Vast, however, as are the difficulties which lie before the Americans, ere their country can again assume a normal and settled condition, it cannot be denied that they are applying themselves to their work with their usual earnestness and energy, and we have no doubt they will accomplish it far more speedily than any other nation could do. Their power of recovery is absolutely wonderful. Scarcely six months have elapsed since the virtual termination of the war by Lee's surrender, and of that time much was unavoidably lost by the transfer of supreme power into fresh hands in consequence of Lincoln's assassination and Mr Johnston's accession to the Presidential throne. Yet in those few months how much has been effected! A large proportion of the troops have been disbanded; hundreds of vessels have been taken out of commission and laid up in ordinary; the work of reconstruction has already made considerable progress in several of the Southern States as far as mere political arrangements go; industry is beginning to raise its head by degrees in some of the districts, and cotton is gradually filtering down into the Gulf ports; while in those provinces which have escaped the ravages of war—that is, nearly the whole North and West—the discharged soldiers are slowly returning to fill up the deficiency in population which had been severely felt, and labour and enterprise are re-assuming all their former energy. In a couple of years, we have little doubt, the *external* appearance of things throughout the Union will be nearly what it was before the war. Below all this there will, of course, be traceable the scars of wounds that can never be altogether healed; and also, we would hope, the net result of lessons which will never be forgotten.

BRITISH ASSOCIATION ON PARLIAMENTARY REFORM.

When wise men meet for the promotion and advancement of philosophy and the exact sciences, it would be well they should abstain from politics. If they cannot, they should at least discuss them like wise men. Few will be disposed to deny that Political Economy and Statistics have a certain claim to rank as branches of scientific inquiry; and we at least are not inclined to regret that the British Association should have assigned a section to these topics. Statistics lie at the root of nearly all our *precise* knowledge of many political and of still more social questions; and, properly handled and collected with due exactness, are of singular value, and are in a great measure distinctive of our days. It was a dictum, we believe of Dr Johnson's, that the great difference between ancient and modern philosophers was that the Ancients *guessed* and the Moderns *counted*. And assuredly on few subjects does the miscellaneous public mind more want education than in the art of dealing with statistics; and if the section of the Association which has undertaken the task would really devote itself and confine itself to disseminating the principles of the scientific management of figures, it might do vast good. In the same way Political Economy must be admitted to have made good its title to be classed among the sciences, and almost perhaps even among the exact sciences; and it may even be conceded that its applications as well as its naked doctrines are fit enough subjects for discussion in an assembly of philosophers. But the essential condition which alone can render such discussions of real value is that they shall steer clear even of those outskirts of pure politics into which passion and interest must always enter so largely; and the Statistical and Economic Section will soon fall both into mischief and discredit, if topics like these introduced by Mr Leone Levi last Friday morning are permitted, and above all if they are treated as they were

Digitized by Google

treated by most of the speakers on that occasion. Parliamentary Reform is a question for Parliament and the Press, and not for a meeting of scientific professors; and it would be almost as legitimate to have made a census of the population of Denmark a pretext for a discussion on the merits of the Danish war, as to make Mr Leone Levi's analysis of our census returns an occasion for giving to the world his ideas as to the desirable basis of a new Reform Bill. We are surprised that the chairman, Lord Stanley, who is usually both sensible and resolute enough, did not stop the matter *in limine*.

Putting aside, however, the inappropriateness of the time and scene, some of Professor Levi's figures were valuable, and most of his views reasonable enough. From the 5,000,000 or thereabouts of adult males who constitute what may be termed the extreme electoral population of England and Wales, Mr Levi would eliminate 50,000 as imbecile, bed-ridden, or lunatics, 250,000 criminals, 300,000 paupers, 40,000 civil servants, 100,000 domestic servants, 100,000 soldiers, 100,000 sailors, thus arriving at the figure of 3,000,000 as the extreme number who could under any circumstances be admitted to the franchise. Professor Fawcett (who, being now in Parliament, will, we trust, learn to reconsider some of his more advanced and cruder views) took exception to some of his brother professor's calculations, as well as to his doctrines, and, in company with Professor Rogers, advocated something very like universal suffrage, or what at least would soon become such. We do not attach much weight to the criticisms on Mr Levi's figures, as the possible errors pointed out were not very material; but it is obvious that the mode of ascertaining the number who cannot read and write by the proportion who make marks instead of signing their names in the Marriage Register, is imperfect and inconclusive, though it is true enough that at present no better criterion is at hand. Nor can we see any adequate reason why civil servants should be debarred from the exercise of the franchise. They have their political predilections, and they have also a fixed position; they are as a rule little liable to solicitation or intimidation from those above them; they have been appointed by each political party in turn, and adhere to their nominators; and among their immediate superiors, who alone could influence their fate, nearly as many belong to one party as to the other. As a fact, we believe, such a thing as undue influence is scarcely ever even attempted towards them; and probably as a rule no class of voters would be more independent or intelligent. But the point which most requires comment is the sort of facile assumption made by both Professor Levi and his critic Professor Fawcett that capacity to read and write is a title to the franchise. Both take this for granted:—the first by excluding all who cannot, and the second by admitting all who can. We demur to the asserted or implied position. We deny that education ought to be the sole test of electoral fitness, and we deny that reading and writing are any adequate criterion of education. Intelligence is not the only qualification we need in an elector, and many who can do neither are more intelligent than many who can do both. The bald notion that all claimants should appear before the Revising Barrister, and if able to write a sentence from dictation should forthwith be placed upon the Register, though indorsed by so grave an authority as John S. Mill, has we think been effectually disposed of by a writer in the August number of *Fraser's Magazine*, who points out three objections which lie on the very surface. In the first place, such a criterion would confer universal suffrage as soon as our system of elementary education (though purely rudimentary and formal) has become as wide-spread as we all expect ere long to see it. In the second place, the criterion would in numberless cases admit to the franchise the conceited, inexperienced, unpropertied, and perhaps silly son, and exclude the sober, sensible, experienced father, who had probably laid by money, but forgotten his learning. And thirdly, such a test would confer the suffrage on the young man fresh from school, but utterly without knowledge of life and character; and would deprive him of it ten years later, when he was incomparably wiser and more competent to judge and vote, when he was married and had given hostages to fortune and had possibly earned a stake in the country,—but when years of hard-handed and unremitting toil had irreparably damaged his orthography.

Mr Levi gives a very interesting comparison, which would be most valuable and curious were it certain and reliable, of the aggregate number of votes which would fall to the share of the upper, middle, and lower classes respectively, if allotted according to mere numbers or according to the amount of taxation paid by each. Thus:—

	Upper.	Middle.	Lower.
Proportion per cent. of votes by *population*...	4 ...	32 ...	64
— — — *taxation*.....	83 ...	13 ...	4

But before we can admit the accuracy of these figures (which we quote from *The Times*) we should require to know the data on which they were founded, and the mode in which they were worked out. It is manifest that the terms "upper, "middle, and lower," are vague in the extreme, and we can scarcely conceive it possible that only four per cent. of the taxes is paid by the lower classes, however these may be defined. A very elaborate estimate put forth in an article on British taxation in the *Edinburgh Review* for January, 1860, gave a very different result. Possibly, however, Mr Levi meant only direct taxation;—though, if he did, the comparison would be simply worthless.

The Reviewer's calculation, which we have little doubt was in the main correct, was that the working classes paid 24,000,000*l* out of 75,000,000*l*, or 32 per cent. of the aggregate taxation of the country. "The working classes (he sums "up) 22,500,000 in number, with an aggregate income of "225,000,000*l*, pay 24,500,000*l* of taxes,—that is 22s a "head, or not quite 11 per cent. of their incomes. The "upper and middle classes, 7,500,000 in number, with an "aggregate income of 320,000,000*l*, pay 51,500,000*l*,—that "is 6*l* 17s 4d per head, or 16 per cent. of their incomes." The Reviewer too estimates the working classes at 75 per cent. of the whole population,—Mr Levi, at only 64 per cent.

The following table shows the comparison between the number of houses rented at above and below 10*l*, and gives an idea, therefore, how a household suffrage would operate:—

Rent.	Houses.
From £3 to £5	659,724
6 — 10	1,277,956
10 — 15	822,149
15 — 20	459,693
Above 20	519,981
	3,739,503

THE RAVAGES OF THE SHENANDOAH.

WHATEVER we may think of the so-called "responsibility" of Great Britain for the fatal results of the Alabama's and her consorts' escape from English ports, during the war, there can be no doubt at all that the further ravages committed by the last of these formerly Confederate cruisers, since her commander knew that the war had come to an end, and that no "belligerent" Government any longer existed in the South, are in contempt of all principles of international law. Every mail from America brings us news that the Shenandoah, under the command of Captain Waddell—the same man who treated our Australian authorities so cavalierly some eight or nine months ago—is still capturing and burning all the American whalers he can find in and near Behring's Straits, and crowding together the crews in little vessels (quite unequal to hold them) to land them at the nearest Pacific port. Captain Waddell's pretended justification is, that having received no account of the conclusion of the war except through Northern papers, he does not believe the asserted extinction of the Confederate Government, and is bound to go on acting upon his instructions as if it still existed. This plea, however, will certainly not avail him in the least, if he should be once captured either by Northern ships of war or those of any other Power, and should be brought to trial on a charge of piracy, as waging private war under no existing flag against the ships of regular Powers. It is clear that there would not even be the pretence for him which there might have been some years ago for a ship professing to carry the standard of the Bourbon Government of Naples after Francis II.'s expulsion from Gaeta. For such a ship it might have been said that Francis II. had long been both *de jure* and *de facto* King of Naples, and that, though he had then ceased to be King *de facto*, he had not ceased to be King *de jure*, and that, his cause not being yet hopeless, all the Royalist party, properly so called, might lawfully receive commissions from him and do their best by fighting to annoy his enemies and facilitate his return. That no doubt might have been said, and its plausibility would have depended very much on the *bona fide* character of the war so carried on, and the strength and hopes of the party carrying it on. But nothing of the kind can possibly be said by the commander of the Shenandoah on his

Digitized by Google

own behalf. The Government of Richmond never, in any international sense, existed *de jure* at all. No Power either in Europe or in America had ever recognised it, although its *de facto* existence as a belligerent Power had. for the purposes of the international laws of war, been necessarily admitted. Whenever, therefore, it ceased to exist as a fact, it ceased to exist altogether, and the only question that could even be put to a jury for Captain Waddell would be, whether he did *really* believe the Confederate Government to be still in existence as he asserts or not. It matters not in the least what hypothesis he chooses to make on the subject as an apology for further outrages. The only question admitting of discussion would be whether any circumstances could be shown at all tending to prove that his asserted belief in its continued existence was genuine, and not merely a pretence. Now, there can be little question, we suppose, that any man reading the details of the Confederate collapse, even in Northern papers, must have been satisfied as long ago as April, that there no longer existed any sort of Power in the South to which he could render an account of his doings. Yet as late as the beginning of August Captain Waddell was still plundering and burning fleets of whalers in the vicinity of Behring's Straits, so causing great private misery to the people of New Bedford, Massachusetts, to which they belonged, but no more affecting the power of the North, or stirring anything there except hostile feeling, than the King of Abyssinia affected the power of England by keeping Consul Cameron in chains. Nothing can be really more wicked than the continuation of all the miseries and horrors of war for the mere gratification of private malignity, and without a scintilla of hope of affecting anything for any public cause. In the present case Captain Waddell probably carries on his malignant and lawless operations after he has ceased to be anything but a pirate, because he knows that he is injuring, and injuring very deeply, many poor people in that New England State which the South had most reason to fear and hate, Massachusetts. These whaling ships which the Shenandoah is destroying are owned not by large capitalists, but "by a number of small shareholders who have invested "their savings in the purchase of an eighth, a sixteenth, or a "thirty-second part of a ship, and these are often held by "widows and orphans who depend solely upon the returns for "support." The crews, too, are paid by a regular percentage on the profits of the voyage, not by monthly wages. Plundering and burning ships of this kind, belonging to the poorest class of the community, without a pretence of war, is the most malignant of private crimes. The last news we had was that twelve or fourteen out of eighty whalers had been captured by this piratical cruiser, and all their crews (numbering 252 persons) crowded into a little bark intended to carry a crew of only 30. What species of rapine can be more cruel than this?

It is already certain that the Shenandoah cannot seek shelter in any British port, for Lord Russell's circular had been telegrphed to Vancouver's Island, and was known in all those seas. But something more is needed in the circumstances of the case than the refusal of shelter to a ship which is now acting the part of a common pirate—unless indeed it can be shown that Captain Waddell still believes in the existence of the Government of Mr Davis, in which case he should be permitted the opportunity of vindicating his character by proving that belief on his trial—and which obtained its Confederate "commission," we will not say through our neglect, but either through the legislative imperfections of the British Foreign Enlistment Act, or through the administrative imperfections of the system by which it is carried into effect. Every Power is interested in the suppression of private war. We are more especially interested in the suppression of this private war, of the possibility of which our own acts of omission may be said to have been necessary conditions. The recommendation of the *Times* that instructions should be given to our own ships of war to chase and capture this ship is an obviously just one. There is no kind of reason which cannot be urged in its favour. Even if we are quite unjustly charged with responsibility for the ravages of this ship, we were still the unfortunate means of giving it its equipment and powers of mischief. The more we wish to prove our former earnestness in preventing the escape of such vessels by every legal means, the more incumbent is it upon us now to use the obvious legal means of putting an end to its depredations. Our own countrymen, too, are said—we trust and believe falsely—to be concerned in its outrages. We are told that among the crew of the Shenandoah is an Englishman who seems to be "prospecting for five vessels to be put on a line between "Australia and New Zealand, and who *probably would purchase* "some of the captures of the pirate." This rumour of the existence of a mythical Englishman, with "probable" mercenary motives, among the crew, is no doubt due only to the sore feelings which the legal controversy with England concerning the Alabama has caused; but still it concerns us only the more to dissipate all these rumours by capturing the Shenandoah if we can, and so finally terminating the causes of the soreness between us and the North. Only put the case that during a rebellion in Ireland a ship of war commissioned by the rebel Government had slipped out from Boston or New York to harass our commerce, and that after the complete extinction of the rebellion, this ship should go on capturing our whalers in Baffin's Bay and subjecting the crews to the greatest hardships and miseries. Should we not cry out that the Government at Washington was guilty of a shameful dereliction of duty if it did not give orders to its own cruisers to capture this flagless vessel wherever and however they could meet it? If we think that we have been without fault up to the present time, so much the more incumbent on us is it to keep ourselves blameless, by doing all in our power to terminate this defiance of all law. If we think that we have been even in a slight degree blameable for the escape of the Shenandoah or any of her comrades, we owe this duty as the most obvious reparation to the injured feelings of a friendly Power.

IRELAND IN TRANSITION.

FREE TRADE.

THE famine of 1846 is commonly taken as the turning point in the industrial history of Ireland. In fact it has proved so, because the famine precipitated free trade; but it is not less true that free trade would of itself have entailed, though without the frightful aggravations incident to the sudden failure of a people's food, all the consequences of a permanent kind which we trace to that calamity. All the leading incidents of the industrial economy of Ireland as it stood in 1846 were identified with the maintenance of its tillage system; and of that system free trade sounded the inevitable doom.

If the ECONOMIST still numbers readers who cherish the traditions of protection, they will, we doubt not, snatch at this statement as a concession fraught with discredit to the doctrine of commercial freedom. Here, it will be urged, is the admission of free-traders that free trade has in one instance at least involved, if not accomplished, the destruction of a nation's industry. At whatever cost of odium to political economy, we are bound to accept the inference as substantially fair. It is, we hold, indubitably true that the cultivation of cereals in Ireland on the scale on which it existed anterior to 1846 depended upon Ireland's being secured in the monopoly of the English markets; and this condition free trade forbade. Whether England was on this account bound to exclude her own people from procuring their food where they could get it cheapest—bound to set limits to her own development in order to find a market for products unsuitable to the Irish soil—is the question which free-traders have to meet. For ourselves we meet it by denying the obligation. Further, we contend that the sacrifice it involved would have been, not less injurious to the country in whose behalf it was made, than to that which was called to undergo it.

We regard it as a truth placed now beyond the reach of controversy that the population of Ireland in 1846 was excessive to a most injurious degree, excessive—looking to the actually available resources of the country to maintain its people—beyond any example afforded by history. Some years ago a comparison was instituted in this journal which set the real position of Ireland in regard to population in a clear light. The density of population in Ireland was compared with that of certain agricultural districts in England which resemble Ireland very closely in their industrial capabilities, namely, with Cumberland, Westmoreland, and Wales. It is probable that, taking the whole of Ireland, the proportion of sterile surface is less than in those British districts; but, on the other hand, the latter comprise relatively to their extent a larger amount of manufacturing industry,—Cumberland having extensive coal mines,

Digitized by Google

while in Wales a large population is absorbed in the iron works of Monmouthshire, the coal ports of Swansea and Cardiff, and the slate quarries of the northern counties. The result of the comparison showed that Ireland, judged by the standard of those parts of Great Britain which approach it most nearly in character, was, in 1862, still greatly over-populated; the number of acres per head of the population being in Ireland but 3·6, as against 4·5 in the British districts. That was the state of the Irish population in 1862 after fourteen years of unparalleled emigration had reduced its numbers to two-thirds of their former amount. It may be conceived, then, how enormously in excess of its due relation to the means of support the Irish population must have been, as it stood in 1847, ere the drain of emigration had yet begun. If confirmation of this reasoning were wanting it was but too abundantly supplied in the utter wretchedness and hopelessness of those Irish multitudes. We need not stop here to reproduce the familiar picture of the domestic life of the Irish peasant when overtaken by the famine. Is it not written in the book of the Devon Commission?

Well, what was the cure for this state of things? How was this excess of people to be remedied? Either the numbers would need to be reduced, or an increased demand must be found for their services. Where was this demand to come from? Our protectionist friend will probably reply, from the development of Irish resources,—a phrase which, in the case of a country almost purely agricultural, must be understood in effect to mean the better cultivation of the Irish soil; and this brings us to the inevitable dilemma in the Irish case. The resources of a country may be developed in a right or in a wrong direction—in a direction indicated by nature, or in one forced upon it by art: now already the industrial development of Ireland had proceeded far in this latter road. Was her industry to be urged still further in this direction? Was the principle of protection to be again appealed to, and England to be invited to close her markets still more completely against foreign supplies? Either this, or it became necessary to start the industrial development of Ireland on a new, that is to say, on its natural and legitimate track—in a word, to adopt free trade.

We think that a candid consideration of these circumstances cannot but lead to the conclusion that, practically, there was no other alternative for Ireland in 1860 than that which was actually adopted. Having been started on a wrong course, she had reached the goal—the inevitable *cul-de-sac* of protection: escape could only be found in retreat. Free trade was thus scarcely a choice. But free trade once adopted, all the consequences which have since been realised followed almost with the certainty of the results of a physical law.

Let us glance at a few of those consequences. And first, and most important of all, free trade imperatively prescribed a large reduction in the numbers of the Irish people; for it struck at the root of the large cereal cultivation by which those numbers were sustained. An agriculture of tillage differs from one of pasture amongst other things in this, that the capital which supports it is, for the most part, circulating; whereas in the case of pasture it is chiefly fixed. The capital of a tillage system exists mainly in the form of wages-fund, which is annually consumed and re-produced; that of a pasture system is for the most part fixed in the ground; the annual revenue representing, not, as in the former case, the excess of annual returns over annual expenditure, but the annual yield from an outlay effected once for all. It follows that the new direction given to agriculture in Ireland of necessity involved a decline in the demand for labour. This would not indeed be felt at once, since the process of conversion would, during its continuance, necessitate the maintenance of the circulating capital unimpaired; but the conversion once effected—the land once brought into the condition in which it was destined permanently to remain—both the need for labourers and the means of subsisting them would together suffer decline. Free trade in Ireland, thus, of necessity—throwing the country back, as it did, on its natural capabilities, which were favourable to pasture—involved as its consequence a diminution in the number of its people. And other causes not less founded than free trade in the irresistible tendencies of modern civilisation were at this time acting powerfully in the same direction.

Those who study Irish phenomena in the light exclusively of facts peculiar to Ireland will form but an inadequate notion of the scope of the forces which are now moulding that country. The Irish exodus is but an exaggerated representation of a movement which is at the present moment powerfully affecting the whole of Europe. As has been shown by M. Jules Duval, in his History of Emigration, there is not a country in Europe which has not within the last forty years felt the force of the emigrating impulse. Ireland is the most conspicuous example, but Germany and Great Britain present scarcely less striking results; and, though in a less degree, Spain, Belgium, and even France lend their annual contributions to swell the tide.

We believe the causes of this widespread movement are now pretty well understood; they are indeed, when once attention is drawn to the subject, sufficiently evident. As the cause of popular education advanced, and the people of different countries came to be acquainted with each other's condition, it was natural that the inhabitants of the less favoured lands should desire to join those whose lot was happier; and it was equally natural that, as the progress of the art of navigation and extended intercourse with foreign countries brought the means, they should seek to gratify this desire by emigration. These influences have been in operation over the whole of civilised Europe; but they have been especially active in Ireland. The progress of popular education in Ireland under the national system is in itself a notable phenomenon, still more notable in contrast with the long stagnation which preceded it; and not less remarkable has been the extraordinary development of facilities of international intercourse opened to the Irish people through the growth of British trade. It is impossible to contemplate these facts, in connection with the overcrowded numbers and wretched condition of the people of Ireland, without perceiving that, even though the famine had never come, though free trade had been still the dream of political economists, the industrial system of Ireland was already doomed, and the dispersion of the Irish population an inevitable event. The famine suddenly broke the dam, which already imperfectly restrained the long-gathering waters: free trade lent a new force to the growing pressure; and the tide swept on with a volume and impetuosity which, after seventeen years of continuous flow, scarcely yet shows signs of diminution or abatement.

SAVINGS' BANKS RETURN.

THE following return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Sept. 9, 1865:—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS:—	£ s d	£ s d
In money and interest credited	41,408 14 1	91,248 18 3
To transfer certificates from Post Office Savings' Banks to Savings' Banks	239 4 10	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	6,455 6 5
Total	41,647 8 11	97,704 4 8
POST OFFICE SAVINGS' BANKS:—		
In money and interest credited	90,912 13 1	11,785 1 11
To transfer certificates from Savings' Banks to Post Office Savings' Banks	6,455 6 5	...
By transfer certificates from Post Office Savings' Bank to Savings' Banks	...	239 4 10
Gross Total	97,367 19 6	12,024 6 9

	£ s d
Total amounts on Sept. 9, 1865, at the credit of—	
The Fund for the Banks for Savings	38,341,976 15 0
The Post Office Savings' Banks fund	6,145,881 14 2
Total	44,487,858 9 2
Ditto—by last monthly account	44,458,571 2 2

Agriculture.

MODERN FEUDALISM.

LIGHT BREAKING IN.

THE spirit of feudalism which in this country pervades all the relations of landlord and tenant finds its greatest development in regard to game. The game are, as Blackstone long ago said, "a bastard slip" of that most oppressive code the forest laws. Since Blackstone's day the system of game preservation has become trebly onerous to the occupiers of farming land, while in the recent Act, introduced by Sir Baldwin Leighton, for converting the county police constables into game watchers, the last screw has been given to the previously stringent provisions of the game laws. There is now a growing public opinion adverse to the

Digitized by Google

existing system of game-preserving, and to the laws upheld for its maintenance, which even Landlordism will not long be able to resist. Of this the signs are many and marked. And although the spirit of feudalism is manifest in every part of our law of real property, especially in that part which applies to landlords and tenants, the great practical manifestation of that spirit is to be found in the game system. It is the game to which landowners seem to cling with unreasoning tenacity. It is the reservation of game rights to the landlord,—by contract in England and by force of law in the absence of special contract in Scotland,—which more than anything else prevents the adoption of sound and rational leases, and the application of true commercial principles to contracts for the occupation of farms. And it is for the sake of game that our landowners lose many opportunities for improvement of their property and their incomes. Why is this? The apologists of game-preserving say it is for the sake of sport, that British landowners are keen sportsmen, and cannot be blamed for availing themselves of the opportunity of securing their sports which the ownership of land affords. But this is not the truth, or, at all events, the whole truth; and in the majority of cases it is the reverse of the truth. For it is the fact, that though game-preserving has largely increased during the last forty or fifty years, sport in connection with game has declined. Indeed, sport is inconsistent with modern game-preserving. The essence of sport consists in a certain degree of uncertainty in finding the game, in watching and controlling the dogs, who are the sportsman's assistants, and in the robust exercise which is one of the chief rewards of the sportsman. But none of these things are incident to the *battue* and the game preserve. The preserve must not be disturbed more than a few days in the season, or the pheasants and perchance the hares would wander into other preserves. Dogs are simply in the way of battue shooting, where a little army of beaters drive the game across the range of the effeminate shooters' guns; while the exercise consists only in standing at certain points to which the game is driven. Sometimes, in damp weather a board is provided on which the *robust* battue shooter stands, lest his feet should get damp!! In fact, game-preserving is more a matter of ostentation than sport. If the preservation of a "large head of game" could be actually interdicted, the owners of game preserves would not loose more than two or three days' enjoyment—if it be enjoyment—in a year, though the abrogation of game preserves would go far to restore the *sport* of shooting as such to those who like to follow that pastime in a manly and rational way.

Now the influence of public opinion seems to be acting upon the landowners. We have had occasion to notice the action of the farmers, especially of the Scotch farmers, during the late elections, in reference to game. There can be no doubt that the evil of game-preserving has attained such a height, both in England and in Scotland, that it must be abated. It is utterly inconsistent not merely with the advancement of agriculture, but with the maintenance of husbandry at its actual standard, and both English and Scotch landowners will, in deference to public opinion or from a more rational view of their own interests, ere long find it necessary to abandon the German system of game preservation.

Mr J. Badenach Nicolson, of Glenbervie House, Kincardineshire, a Scotch landed proprietor, has in a seignorial sort of way given limited permission to his tenants to shoot hares and rabbits. The notice is so curious, and breathes so much of the feudal spirit in its tone and provisions, that (concession though it be) it illustrates so forcibly our remarks, that we give it entire:—

To the Tenants on Glenbervie, Mondynes, &c.

Most, if not all, of your leases bind you to protect the *game* upon your farms; but there is no express stipulation in any of your leases prohibiting the killing of rabbits. It is, however, the fact that most, if not all of you have abstained from killing rabbits as fully as if you had been expressly prohibited by your leases from doing so.

It is not Mrs Nicolson's intention to abandon the rights which the common law and her covenants with you give her over the wild animals to be found on the land in your occupation. But it is her wish to exercise these rights in the way least burdensome to you. With that view she proposes as follows:—

1. That each tenant shall be (himself) entitled to shoot rabbits at any time of the year, and on any part of his farm, arable or pasture.

2. That each tenant shall be entitled (himself) to shoot hares on the *arable* land of his farm, between 12th August and 1st March.

3. That wherever a tenant does not himself shoot, he shall be entitled to name one person to do so in his stead, such person being his own near relative, or in regular employment on the farm.

4. That Mrs Nicolson will, by her gamekeeper and otherwise, aid her tenants in keeping down the hares and rabbits on their farms within such bounds as to prevent any one having just ground of complaint.

5. That this arrangement shall continue in force from 12th August, 1865, to 12th August, 1866.

While making this proposal, Mrs Nicolson will not insult you by saying that she hopes you will yourselves abstain from trespassing on your neighbour's farms, or shooting flying game, or hares out of season, or off the arable ground of your respective farms; but she relies on your taking care to prevent other persons from doing so.

A specific period is mentioned for the endurance of this proposed arrangement, not from any intention that some such arrangement shall not be permanent, but only that, after a year's experience, both parties may have the opportunity of considering whether that now proposed has worked satisfactorily.

Written permissions to shoot hares, as required by 11 and 12 Vic., cap. 30, sec. 1, will be ready for delivery here on Thursday next; when it is requested that each tenant will be prepared to state the name of the person (himself or not) in whose favour he desires that the permission for his farm shall be made out.

Mr Hercules Scott, of Brotherton, in the same county, moved by the example of Mr Nicolson, has issued a similar circular to "the Brotherton tenants." So far, good. Again, we learn from the *Haddington Courier* that "the Earl of Lauderdale has given permission to all his tenantry, by *themselves* or families, to kill hares on their farms by dogs, and an unlimited right to take rabbits." Good, again, so far. But what a picture of the condition—moral and economical—of the tenant-farmer occupying a farm on which the game rights are reserved to the landlord, do these gracious concessions present. Imagine the feelings of a man, who has given the full value of the farm by way of rent, and who has invested his capital in its cultivation, on being thus condescendingly freed in part from a grievous wrong! Is it surprising that the most enterprising minds seek any field for their enterprise save farming?

The Earl of Southesk has gone a step or two in advance of the proprietors we have mentioned, as according to the *Scotsman* he "has entered into an agreement with this tenants on the Kinnaird estate, under which they have formed a game association, and become holders of all the shootings on the estate, with the exception of a portion reserved by the Earl in name of sport. For this privilege the farmers pay 200*l* a year in the name of rent, 80*l* of which is to be paid to watchers; and, on the other hand, are entitled to keep down the game by themselves shooting, or by inviting their guests to join in the sport, or by employing watchers." This seems to be a reasonable and business-like arrangement, and made in the right way by contract between the landlord and his tenants.

We see much of hope in these recent arrangements about game, for if the fashion sets in the right direction, the fashion of German battue shooting may be superseded by the old English gentleman liberality in connection with game.

Literature.

EAST AND WEST: a Diplomatic History of the Annexation of the Ionian Islands to the Kingdom of Greece. By STEFANOS XENOS. Trubner and Co. 1865.

THE bulk of this volume consists of the correspondence relative to the cession of the Ionian Islands to Greece between the Greek Government and its representative in London, Mr Charilaous Tricoupi; together with the text of all or nearly all of the treaties or conventions having any bearing on Greek affairs from the close of the last century to the present day. There is also added the late Sultan's celebrated *Hatti Houmayoun* of the 18th February, 1856, wherein he granted certain rights and privileges to his Christian subjects. Prefaced to these documents is an introduction divided into three parts, the first giving a sketch of events in Greece from the war of independence to the offer of the throne to Prince Alfred; the second treating of the cession of the Islands; and the third an account of the present condition and future prospects of the Turkish Empire. Mr Xenos is a most earnest Panhellenist, and pleads the cause of his country—or rather of his race—with great ability; and on the whole we are inclined to think that he is in the right, and that the Greek populations have good reason to complain of the systematic "snubbing" they have been subjected to for the benefit of Turkey—that "sick man" who will *not* get well in spite of all the endeavours of his friends and physicians. At the same time Mr Xenos' statements have too *ex parte* a tone to allow us to accept them as altogether authoritative. His exoneration of his countrymen from all the delinquencies which have been laid to their charge is *too* complete for one's natural scepticism; and one cannot help feeling that, though the counsel for the other side may not hold so good a brief, they must still have something to say for themselves.

Mr Xenos is, in the first place, anxious that it should be recognised in England that the friendly feeling which prompted the offer of the throne to Prince Alfred was neither a new sentiment nor a speculation, but a sincere feeling springing naturally from a series of facts, and from mutual material interests. It is a great mistake, he insists, to suppose that Greece is now or has been since the war of independence subject to the influence of Russia. That up to that time she was, is no doubt true, and no subject for wonder, Russia being the only Power that knew or cared to know anything of her sufferings, and was willing to make some effort to stand between her and Turkish oppression. But the Greeks, thankful to Russia for the promises of help and sympathy of which she was lavish enough, and for the hospitality with which she opened to them the doors of her civil and military service, and drawn to her by a community of religion, did not for a long time perceive that the aim of the Czar was simply to substitute the tyranny of the Muscovite for that of the Mussulman. The Greeks, at least the more enlightened portion of them, though glad enough to have Russia for an ally, had no wish for absorption, and as soon as the real state of the case became apparent through the behaviour of the Emperor Alexander at the commencement of the revolution of 1821, a strong revulsion of feeling took place.

Digitized by Google

Religious fanaticism, and the effect of old traditions, may still have made the mass of the people regard Russia as their natural ally; but those with any pretensions to statesmanship saw clearly that if their country was ever to become what they sought to make her, she must in the main rely on herself, and would find her true friends in the Western Powers. Mr Xenos does not attempt to deny that during the Crimean war the sympathies of Greece were with Russia, and against the allies, but the cause, he maintains, to have been not affection for Russia, but hatred to Turkey. It was impossible for the Greeks to wish well to efforts the object of which was to sustain their old oppressor in his dominion. But though on this occasion the Greeks sided with Russia, yet among the merchants, landowners, and shipowners of the provinces, sympathy with the Western Powers, founded on an appreciation of the great commercial and maritime interests which bound Greece to them, and on an admiration for their institutions, grew stronger and stronger. It was partly to his opposition to this tendency that King Otho owed his unpopularity. His object was to lean upon Austria, and Austria, according to Mr Xenos, is detested in Greece even more if possible than Turkey. It was this attachment to England that led to the offer of the Crown to Prince Alfred,—an attachment sincere and disinterested, since the English Government, so far from attempting to win the goodwill of the Greeks, had done all they could to alienate them.

Mr Xenos complains of the conduct of Sir Edmund Lyons, as Envoy at Athens, and also of the harsh and overbearing spirit displayed in the matter of Don Pacifico, but his great grievance against England is clearly the conditions attached to the cession of the Ionian Islands. He charges England with having ungenerously profited by her position in insisting on the neutrality of the Islands, thereby wantonly wounding the pride and dignity both of Greeks and Ionians, and with having committed "an act of Vandal barbarism" in destroying the fortresses. In exacting these conditions, England, he says, was listening to the suggestions and following the counsels of the two great enemies of the Christian races of the East—Austria and Turkey. The treaty of 1815, which entrusted England with the Protectorate of the Islands, expressly recognised, according to him, these fortifications as the property of the Ionian State, which had in the interval paid nearly 1,500,000*l* for their maintenance. We must join issue with him on this point. That Greece should feel the terms on which the cession was made irritating and humilitating was natural enough, but we cannot see that the English Government had any other course to pursue. Mr Xenos seems to us to forget that in making the cession, England was under no obligations to Greece, and *was* under the very strongest to the other Powers parties to the treaty of 1815. Lord Russell put this conclusively in a conversation with Mr C. Tricoupi, and in two despatches, one to Lord Napier, of November 11, 1863, and another to Mr Scarlett, of January 28, 1864, all of which are given by Mr Xenos in an appendix. As regards Greece, the cession was an act of pure generosity; England was entitled to impose any conditions she thought proper, and if Greece did not think the gift on these terms worth having she might decline having it at all. But England could only abandon the Protectorate which she had assumed by agreement with the other great Powers by their consent. If Austria, as was the case, absolutely refused to consent to the cession, except on certain conditions, England had no choice but to insist on these conditions or to break her treaty engagements. So in the matter of the life pensions to the *employes* of the British Government in the Islands, which Lord Russell insisted on Greece undertaking to pay, and which amount to 10,676*l* per annum. It no doubt seems hard that a very poor country like Greece should be called on to pay this sum, equivalent, Mr Xenos says, to the salaries of all the Greek Senate. Nevertheless, as "vested interests" have a kind of sacredness in English eyes, if Greece was not to pay the money, it must have come from the pockets of the British tax-payer, and we cannot say that we should have envied the Minister who had attempted to pass such an item in the estimates through the House of Commons. As we said before, Mr Xenos forgets that the interests of Greece were not the only points the English Government had to consider.

The last part of Mr Xenos' introduction is devoted to an exposure of the true condition—political and financial—of the Turkish Empire. We are unable to vouch for the accuracy of his statements, and he writes so manifestly under the influence of a strong partizan spirit, that on *a priori* grounds we should be inclined to think that they must be taken with allowances; still, it is impossible to be blind to the fact that the number of thinking men who, with Lord Stanley and Professor Goldwin Smith, consider the Ottoman Empire affected with incurable dry rot, and the attempts of diplomacy to bolster it up a monstrous mistake, is decidedly on the increase. The total population of Turkey in Europe Mr Xenos estimates at no more than 15,000,000. Of these only 2,000,000 are Turks. The remaining 13,000,000 Macedonians, Albanians, Thessalians, Bosnians, Roumeliotes, &c., are Christian, and Greek if not in race at least in language, sentiment, and religion. It is these 13,000,000 of Christians who conduct whatever commercial and industrial operations are carried on in Turkey. They pay the custom house duties, they till the land and tend the cattle, they man the marine; and they are still held in a state of degrading subjection by a semi-barbaric horde, who, in spite of four centuries of possession, can only be said to have "bivouacked" in Europe. Mr Xenos enters into long statistics to show that though the imports and exports of Turkey may have increased of late years, yet the trade is forced and unhealthy, and gives no promise of solid commercial prosperity. The statements of Turkish financiers as to the revenue are entirely valueless, but he thinks the true estimate would fix the income at 12,000,000*l*; the expenditure, including the interest of the debt, at 17,000,000*l*. Before the Crimean war Turkey had no debt; ten years only have passed since, and now her obligations, public and private, home and foreign, amount to 70,000,000*l*. Such a debt with such a revenue would render progress impossible. By the *Hatti Houmayoun* or "illustrious writing" of February, 1856, the Sultan solemnly promised, and his promise was guaranteed by the Great Powers, that henceforth Christian and Turk should be equal in the eye of the law, that is that the Christian should be as eligible as the Turk to the office of cabinet minister, and to every rank in the civil, military, and naval service. This promise has been, as every one acquainted with Turkish character knew it would be, unless the Allies left an army of 100,000 men to see it carried out, simply null and void. Sooner or later—it may be in six months, it may be in six years, it may be even longer—the crash must come, and the Turkish Empire, bankrupt in credit and resources, with more than six-sevenths of its population in open revolt, with an army mutinous for arrears of pay, and a civil administration paralysed for want of funds, must go the way that all shams are in the end destined to traverse. Is England, asks Mr Xenos, wise in upholding a state of things which can have this end and no other? He quotes the following words from Lord Stanley's speech at Lynn last October: "I do not understand the determination of our older statesmen to stand by the Turkish rule whether right or wrong. I think we are making ourselves enemies of races which will very soon become in Eastern countries dominant races; and I think we are keeping back countries, by whose improvement we, as the great traders of the world, shall be great gainers; and that we are doing this for no earthly advantage present or prospective."

There is one way, and one only, according to Mr Xenos, by which the impending catastrophe may be averted. The great Powers have interfered once to save Turkey from succumbing to foreign aggression. Let them now interfere forcibly a second time to save her from going to pieces by internal misrule. If, by virtue of a treaty with the Sultan they established a combined fleet and army at Constantinople for six years, if they disbanded the present Turkish army, and reorganised a force of 25,000 men composed equally of Turks and Christians, if they equipped five Turkish war vessels equally with Turks and Christians, and themselves undertook to repress any rebellious outburst, 4,000,000*l* of the present outlay would at once be saved, and the Sultan's Christian subjects would obtain a reliable protection. If the money lent by Europe were applied under the control of European agents to the construction of roads, and Christians were allowed to purchase the land that lies untilled (which now they are not), the improved export trade would yield an additional surplus of 4,000,000*l*. If natives of every religious denomination were made equal by law, there would be hundreds of the Sultan's subjects who now waste their lives at Athens scrambling for a few drachmæ, who would return to their native towns and find a legitimate field of action. If such means were taken the fate of Turkey might be altered, but that such means will *not* be taken, Mr Xenos considers certain. "The abyss that must engulf Turkey is," he says, "preparing to yawn, and neither the ignorant diplomatist who looks on her as a political necessity, nor the selfish one who looks on her as political capital, can much longer avert her fate."

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Monsteur* has published the following return of the Bank of France, made up to the 14th inst. The return for the previous week is added:—

DEBTOR	Sept. 14, 1865. f c		Sept. 7, 1865. f c
Capital of the bank	182,500,000 0	.....	182,500,000 0
Profits, in addition to capital	7,044,776 2	.....	7,044,776 2
Reserve of the bank and branches	22,105,750 14	.....	22,105,750 14
New reserve	4,000,000 0	.....	4,000,000 0
Notes in circulation and at the branches	850,146,625 0	.....	849,749,975 0
Drafts drawn by the bank on the branches of the bank payable in Paris or in the provinces	7,795,102 69	.....	8,955,167 22
Treasury account	164,617,774 96	.....	155,028,740 55
Accounts current at Paris	173,067,871 24	.....	189,232,370 48
Ditto in the provinces	27,920,108 0	.....	28,506,456 0
Dividends payable	1,548,787 75	.....	1,624,321 75
Various discounts	5,267,615 67	.....	4,867,726 36
Re-discounts	1,427,622 17	.....	1,427,623 17

The variations in the principal items of the Bank return are not important; an increase of 5,488,000f in the discounts and of 397,000f in the circulation of notes; and a decline of 4,490,000f in the coin and bullion. In the deposits there is a falling off of a certain importance—16,751,000f.

Operations on the Bourse have been animated during the last few days, especially in Threes, from which the quarterly coupon is on the eve of being detached. Both the present and the immediate future are regarded with confidence, and some persons affirm that we are on the eve of a revival of that eager speculation which formerly characterised the Bourse of Paris, but affirmations of that kind respecting such a very treacherous arena require to be received with caution. Annexed are the week's quotations:—

	Sept. 7. f	c		Sept. 14. f	c

South Austrian Lombard	468	75	.....	470	0
Saragossa	327	50	.....	321	25
North of Spain	220	0	.....	220	0

The Comptoir d'Escompte is, I am informed, on the eve of concluding a contract with the Viceroy of Egypt to raise, on commission, a loan of 75,000,000f (3,000,000*l*) for his own private purposes, on security of his personal estates. Some eminent French and German houses are associated with the Comptoir in the affair, but I understand no English capitalists take part in it. The loan is to be offered to public subscription. A considerable portion of it is, it is understood, to be employed in paying a debt due from the Viceroy to a merchant at Marseilles.

In the expectation that the proposed conversion of the Turkish funds will not have all the success its promoters and the Turkish Government could wish, there exists, I hear, some intention of effecting that operation on a new basis and under entirely different patronage. The new scheme, it is thought, will be received with pleasure by all fundholders, and especially by those in France.

The conversion of the first Mexican loan (that of Glyn and Co. and the Credit Mobilier), which has long been expected, will probably be carried into effect towards the beginning of next month, provided the quotation of the loan on the Bourse and the news from Mexico be satisfactory; if not, the operation will be postponed to November. The conversion will consist in assimilating the old loan to the new one,—that is in attaching to it a lottery, making the bonds of 340f each, but to be paid off at 500f, and giving them a premium of 340f, payable at the end of 50 years, secured by an investment at compound interest. The holders of the old stock will probably be offered only two bonds of the new, bearing 60f interest, for bonds of the old bearing 75f 60c (3*l*) interest; but the difference will, it is thought, be amply compensated by the advantages accorded. These figures, however, must not be taken as definitive, and in any case the conversion will not be compulsory.

An advertisement from the Comptoir d'Escompte makes known that the provisional scrip of the Mexican (1865) loan, on which all calls are paid up, will be exchanged for definitive bonds from the 22nd.

Some time back you were informed that the Emperor in his pamphlet about Algeria, which was printed for private circulation, proposed the abolition of customs in that colony. The *Courrier* of Oran now announces that the measure is about to be carried into effect. This fact gives the opportunity of repeating that it is greatly to be desired that the Emperor would turn his attention to the customs tariff of France. He would then see that the revenue it produces is very small, much less than is thought by the public, who never take the trouble to look into figures. In the first seven months of the present year, the latest date for which there is any return, the customs yielded only 59,291,000f, which was 2,371,640*l*; and though on the one hand there was some outstanding sugar duties to come in, there is on the other hand a large sum to be deducted for expenses of collection. The net sum which the Treasury will get will therefore be very little—so little as really and truly not to be worth having. If this fact were once fairly presented to the Emperor, there is reason to hope that he would forthwith sweep away customs, as there is no one who knows better than he does that they check trade, navigation, and agriculture, and are, consequently, burdensome and unjust to the great body of the people.

Certain Bourse speculators in this city, when it suits their purpose to produce a fall in particular securities, hesitate not to issue pamphlets affirming, with a great show of figures, that they are terribly overrated, if not altogether worthless. One of these gentry has just thought fit to assail the South of Austria and Lombard Railways in a *brochure*, of which he has distributed gratuitously a considerable number of copies. He maintains that the cost of these railways will be infinitely greater than represented by the directors in their annual reports; that the gross revenue will be much less, the working expenses more; and that, when all the lines shall be completed, the result will be that "the Company will not be able to pay the interest on its bonds." On people in Paris who know the real situation of the Company, this publication has produced no effect; but it appears to have caused some little uneasiness among timid holders of bonds and shares residing in the country. Accordingly, the Company has published a refutation of it, and, as the refutation is from the pen of M. Eugene Forcade, of the *Semaine Financiere*, it is, of course, masterly and complete. M. Forcade shows that the figures presented by the pamphleteer are all erroneous, not to say wilfully false. The latter, for example, puts down the total cost of the lines when completed, including the purchases from the Italian Government, at 1,207,598,832f; but to arrive at that figure he counts a sum due to the Austrian Government at 40,000,000f, when it is only 15,000,000f; he counts that nearly 135,000,000f will be required for lines in construction or to be constructed, when in reality a considerable portion of them are already finished and paid for; and he counts a subvention for the tunnel through Mont Cenis, when none is to be paid. On the whole, he exaggerates the outlay by 57,000,000f at the least. With respect to the revenue, M. Forcade shows that the pamphleteer assumes that the net receipts from 2,615 kilometres will be only 40,734,000f, whereas that sum was obtained from 2,187; that he arbitrarily estimates the net revenue from the lines purchased from the Italian Government at 14,800,000f, whereas that Government has guaranteed a gross revenue of 28,000,000f, and whereas the working expenses will not exceed 40 per cent.; and that he omits altogether a net revenue of 6,500,000f from the Central Italian lines guaranteed by the Government. Thus, then, the pamphlet is proved to be a tissue of error and misrepresentation. After giving this proof, M. Forcade makes a calculation of what the probable clear revenue of the company will be—basing it, he says, on solid facts and keeping it moderate. His conclusion is that in the present year there will be 58,800,000f net, from which 24,500,000f must be taken for interest and sinking fund of bonds. There will remain 34,300,000f, which will be sufficient to give 40f to each share, reserve included, and to leave 3,050,000f for general expenses, and for bringing into working order the lines purchased from the Italian Government. He further calculates that in subsequent years, the situation will be still more favourable,—provided, as may reasonably be assumed, that the receipts increase by 4 per cent. per annum, and that the bonds remaining to be issued will be taken by the public at 250f. In that case, the position will be pretty nearly as follows:—

	Net receipts. francs	Interest and sinking fund of bonds. francs	Sums necessary for distributing 40f per share, reserve included. francs	Remains disposable for general expenses and the Italian lines. francs
1866	70,050,000	32,200,000	31,250,000	6,600,000
1867	72,870,000	38,200,000	31,250,000	3,420,000
1868	81,850,000	46,000,000	31,250,000	4,600,000
1869	84,900,000	47,500,000	31,250,000	6,150,000
1870	88,000,000	47,500,000	31,250,000	9,250,000

As to the Italian lines, the total sum required for the year 1865 to 1870 is 17,700,000f, so that after paying it by annual instalments the balance each year will be amply sufficient for general expenses. M. Forcade concludes by affirming that in few companies have greater foresight and vigilance been employed to secure a fair remuneration of capital than in those of the South Austrian and Lombard Railways; and he adds, with great truth, "that there are few which are supported by such powerful financial influence." The full significance of this last remark will be understood when your readers are reminded that Baron James de Rothschild is at

Digitized by Google

the head of the Company, and that, as in all the other affairs in which he is engaged, he has a deep stake in its prosperity.

An official return shows that the number of foreign companies which pay stamp duty in France, in order to obtain the privilege of having their shares and debentures quoted on the Bourse, is 20. They are Austrian, Spanish, Italian, Portuguese, Dutch, Belgian, and Prussian. There is not an English company amongst them. The most important of them is the South Austrian and Lombard Railways, which pays for 375,000 shares and 1,560,000 bonds; the Saragossa Railway, 120,000 shares, 742,000 bonds; the Austrian Railways, 198,979 shares, 741,933 bonds; the North of Spain Railway, 100,000 shares, 622,487 bonds; Roman Railways, 96,000 shares, 651,246 bonds; and Isthmus of Suez Canal, 200,000 shares.

According to letters from Marseilles the execution of the convention between England, France, Holland and Belgium relative to sugar already encounters difficulties in this country. A number of eminent sugar merchants and shipowners have addressed a communication to the Minister of Commerce in which they say:—"By application of the international convention of the 8th Nov., 1865, relative to the *regime* of sugars, the Board of Customs has sent to the different custom houses the types adopted, according to which the classification was to be made from the 1st August last. These types comprise four numbers of three sorts of sugar, and under the text of the condition they ought to have been in conformity with the text of the Dutch types, but interested parties have not been a little surprised to find that only is there no concordance between the types adopted and the Dutch types, but that there even is in the comparative scale of Havana and native sugars as much as two numbers difference for the same type. These divergences are evidently the result of error, which must be rectified under any circumstances and which imperatively requires a prompt revision, because it does considerable injury to respectable interests which the Government certainly did not intend to sacrifice. In fact, Havana sugars have been completely sacrificed to the great detriment of the refiners, of ports of commerce, and of shipping.

A Company for cleaning, combing, and "cottonising" China grass is advertised. The capital is to be 3,000,000f in 6,000 shares. The majority of its directors are eminent manufacturers of Rouen. Shortly after the cotton famine began experiments were made at Rouen with China grass as a substitute for the famous textile; and the formation of the Company indicates not only that they have succeeded, but that there is a reasonable prospect of obtaining an ample supply of the plant.

Undeterred by the misfortunes which have of late befallen large sugar refining establishments at Marseilles, Honfleur, and Havre, a number of capitalists of Bordeaux submit to the public a project for establishing a refinery in their town with a capital of 4,000,000f, in 8,000 shares. For a long time a refinery at Bordeaux has been strongly desired by the commercial community of the place, from the belief that it will give great extension to its sugar trade, and considerable employment to its shipping whilst, providing occupation for a large number of the working class.

The Company of Magasins Publics et Generaux at Bordeaux makes a new call of 50f per share, to be paid from the 1st to the 15th October.

From a pamphlet just published, it appears that there are in France 83 life, fire, maritime, and other assurance companies, and that their united capital is 266,700,000f. The oldest, however, only dates from 1818.

The bankruptcy of the Ligne d'Italie Railway is likely to give rise to some difficulties, owing to its having been decreed in Switzerland, whilst the greater part of the interested parties reside in France, and owing, also, to the authorities in Switzerland showing a disposition to act with rigour. The journal *La Finance* has published a series of articles on this unfortunate railway, from which it appears that almost from the very formation of the Company there was profound discord among the directors, and that the general meetings of shareholders were frequently marked with great violence.

Brussels letters say that the Belgian Government is studying the question whether all the railways in the country now held by companies shall be taken by the State or shall be placed under a central board of management.

The following is the market report:—

FLOUR.—At *Paris*, yesterday, the quotation was 46f to 50f 50c the sack of 157 kilogrammes. Six marks, current month, 49f 75c; four months of November, 51f 50c. Type Paris, the 101 kilogs, 30f 50c.

WHEAT.—Business was not active at *Paris* yesterday. Old wheat, in good condition, was taken at 27f to 27f 50c for choice red, 28f to 28f 50c choice white, the sack of 120 kilogs. New wheat was—choice white, 28f; choice red, 27f; first quality, 26f 50c; good, 26f; ordinary and inferior, of which sales were difficult, 21f to 24f.

COTTON.—Business at *Havre*, in the week ending Friday, was active, the sales being 11,892 bales, and the arrivals 5,634. The stock was estimated at 34,665 bales. The closing quotations were 10f higher for Hayti, 8f for Coconada, 7f China, Dhollera and Compta unchanged, other sorts 5f higher. Low New Orleans was consequently 240f the 50 kilogs; good ordinary qualities in Broach, 165f; Tinnevelly, 160f; Madras, 170f; China, 155f; Jumel, 220f. This week, calm has prevailed: yesterday, New Orleans was 200f to 212f 50c; Oomrawuttee, 165f; Broach, 160f; Tinnevelly, 157f 50c; Madras, 165f; China, 150f.

COFFEE.—The demand at *Havre*, in the week ending Friday, was regular. 570 casks Port-au-Prince, 82f to 83f the 50 kilogs, in bond; 100 Cape, 84f; 588 Gonaives, 87f to 87f 50c; 1,100 Rio, not washed (part, it was said, for the United States). 71f 50c to 81f 50c: 1,320 ditto, for delivery, 81f to 83f; 30 Rio, washed, 99f 50c; 500 ditto, for delivery, 101f to 103f; 420 Bahia, 65f 50c to 66f; 1,252 La Guayra, 92f; 14 Guatemala, 91f. The arrivals were 132 casks and between 500 and 600 sacks. This week, Hayti, 82f 50c, 83f, and 84f; Bahia, 86f; Rio, for delivery, 82f 50c and 75f 50c. At *Nantes*, last week, 400 bags Reunion, for delivery, 140f, duty paid. No sales this week. At *Bordeaux*, last week, 100 sacks Mysore, 118f; 200 La Guayra grage and 47 Costa Rica at prices not stated. Nothing done this week. At *Marseilles*, last week, by auction, 774 sacks Brazil, sound, 60f 75c to 69f; also some damaged. This week, Maracaibe, by auction, 78f to 80f.

SUGAR.—At *Havre*, last week, some small lots of French West India were taken at 47f 50c the 50 kilogs, duty paid; and afterwards 1,055 casks were sold at 47f and 400 at 46f 75c. Subsequently, however, for various lots, 47f were obtained. In Havana, 1,230 casks by French ship went part at 30f, the rest at 29f 50c the 50 kilogs, for No. 12; 113 by Spanish ship, 28f 50c, same number; but afterwards, 840 casks by French ship were taken at 30f. The arrivals were unimportant. This week, French West India, 57f; and for delivery, 47f 25c, also 59f and 52f 50c; usine, 75f; Havana, 31f in bond, and 30f 50c for No. 12. At *Nantes*, last week, 265 sacks Reunion, inferior, 42f 50c; 300, 44f on sample; 5,085 at 50f bonne quatrieme; 1,000 Mayotte, on the basis of 46f 50c bonne quatrieme; various lots of French West India, 45f to 47f bonne quatrieme; some usine, 50f 50c to 52f. This week, Reunion, gros grain, 51f bonne quatrieme, and 50f ditto; Havana, 31f 75c No. 13¾, 30f 50c for 13½. At *Bordeaux*, last week, some French West India, 46f 50c; 1,000 sacks Reunion, at prices not stated; Mauritius nominally 52f 50c bonne quatrieme. No sales this week. At *Marseilles*, last week, 500 casks French West India, 27f 75c bonne quatrieme of Havre; 3,500 sacks Pernambuco, by English ship, 24f 75c, No. 10; 10,000 bales Mauritius, 28f, No. 12; 10,000 casks Havana, by Spanish ships, 27f 50c, No. 12. By auction, 5,727 bales Mauritius No. 9¼ to 14, 25f 25c to 29f 50c; also 1,200 damaged Havana. This week, Reunion 50f duty paid; French West India, 27f 75c, bonne quatrieme of Havre.

INDIGO.—The demand was limited at *Havre* in the week ending Friday: 4 chests Bengal, 55c above the estimates; 18, at prices kept secret; 23 serons Guatemala. The arrivals were 5 chests from England. This week, Bengal, at a premium of 55c and 35c. At *Bordeaux*, last week, 196 chests Bengal and 31 Madras, at preceding quotations; also, 3 Kurpah. This week, same sorts, prices not stated.

HIDES.—At *Havre*, in the week ending Friday, sales were active, and prices, generally speaking, firm: 2,800 La Plata dry ox, 94f the 50 kilogs; and cow, 74f to 90f; 6,330 ditto salted ox, 52f 25c to 60f; cow, 45f 50c to 46f 50c; 1,000 Rio Grande salted ox, 56f 50c; 1,800 ditto cow, 45f 25c; 800 Rio Janeiro salted ox, 51f; 900 Pernambuco salted, 45f; 500 Minos dry, 77f; 650 Valparaiso drysalted ox, 76f; and cow, 66f; 2,000 La Plata horse, salted, 43f 50c. By auction, in addition to various lots of damaged, 277 Porto Cabello, sound, 61f. The arrivals were 1,280. This week, Rio Grande salted cow, 44f to 47f; Minas dry, 77f; Monte Video salted ox, 59f; cow, 46f 50c to 48f; Buenos Ayres salted horse, 44f; Valparaiso drysalted cow, 66f.

WOOL.—At *Havre*, in the week ending Friday, calm prevailed: 160 bales La Plata unwashed, 1f 10c to 2f 10c the kilog, and 9 washed, 2f 20c. The arrivals were 362 bales. This week, Monte Video unwashed, 2f; Entre Rios, 1f 70c and 2f 10c.

TALLOW.—Business was animated at *Havre*, in the week ending Friday, and prices easier: 585 pipes La Plata disposable, 53f 25c to 56f the 50 kilogs; 615 pipes for delivery, 54f 50c to 56f 50c; 75 New York a la marque disposable, 55f to 56f; 200 New Orleans, 53f 50c; and 100 Russia, 55f to 56f; also by auction 42 casks Buenos Ayres, indifferent quality, 50f 50c to 52f. No arrivals. This week, Russia, 56f 50c; La Plata, 54f to 57f 50c. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 122f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, 48f 50c the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 degrees, 61f; 3-6 beetroot, first quality, 90 degrees, 56f.

COMMERCIAL AND MISCELLANEOUS NEWS.

Transmitted to U. S. mint Philadelphia, for coinage			548,350	69

In the year ending the 30th of June last, the imports into Canada were of the value of $44,620,000. The imports from Great Britain amounted in value to $21,036,000; from the United States, $19,589,000; from British North American colonies, $511,000; from the British West Indies, $209,000; from France, $752,000; from Germany, $387,000. The total of the previous year was $49,753,000. The duties in the year 1864–65 amounted to $5,663,000; in the previous year, $6,081,000. The imports of 1864–65 are thus classified:—Paying 30 per cent. and upwards, $4,792,141; 25 per cent., $182,011; 20 and 15 per cent., $18,117,392; 10 per cent., $2,216,658; free goods—coin and bullion, $4,768,478; other free goods, $14,538,741; reprints of British copyrights, $4,948.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 13th day of September, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,950,400	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,300,400
		Silver Bullion	...
	27,950,400		27,950,400

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,384,309
Rest	3,747,923	Other Securities	21,243,509
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6,321,640	Notes	6,555,340
Other Deposits	13,860,979	Gold and Silver Coin	855,179
Seven Day and other Bills	554,695		
	39,038,237		39,038,237

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,949,755	Securities	31,724,718
Public Deposits	6,321,640	Coin and Bullion	14,155,579
Private Deposits	13,860,979		
	42,132,374		45,880,297

Dated the 14th September 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,747,923*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£286,253
An INCREASE of Public Deposits of	335,930
A DECREASE of Other Deposits of	347,016
No change in Government Securities.	
A DECREASE of Other Securities of	121,827
A DECREASE of Bullion of	166,696
An INCREASE of Rest of	8,816
An INCREASE of Reserve of	139,979

The principal feature in the above return is the further decline in the bullion owing to the internal demand for coin. The other securities however having decreased, a nearly corresponding augmentation has taken place in the reserve.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 20,703,610	£ 21,610,987	£ 21,487,105	£ 20,960,414	£ 21,949,755
Public deposits	7,938,331	9,074,279	7,371,510	6,702,054	6,321,640
Other deposits	11,146,762	13,738,905	13,484,939	19,723,620	13,860,979
Government securities	12,759,368	11,110,547	11,091,284	10,797,095	10,384,209
Other securities	17,388,784	19,492,569	19,413,656	20,487,579	21,243,509
Reserve of notes & coin	7,984,985	11,221,598	9,338,021	7,139,396	7,410,519

Bank rate of discount	4½ p. c.	2 p. c.	4 p. c.	9 p. c.	4 p. c.
Price of Consols	90⅝	93⅜	93½	88	89½
Average price of wheat	75s 2d	55s 10d	44s 1d	42s 4d	46s 0d
Exchange on Paris (short)	25 25 32½	25 17½ 25	25 25 32½	25 30 37½	25 20 27½
— Amsterdam ditto	11 17½ 18	11 15½ 16	11 16½ 17½	11 19 12	11 18½ 19
— Hamburg (3 months)	13 13 8¾	13 8 8½	13 8½ 8¾	13 9½ 10	13 9¾ 10½

For the corresponding week of 1855, news had been received of the fall of Sebastopol and the destruction of the Russian fleet. Messrs Strahan, Paul, and Bates had been committed for trial. The Bank of England had raised its rate from 4 to 4½ per cent.

In 1862, the official report of the capture of Garibaldi and his forces by Colonel Pallavicini had been published. The Prince of Montenegro had accepted the conditions proposed by Omar Pasha. News had arrived of serious engagements between the Confederate and Federal armies at Bull's Run and at Manasses Junction, in which the Federal forces had suffered severe defeats.

In 1863, some heavy reverses had been suffered by the Polish insurgents in the district of Lublin. Warsaw had been declared in a state of siege. The members of the International Statistical Society had been received by the King of Prussia at Berlin, where they had held their session.

In 1864, Marshal M'Mahon had been appointed Governor of Algeria. The Prince and Princess of Wales had arrived in Denmark. The Confederates had defeated the Federal General Hancock on the Weldon Railroad. Atlanta had been captured by General Sherman. The Bank of Prussia had raised its rate of discount for bills of exchange to 6 per cent., the Bank of France had raised its rate to 7 per cent., the National Bank of Italy to 8 per cent., the Bank of Holland to 5½ per cent., the Bank of Portugal to 7 per cent., and the Bank of England to 9 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 6,242,022*l*; in 1862, a deficiency of 5,758,664*l*; in 1863, a deficiency of 5,928,717*l*; and in 1864, a deficiency of 7,763,959*l*. In 1865, the deficiency is 7,382,530*l*.

DISCOUNT AND MONEY MARKET.—The approaching end of the quarter, the introduction of the new Brazilian loan, the maturing of some large amounts of Indian paper, and the generally increasing activity in business have again caused a

Digitized by Google

more extensive demand for money this week, and in only exceptional cases transactions have taken place below 3⅞ per cent. To-day especially the applications for discount have been rather considerable, both at the Bank and in the open market. Annexed are the current charges for bills of various dates:—

30 to 60 days	3⅞ per cent.
3 months	4 per cent.
4 months	4¼ per cent
6 months—Bank bills	4½ per cent.
6 months—Trade ditto	5 per cent.

On the Stock Exchange, loans on Government securities have been more wanted, owing to the foreign and share settlement, and the quotation to-day was about 3½ to 4 per cent.

The following are the rates of interest allowed on deposits:—

Joint Stock Banks	*3 per cent.
Discount houses at call	3 per cent.
Do. with seven days' notice	3¼ per cent.
Do. fourteen days	3½ per cent.

* At the London and Westminster 2 per cent. only on sums below 500*l*

About 105,000*l* in gold was taken to the Bank yesterday, and 101,000*l* to-day, making a total of 206,000*l* since making up the last account.

The prospectus has been issued of a new Brazilian 5 per Cent. loan at 74. The total to be raised in cash is 5,000,000*l*, so that the amount of stock to be created is nearly 6,760,000*l*. The instalments extend over 12 months, with accruing dividend from the 1st September, An accumulative sinking fund of 1 per cent. is provided to repay the loan in 37 years at par, by annual drawings. The operation has not been attended with very great success, notwithstanding the low price of issue, and the scrip has been quoted between 1¼ and 2 premium, closing rather weak this afternoon at 1¼ to 1½. A few weeks ago the existing issues of Brazilian 5 per Cents. stood at nearly par.

Ceylon Government Six per Cent. debentures for 100,000*l* were offered to public competition yesterday by the Crown agents for the colonies. The total amount applied for was 165,400*l*, at prices varying from 95*l* to 106*l* 7s 6d. The minimum was 104*l*, at and above which rate debentures for 10,000*l* were allotted. It is understood that applications for the balance will be received at the minimum.

The weekly return of the Bank of France shows the following changes:—

	£
Increase.	
Commercial bills	220,000
Notes	13,000
Treasury balance	392,000
Decrease.	
Cash in hand	180,000
Current accounts	670,000
Advances	20,000

The Stock Exchange Committee have passed the following resolution:—"Resolved unanimously, That this Committee, finding serious discrepancies between the prospectus and articles of association of the Glamorgan Iron and Coal Company (Limited), and also that there were many objectionable practices in the promotion of the Company, and in the allotment of shares, decline to appoint a settling day."

The followink are the rates of discount in the chief cities of the Continent, showing a slight decline in Paris and Berlin:—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	2¾
Vienna	5	5
Berlin	5	4⅞
Frankfort	4	3
Amsterdam	3	3
Turin	5	4½ 5
Brussels	4	4
Madrid	9	...
Hamburg	...	4¼
St Petersburg	6	6½ 7

English Funds.—Consols this week have been rather dull, but show only a fractional decline compared with last Friday. The increasing demand for money and the comparatively unfavourable Bank returns have chiefly caused the present depression; but it is in some degree due to the general absence of business. During the present week attention has been almost exclusively directed to the foreign settlement. Consols for the account, which closed last Friday at 90 to 90⅛, left off to-day at 89⅞ to 90. For money the last price was 89¾ to 89⅞. Reduced and New Three per Cents. were ultimately quoted 88⅛ to 88⅜, and India Five per Cents. 105⅛ to 105⅜.

The Government broker continues to purchase daily from 10,000*l* to 20,000*l* stock for the sinking fund and other accounts.

Exchequer bills remain without change, at 2s discount to 2s premium.

Foreign Stocks.—The principal movement in the foreign market has been a fall in Brazilian descriptions, on the issue of the new loan. A relapse has also taken place in Egyptian 7 per Cents. of 1864, and Italian 5 per Cents. Mexican, Portuguese, Russian, and Venezuelan bonds were flat. Spanish Passive and Certificates are fractionally lower. There has been a better demand for some of the smaller South American descriptions, especially Equador and New Granada. Greek has also improved. Turkish bonds are firm, with an upward tendency, the Consolidés, in particular, having risen to 50½ to 50⅜, and the 1862 Loan to 74½ to 74¾. United States Five-twenties closed the same as last Friday, at 68⅜ to 68⅝.

The final price of French 3 per Cent. rentes on the Paris Bourse this evening was 69f 40c, showing no alteration compared with last week, but a fractional decline since yesterday.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

Railways and other Shares.—The railway market has been firm, the settlement showing that the supply of floating stock continues limited, although, perhaps, less scanty than on previous occasions. The traffic returns likewise remain favourable, and thus induce investments by the public. The principal rise this week has been in Great Eastern and North British. South-Eastern and Metropolitan stocks have likewise been in demand, and Great Northern A has improved to 152 to 153. Among the less important descriptions, the chief movement is an advance in Taff Vale.

Indian guaranteed stocks have been quiet, at about previous prices. Canadian descriptions are rather better. Foreign shares also show an improvement, especially Dutch-Rhenish. South Austrian and Lombardo-Venetian have been exceptionally flat.

Peruvian Railway shares are nominally quoted 12 to 14 premium.

In the miscellaneous departments a fair inquiry has prevailed for financial shares, particularly Credit Mobilier. Imperial Ottoman Bank show firmness at 16 to 16¼ on the announcement of the proposed meeting for the increase of the capital of the undertaking.

The subscription list of the Bay of Havana and Matanzas Railroad bonds will be closed on Wednesday, the 20th inst. The price is 1¾ to 2¼ premium.

FOREIGN EXCHANGES.—The rates this afternoon have been generally rather higher.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—There has been no export demand for gold during the past week, and 210,800*l* has been purchased by the Bank of England since our last circular. The arrivals comprise, 32,000*l* per Scotland, from New York; 3,500*l* by the Edinburgh, from New York; 19,600*l* by the City of Baltimore, from New York; 1,500*l* by the China, from Boston; 2,809*l* by the Delta, from Alexandria; 66,000*l* by the Tasmania, from the West Indies; 127,000*l*, by the Transatlantic, from Melbourne. The shipments are 104,840*l* (in sovereigns) per Oneida, for Brazil, and 2,900*l* per Tanjore, for Alexandria.

Silver.—The transactions in silver during the past week have been very limited, there being hardly any demand. The Tasmanian has brought 109,000*l* from the West Indies, chiefly in refinable bars; of these no sale has yet been effected. The shipments are 8,000*l*, per the Oneida, for Brazil, and 40,250*l*, per the Tanjore, for Bombay.

Mexican Dollars.—There has been a decline in the price of this coin, and the dollars brought by the Seine have been sold at 59⅞d per oz. The market is quiet, with a very limited demand. 92,000*l* arrived at St Nazaire per the Floride, chiefly on foreign account.

Exchange on India for drafts by the banks at 60 days' may be quoted for Bombay, Calcutta, and Madras, 1s 11½d to 1s 11¾d per rupee.

India Government loan notes may be quoted as follows :—108 to 110 for 5½ per Cents, 102 to 104 for 5 per Cents., and 88 to 90 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9d per oz std; ditto, refinable, 77s 10½d per oz std, last price; Spanish doubloons, 75s 0d to 75s 6d per oz; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 76s 2¾d per oz. Silver—Bar silver, 5s 0¾d per oz std, nearest; ditto, containing 5 grs gold, 5s 1d per oz std, last price; Mexican dollars, 4s 11⅞d per oz, last price; 5-franc pieces, 4s 11½d to 4s 11¾d per oz, nearest. Quicksilver, 8*l* per bottle; discount, 3 per cent.

RAILWAY DIVIDENDS.—The proposed dividend on Edinburgh and Glasgow Railway stock is officially announced at the rate of 4½ per cent. per annum, with a bonus of ⅞ per cent., against 4½ for the corresponding period of 1864.

PUBLIC COMPANIES.—At the meeting of the proprietors of the Bank of England, held on Thursday, the net profits for the half-year ended 31st August were stated at 704,269*l*, which would make the "rest" 3,733,945*l*. A half-yearly dividend of 5 per cent. was declared, without deduction of income tax, after the payment of which the "rest" will stand at 3,006,295*l*.

The directors of the Millwall Iron Works, Ship-building, and Graving Docks Company (Limited) have declared an *ad interim* dividend of 8 per cent. per annum for the half-year ending 30th June last, payable on and after the 30th inst.

At a meeting of the Merchant Banking Company of London (Limited) an interim dividend of 1*l* per share upon the old shares, and 1s 6d per share upon the new shares (equal to 8 per cent. per annum), was declared.

The London, Buenos Ayres, and River Plate Bank will, in future, be known as "The London and River Plate Bank (Limited)," in accordance with the resolution confirmed at the last special meeting.

At the meeting of the Surrey Commercial Dock Company, which took place on Thursday last, a dividend of 3 per cent. was declared for the six months. The directors were also authorised to raise debenture stock not exceeding 140,000*l*.

At an extraordinary general meeting of the Atlantic Telegraph Company, held on Thursday, the report presented by the directors was unanimously adopted. This resolution merely conveyed an expression of the readiness of the shareholders to invest the directors with the power of raising a sum of 800,000*l*; but the terms to be offered to the contributors of this additional capital were left for the consideration of a future meeting to be held on the 12th of next month. The directors have already entered into a contract with the Telegraph Construction and Maintenance Company for the laying down next year of a new cable between this country and America, at a cost price of 500,000*l*. It is only in the event of success that this latter company are to receive any further remuneration, and they undertake, without any additional charge whatever, to endeavour to recover the cable lately sunk in the Atlantic, and to continue it to the coast of Newfoundland.

An extraordinary meeting of the London Merchants Company (Limited) took place on Tuesday last, when the directors unanimously agreed to return the deposits to the subscribers, with 5 per cent. interest.

The report of the directors of the London Bank of Mexico and America (Limited) has been issued in anticipation of the meeting to be held on the 19th instant. The total available for dividend is stated at 24,848*l* 19s 1d; and a dividend at the rate of 9 per cent. per annum, free of income tax, is recommended.

At the meeting of the International Land Credit Company, yesterday, the following resolution was adopted :—"That the report of the directors of the International Land Credit Company, which has now been read, together with the report of the auditors, and the accounts and balance sheet for the year 1864, be approved and adopted, and circulated among the proprietors. That, in pursuance of the recommendation contained in the directors' report, a dividend of (5f) 4s per share be now made, which, added to the payment on account of dividend at the rate of 6 per cent. per annum, which was distributed to the proprietors in January last, makes the total dividend for the official year of 1864 on the Belgian issue equal to 9s (11f 27c) per share, and on the English issue equal to 6s 10½d (8f 62c) per share, and which, for the respective periods of eight months and a half and five months since those issues were made, represents a dividend for the year 1864 of upwards of 10 per cent. and 14 per cent. respectively on the capital paid up, and that such further dividend of 4s (5f) be payable on and after the 30th day of September instant."

The board of directors of the Joint Stock Discount Company has been strengthened by the addition of Mr William Dent, sen., as Chairman.

The following has been published with respect to the Venezuela 6 per Cent. loan of 1864 :—

The General Credit and Finance Company of London (Limited) are in receipt of advices from their agents, Messrs H. L. Boulton and Co., dated La Guayra, 25th August, 1865, of duties collected as follows, on account of the above loan :—

Per statement No.	43	from La Guayra	$10,105 98

It does not appear to be generally understood by the shareholders that the instalment of 80*l* on the paid-up scrip of the East London Railway Company need not be paid entire on the 23rd of this month, but may, at the option of the holders, be divided into two payments; one of 30*l* on the 23rd inst., and the balance of 50*l* on the 23rd March, 1866.

Mr Jeremiah Dunne has joined the Board of the Dublin Trunk Connecting Railways Company, the works of which are being steadily prosecuted by the contractors, Messrs Rigby.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is nearly 1-10th per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.6¾ per 1*l* sterling. Standard gold at the English Mint price is, therefore, rather more than 1-10th per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 109¼ to 109½ per cent. At this rate there is no profit on the importation of gold from the United States.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.—The Postmaster-General has sanctioned an alteration in the dates for despatching from Liverpool the mails for Honduras, Jamaica, Hayti, and Mexico, by the packets of the West India and Pacific Steam Ship Company. In future, the packet for Belize (calling at Jamaica) will leave Liverpool on the 29th, instead of on the 5th, of each month, and the packet for Mexico (calling at Port-au-Prince, Hayti, and Jamaica) will leave Liverpool on the 15th, instead of on the 20th, of each month. When either the 15th or 29th of the month falls on a Sunday, the packets will sail from Liverpool on the following day.

COMMERCIAL EPITOME.

FRIDAY NIGHT

The total supply of English wheat on sale at Mark lane, to-day, was moderate. The trade was dull for all qualities, at Monday's decline in the quotations. Foreign wheat, of which there was a moderate supply on offer, moved off heavily, at about previous rates. Barley met a slow sale, although the supply on offer was small; prices varied from 25s to 40s per quarter. Malt sold slowly, at about previous rates. For oats there was a fair demand, at late rates. Beans and peas met a slow sale, at about Monday's currency. The flour trade was dull, on former terms. This week's imports amount to 9,130 quarters of wheat, 4,910 barley, 14,990 oats, and 250 sacks of flour.

At Liverpool, this morning, the trade for wheat and flour was dull, and prices had a downward tendency. At Wakefield, old wheats sold at rates 3s per quarter below the late highest point.

There has been again a fair business transacted in the Liverpool cotton market, and the total sales reach 71,000 bales, of which the trade have taken 41,000 bales, speculators 11,000, and exporters 19,000 bales. The imports of the week amount to 127,000 bales; and to-day's stock is 427,000 bales. At the commencement of the week prices declined to the extent of ¼d to ⅜d per lb; but since Wednesday the demand has become more general, and the decline has been to a large extent recovered. To-day the market closes very animated, with sales of 20,000 bales.

From Bombay, via the Persian Gulf, we learn that the export of cotton from Sept. 2 to Sept. 9 had amounted to 11,000 bales. Dhollera was quoted at 10 7.16d; and Broach, 10 5.16d per lb, free on board, including freight. Freight to Liverpool was 17s 6d per ton.

Our latest information from New Orleans states that the quotation for middling cotton was 42c to 43c per lb, and that the total stock amounted to 90,000 bales.

At Mobile, on the 18th of August, the quotation for middling was 36c to 37c per lb. The receipts of produce during the week had been 8,502 bales, and the exports 4,366 bales. The stock on hand and on shipboard at the above date was 38,410 bales. Freight to Europe was 1d to 1¼d per lb.

From interior Southern ports, we learn that the receipts of cotton had increased, and that prices had, in several instances, given way. At Augusta, Montgomery, and Macon, the trade had been heavy, on easier terms.

There has been considerable activity in the markets for colonial and foreign grocery produce this week, and, in some articles, an extensive business has been transacted. In the sugar trade, there has been a fair amount of activity, and all good and fine produce has sold readily, at extreme rates. *New* teas have been in steady request; but the leading change to notice in the tea trade is an active demand for Indian produce, at an advance in price for all good and fine qualities of 1d to 2d per lb. Coffee has moved off steadily, and there has, in some instances, been a slight tendency to improvement in the quotations. Cocoa supports previous rates; and holders of rice are firm in their demands; but in both articles the amount of business doing is very moderate, and as regards the latter, the tendency of prices is in favour of buyers. Last week, duty was paid in London on 1,139,765 lbs of tea, whilst the export for the week ending Sept. 7, was 882,647 lbs, making a total of 2,022,412 lbs, against 1,475,624 lbs last year.

☞ The following is from Messrs Trueman and Rouse's circular:—

Cotton....bales & serons	10,500	...	1,100	1,200	1,200

The public sales of colonial wool continue to be well attended by home buyers. Good and fine wools are selling at the extreme rates of last series; but inferior qualities exhibit a decline in value, as compared with the same period, of about ½d per lb. The amount of business doing for export is limited. The sales will be brought to a close on the 23rd inst. Privately, the trade for English wool is firm, at fully late rates.

Hemp is firm, at 29*l* 10s for clean Russian qualities. Flax is in but moderate request, yet prices rule firm. Jute is a slow sale, at late rates.

The silk trade is very quiet. Prices, as yet, are stationary; but as regards certain descriptions, there is decidedly a downward tendency. The following statement, showing the state of the London warehouses, is from Messrs Durant and Co.'s circular:—

STATE of the SILK WAREHOUSES.

	Sold Stock. Sept. 1, 1865. bales.	Sept. 1, 1864. bales.	Unsold Stock. Sept. 1, 1865. bales.	Sept. 1, 1864. bales.

Scotch pig iron has sold at 57s 3d, 57s, and 56s 9d cash, mixed numbers. Tin is steady, at 88*l* to 88*l* 10s cash for Straits. Spelter has realised 21*l* 17s 6d per ton, on the spot. In the oil trade, there has been considerable activity: linseed oil has sold at 37s; foreign refined rapeseed do., 48s 6d per cwt.; sperm, 105*l* per tun; French spirits of turpentine have realised 47s; and American refined petroleum has changed hands, at 2s 11d to 3s per gallon. The export of petroleum from all ports in the United States, from Jan. 1 to Aug. 6, was 11,357,127 gallons; against 20,505,116 gallons last year; and 20,446,170 gallons in 1863.

In tallow, a very moderate business has been transacted, yet prices have ruled high, new P.Y.C. being quoted at 46s 3d to 46s 6d per cwt on the spot, and 48s for March delivery. The quotation at St Petersburg, at latest date, was 50 silver roubles.

Rather a considerable business was transacted in cotton and cotton goods at New York, during the week ending Sept 2. Owing, however, to rather extensive receipts, the raw material gave way in price to the extent of 1c per lb, but most descriptions of manufactured cotton changed hands at fully previous quotations. For wool there had been a steady demand, at full prices, whilst the trade for woollen goods was decidedly firm, at quite previous rates. With the exception of the market for breadstuffs, which, owing to a falling off in the export demand, had exhibited less firmness, the various articles of food and drink, and especially grocery produce, had been in good demand, and the late advance in prices had been fully supported. Gold fluctuated in value between 143⅞ and 145 per cent. The stock of bullion in the banks on the 26th ult. was 3,304,730*l*, against 3,990,600*l* last year, 6,406,010*l* in 1863, and 7,128,200*l* in 1862. The balance in the Sub-Treasury on the 26th ult. was 11,904,420*l*, about one-half of which consisted of currency. The shipments of specie from Jan. 1 to Aug. 26 were 3,992,100*l*, against 6,357,200*l* last year, 5,584,430*l* in 1863, and 7,724,760*l* in 1862. The imports of dry goods and general merchandise for the same period were valued at 23,428,250*l*, against 32,175,310*l* last year, and 23,730,270*l* in 1862.

The cotton market opened quietly, and with an unusually large import in the early part of the week, some slight decline was submitted to by holders, who continue to supply the demand freely. Since Tuesday the firmness in the Manchester market has been followed by a more extensive business, and decidedly steadier prices, and yesterday the market closed firmly, though still with some slight decline in most descriptions from last Friday's quotations. Sea Island has been in moderate request without change in prices. American has been in fair demand; but the lower qualities have declined ¼d to ½d per lb. The recent large supply of Brazil was followed by a considerable decline in price, which brought buyers more freely into the market, and a steadier feeling has since prevailed. Pernam and Maranham are not now more than ¼d, but Maceios are ½d lower than at the close of last week. In Egyptian a large business has been done, but quotations are reduced ¼d per lb. Smyrna is also ¼d per lb cheaper. The heavy import of East India continues to be freely offered, and early in the week a decline of ½d to ¾d per lb was, in some instances, submitted to, which attracted the attention of buyers; large sales have since been made, and prices have recovered to within ¼d per lb of last week's rates. The demand for China and Japan has, in consequence of their great scarcity, been chiefly of a retail character at an occasional decline of ¼d per lb.

The transactions "to arrive" have been to a fair extent, and the latest prices paid were for Paraiba, ship named, 17½d per lb; Egyptian, fair open, ship named and shipping or shipped, 17¼d; Dhollerah, fair, ship named 12¾d; Oomrawuttee, fair merchants, ship named, 11¾d; Bengal, fully fair new, July shipment, 8d; Western Madras, fair new, ship named, 12d per lb.

The sales of the week amount to 70,700 bales, including 10,820 on speculation, and 19,630 declared for export, leaving 40,250 bales to the trade. The sales to-day will probably amount to about 20,000 bales, at full prices.

LONDON—Sept. 15.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The market opened dull, and prices gave way ¼d to ½d per lb, but on Wednesday there was an improved demand, and in some cases this decline has been recovered.

NEW YORK—Aug. 26.

The transactions of the present week are about 13,000 bales, chiefly at a decline in prices from Saturday last of 1c per lb. Middling upland is quoted at 43c per lb. The week's arrivals are 20,800 bales, the leading ports whence those supplies were derived being New Orleans, which forwarded 7,236 bales; Mobile, 2,251 bales; Galveston, 692 bales; and Savannah, 2,963 bales. The total import since September 1 amounts to 400,951 bales. The prices current are as follows:—

	New York Classification. Upland.	Florida.	Mobile.	New Orleans and Texas.
	c	c	c	c
Ordinary	35	35	35	35

MARKETS IN THE MANUFACTURING DISTRICTS.

The demand for cotton and woollen goods, this week, has been far from active; nevertheless, the late advance in prices is supported. In the iron trade there is considerable activity, and an increased amount of business is doing for shipment to the United States. Coals have been freely dealt in: the export demand has been large.

MANCHESTER, Sept. 14.—From Friday of last week there ensued a few days dulness, owing to the large arrivals of cotton in Liverpool, but purchasers were so well engaged that no change of prices could be made, and the market has gradually recovered confidence, so that a moderate amount of business is being daily brought out. The best makes of 8¼-lb shirtings for China have been sold readily; in other cases, wants have been small individually, but make up a fair aggregate, and probably more could not be done without inducing a higher level of prices. The prospect of free supplies of cotton from America at the end of the year keeps this in check, meanwhile allowing the trade to maintain a healthy position.

BRADFORD.—Wool is in good demand, with firm and even hardening prices. The principal demand is for bright-haired hogs, for which a farthing per pound advance can be easily made. The demand for yarns for home consumption has become very large. For export the demand does not improve. In prices the greatest activity continues to prevail. The Americans are still the largest buyers. Prices continue to harden.

LEEDS.—Seasonable fabrics, including both heavy goods and those of lighter make for ladies' wear, are in fair request. Considering the stocks of new goods offered in the halls, a satisfactory amount of business has been done, and the condition and prospects of the woollen trade throughout this district are healthy. Prices keep firm, those of cloth as well as those of wool.

ROCHDALE.—The market has been quiet: the only inquiries are for printers' and fancy goods, and in the plain department for flannels of the finer qualities. Some small lots of the better kind of Yorkshire goods are in demand.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Aug. 26.—The export demand having fallen off considerably, trade in wheat and flour has ruled heavy during the last few days, and prices have given way. In the early part of the week, however, there was great activity in the market and an important rise took place in the quotations, but this advance is now entirely lost. In reference to the crops, the accounts at hand are favourable. Corn has changed hands at a fair extent at irregular prices. The week's receipts are 72,691 barrels of flour, 219,520 bushels of wheat, and 368,904 bushels of corn. The following are the prices current:—Flour—State, superfine brands, $6.60 to $7.20; State, extra brands, $7.35 to $7.50; State, choice brands, $7.55 to $7.75; Ohio, common brands, $8.70 to $8.85; Ohio, fancy brands, $8 90 to $8 95; Ohio, good and choice extra brands, $9 to $11; Michigan, Indiana, Wisconsin, &c., $6.60 to $8.10; Genesee, extra brands, $8 to $11; Missouri, $12 to $14.25; Canada, common, $7.50 to $8.90; Canada, good to choice extra, $8 to $10.75 per barrel. Wheat—Chicago spring, $1.50 to $1.53; Milwaukee Club, $1.51 to $1.53; amber Milwaukee, $1.54 to $1.56. Corn—Western mixed, 91½c to 92c; unsound ditto, 85c to 90c; nearly yellow ditto, 93c per bushel.

NEW YORK, Sept. 5.—There is more doing in flour, and prices have improved. The wheat trade is firmer, and the finer qualities have realised slightly enhanced rates. For corn the market is quiet.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that only moderate supplies of English wheat have been on sale here this week, the demand for all kinds has ruled heavy in the extreme, at a decline in the quotations of from 1s to 2s per quarter. In foreign wheat, scarcely any business has been passing, and the currencies have given way 1s to 2s per quarter. Fine barley has been held at full quotations. Inferior parcels have sold slowly, at barely late currencies. The demand for malt has fallen off, and late rates have been with difficulty supported. Oats have moved off steadily, on former terms. Both beans and peas have sold slowly, and, in some instances, the quotations have had a drooping tendency. Flour, both English and foreign, has slightly given way in price.

Harvest work in the North of England, as well as in Ireland and Scotland, has progressed rapidly, and most of the wheats have been carried in excellent condition. The grain has thrashed out well. Very little spring corn now remains in the fields.

In the country markets wheat has moved off heavily, at a decline of about 2s per quarter. Barley and all other articles have commanded very little attention. On the continent wheat has changed hands on lower terms. Barley and oats have continued in active request on English account. In America, breadstuffs continue high in price.

The Scotch markets have been scantily supplied with wheat, for which the demand has continued heavy on lower terms. The transactions in spring corn have been trifling.

In Ireland, very few sales have been reported. Wheat has gone lower in price, and the value of other articles has not been supported.

Fresh up to our market to-day the arrivals of English wheat were limited, but the total supply of home grown produce on sale was moderate. The trade was very inactive at Monday's currency. For foreign wheat the trade was dull at late rates. Barley sold slowly on former terms. Malt was dull at barely stationary prices. For oats there was a moderate demand at late rates. Beans and peas were a dull inquiry at former prices. The flour trade was quiet at Monday's quotations.

In reference to the state of trade in floating cargoes, Mr Dornbusch reports as follows:—Arrivals at ports of call since last Friday only 17, viz., 7 wheat, 5 maize, 2 barley, 1 beans, and 2 cott on-seed. Trade inactive, and prices unaltered or drooping. Sales:—Wheat—7 arrived cargoes sold: Ghirka Nicolaieff at 38s 7½d to 39s 6d; Odessa, 40s; Taganrog, 39s 6d; Marianopoli, 40s 6d; hard Odessa, 39s 4½d; Ghirka Taganrog, on passage, July, 40s per 492 lbs. Maize—2 cargoes sold: one arrived, Kustendje, 29s 9d; one on passage, Ibrail, August, 28s 6d per 480 lbs. Barley—2 cargoes sold: one arrived, Odessa, 22s; one Azow, on passage, July, 21s 9d per 400 lbs. Cotton-seed—2 cargoes both sold before arrival. Sales: on passage, Egyptian, from Alexandria, July and August, 7*l* 2s 6d to 7*l* 4s per ton; shipped or to be shipped, 7*l* 2s 6d to 7*l* 7s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT"

MINCING LANE, FRIDAY MORNING.

SUGAR.—A firm tone pervades the market, and the demand is still very steady. The advance referred to last Friday has been maintained, and the trade have taken 2,362 casks West India in three days. Barbadoes by auction realised 31s to 37s. Low brown sugars still attract attention. For most other kinds there is a steady demand. The stock of sugar is reduced to 104,600 tons, against 105,840 tons last year, and 114,050 tons in 1863. There is an increase in the total deliveries over the previous season's amounting to 36,170 tons.

Mauritius.—12,500 bags offered by auction chiefly sold, at and afterwards, generally at full quotations: soft brown, 27s to 31s; soft yellow and grey, 32s to 34s; grainy and crystallised, 34s to 38s 6d per cwt.

Bengal.—2,221 bags offered by auction were chiefly sold at steady rates: white Benares, 35s 6d to 38s; soft yellowish brown, 30s 6d; low brown, 26s; pale yellow Gurpatta date, 34s 6d to 35s 6d per cwt.

Madras.—1,131 bags native sold at 28s to 28s 9d for brown.

Penang.—1,752 bags sold steadily at 29s to 34s 6d per cwt.

Manilla.—2,164 bags washed clayed sold by auction at 30s to 31s. Privately, 12,000 bags are reported at 31s 6d to 32s per cwt.

Foreign.—650 casks 165 barrels Porto Rico offered by auction partly sold at 33s to 37s; good to fine grocery, 37s 6d to 39s 6d. Privately, 1,100 boxes Havana are reported at 40s. 800 casks Porto Rico at 33s 6d to 35s. Two floating cargoes of Havana for the United Kingdom: No. 12 at 26s 6d; one of white Bahia at 25s; one of brown ditto at 22s 6d; one of low Cuba at 22s 6d; one of muscovada at 23s 9d per cwt.

Refined.—Dry goods continue firm at a further advance, low qualities obtaining 42s 6d to 43s per cwt.

MOLASSES.—90 puncheons St Kitt's sold at 15s per cwt.

RUM.—The market is quiet and prices remain unchanged this week.

COCOA.—358 bags Trinidad chiefly sold at full prices. Low to middling, 63s to 77s 6d: good to fine, 81s to 103s. 280 bags Grenada realised 54s to 57s 6d. 245 bags Bahia were chiefly taken in at 44s to 45s, a small quantity selling at 42s per cwt.

TEA.—The sales of Indian growth generally passed with spirit, especially all the fine and strong classes, establishing an advance of 1d to 2d on all fine souchong and pekoe, and 2d to 4d per lb on fine broken leaf and dust. By private contract the event of the week has been the business in new season's congous, which arrived on Monday per Fiery Cross and Serica. These opened high, ranging from 2s 2d to 3s 1d per lb. Smaller packages 1d to 2d per lb more.

COFFEE.—Importers continue to bring large quantities on the market. The sales have, however, gone off with great spirit, and 87,000 bags submitted by the Netherland Trading Company at Amsterdam on Wednesday, sold rather dearer than expected, good ordinary Java obtaining 45¼ cents. There is more inquiry for native Ceylon, the latest prices showing 6d to 1s advance. 70 casks 3,961 bags, by auction, sold at 65s to 70s for ordinary to fine. 3,281 casks 1,415 barrels and bags plantation went rather above the valuations: fine, 88s to 100s; low middling to good bold, 77s to 86s 6d. 70 cases 1,346 bags East India chiefly sold: pale, 71s to 71s 6d; fine ordinary to middling, 76s to 82s 6d. 5,735 bags Manilla were bought in: pale and yellowish, 72s to 75s; low, 52s to 56s per cwt. The export deliveries in this port have exceeded last year's by 3,800 tons, or about 20 per cent. According to the latest return the stock was 3,720 tons above that in 1864.

Digitized by Google

RICE.—A few parcels of soft grain have sold on the spot, at prices rather under the highest lately current. 3,000 bags white Bengal sold at 14s 9d to 15s 6d per cwt.

IMPORTS and DELIVERIES of RICE to Sept. 9, with STOCKS on hand.

SAGO.—120 boxes bold grain sold at 22s per cwt.

SAGO FLOUR.—500 bags sold at 13s to 13s 6d per cwt.

SPICES.—Nutmegs are rather dearer in some instances. 64 cases brown sorts chiefly sold: small, 1s 1d to 1s 4d; middling to fine, 1s 6d to 3s 6d. 23 cases mace were only partly sold: middling to fine at at 1s 5d to 2s 8d. Low of old import bought in at 1s 1d to 1s 3d. 21 cases Penang cloves sold at 11d to 11¼d. 3,400 bags black pepper partly sold: West Coast and Trang at 2⅞d to 3d; the latter being rather cheaper. A small quantity of good Tellicherry realised 4⅜d, and some good Singapore, 3⅛d. 128 bags Penang white sold at 5d per lb. 235 cases wormy Cochin ginger partly sold at 65s to 67s per cwt. There was not any Jamaica brought to auction on Wednesday. Cassia lignea commands higher prices. Pimento has advanced to 3d per lb.

SALTPETRE.—There have been few transactions during the week, and the market is firmer.

IMPORTS and DELIVERIES of SALTPETRE to Se t. 9, with STOCKS on hand.

	1865	1864	1863	1862
Imports ..... tons	5720	10920	11820	12850

Stock	5530	8870	5630	4000

DRYSALTERY GOODS.—Gambier is firmer. Good Cutch continues easier. Bengal safflower unchanged, with a steady market.

COCHINEAL.—At the public sales on Wednesday prices were rather irregular. 674 bags met a steady demand, and chiefly sold at full quotations. Honduras silvers, 3s 2d to 3s 6d; out of condition, pasty and small grain, 2s to 3s 1d. Teneriffe blacks, at 3s 7d to 3s 9d per lb, went rather dearer.

METALS.—The market has been steady. Tin is quiet in Holland, and there has not been much business done here. Straits, 88*l* to 88*l* 10s per ton. Quotations of spelter have fluctuated between 21*l* 10s and 21*l* 17s 6d, the latter being paid during the last few days, which establishes some advance, and the market is now firmer. Scotch pig iron has sold from 56s 9d to 57s 3d per ton, mixed numbers, on board at Glasgow. Other kinds of iron are in steady demand.

JUTE.—The demand is good, to meet the present extended rate of consumption. Several parcels have been sold, to arrive, at rather higher quotations. On Wednesday, 6,950 bales sold at full prices, ranging from 11*l* to 22*l* 5s per ton for common to fine.

MANILLA HEMP.—A small parcel of old import sold by auction at 33*l* to 33*l* 10s per ton.

OILS.—The price has advanced to 105*l* per tun for sperm. Olive oil is in demand, and may be quoted 1*l* dearer; Gallipoli 54*l*; other kinds 49*l* to 52*l* per tun. There is little fine palm oil offering, and the prices are 38s 6d to 39s. Cocoa-nut has been sold upon rather higher terms: Ceylon, 43s 6d to 44s 6d; Cochin, 46s to 47s. Linseed has advanced, owing to the upward course of the seed market. On the spot, 36s 6d; forward deliveries, 36s 3d to 36s 6d. Rape scarce for present delivery. Contracts have been made in brown for delivery: English, 45s 6d; foreign, 46s per cwt.

LINSEED.—Considerable purchases have been made during the week for export to America, and combined with a further advance in the value of oil and reports of short supplies from Calcutta and the South of Europe, has caused a further advance of 1s 6d to 2s per qr. Petersburg has realised 57s 6d; Calcutta, 59s 6d to 60s; and Bombay, 61s to 61s 6d per qr. For arrival, a cargo of Azov sold early in the week at 58s, now 60s required, and some quantity Calcutta at 59s 6d to 60s for ordinary.

TALLOW.—The market is less active than of late. This morning, first sort new Petersburg Y.C. closed at 46s 3d to 46s 6d; January to March, 47s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, September 11, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market closes firmly, at full rates to 6d per cwt advance. 1,318 casks West India have sold, making the week's sales 3,580 casks. Barbadoes by auction went at 31s to 37s 6d. 1,900 bags Penang sold at rather higher rates, from 31s 6d to 35s. 478 bags native Madras sold at 28s to 29s for brown. 1,461 bags dark grainy Madras Jaggery were bought in at 29s.

COFFEE.—511 casks 15 barrels 765 bags Ceylon, and 1,425 cases 1,356 bags East India sold at previous quotations.

COCOA.—606 bags Trinidad offered by auction sold steadily at 63s to 110s. 85 bags Grenada partly sold at 55s to 56s per cwt.

RICE.—A cargo of Necrancie Arracan sold at 10s 7½d per cwt.

OIL.—286 casks by auction sold: Ceylon, 43s 9d to 44s 3d; Cochin, 46s to 47s 6d per cwt.

TALLOW.—Quotations of town melted and foreign unchanged. 50 casks Australian by auction sold at 45s 6d to 47s 9d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar is not quite so buoyant as last week; no material alteration to note as respects prices. The refined market in Holland remains very firm.

GREEN FRUIT.—More business doing arrivals of Lisbon grapes giving employment to the dealers. Some parcels sold by Keeling and Hunt at public sale went in character with condition and quality. Some improvement in the value of lemons of good character; inferior without alteration. A larger business is doing in nuts than is usual at this period of the year, arising from the deficiency of the new crop generally

DRY FRUIT.—A fair trade has been done in currants during the week. At public sales, Valencia raisins have moved off heavily. The season is not sufficiently far advanced for the trade to buy actively.

SEEDS.—The trade for all seeds rules steady, with firm quotations for most varieties.

ENGLISH WOOL.—Rather more demand for short wools.

WOOL.—The same.

COLONIAL WOOL.—The market remains firm. The sales progress without change: they will close on the 23d inst.

FLAX.—Market steady.

HEMP.—Rathor more inquiry during the week. Market steady.

SILK.—Market very dull, and inactive. Large imports arriving of China silk, but little done yet.

TOBACCO.—No alteration to report.

LEATHER AND HIDES.—Durfng the past week a good average demand for leather has continued, a better feeling having pervaded almost all departments of the trade. The transactions in heavy butts are, however, still limited, and prices are stationary. The articles most in request are good crop hides, 40 lbs and 50 lbs; bellies, both English and foreign, good common dressing hides, calf skins, kips and horse hides.

METALS.—We continue to report a want of life in nearly every branch of metals, although it is not accompanied by any special anxiety. Copper sells slowly, in the absence of Indian demand and the fact that the French market is so fully supplied with Chilian. Tin is again rather more dull of sale. Lead, also, is neglected. Iron maintains a very steady course, and Scotch pig has advanced in price. Spelter is quiet. Tin plates are in excellent demand.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	48	9
Fat by ditto	2	4
Yellow Russia	48	0
Melted stuff	36	0
Rough ditto	20	0
Greaves	20	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 11.—The total imports of foreign stock into London, last week, amounted to 20,915 head. In the corresponding week in 1864 we received 13,247; in 1863, 18,242; in 1862, 11,109; in 1861, 14,327; in 1860, 12,029; and in 1859, 13,828 head.

To-day's market was extensively supplied with foreign beasts and sheep. With the exception of some excellent Normandy beasts, the quality of the stock was very middling. The trade was slow, on easier terms. The arrivals of English beasts fresh up exhibited a slight increase as compared with Monday last. The receipts from Ireland were somewhat extensive; but the show of Scotch was confined to 40 head. Generally speaking, the beef trade was dull. The finest Scots, Crosses, Lincolns, Devons, and Herefords changed hands, at mostly full prices; but in the value of inferior breeds a decline of about 2d per 8 lbs took place. The top quotation was 5s 4d per 8 lbs. Apart from the foreign supply, the arrivals of sheep were more extensive than on Monday last, the increase being chiefly confined to Scotch and Irish breeds, of which there was a considerable number in the pens. The quality of the stock was very thin and middling. Good and prime breeds changed hands, at prices barely equal to Monday last; but inferior stock gave way in price 2d per 8 lbs. Prime Downs and half-breds sold at 6s 8d per 8 lbs. A few lambs were on offer, and the primest breeds realised 7s per 8 lbs. Calves were in but moderate supply. The trade was slow, at about late rates; the top price being 5s 4d per 8 lbs. The pork trade was quiet, at last Monday's currency.

SUPPLIES.

	Sept. 12, 1864.	Sept. 11, 1865.
Beasts	6280	5920
Sheep and lambs	24299	30050
Calves	288	265
Pigs	540	475

THURSDAY, Sept. 14.—The supply of English beasts on sale here to-day was very moderate; of foreign breeds, somewhat extensive. The beef trade was in a sluggish state, yet very little change took place in prices, as compared with Monday. The top quotation was 5s 4d per 8 lbs. Sheep were in good supply and slow request, at Monday's quotations, the top price being 6s 8d per 8 lbs. There was a fair demand for calves, at late rates. The pork trade was firm, and prime small pork changed hands at higher prices.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, Friday, Sept. 15.—Our market continues to be well supplied with new hops, in which sales progress slowly, at the annexed quotations:—New Mid and East Kents, 105s to 160s per cwt; New Weald of Kents, 95s to 126s; New Sussex, 90s to 110s; Yearlings, 95s to 140s. A few parcels of new foreign hops have arrived at market.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Sept. 15.—Some potatoes have advanced in price, the quotation being 100s to 140s per ton. Inferior potatoes are selling as low as 30s per ton.

HAY MARKETS.

THURSDAY, Sept. 14.—The various markets have been well supplied with hay and straw, for which the trade has ruled heavy, at barely late rates.

Per load of 36 trusses.

	Smithfield.	Cumberland.	Whitechapel.

Ships at market, 35; sold, 7; gas contracts, 25—32; unsold, 3; ships at sea, 55.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 15.—There is a fair inquiry both for home consumption and export, and the improved harvest prospects have a tendency to make holders very firm in their demands; but as buyers are trying for some concession in prices, the actual business done is rather restricted in consequence.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 15.—Wheat in fair request, about Tuesday's rates. Flour slow sale and nominally unaltered. In some instances, however, to effect sales holders of both wheat and flour had to accept lower rates. Indian corn 3d dearer, which checks business, mixed American, 29s 6d. Beans steady. Oats, 1d to 2d, and oatmeal 6d to 1s lower. Demand dull.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 2d of September, on 12,241 miles, to 757,316*l*, and for the corresponding week of last year, on 11,889 miles, to 715,157*l*, showing an increase of 352 miles and, of 42,157*l*. The gross receipts on the following 14 railways amounted in the aggregate, on 8,759 miles, to 625 216*l*, and for the corresponding week of 1864, on 8,448 miles, to 593,362*l*, showing an increase of 311 miles and an increase of 31,854*l*.

Accounts from Mexico report the gross traffic receipts of the line between Vera Cruz and Paso del Macho, 47 miles in length, to have been for the month of April, 6,994*l* 10s 10d; for the month of May, 8,481*l* 2s 9d; and for the month of June, 8,412*l* 7s 7d, equal to 39*l* per mile per week.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Sept. 11.—In the share-market to-day the amount of business transacted was little more than nominal, and the banks and railways were rather inclined to depreciation; and mines and miscellaneous shares were firm. In English railways, North British recovered ½; South Devon declined 1, Great Western ¾, North-Western ¼, and Lancashire and Yorkshire and Midland a further ¼ each. In colonial, Great Western of Canada shares (of both descriptions) were ⅛ lower. In foreign, Great Luxembourg relapsed ⅛, and Paris and Mediterranean declined ½. In America Panama Railroad (2d mortgage) improved 1, and Erie shares (paid up) ¼, and United States (5-20) further declined ¼. In British mines, Wheal Seton advanced 2½, East Bassett 1, and Clifford Amalgamated a further 1. In foreign mines, Frontino Gold improved ⅛, and East del Rey relapsed ¼.

TUESDAY, Sept. 12.—In the share market to-day the transactions were again few, and the banks, foreign railways, and miscellaneous shares closed with a weak appearance. Mines and American securities were, however, firm, and the other descriptions were without alteration of tone. In English railways, North British further advanced ½, Great Western recovered ¼; and ditto (South Wales) declined 1. In colonial, Calcutta and South-Eastern receded ½. In foreign, Northern of Buenos Ayres declined 1, and Sambre and Meuse and Lombardo-Venetian ⅛ each. In American, Marietta bonds advanced 1, and Erie shares (paid up) further 1¼. In British mines, East Lovell improved ½, and Clifford Amalgamated a further ½. In foreign mines, East del Rey recovered ⅛, and Yorke Peninsula improved ⅛, and Frontino Gold a further ⅛.

WEDNESDAY, Sept. 13.—In the share market to-day a very small amount of business was done, and the only description which showed any average alteration in the closing prices was English railways, which were rather firmer, and of which Great Northern (A stock), Blackwall, and Metropolitan advanced 1 each, Great Southern and Western (Ireland), 5, South-Eastern ½, and North British a further ½; and Bristol and Exeter receded 1. In colonial, Great Western of Canada shares (paid up) improved ⅜, and ditto (new) ¼; and Madras (4½ per cent.) and ditto (4½ per cent.) declined 1 each. In foreign, Dutch-Rhenish were ¼ better, and Lombardo-Venetian a further ⅛ lower. In American, Erie shares (paid up) further improved ¼.

THURSDAY, Sept. 14.—In the share market to-day there was a little more activity, the transactions being chiefly in connection with the settlement in the middle of the month, which takes place to-morrow, and nearly all the descriptions showed a tendency to firmness, in which respect British mines were the only exception. Of English railways, Caledonian and Great Eastern advanced 1 each, North-Eastern (Berwick), ditto (Leeds), and ditto (York), ½ each; Manchester, Sheffield, &c., ¼, North British a further 1, and Great Northern (A stock) and South-Eastern a further ½ each; and Metropolitan District (paid up) declined ½. In colonial, Great Western of Canada (6 per cent. bonds) improved 1, and ditto (new shares) a further ¼. In foreign, Lombardo-Venetian recovered ⅛; and Paris and Mediterranean improved ½, and Antwerp and Rotterdam, Great Luxembourg, and West Flanders ⅛ each. In American, the several descriptions of Atlantic and Great Western improved 1 each. In British mines, North Wheal Crofty receded ⅜, and Clifford Amalgamated a further 1. In foreign mines, Frontino Gold further improved ⅛.

FRIDAY, Sept. 15.—The railway market was firmer to-day, and an advance, ranging from ¼ to ¾ per cent., took place in some of the principal lines. The settlement was completed this afternoon. Great Western of Canada Railway shares were in demand and improved in value. Indian and foreign lines showed no movement.

During the week ending Sept. 13, the imports of the precious metals were:—Gold, 198,838*l*; silver, 155,404*l*. The exports were:—Gold, 185,307*l*; silver, 64,543*l*.

COUNTRY AND TOWN Residences, Landed Estates, Investments, Hunting Seats, Fishing and Shooting Quarters, Manors, &c.—BEAL'S REGISTER of the above, published on the first of each month, forwarded per post, or may be had on application at his Offices, 209 Piccadilly, W. Particulars for insertion should be forwarded not later than the 28th of each month.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West, N.W.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

WESTERN GRAMMAR SCHOOL, Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

HUMIDIC COPYING BOOK (Patent) does not require damping, produces instantaneously copies of letters, invoices, &c. when written with copying ink, and avoids the trouble of wetting every leaf as hitherto. Price, style, and size, as the old style of letter copying book.—NISSEN and PARKER (sole proprietors), Stationers, 43 Mark lane, London.

IMPORTANT ANNOUNCEMENT.—JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

Just published, 1s. Illustrated, Second Edition.

THE HEAD AND HEART LEGACY.

"Possessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, 'Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"This is a work quite sui generis. It is quaintly written, but is full to an overflow of the wisdom of experience and the impulse of virtue. To all who have 'heads and hearts' we commend this singular 'legacy.'"

London: Tweedie. 337 Strand.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practioner."—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

ANGLO-AUSTRIAN BANK.—

Notice is hereby given, that this Bank will be prepared to pay on and after the 15th of September, out of profits of the current year, the sum of 3*s* per share, equal to 5 per cent. per annum, free of income tax. The Directors desire to explain that the rate of the present payment has been fixed at 5 per cent. (instead of 6 per cent. as paid in October, 1864), solely in order to conform to the terms on which the shares of the Bank are dealt in on the Vienna Bourse (viz., with 5 per cent. accruing on them).

The provisional shares are now in course of preparation, and notice will be given when the same will be ready to be exchanged against the Scrip Certificates.

F. BREUER, General Manager.

BAY OF HAVANA & MATANZAS RAILROAD (in the Island of Cuba).

Loan of £400,000 sterling, in bonds of £100, bearing interest at 7 per cent. per annum, payable half-yearly in London.

AGENTS.

In London—Messrs J. Henry Schroder and Co.
In Havana—The Bank of Commerce, Francis Fesser, Esq., Manager.

This Company was formed in 1857, obtained its concession the same year, and in 1861 the main road was completed from Regla, in the Bay of Havana, to Matanzas, a distance of 54 miles.

Since then branch lines of considerable value have been constructed.

The cost of construction to this date is £1,056,000; of this sum £448,000 was raised upon shares, subscribed in the Island.

£250,000 was raised in London, in 1861, by a first mortgage loan, bearing 7 per cent. interest, and repayable by the operation of a sinking fund of £25,000 per annum, commencing 1867, which will redeem the entire loan in 1876.

£100,000 was similarly raised in 1863 for the construction of two branch roads, secured by a second mortgage on the road, and guaranteed by the Bank of Commerce, repayable by the operation of a sinking fund of £4,000 per annum, commencing in 1873.

A considerable portion of the remainder of the capital has been supplied from time to time out of the earnings of the road.

The results of the undertaking have been very satisfactory, and show the following returns:—

	Gross Receipts. £
1862	100,700
1863	122,000
1864	143,000
and 1865 gross receipts from January to June, £92,000 against same period 1864	82,000

The Bay of Havana and Matanzas Railroad Company has now effected the purchase of the Coliseo Railroad, running from Matanzas to Bemba, a distance of 35 miles, a very valuable road, and of immense importance to the Bay of Havana and Matanzas Company, inasmuch as it is in direct junction with that road at Matanzas, traversing a district rich in sugar produce, and being connected at Bemba with the Cardenas and Jucaro Railroad, becomes a section of the central road of the island, which will very shortly reach Villa Clara by the completion of the Cardenas and Jucaro Railroad.

The returns of the traffic of the Coliseo Railroad are as follows:—

	Gross Receipts. £
1860	49,100
1862	59,580
1864	71,200
and the returns of 1865 from January to May 20 £49,000 against 1864 same time	45,000

To complete this purchase the Bay of Havana and Matanzas Company desire to raise a loan in London of £400,000, bearing interest at 7 per cent. per annum, payable half-yearly in London.

As security for this loan, the Bay of Havana and Matanzas Railroad Company will effect a first mortgage on the Coliseo Railroad, its rolling stock, appurtenances, and all properties; and also a mortgage on the Bay of Havana and Matanzas Railroad and its branches, subject only to the existing mortgages of £350,000, of which the first mortgage of £250,000 will be paid off entirely in 1876, by the operation of the sinking fund which commences in 1867.

The property thus mortgaged is as follows:—

The Coliseo Railroad to be purchased out of the proceeds of this loan, producing a gross revenue in 1864 of £71,200.

The Bay of Havana and Matanzas Railroad and its branches, costing £1,056,000, producing a gross revenue in 1864 of £143,000 (subject only to the above-mentioned mortgages).

It will be noticed that the revenue of the Bay of Havana and Matanzas, as well as that of the Coliseo Railroad, has for some years been steadily increasing at the rate of 20 per cent. per annum, and it is beyond a doubt that the amalgamation of the two roads, by a natural increase of traffic and a large saving of expenditure in the administration, will produce a far larger revenue, and may be fairly estimated for the coming year at £250,000 gross, or fully £100,000 net revenue.

For the repayment of this loan a sinking fund is arranged for, whereby £20,000 is to be paid off annually, either by the purchase of bonds or public drawing, its operation to commence in 1877, by which time the first mortgage loan of £250,000 will be entirely redeemed.

The bonds will be issued in sums of £100, and bear interest coupons, payable 10th June and 10th December, at the counting house of Messrs J. Henry Schroder and Co.

The first coupon will be payable 10th June next.

The subscription price is 90 per cent., payable as follows:—

£5		on application.
25		on allotment.
30		on 10th November.
	£30 0	
Less	14	interest at 7 per cent., per annum upon previous instalments.
29 6s		on 10th December.

Interest at 5 per cent. per annum will be allowed for prepayment of any of the instalments.

Applications for an allotment to be made to

Messrs J. HENRY SCHRODER and CO., 145 Leadenhall street,

or to the Brokers,

Messrs LAURENCE, SON, and PEARCE, No. 7 Angel court, Throgmorton street.

145 Leadenhall street, London, 7th September, 1865.

BAY OF HAVANA & MATANZAS RAILROAD (in the Island of Cuba).

Loan of £400,000 sterling.

Notice is hereby given, that the Subscription Lists for the above Loan will close on Wednesday next, the 20th inst., at 12 o'clock.

J. HENRY SCHRODER and CO.

145 Leadenhall street, London, September 16, 1865.

FIVE PER CENT. DEBENTURES of the DUTCH MORTGAGE BANK of AMSTERDAM.

The coupon of the English series (K) of the Five per Cent. Debentures of the Dutch Mortgage Bank, falling due on the 1st of October next, will be paid at the rate of £1 5s each, after that day, at the Counting House of Messrs G. and A. Worms, 41 Threadneedle street, where lists may be obtained.

Coupons must be left three days for examination.

London, September 15, 1865.

LOANS ON DEBENTURES.

JOHN BROWN AND COMPANY (Limited).

Capital, One Million, in 10,000 shares of £100 each.

The Directors are prepared to receive LOANS, for periods not exceeding seven years, at five per cent., on security of their DEBENTURES.

The security consists of uncalled capital, to the extent of £600,000, with all the extensive and valuable property belonging to the Company. It affords a most ample and safe investment for trust and other moneys, all the shares being held by responsible persons. Interest payable half-yearly.

Apply to the Secretary, at the Company's Offices, Atlas Steel Spring and Iron Works, Sheffield.

JOHN HEWETT, Secretary.

THE

TRANSATLANTIC STEAMSHIP COMPANY (Limited).

Capital £800,000 sterling.

First issue 10,000 shares of £50 each.

£1 deposit on application; £4 on allotment.

It is not anticipated that over one-half of the capital will be called up within the next twelve months. In the event of the desirability of an extension of the Company's operations, either by additional steamers for the New York service or for the South, the Directors will consult the proprietary as to whether the same shall be provided by further calls or by an issue of additional capital.

DIRECTORS.

Captain Charles E. Mangles, Chairman of the Royal Mail Steam Packet Company, and of the London and South-Western Railway.
Russell Gurney, Esq., M.P., Deputy-Chairman of the Royal Mail Steam Packet Company.
Charles Capper, Esq., Chairman Southampton Dock Company.
George Moffatt, Esq., M.P.
John Hopton Forbes, Esq., Director Southampton Dock Company.
George Hunt, Esq., Chairman Hampshire Banking Company.

(With power to add to their number.)

BANKERS.

London—Messrs Glyn, Mills, Currie, and Co.
Southampton—The Hampshire Banking Company.

AUDITORS.

Messrs Chadwick, Adamson, M'Kenna, and Co.

BROKERS.

Messrs Hutchinson and Sons, Angel court, London, E.C.

SECRETARY (pro tem.)—J. H. Vincent, Esq.

SOLICITORS.

London—Rowland Miller, Esq., 2 Copthall court, E.C.
Southampton—Messrs Sharp, Harrison, and Sharp.

TEMPORARY OFFICES

London—9A New Broad street.
Southampton—Canute road.

PROSPECTUS.

The Transatlantic Steamship Company (Limited) is formed under the auspices of the important interests connected with Southampton, for the purpose of establishing a line of first-class passenger and cargo steam ships between Southampton and New York, for which there is now an admitted necessity.

Southampton, from its central position, its close proximity to London and the continental ports, its safe and easy access in all states of the tide, possesses unrivalled advantages for the American trade.

The Southampton route to America is very imperfectly served by the present lines of steamships under foreign flags, which touch at Southampton from Hamburg and Bremen on their way to New York, and clear out with immense freights of German, French, and British manufactures, and large numbers of passengers of all classes, and are eminently successful.

Pending the construction of the necessary ships, the Directors will be in a position, if needful, to open the traffic at an early date by means of existing steamers, which may be chartered or purchased for the service.

The proposed capital is considered adequate for the immediate purposes of the New York service; but, as operations in connection with the Southern ports are also contemplated, the Directors will take advantage promptly of any opening that may arise, to establish a line to a Southern port, by steamers expressly adapted for that service, so soon as circumstances may justify the step.

FORM OF APPLICATION FOR SHARES.

No. (To be retained by the Bankers.)

To the Directors of the Transatlantic Steam Ship Company (Limited).

Gentlemen,—Having paid to your Bankers the sum of £ , being a deposit of £1 per share on shares in the above Company, I hereby request that you will allot me that number, and I agree to accept such shares, or any less number you may allot to me, on the terms of the prospectus; and I agree to pay the deposit due on allotment, and to sign the Articles of Association of the Company when required, and I authorise you to insert my name upon the register of members for the number of shares allotted to me.

In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

UNITY OR PLURALITY OF BANKS OF ISSUE.

THE controversy upon the issue of notes which at intervals appears everywhere from time to time upon the Continent bears upon a different point of the currency question to that which the infinite discussions as to the Act of 1844 have made so vital in England. Sir R. Peel thought it wise to separate the office of issue from the business of banking. He divided the Bank of England into two halves—one charged with the first, and the second occupied with the other. He allowed no new bank of issue to be established; he confined within an authorised limit the country banks which he could not abolish. It will be admitted both by the friends of the Act of 1844 and by its enemies, that its very principle is the entire division of banking proper—the receiving of money and lending of money,—from note issue—the creation of money. The former was to Sir R. Peel a trade like another trade; the latter a public function to be carried on as much as might be on behalf of the State and for the State. But on the Continent—we do not speak of individual or theoretical economists, but of broad practical discussion—the idea that note issue is a public function is hardly mooted or discussed. The question as it now comes up in France, as it now comes up in Switzerland, as it is discussed in the Paris papers, as it is discussed in the *Journal de Geneve*, is not, ought issue to be separated from banking? but what sort of banker ought to issue? It is assumed that some banker must issue. The idea of an issue department does not present itself. The critical issue—the issue on which combatants join so eagerly—is, ought many banks to issue or ought only one to issue?

M. Coullet, as we showed a fortnight since, has reviewed this subject with great care and great dispassionateness. He maintains that the function of issue ought not to be separated from that of banking; but he also maintains that the bank which issues ought in each country—in each political division of the world—to be one and simple. We are very decidedly of the opposite opinion. We put aside here all questions as to the function, or duty, or position of the State as to the note currency. We take the question as M. Coullet puts it, and as every practical continental writer puts it. We say, it being granted that *some* banker should issue notes, it is better that many should do so than that one should do so.

The best, the only reason for entrusting the function of issue to a banker at all is that it develops banking. In the earlier stages of commercial civilisation, it is very difficult to make real banking—the taking in of deposits and the lending out of deposits—profitable; and the reason is that people will not make those deposits. Credit is immature; no one with real gold and real silver much likes to let them out of his possession. All over the Continent this is the difference which strikes a competent English observer. You see railways as good as in England; you see great manufactories, if not as good, nearly as good as in England, but you do not see *banks* as good. You do not see such diffused and ramified credit; you do not see in every little town a receiving house, or two or three receiving houses (for we have as many in England), in which the little savings of the neighbourhood are concentrated, and from which they are transmitted and issued to profitable employment. In England and Scotland these were created by the local issuers. They subsisted by the issue of notes when there were no deposits to be had; they advertised themselves by the issue of notes; they got deposits at last. Thus was created the London money market, and those who want to create another great money market must begin in the same way with the small country savings. Somehow or other you must attract them to the great centre. Local issuers can effect this; a single bank acting from the metropolis would be ruined if it tried. The Bank of England would have been ruined if, at the beginning of this century, it had established branches wherever there were banks of issue, then living on the profits of note issue mainly, but now fed by copious deposits, and regarding notes as but a secondary, subordinate, and unincreasing source of profit.

This great use of plurality of issuers is not noticed by M. Coullet, and it is not disgraceful to him to have neglected it. It has been overlooked by many writers of great and deserved reputation. Our current political economy has been too much made in cities; our theorists live there; our greatest bankers live there. Few writers have been out in petty towns, or seen how deposits dribble thence to the great centre, and how first they were rendered possible.

But though M. Coullet has not noticed this great advantage of diffused issuers, he has given us an excellent enumeration of all the advantages of a single banking issuer. What, then, are these?

"The first advantage," he tells us, "in the order "of importance is the absolute security which ought "to follow to the holders of notes from the unity of

Digitized by Google

"the issuing bank. This security is obtained by the "severe regulations which the State has a right to "impose, and which it imposes [in France, as we understand] "upon an establishment invested with an exclusive right of "issue." The tutelary superintendence as shown he explains in several points. The State may require that the bank of issue shall possess a considerable and available capital. The sort of business it may undertake may be strictly defined. State functionaries may be employed as its rulers, or as part of its rulers. But we do not admit that the holder of a note emitted by a monopolist issuer need be better off than one of a note issued by several issuers. *All* issuers may be required to deposit security (so much of Government stock and so much actual coin) for what they issue, and this is a far better security than any "capital." The amount of capital is a very insufficient criterion of the goodness of a bank. It may easily be too small, but it may easily also be too large; and if it is too large it is excessively dangerous, for in order to pay a dividend on it, the bank is apt to embark in business of a speculative character, which brings augmented profits the first year and overwhelming losses in after years. And as to the State's regulating the business of a bank, we would as soon employ a professional criminal as a policeman. The Government of a country is almost always the greatest borrower in the country, and the last person therefore to be trusted with the business of lending. It would be sure to lend to itself, and even without a sinister purpose, how can statesmen say what bills are to be discounted or not discounted, or what stock lent on or not lent on, or what personal security taken or refused? M. Coullet cites the Bank of England and the Bank of France. The Bank of England is independent of the Government. If M. Coullet doubt it we would refer him to the letters of the Bank to Mr Pitt during the French war. Mr Gladstone could no more command or control the Directors of the Bank of England, than he could control the Directors of the Great Western Railway. And as for the Bank of France, the only thing which injures its credit in Europe is the idea that the Government looks after it and will not *always* let it act according to its wise intentions and the rules of political economy. To give the State, as such, a command over the great central bank, is to place a dangerous depredator in guard of invaluable gold.

M. Coullet himself, as it appears to us, rather inconsistently enumerates this proximity to the Government, this danger that a Government may so get an unfit loan, as one of the defects of the monopolist issuer, and has nothing to say in reply to it, but that a good Government—he ought to have said a perfect Government—would not make use of it. But a monetary system which so tempts Governments, that can only be used under a perfect one, cannot be recommended for indiscriminate adoption. We must take Governments as they are, and as they are, they are the last whom we should wish to decide what loans should be made, and what loans not made, to themselves.

M. Coullet's second reason is still more remarkable; it is as follows:—"By means of the unity of the bank note, the "circulation becomes much larger than under a system of many "issuers. The whole country accustoms itself to the notes of "the single bank, and they become in time an instrument of "exchange as well trusted and as general as coin itself." The truth we believe to be that under the guidance of a monopolist issuer, notes are few at the stage of economical progress when they ought to be many, and many when they ought to be few.

Take two countries—country M with many issuers, and country S with a single issuer. If country M be properly prepared, what happened to England and happened to Scotland will happen to it. At the first stage notes will be many in proportion to deposits; they will grow rapidly in number altogether; they will rapidly supersede and take the place of metallic circulation. But at this stage in country S the single issuer will have made no way. He will not be able to get his issues into circulation; he will not introduce banking by means of his notes; he will not displace coin by means of his notes; his issues will be few and scanty, and restricted to the vicinity of the central issue and a few branches. At this stage country S will have far less notes then country M. But take the two countries twenty years after. In country M the many issuers will have developed country banking. Note issue will have become a trifle—an inconsiderable item as compared with deposit banking. Everybody would keep a banking account, and every note issued by Bank A would find its way into Bank B at once and be asked for payment. Notes at this stage of economical progress are very likely to become absolutely less in number. And they always become relatively less, less in proportion to the wealth of the country and to deposit banking. But at this stage, probably the single issuer in country S has just got a good many notes. After twenty years of issue and reissue, he is beginning to get a circulation. Very likely, most probably, he will have absolutely more notes in circulation than the plural issuers in country M. There will be no deposit accounts into which his notes will be paid in: no rival bank to demand payment for them. Absolutely they *may* be less; relatively they must be less. And this is what we meant by saying that the issues of the single issuer are large at the economical stage when they should be small, as well as small at the stage when they ought to be large.

Thirdly, M. Coullet justly, observes that a single issue by a bank well known in a country is taken throughout the country, whereas each local issuer is only known in his locality. He remarks, and justly also, that a paper currency universally accepted is far better than a bit-by-bit currency only taken here and there. But he omits the remark, and does not seem to have considered, that the advantage belongs not only to a single uniform circulation, but to all circulations *uniformly secured*. If the same proportion of *rentes* and notes were required from the note issuers of Alsace and the note issuers of Normandy (and that security was popularly accepted as enough), the notes of the Alsace bank would be taken in Normandy, and those of the Norman bank would be taken in Alsace. The uniformity looked for by the holder and user of a note is unity of liquidation; it is not historical as to the place of issue, but prospective as to the date of payment.

The last peculiar advantage which M. Coullet ascribes to a single issue is one which we do not much think of in England, but which a lamentable experience makes all French economists force into great prominence. After 1847, it was possible to make the notes of the Bank of France legal tender, for much was known of it by the Government and by every one; but it was not possible to make the notes of the small provincial banks legal tender. They had to stand the brunt of the crisis by themselves, and they wound up and made arrangements with the Bank of France. With this experience before them, so close and so painful, French economists rightly think that in France it is a necessity that every authorised circulation should be capable, at a crisis on the morrow of a revolution, of being made legal tender. And M. Coullet claims this advantage as belonging exclusively to his client, the single issuer. But it belongs also, and belongs even more justly, to a sufficient system of *secured* issue. All well based issues, all issues which everybody knows must be paid, could be made a legal tender when needed. The security being specific and notorious, there would be far less objection than in the case of a single issuer like the Bank of France, which always, after a crisis, does and must make advances to the Government.

These positive grounds of preference, which are all that M. Coullet sets forth on behalf of the single issuer, are therefore untenable; but he also debits the plural issuers with several defects, and these we will examine hereafter.

THE FENIAN ARRESTS.

We have not the shadow of a doubt that the Irish Government have acted as wisely, as they have assuredly acted vigorously and skilfully, in the steps they have taken to tread out the Fenian folly. We are not, of course, acquainted with the special motives which induced Lord Wodehouse to take measures so prompt and so decisive, nor of the information which is no doubt in his possession; but we can easily divine the former, and the latter is certain to be ample. Happily, Irish conspirators are so habitually leaky, and many of them so incurably venal, that in all seditious movements and inchoate rebellions the authorities are as well informed of the plans and designs of the conspirators as the conspirators themselves. Some cannot help blabbing, and some are always to be bought, and usually offer themselves for that purpose. In a few days probably we shall be made aware, by the preliminary legal proceedings taken against the plotters, of the precise nature of their overt acts and of the extent to which the Fenian sedition has spread:—at present we must be content

Digitized by Google

with knowing that nearly every one applauds the measures that have been adopted.

Indeed, there was no lack of reasons—reasons both of mercy and of policy—why a movement at once so silly and so mischievous, although so little formidable, should be crushed in its cradle. Though not dangerous to the Government, it was very dangerous to the tranquillity of the country;—and what Ireland wants above all things is tranquillity. The first and most indispensable condition of returning prosperity is that the population should think of business and agriculture, and not of politics; should busy themselves with their duties and not with their grievances; should seek the cure of their misery in the cultivation of the land, and not in the overthrow of the Government. Rows and outrages, faction fights, Belfast riots, violences against landlords, middle-men, and members of the hostile creed, are so much more congenial to the Irish temper than steady industry, that as long as these continue—and nothing multiplies them or gives zest to them like a spice of sedition and conspiracy—there is little prospect of any general improvement. To keep the peace is the first duty of every Government,—and the first duty of every Irish Government more peculiarly. But there was a further reason of the same sort why Lord Wodehouse should not suffer the affair to go any further without interruption,—he owed protection to the well-disposed inhabitants of the country, whom the unchecked excitement about Fenianism was beginning seriously to inconvenience and disturb. We find it difficult over here to realise the sort of habitual insecurity in which decent people are compelled to live in many parts of Ireland,—insecurity which makes them barricade their doors and windows, and avoid going out at dusk or after nightfall. But we can all of us understand how alarmingly this feeling must be aggravated when in consequence of this new nonsensical agitation, houses are visited and ransacked by bands of ruffians in search of arms to aid their rebellion, and when gentlemen are knocked down or have to ride for their lives because they have stumbled unawares upon a drilling camp of Fenians. The ordinary and normal turbulence and lawlessness of the lower Irish is bad enough, but it becomes ten times worse the moment it is taken in hand by any sort of *organisation*. Therefore we are satisfied that Lord Woodehouse did not act one hour too soon.

Moreover, the Irish, less than almost any other people, can afford to be let alone in their folly. It may be doubtful whether it is ever wise in any Government to allow its laws to be broken and its authority set at defiance with impunity; it certainly would not be wise in an Irish Government. The Irish easily excite themselves: they amuse themselves with talking and singing rebellion, vaguely and with no definite intentions, till by degrees they begin to think of acting it too, and find themselves at last involved in treason out of mere wantonness. They are fond of playing with fire and with edge-tools, and if allowed to do so without interruption, will go on till they burn themselves or cut themselves, and perhaps others also. The silence and inaction of the authorities, even when that silence and inaction proceed from contempt or from compassion, encourage them to venture further, till it becomes too late to draw back. They cannot understand, any more than an Asiatic, that quiescence in an insulted Government which springs from the consciousness of irresistible strength;—forbearance they always misinterpret as weakness or as fear. Every day that the Fenian sedition was suffered to go its way without interruption, some score of fresh fools would have been drawn into its ranks;—therefore it was kind as well as politic to move. But there was more than this:—if no people are more encouraged in evil doing by the forbearance of the executive authorities, no people, on the other hand, are more easily discouraged and put down when met vigorously and face to face. The most solid Hibernian phenomena of this sort *vaporise* instantly when assailed with spirit. It has always been so:—the instant that Government exchanged its patient and passive attitude for one of action and determination, the repeal agitation collapsed at once, and O'Connell in prison soon became insignificant enough to be let out on a legal quibble. The rebellion of 1848 evaporated into still thinner air at the first touch of a policeman's wand, and we all remember the cabbage garden finale of Smith O'Brien, his merciful sentence and his half-contemptuous pardon. We have no doubt it will be the same now; some of the leaders will scurry back to America in the hold of a steamer; others will languish and sober a few months in gaol; three or four perhaps may go to Bermuda or Fremantle,—and in an incredibly short time the whole affair will be forgotten.

It is curious to read the comments of the French journals on the Fenian sedition and arrests. Most of them are rational enough; the *Debats*, the *Constitutionel*, the *Presse*, and the *Avenir* concur in condemning and despising the movement and its supporters. The *Debats*, probably with a good deal of truth, suggests that the origin of the menaced disturbances are to be traced to the disbanded Irishmen who have lately been serving in both armies of the United States, and who are now returning in numbers to seek congenial occupation in their native land rather than resume regular industry in America. But the *Siecle* talks all the old exploded nonsense; the *Pays*, though admitting that an outbreak would have no chance of success, seems to think that misery has caused it and might almost excuse it; while the *Patrie* indulges in extravagances like the following:—

> There are people in France who entertain a blind enthusiasm for England. Alas! The persecutions of which Ireland is about once more to be the victim will soon show what we are to think of that asylum of liberty and progress! For the third time within less than a century the Irish question appears to be about to disturb England in her tranquillity. To the insurrectionists of 1798 and the agitators of 1848 have succeeded this year the Fenians, whose powerful organisation is increasing and spreading everywhere. The English Government has, indeed, anticipated the explosion of the vast conspiracy got up against it both in Ireland and America. But will the measures adopted in Dublin defeat the efforts of the "Irish brethren?" The association of the Fenians is no longer isolated. It is a national party which England has to deal with now, a party which has auxiliaries who make it the ally of the most formidable adversaries of the Britannic rule..... While the association includes as yet only (!) from 250,000 to 300,000 members in Ireland, there are certainly more than a million in America. Women also form part of the union. The organisation of these female associations is similar to that of the men's societies, but are not yet so numerous, notwithstanding the meetings which they hold, the speeches they deliver, and the ardour they contribute to the cause. They form one of the two great divisions of the association, which is divided into the Fenian "Sisterhood" and Fenian "Brotherhood." A supreme council, called the Head Centre, directs all the operations of the society, which is divided into an infinite number of lodges. All the members of the fraternity belong to one of those sections, and these are each directed like an American meeting or one of the former French clubs, by a president and a committee chosen in the assembly. All those clubs are in correspondence with each other. In the State of Rhode Island, the smallest in North America, and of which the population does not exceed 175,000 inhabitants, fourteen Fenian clubs were recently counted, each of which bore the name of one of the former patriots of Ireland or one of the most picturesque and historical places in the country.

The following genuine bit of Hibernianism come to us from America. It is from the published address by the Fenian Brotherhood at Springfield, Illinois, to the people of the United States:—

> Out brothers at home are organised in a manner far superior to that of any oppressed people we have read of. The day of Provisional Government is established; an army of 200,000 men is sworn to sustain the officers, American and Irish, who have served with distinction in your service. They are silently moving into Ireland to assume the control of active operations, to be inaugurated sooner—much sooner—than any of you can believe. All they require now are arms, to enable them to meet the enemy on something like equal terms. A large sum of money is required, and, without hesitation, we appeal to you for that assistance, never heretofore withheld from an uprising people.

THE EFFECT UPON THE NORTH OF THE CONQUEST OF THE SOUTH.

THERE are two aspects under which the result of the American civil war deserves to be regarded; first, in its social aspect, and in relation to the condition of the negro; secondly, in its political aspect, and in relation to what the Americans themselves deem of greatest interest,—the restoration of the Union. As to the first, as to the social aspect, we can hardly doubt that the result of the war must be beneficial. The condition of the negro before the war was so bad that it can hardly help being better after the war. The present generation of negroes may suffer more, but the ultimate state of the negro race must be better. No change could make it worse. Before the secession, and while no one's partialities were enlisted for North or South, every one who had studied the subject believed that American slavery was an evil of the first magnitude. As to slavery "in the abstract," as to the use of slavery in other forms, as to the part which slavery has played in history, there were many opinions, but there was only one opinion upon this particular concrete case. That negroes should be worked in gangs like cattle; that they should be bred in one State and sold in defiance of all family

Digitized by Google

ties; that they should be consumed, as the phrase went, that is, worked to death when pecuniary motives suggested it, and their master's interest needed it; that they should be refused the right of marriage, and therefore excluded from the first elements of morality; that they should be refused a hearing against any white man in courts of law, and therefore be subject to almost unlimited tyranny from any white man without protection by the law,—was never defended and hardly ever palliated by any one. Every considerate man must admit that such evils are so intolerable that they cannot be replaced by greater evils. However gloomy the prospects of the negro now may be, they are better certainly than in 1859.

But if we consider the present state of America from what the North have always believed to be its principal aspect, our judgment is far less sanguine. A war for the restoration of a Federal Union seemed always an absurd war. It seemed like beating a man to make him like you. Every thoughtful man used to ask how the North would manage the South if the Union were restored. Now the North has been successful, and the Union has been restored, every thoughtful man must anxiously observe how it *is* managing the South. The fortune of war has decreed the restoration, not indeed of conjugal but of united rights, how then will the *ménage* go on? We doubt if a legal decision that a family were to live together ever made a happy family, and just so we doubt if a military decision that two free States were to be united ever made a pleasant free State. One monarchy may conquer another, one kingdom reduce another to subjection. All history is full of such things. But there is no instance in history where the stronger part of a free commonwealth has reannexed the weaker part without a heavy penalty of instant trouble.

In America, the actual difficulties are greater than usual. Commonly a defeated party has no legal organisation. It is broken up by the fortune of the war and force of events, and there is, at least for the time, an end of it and its action. But in America the law provides an organisation for the defeated combatants. The object of the North was to reunite the United States. But the Southern States were the rebels. As soon as the Northern object is effected, the Southern strength revives. The South comes back into the Union organised and fortified by the Washington Constitution, which the North fought to reanimate and uphold.

We shall see this more clearly if we look at the three alternatives which are massed together in the vague phrase, "reconstruction of the Union," but between which every one who tries in practice to reconstruct that Union must inevitably choose.

First. There is the solution of the difficulty to which law and usage point, and to which Mr Johnson is inclining. According to this scheme, the States are to come back into the Union under the amended Constitution. In accordance with its fifth Article, three-fourths of the States will add to the Constitution an amendment explicitly and clearly abolishing slavery within the Union. This new clause, this alteration so agreed to will be binding on all the other States, just as all former alterations and all other new clauses have been binding. It must be accepted by each State. But when accepted, each State ~~again becomes~~ a political unit. It has all its rights, no matter whether it is North or South, whether it is victorious or beaten. By the old laws of the South, negroes, even if free, are excluded from the franchise; and the reanimated and reintroduced State of the Union is, therefore, solely composed of rebellious whites, who have striven as far as they could not to be reunited, who hate those who reunited them, who cannot be a loyal integral part of a State to which they only belong upon compulsion.

Upon the now primary and urgent question of American politics, the imposition of taxation and provision for the interest of the debt, the Southern vote—the votes of the Southern rebels—*must* be opposed to the true interests of the recombined Union. The interest of the Union, of course, is to pay the debt; the inclination of the South not to pay it. The correspondent of the *Spectator*,—a typical Northerner, a Northerner most eager for the war and the Union,—puts it neatly. He tells us that, in private, Southerners admit that as soon as they can they shall "go in" for a repudiation of the war debt. They say they "are not so fond of being "licked as to pay a man for licking them." And, without specific testimony, it would be childish to suppose that the Confederates, who have seen their own debt dishonoured and unpaid, would now be tamely and willingly taxed to pay the Federal debt.

Upon this great question and others which much arise as events develop and history goes on, the North have only succeeded in acquiring a difficulty. They have been successful in making votes against themselves. And the almost amusing and perverse result is, that the South is now entitled to more votes than those to which it used to be entitled. Formerly, in reckoning the population of the different States as a basis for adjusting their comparative political power in the Union, a slave only counted as three-fifths of a man; but now the free negro, though he has himself no vote, counts as a whole man; 500 slaves used to reckon only as 300 in the all-important sum, but they now reckon as 500. Accordingly a white man in a Southern State—where there are many blacks—a conquered rebel—will have more power than a white in a Northern State—where there are few blacks—a victorious Unionist. According to a trustworthy American authority the result will be that "every hundred of the white inhabitants of "South Carolina will have as much power through their "representatives as two hundred and forty of the people of "Iowa; one hundred white men in Mississippi will equal two "hundred and twenty-three men in Wisconsin; one hundred "white men in Louisiana will equal one hundred and ninety-"eight in Maine; one hundred white men in Alabama will "equal one hundred and eighty-three in Connecticut; and "one hundred white men in Alabama and Louisiana together "will equal one hundred and eighty-nine in Indiana." If therefore the most simple and legal alternative be ultimately adopted, the North will have been successful not only in reannexing an adversary, but also in strengthening that adversary—not only in combining hostile votes, but in adding to those votes.

But, secondly, such as desire to escape so curious and perverse a result, and such, too, as do not wish to see the fate of the negro in each State given over exclusively to the white population—to the old slave-owners and the "white trash" of that State—propose eagerly at once to give the negroes votes. They are men like others, they say; they are born "free and "equal" like others; and what is more to the propose, the line of colour is not the line of competency—the best negro is doubtless wiser than the worst white man—an educated octoroon of greater political capacity than an ignorant but pure white. If the negroes had votes they would perhaps use them against their former masters; at any rate there would be a chance of their so using them. But what a monstrous result is this of a great and successful civil war! It ends in adding to the national constituency—to the constituency which chooses the President—which chooses the House of Representatives—millions of voters who were slaves yesterday, who are ignorant to-day; who have not a political idea; who never argued, to whom no one ever argued; who may vote one way or may vote the other way; who are an unknown quantity in the Constitution; who are certain to vote upon fancy and by chance, but of whom nothing else is certain.

And it seems that this acquisition of incompetent voters must be purchased by a breach of the Constitution as well as by a civil war. It is altogether less likely that the majority requisite to amend the Constitution would amend it in this sense; that three-fourths of the States would consent to make negro suffrage a *sine qua non* of reunion; that they would enact that no State should have the rights of a State unless it chose that suffrage. And unless the Constitution be so amended, all acts of Congress, all acts of the President, are inoperative and invalid.

Lastly, there is the alternative which several eminent citizens of Boston are pressing upon the President, and which they have defended in a very able document. "It is necessary the negro should have a vote; we cannot recombine the Union without his vote, but he is not fit to have a vote now. *Delay*, therefore, the reconstruction of the Union till he is fit. Educate him, and when educated give him a vote, and then, and not till then, admit his State as an integral part of the Union—until then keep its rights in suspense."

This solution is probably the best which could be chosen, the best which could be suggested; but to what does it come? It amounts in fact to an admission that the avowed, the cherished, the substantial object of the North is for at least a generation—perhaps several generations—impossible. To change a negro slave into a competent political elector is a task needing years; to be begun with the negroes, now children,

Digitized by Google

but scarcely to be completed even with their children. It has been said in Europe a hundred times, and denied in America a hundred times, that if the North were victorious the South must be governed as a conquered dependency—that it must be a "territory" governed from Washington. But the scheme now suggested at Boston amounts to admitting this to be so,—at least for a generation.

This solution, too, seems scarcely legal. If the Southern States adopt the amendment to the Constitution, they have a right to readmission within the Constitution. And this is no legal technicality. America is a country of parties, a country of elections; and the party which believes that at an election it would have the Southern vote, would agitate till it obtained for the South that vote. Only a conclusive national determination could maintain it, and there is no evidence that the mass of those who fought for the Union are as yet agreed to suspend the Union.

In any alternative the difficulties are nearly insuperable,—at least, what in Europe we should call insuperable. Americans may "pull through" as they call it, but it will be at a cost of inconveniences and dangers which in Europe we should fear and dread. Without intending it (at least, for the most part) the Northeners have liberated the negro; without (for the most part) much caring about it, they may benefit the negro; but as far as regards their cherished aim and treasured hope,—as far as regards the reconstruction of the Union, "cursed with the burden of a granted prayer" seems likely to be the motto of those who have achieved it.

ENGLAND AND FRANCE ON SCHLESWIG-HOLSTEIN.

The despatches by Lord Russell and M. Drouyn de Lhuys on the Gastein Convention, which have been published side by side this week, bear the marks of the closest political concert; and no doubt they were permitted to ooze out simultaneously, as they have done, expressly in order that they might evince to Prussia and Austria these marks of political concert. They both point out that two treaties have been broken; they both intimate that even after treaties had been broken, the German Powers might have justified their action, to some considerable extent at least, by substituting the obligations created by the present wants and hopes of the population for the obligations of legal contract regarded as obsolete; and they both indicate with sufficient distinctness that no such substitution has been attempted. The Gastein Convention, M. Drouyn de Lhuys insists,—rather too much perhaps, considering the provisional nature of the Convention,—decrees the *partition* of Schleswig-Holstein against the popular cry for its indivisible union, to which Count von Bismarck may perhaps reply that he contemplates distinctly their ultimate indivisible union—under Prussia. Lord Russell remarks that not one of the popular wishes has been gratified by the Convention of Gastein, and that that Convention consulted nothing but the law of force, and the convenience of the two German Powers. M. Drouyn de Lhuys believes that precedents for such proceedings "must be sought in the darkest ages of history," and that, "substituted for the principles which govern modern so-"ciety, they are an element of trouble and dissolu-"tion;" Lord Russell, that "violence and conquest "are the only basis upon which the dividing Powers "have established their Convention." Finally, both despatches conclude with forbidding the diplomatic agents of either nation to communicate the despatches, which are "solely "intended to acquaint you in what sense to speak" of the Gastein Convention "when the occasion arrives." The Convention being a mere provisional arrangement, the proper time for official protest or intervention is not yet. In the meantime Prussia and Austria are informed pretty plainly, by what we may call a loud "aside," what are the mutual confidences of their most formidable critics concerning the present aspect of affairs. If there is any difference between the two despatches, Lord Russell's is the more reticent, the least threatening in tone. Warned by the bitter complaints of "menaces that meant nothing," he has restricted himself here to pointing out in the gravest way the dissatisfaction which the Convention of Gastein has caused the English Cabinet, and its grounds. He says nothing whatever that could by any possibility be construed into a threat. M. Drouyn de Lhuys' language is undoubtedly nearer the border of menace. We are grateful to Lord Russell for this reticence. Whether we do or do not in future act in concert with France to obtain some better fate for the conquered Duchies than any which Prussia and Austria seem to have in store for them, it is not only wise and dignified, it is almost essential for the exercise of any influence abroad, that we should speak quietly and with self-restraint now. We have, owing to many circumstances, some unfortunate and some not to our credit, got a reputation abroad for using hectoring language which turns out to have no meaning when it comes to the point. Whether we are to adopt the policy of non-intervention in its extreme Manchester meaning, or whether we are still to use our influence from time to time to secure justice for the weaker States of Europe, we shall equally in either case benefit by the reticence of our language when, as at the present moment, anything like menace would be premature and therefore calculated to inspire disbelief. Even in the meantime, and before the provisional arrangement comes to an end, the studious moderation of Lord Russell's language will probably make Count Bismarck more uneasy, and more disposed to give us credit for meaning business, than any hypothetical reference to the future would have done.

For the rest, it is subject of pure congratulation that France and England are once more in close concert on foreign policy. No doubt the views of France and England are not always the same. But France gives up much to secure our alliance, and the residuum of self-interested policy which will always tinge the purposes of a new and half-established dynasty is more effective in managing selfish Powers than all the disinterested remonstrances and threats of a Power like England, which has no motive for aggrandisement. No Power risks *much* in a cause purely disinterested. All the world knows that, wherever a nation's sympathies may be, it takes some sharp touch of either fear or hope to set those sympathies working with any effect. If the Power conjoined with us in intimating our displeasure to Prussia were another as insulated or disinterested as ourselves, Prussia would fear very little. She would know that something more than the spirit of equity is usually necessary to move armies and fleets and vote supplies. The *arrière-pensée* which she well knows must linger in the mind of the French ruler,—the thought that, when once justice assumes the sword, she may use it, not only to execute, but to pay the executioner, and that in her own case that payment may be the Rhine,—will quicken her faith in the sincerity of the French purposes. And as for England, little as we may really wish to go to war, a close alliance once entered into with a Power that does at heart wish it, is not always, as the world noticed in the Crimean war, so easy to escape from. Hence the alliance between France and England is far more salutary than any other. In order to secure us, France is obliged to keep her ambition within limits, and to stretch somewhat the liberalism of her foreign policy. Thus we disarm her of her worst sting, and yet the alliance gets all the influence due to a partnership in which one of the partners has a very deep personal interest. Should France and England together ever submit an ultimatum to Prussia on the Schleswig-Holstein question, we may be sure that ultimatum would receive the most elaborate attention, if not immediate acquiescence. The concurrence of England would ensure its being a moderate and popular ultimatum; the concurrence of France would give it a dangerous meaning. Austria could not afford to fight. She is too poor, too much exposed in Italy and the South, too little interested in these German Duchies, to engage in any great warlike enterprise for the sake of a little territory. Prussia could not afford to fight France and England united,—even to secure two Duchies, a naval port, and a despotic Constitution, when by yielding a little she might satisfy all the claims of popular justice. France and England together might, no doubt, eventually dictate fair terms for the Duchies, if they chose, without any great sacrifice. The risk of war would be very small, the advantages of satisfying the popular sentiment and of preventing a cynical insult to the people of Europe would be immense. There is nothing more dangerous to the peace of Europe than that the peoples should think there is no protection against selfish conquerors. If Prussia be permitted to appropriate, without any view to the welfare of the people, the country on behalf of which she made so many mock-remonstrances to Denmark, an impulse will be given to that feverish popular democracy in Europe—that rage against existing institutions—which sets in motion the revolutionary wave that we have, twice within the last thirty years, seen spread over the Continent. The only point for

Digitized by Google

the Government and people of England to consider is whether they are prepared to carry the new fear of intervention to the point of risking *nothing*, even for a great and pacific end, and with immense chances of success. If they are, then it would be wiser for our Foreign Office to cease expressing its opinions altogether on the conduct of other Governments, and especially to cease from expressing them in that concert with other Powers which produces a natural soreness when we have led them into a line of policy from which we gradually withdraw ourselves. The only true wisdom for our Foreign Office, if intervention is to be finally and absolutely abandoned, would be never to write a despatch at all except on English interests, and completely to avoid every sign or hint of co-operation. But if we are not prepared to go this length,—if, with reasonable certainty of success, we are still prepared to exercise an influence in Europe to prevent the sale and purchase of peoples as if they were cattle,—then it seems to us that we are acting most wisely in drawing closer to France on this miserable German question, and preparing, though with the utmost reticence, to join her in demanding terms for the conquered Duchies which Prussia would not, and Austria could not, voluntarily concede.

IRELAND IN TRANSITION,

THE IRISH COTTIER.

In his admirable "Plea for Peasant Proprietors," Mr Thornton observes that "Ireland is one of the few countries in which "there neither are, nor ever were, peasant properties." The remark well deserves consideration, and, followed up, will be found to throw light on some characteristic features of Irish industrial life.

It would seem that in the progress of nations from barbarism to civilisation there is a point at which the bulk of the people pass naturally into the peasant proprietor condition: it corresponds with that at which the transition takes place from the shepherd mode of life to that of agriculture; peasant properties representing, in fact, the definitive accomplishment of the process of disintegration of joint ownership in land—the form which, as is now known, property invariably assumes in the primitive life of human beings. But into the phase of industrial existence represented by peasant proprietorship, the Irish people have never passed. Those who are acquainted with the history of the country will probably not find much difficulty in understanding the phenomenon. It would seem to be traceable mainly to the particular stage in the growth of the Irish people at which the conquest of the country took place, combined with the wide interval which separated them in habits and ideas from their conquerors. Just about the time at which, in the ordinary course of development, the common tribal property would have been transmuted into individual possession, more or less qualified by tribal claims, of the members of the tribe, the greater portion of the soil of Ireland passed by confiscation into the hands of English owners. These took the place of the native chiefs, but with proprietary pretensions of a far different kind. Those qualifications of strict proprietary right arising from tribal feelings and traditions, which would have bound the native proprietor as firmly as law, were wholly repudiated by his alien successor; and the loose and undefined prorogatives of the tribal chief in relation to the land—in the language of the English law courts, "no estate, but only a "transitory and scrambling possession"—prerogatives which would easily have given way before the growing requirements of the cultivator for a larger interest in the soil—were in a moment, under the flat of English judges, transmuted into the definite ownership of English law. The result was that the natural development of proprietorship in the soil was violently arrested. Ireland has accordingly never known peasant proprietorship; but, instead, has furnished the world with a type of tenure peculiarly her own. "Cottierism" is, we believe, a specific and almost unique product of Irish industrial life.

One of the most curious and unfortunate blunders which have been made about the Irish cottier is that which confounds him with the peasant proprietor under the general description of a representative of the *petite culture*. In fact the two forms of tenure are, in that which constitutes their most important attribute—the nature of the cultivator's interest in the soil which he tills,—diametrically opposed: and the practical results stand as strongly in contrast as the conditions. Mr Mill's definition brings out very clearly the salient features of the cottier *status*. "By the general appellation of cottier "tenure," he says, "I shall designate all cases in which "the labourer makes his contract for the land without the "intervention of a capitalist farmer, and in which the condi-"tions of the contract, especially the rent, are determined not "by custom but by competition." The points to be attended to are the absence of a class of capitalist farmers, bringing the labourer into direct contact with the owner of the soil—a circumstance which separates the cottier from the tenant-farmer of England and Scotland; and, secondly, the paramount influence of competition in determining the rent, which takes him out of the category in which are to be found the metayer of continental countries and the ryot of the East. Bearing these conditions in mind, and looking to the state of Ireland from the time at which the bulk of the land passed into English hands, we shall have no difficulty in understanding how the cottier system arose.

As we have just pointed out, the wholesale confiscations which marked the close of the seventeenth century precluded the realisation, which in conformity to the analogy of other countries would probably have taken place, of a peasant-proprietor *regime*. At the same time the disturbed state in which the country had been held by successive civil wars, preventing the accumulation in any considerable amount of disposable capital, was unfavourable to the rise of a class of tenant-farmers on the modern English pattern. Lastly, it is obvious that between an alien proprietary, just placed in their position through a successful war, and their tenants, there would be nothing either in their personal relations or social traditions fitted to modify in a manner favourable to the weaker party the strict rights established by law. We are thus led by a process of exhaustion to the inevitable appearance of the Irish cottier. Agricultural capital being practically nil; peasant properties precluded by political causes; the basis for a custom—except in the small portion of the country colonised by English and Scotch settlers—not existing; the only possible alternative was that which befel. A pauper population became the cultivators of the soil, dealing directly with the proprietors or their agents; and, unlike what in such circumstances has happened in all other parts of the world, the conditions of the bargain were determined simply by competition.

But we may look at the cottier from another point of view, with reference, less to the essential facts regulating his condition, than to what we may describe as the accidents of his character. A definition, or rather description, of the cottier given by Judge Longfield sets him before us under this light, —as the "cultivator who produces almost wholly for his own "consumption, and pays his rent chiefly in labour." If less scientific than Mr Mill's definition, this is perhaps more picturesque, and has the advantage of calling attention somewhat more distinctly than Mr Mill's to the precise circumstances of the country at the time when the principal development of cottierism arose. That was in the latter half of the eighteenth century, and was connected with the powerful impulse given about that time to the cultivation of cereal crops, to which reference has already, in these papers, more than once been made. As we explained on a former occasion, cereal cultivation necessitates a much larger employment of labour on the soil than pasture—the condition in which the great bulk of the soil of Ireland existed when the movement towards tillage began; and consequently requires a greater circulating capital. But, as has just been said, wealth in this form scarcely at this time existed in Ireland. The landlords themselves, the middlemen, and the few large pastoral farmers, with whom the initiative in introducing the change would naturally lie, were scarcely better off in this respect than the peasantry whom they desired to employ. What then did they do? Silver and gold, food and clothing, they had none; but such as they had they gave. They took the peasantry into their employment on the terms of paying them in patches of land out of which to extract such remuneration as they were able; while, on their part, they consented to receive their rent chiefly in labour; and thus the Irish cottier in his distinctive attributes was born into the world. This being the origin of of the class, it would of course grow with the growth of the occasion which produced it—the extension of cereal cultivation. Two facts will exhibit the rapidity of this movement. An Act of the Irish Parliament passed in 1727 provides that every occupier of 100 acres should cultivate at least 5. It is probable from this that the land under

Digitized by Google

tillage at this time time did not exceed one-twentieth of the cultivable area; and there is no reason for supposing that in the thirty years which followed, this proportion, the Act of 1727 notwithstanding, had sensibly increased; but by the beginning of the present century nearly one-half the cultivable land of Ireland had been brought under the spade or the plough—a progress which represents the growth of cottierism during the same period.

One cannot help remarking here on the intimate connection of the policy of protection with the industrial fortunes of Ireland. As we showed in a former paper, it was mainly to protection that the excessive multiplication of the Irish population beyond the means of subsistence naturally available for them was due; and it now appears that the same principle is not less responsible for the peculiar mode of existence which the great mass of this vast population adopted. The factitious demand for labour occurring at this time was due to protection; and, in the absence alike of peasant properties and circulating capital, this demand could be only met—as in fact it was met—by calling into existence the Irish cottier.

Agriculture.

AGRICULTURAL EXAGGERATIONS.

THE PRODUCTION OF MEAT.

In agriculture, as in all else, there is a tendency amongst those directly interested in its results to run into exaggerations and to hold opinions far in excess of the reality. This applies strongly to opinions formed in reference to prices, and other incidents to various laws of supply and demand. And the less intimate the connection with practical husbandry the wider range does the exaggerated opinion take. The views so extensively expressed of late by landed proprietors upon the subject of the production of meat, and the propriety of increasing the breadth of permanent grass land as a means of increasing the supply of meat, are instances of this sort. Fat stock is largely produced on pasture land, ergo, to increase our produce of meat we must increase the proportion our pasture land bears to the arable. There can be no greater mistake. There are many farms, doubtless, where a few more meadows would be desirable with regard to the economy and power of keeping live stock. But there are many more whereon an increase of the breadth of arable land by conversion of the inferior pastures would enlarge the tenants' power to produce fat or store stock. We have no doubt that throughout the Midland counties the latter rather than the former process is that likely to advance the general supply of meat. Of course no one would break up a good feeding pasture; but taking the whole of our agricultural districts, the quantity of such pasture land is comparatively limited, and the question is only raised in reference to the secondary and inferior lands. On such lands the quantity of stock raised and fed would be lessened, not increased, by any extensive laying down to permanent grass. And this subject is treated with great good sense and discrimination by practical farmers in various parts of the country. Thus, at the Dorchester Farmers' Club, Mr Dawson, in a paper on the subject of the profits of meat manufacture, disclaiming all pretension of showing "the relative advantages of feeding cattle and growing corn," which he would leave to the business discretion of each farmer, said—"I shall rather demonstrate the fallacy of the advice given by many people at agricultural meetings, that it would be desirable for you to fatten cattle instead of growing corn," that the effect of acting on such would not be at all to the farmers' interest or to the general advantage.

After referring to a passage of a speech made by Sir L. Palk, in Devonshire, wherein he said, "The long and the short of what I would impress on the agriculturists is, that they must look for the future, more to producing good beef and mutton than to growing cereal crops;" Mr Dawson remarked: "Now price must depend upon supply and demand. If you produce a larger quantity, price must lower in consequence. The price of meat for some years past, as you are aware, has been, as I may say, the sheet-anchor of the farmer. But the demand has been met by the producers of meat. Although the price has been high, we must not forget the expensive means that have been used in fattening those cattle, and those enterprising men who have done so have only met a fair return for it. If the advice of Sir Lawrence Palk and other gentlemen could be acted upon, what would be the effect? The price of meat must be reduced, and that to the extent of say 1d or 2d per lb. I believe myself most firmly that it would convert the present fair profit into a positive loss. Some have contended that the increased supply would be met by increased consumption; but it is quite evident that unless you can reduce the price of meat you cannot increase the consumption—not in an equal ratio, to say the least of it."

To increase the consuming power of the working classes, their wages must rise, and though that will certainly take place if the prosperity of the country continues and increases, it will take time. The farmer must not go into extremes. "Fattening must be followed by corn. Every practical farmer knows the necessity of a rotation of crops. Growing roots alone (as many contend we should) could never repay him. You cannot afford to sacrifice—as the Norfolk farmer contended he could do—his crops for the sake of the corn and muck that was to follow them, for that, as reasonable men, you know must depend upon the value of the produce hereafter." The conversion of tillage land into pasture would greatly lessen the demand for labour in husbandry. Mr Dawson then descanted on the benefits he believed would accrue to farmers from the repeal of the malt duty.

In a subsequent discussion, Mr Duke put the matter in its true light when he said "that the more stock they kept the more corn they would grow." And he said, "In some localities the land was naturally arable, and in others it was naturally pasture. Within this last twenty years he had been in Dorsetshire one-third of the land had been broken up; and he thought there was an opportunity of keeping stock to a much greater value than when it was laid down." "He believed in this county they had as good a staple of land as in most counties, but the climate was much worse. If they only went a very little distance, say between Christchurch and Southampton or Portsmouth, he was satisfied that there a man would produce stock with much more profit and more weight with roots alone in ordinary seasons than they could here with all the roots and corn they could give them. This was a great consideration when a man was taking a farm, and he estimated that 5s an acre would go a very little way towards it. He believed there was more stock bred in this country than twenty years ago; but he considered it a great question whether a larger amount of meat was produced, and he would tell them why. In the market that day he saw a lot of sheep sold weighing about 7 stone, which, with a little extra keep, would have made 10 stone. They would have well paid the expense of keeping a little longer; and stock was often sold just at the time they were beginning to pay the farmer."

Here we get a glimpse of some of the questions the farmer must consider when he would push his production of stock beyond the point his land, as at present managed, is capable of carrying. Again, Mr Howe referred to the cost of the turnip crop, and said that a turnip crop would cost 4*l* per acre, and that the direct produce from it, by the ordinary plan of feeding a flock of sheep upon them, would not exceed 2*l* per acre. "He thought that the growing of more cereals and pulse crops and feeding them on the land would pay better than turnips." This may be so, and it is one of the many points farmers will have to take into consideration as to the best mode of raising meat. The chairman wound up by saying: "The system which had been adopted for the last twenty years was the raising and production of as much stock as they could, and the growing of as much corn as they could; and he believed Mr Duke was right when he said that both must go together in order to make a farm remunerative to the tenant. *The larger quantity of corn they grew, the more stock they kept.*"

He doubted whether the present high prices of stock "balanced the loss they sustained by the lowness of corn," and we believe that unless arable land farmers consume more of their grain with stock, they will not find their actual system pay. It is doubtful whether the system of root-growing can be carried much further than at present, and perhaps a smaller breadth of turnips, better done, might not pay more than the large extent now grown on some farms. But to talk of laying down land to increase the produce of meat is a mistake. We have lately been over a farm of very fine mixed arable and pasture land in Warwickshire, and where the best meadows will graze a bullock and a sheep to the acre. Yet the occupier finds it profitable to consume the whole of his corn and pulse crops, except wheat, with stock, chiefly cattle, and that he could make nothing like the quantity of meat he does, without considerable aid from his arable land.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Monteur* has published the following return of the Bank of France, made up to the 21st inst. The return for the previous week is added:—

DEBTOR	Sept. 21, 1865. f	c		Sept. 14, 1865. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0

The Bank return is again bad in a commercial point of view, showing a decline in discounts of 12,913,000f compared with last week. In the deposits there is a diminution of 6,299,000f, and in the circulation of notes of 9,049,000f; whilst as to the coin and bullion they have increased by 687,000f, making the stock unemployed in the vaults of the Bank very nearly 500,000,000f (20,000,000*l*).

There has been a reaction on the Bourse. Several speculators have taken advantage of the high prices attained to sell, and rumours of a disquieting nature, both financial and political, relative to Germany have been spread to-day. The quotations are as follow:—

	Sept. 14. f	c		Sept. 21. f	c

Some months ago you may remember the announcement was made that Messrs Hottinguer, Messrs Mallet, and other eminent Paris bankers, supported by a powerful English connection, had obtained a concession for the establishment of a bank in Mexico. But as they did not act on the concession within the time stipulated, it became necessary to transfer it to parties, and the Comptoir d'Escompte and its following have obtained it. All the details of the affair, with one or two unimportant exceptions, have been arranged between the Comptoir, the Mexican Commission, and the French Government, and the necessary documents will be signed very shortly. They would, in fact, have been executed before this if M. Fould, Minister of Finance, had not been out of town. The bank is to have a capital of 50,000,000f, and is to possess the exclusive privilege of issuing notes, and all the other advantages conferred on the original concessionnaires. Immediately after the signing of the papers, the Comptoir will present the projected bank to the public. The shares to be subscribed will probably be of 500f. No English capitalists, I believe, have been solicited to take any part in the entreprise.

An imperial decree this day authorises the Bank of France to establish a new branch,—it is to be at Chaumont, in the department of the Haute Marne. The law of the 9th June, 1857, which prolonged the privilege of the Bank, enacts that "within ten years the Government may require of the Bank to establish a branch in the departments where there are none." The number of departments is 89; the number of branches is still under 60; and in less than twice 12 months the 10 years expire. The Bank, therefore, must display much energy in the setting up of branches, or it must entreat the Government not to exercise the power the law confers. The repugnance of the Bank to form new establishments—a repugnance manifested by the little that has been done in eight years to execute the law—is to many persons perfectly inexplicable. It enables the enemies of the establishment to reproach it, as M. Pereire did in his pamphlets, with being indifferent to the public interest, and disregardful of the law; and, at the same time, it seems to show that the directors are not duly mindful of the interests of their shareholders. For branches are very profitable, the clear profits from them in 1864 having amounted to not less than 17,673,634f (706,941*l*); in fact, there was only one —that of Flers—which produced loss, and the reason why it was not successful was that it had been only a short time in operation.

No doubt the places in which branches have to be established are of less commercial importance than those in which such institutions exist already. But the Bank, we may be sure, will continue to get profit out of them, and even if it should not, that would be no reason for not fulfilling the law, especially as the Bank possesses the monopoly of the issue of notes, which is worth to it many millions annually.

As was to be expected, the visit which the Queen of Spain paid to the Emperor of the French at Biarritz, has been made the pretext of Bourse reports that the Emperor exacted from her a promise that something should be done to alleviate the deplorable position of the holders of shares and bonds of the North of Spain Railway, and that Her Majesty, on her part, obtained authorisation to raise a new Spanish loan of 100,000,000f in Paris. It is not easy to believe that in the brief ceremonious interviews of the two Sovereigns such matters were treated; and nothing thus far has occurred to prove that they were.

The coupon of the Mexican 1864 Six per Cent. loan, due on the 1st October, is to be paid from that date by the Mexican Financial Commission in Paris, and by the receivers of loans in the country.

The Societe Generale is to pay, from the 1st October, 3f 12½c per share, being half a year's interest at the rate of 5 per cent. on the calls paid up. As, at the end of August, according to the balance sheet, the company had realised profits of about 4,000,000f, a much larger sum might have been distributed; but the statutes do not authorise for the first half of each year the payment of more than 5 per cent.

The Messageries Imperiales Company announces the payment, from the 1st October, of half a year's interest on shares at the rate of 6 per cent. per annum.

The Lyons to La Croix Rousse Railway will be able to distribute 8f 70c per share for 1864, though it is under sequestration, and has had to raise a loan on mortgage of 180,000f.

The Lyons and Mediterranean Railway Company notifies the payment, on and after the 1st October, of coupons of interest varying from 7f 25c to 25f of its different debentures.

The directors of the Sous Comptoir du Commerce et de l'Industrie have fixed the dividend for the first half of 1864 at 4f per share, and it is to be paid from 1st October.

The dividend of the Bank of the French colony of Guiana for the first half of the present year is 5f 70c per share.

The Colonial Credit Foncier is to pay, from the 1st October, 6f 25c as interest of the first six months of the present year, and 7f as dividend of 1864.

The North of Spain Railway will, from the 1st October, pay a coupon of 7f 50c on bonds.

A report of the operations of the Bank of Guadaloupe, from the 30th June, 1864, to the 30th June, 1865, is far from satisfactory. Bills to the amount of 2,093,797f, which the bank had discounted, had been dishonoured; the bank owed to different establishments 4,576,879f, and apprehensions were entertained that many of the bills not due would not be paid. The total operations were 24,719,000f less than in the preceding year, and in it discounts figured for a decline of 1,979,000f.

Bankruptcies have for some time past been unusually numerous in Paris, and in the first fortnight of the present month not fewer than eighty-four were declared.

On the demand of the Chamber of Commerce of Havre the Minister of Commerce has decided that fresh skins, horns, feet, &c., of oxen may be imported into France, provided they come from countries out of Europe. It may be remembered that these articles were included in the interdiction of the imports of living and of parts of dead cattle pronounced by the Government, in the hope of preventing the invasion of the cattle plague.

The Commission charged to fix the value of goods imported and exported has presented its report for 1864 to the Minister of Commerce. An abundance of production, it says, caused a fall in the prices of grain, wine, fruit, cinnamon, vanilla, madder, camphor, caoutchouc, opium; and a scarcity, a rise in oleaginous seeds, cocoa, cloves, indigo, fish oils, essence of roses, and various medical substances. Gutta percha was dearer on account of the restriction on imports from Java; wood for cabinetmaking, from the demand for furniture; vegetables, poultry, and certain other productions of farmers, though abundant, on account of the large exports to England; coal, owing to the strike of English miners; but ivory fell from depression in the turnery trade; firewood, from the employment of coal and gas, and the economy of fuel obtained by the improvement in fire-places; oils for lighting on account of imports from England and the employment of petroleum; the import of foreign iron declined, and the export of French iron increased, and yet the price of the latter fell;—this is ascribed by the Commission to the ironmasters having made energetic efforts to retain possession of the home market. The import of cattle increased and the export declined, and yet the price of meat and offal rose considerably. The augmentation in meat was caused by the increased consumption of the article by the working and agricultural classes; that of offal by the demand of certain industries. With respect to the former, the Commission suggests

Digitized by Google

that it would be well to sow less wheat, especially as the price rules low, and to turn the land into pasturages for the production of oxen. Beet-root sugar fell in price, but the producers of beet-root could not employ the plant in distillation from fear of the competition of alcohols from wines. The silk manufacture suffered both from an insufficient supply of silk and the loss of the United States market; but an increase in the demands from England and Belgium left it in definitive no worse than in the year preceding. The manufacture of cotton tissues almost ceased, owing to the extreme dearness of the raw material; but the price of woollen goods was maintained. The report affirms that the French have made great progress in the manufacture of the latter, and also of flax, hemp, and jute tissues.

The Belgian Government has informed all its consuls in France that it has abolished certificates of origin and legalised invoices for merchandise imported into Belgium. A similar measure would be extremely convenient in the trade between France and England.

The market report is annexed:—

FLOUR.—At *Paris*, the offers of millers are restricted, and prices are very fair. Yesterday, the quotation was 47f to 51f the sack of 157 kilogs. Six marks current month were 50f, and some lots 50f 25c; October, 50f 25c to 50f 50c; four months of November, 51f 50c. Type Paris, the 101 kilogs, 30f 75c.

WHEAT.—At *Paris*, yesterday, little was done: choice white, new, 28f the sack of 120 kilogs; choice red, 27f to 27f 25c; first quality, 26f 50c to 26f 75c; good, 26f; other sorts, 21f to 24f.

COTTON.—The sales at *Havre*, in the week ending Friday, were 7,467 bales. The arrivals were 11,443. Closing quotations were 3f to 5f higher for United States, 5f higher for Cartagena and China, 10f Cumana, 2f Coconada; other sorts unchanged. Low New Orleans was 245f the 50 kilogs; good ordinary qualities in Broach, 165f; in Tinnevelly, 160f; Madras, 170f; China, 160f; Jumel, 220f. This week, business has been active, and yesterday some New Orleans was taken at 212f 50c to 245f; Oomrawuttee, 135f to 162f 50c; Madras for delivery in November, 157f 50c; Tinnevelly, 167f 50; Bengal, 107f 50c to 132f 50c; China, 187f 50c and 160f; Jumel, 227f 50c.

COFFEE.—At *Havre*, in the week ending Friday, the sales were 250 sacks Port-au-Prince, 82f 50c to 83f the 50 kilogs in bond; 100 Jumel, 80f; 115 Cape, 84f; 300 Gonaives, 87f; 1,465 Rio, not washed, disposable, 74f to 84f; 1,255 for delivery, 77f 50c to 82f 50c; 400 Bahia, disposable, 66f. There were also some sales of damaged. The arrivals exceeded 6,000 sacks. This week, Rio, for delivery, 73f, 82f, and 84f; Cape, 84f 50c and 84f; Gonaives, 86f. At *Nantes*, last week, 150 sacks Port-au-Prince, 83f. The sale of 2,500 sacks Ceylon native, and 740 Malabar, made some time before, was announced, but the prices were not stated. No sales this week. At *Bordeaux*, last week, 485 sacks Rio washed, and not washed, at established prices; 192 La Guayra grage, 97f 50c and 98f; 100 at prices not stated; 613 Mysore trie, 118f; 540 not trie, 115f 24c. By auction, 1,175 La Guayra grage and non-grage, 86f to 91f; 100 bags Salem, 117f to 122f; 420 Mysore, 110f to 115f 50c; 24 Bailly, 103f; 123 Winard, 115f and 117f. This week, La Guayra non-grage, at prices not stated; and 89 Mysore, 118f. At *Marseilles*, last week, 2,000 sacks Maracaibo at prices kept secret; and a small lot of Mocha, 109f 75c. This week, Rio, 75f.

SUGAR.—Business was not very active at *Havre*, in the week ending Friday. Some lots of French West India at 47f 25c to 47f 50c the 50 kilogs, bonne quatrieme; and some usine, 52f 50c to 59f; 780 casks Havana, by French ship, 30f 50c to 31f, No. 12 in bond; 112, by Spanish vessel, 30f 50c, same number. The arrivals were between 5,000 and 6,000 casks. This week, French West India, 49f 50c; and for bonne quatrieme, 47f 25c; Havana, No. 12, 31f. At *Nantes*, last week, 2,000 sacks Reunion (gros grain), 51f, bonne quatrieme; 1,000 at 50f; 4,774 at 50f 75f; 8,506 Mayotte, of which about half at 48f 50c, the rest at prices not stated; some French West India, 46f 50c and 46f; usine, 54f 50c. The sale, a few days before, of some French West India usine at 47f 50c and 47f was mentioned. 1,883 casks Havana went at 31f 75c, No. 13½; a floating cargo of 1,620 casks Havana, 30f 50c, No. 13½. This week, French West India, 57f, on sample; 47f and 47f 25c, bonne quatrieme; Reunion gros grain, 51f 50c. At *Bordeaux*, last week, some lots of French West India, 47f, bonne quatrieme; and for delivery, 46f 50c; 3,452 bales Reunion, 52f; 1,347 ditto at prices not stated. This week, French West India usine, 57f; San Yago, 29f, No. 12; Havana, 31f 50c, No. 12; Mauritius, 53f 50c, bonne quatrieme. At *Marseilles*, last week, some French West India at 27f 75c, 28f, and 28f 50c, bonne quatrieme of Havre; and some crystallised, 39f; 1,900 bales Reunion, 50f, bonne quatrieme of Nantes; 100 casks Havana, by Spanish ship, 28f 75c, No. 12. This week, Havana, by auction, 27f to 31f 25c for Nos. 9 to 15.

INDIGO.—At *Havre*, in the week ending Friday, the sales were 20 chests Bengal, part at 35c to 55c above the estimates, part at prices kept secret. The arrivals were 21 chests. This week, Bengal at a premium of 55c. At *Bordeaux*, last week, 195 chests Bengal, 30 Madras, and 14 Kurpah; prices not given. This week, Bengal; prices not stated.

HIDES.—The sales at *Havre*, in the week ending Friday, were 9,920 La Plata salted ox, 54f to 59f the 50 kilogs; cow, 46f 50c; 7,300 Monte Video salted cow, for delivery, 48f; 7,060 Rio Grande disposable, ox, 55f; cow, 46f 50c to 47f; 520 Rio Janeiro salted cow, 39f; 1,700 Minas dry, 77f; 1,000 Pernambuco salted, 47f; 900 Valparaiso drysalted cow, 66f; 900 New Orleans salted, 42f; 1,000 Buenos Ayres horse, salted, 44f. The arrivals were about 11,000. This week, Rio Janeiro salted ox, 51f; Monte Video salted, 59f, 60f, and 67f; Buenos Ayres dry ox, 107f 50c; salted cow, 47f 50c; Rio Grande salted cow, 46f 50c and 47f 50c, and ox, 55f 50c; do. dry, 75f.

WOOL.—At *Havre*, in the week ending Friday, 40 bales Entre Rios unwashed, 1f 75c to 2f 10c the kilog; 150 bales Monte Video unwashed, 2f; 26 ditto washed, 2f 20c. There was also a great public auction, which was numerously attended, but only about a third of what was offered was sold. Good fine sorts were taken readily at the prices of July, and even a little higher; in other sorts there was no change in price. Buenos Ayres unwashed merinos went at 170f to 240f the 100 kilogs; prima, 150f to 225f; secunda, 147f 50c to 215f; tertia, 140f to 210f; quarta, 132f 50c to 180f; quinta, 142f 50c; lamb, 107f 50c to 237f 50c; other sorts, 92f to 195f; Monte Video unwashed merinos, 210f to 245f; prima, 150f to 235f; secunda, 160f to 202f 50c; tertia, 147f 50c to 180f; quarta, 147f 50c to 160f; quinta, 135f to 142f 50c; lamb, 132f 50c to 230f; other sorts, 97f 50c to 200f; Monte Video washed, 220f; Buenos Ayres washed, 212f 50c to 242f; Rio Grande unwashed, 130f to 160f; washed, 290f to 295f; Russia unwashed, 180f; Chili unwashed, 130f; washed, 287f 50c to 317f 50c; Georgia, 100f to 185f. La Plata sheepskin at various prices. The arrivals exceeded 400 bales. This week, Monte Video unwashed, 2f 25c and 190f the 100 kilogs; Beunos Ayres unwashed, 2f 25c.

TALLOW.—The sales at *Havre*, in the week ending Friday, were 530 pipes 525 casks La Plata, disposable, 54f to 57f the 50 kilogs; 800 pipes, for delivery, 56f to 58f; 100 casks Russia, disposable, 56f 50c. The arrivals were 510 casks. This week, La Plata, for delivery, 55f 75c to 58f; New York, à la marque, 58f. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 115f.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, was 50f and 49f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., was 60f; 3-6 beetroot, first quality, 90 deg., 56f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following report of the Calcutta money market is dated the 7th ult.:—During July 58 lacs in specie (silver and gold) were imported, and upwards of 40 lacs, it is said, were brought in from China and Straits on 3rd and 4th instant, so that money is again cheaper and does not fetch more than 3½ per cent. on Government securities. The requirements of trade continue very moderate, and it is not likely that we shall see any reaction for some weeks to come. On the 3rd instant the Bank of Bengal reduced its rates 1 per cent., and now discounts at 4 per cent. Government securities, after some decline in value, met with active inquiry about the 3rd inst., and have steadily advanced in the interval: we quote 5½ per Cents. to-day at 11 and 11-4 premium. Exchange had advanced to 2-0¼ for six months' sight bank paper on 1st ultimo, but to-day quotations are the same as on 21st ultimo, say 2-0⅛ for bank bills. Subjoined are the returns of the Bank for the weeks ending July 25 and Aug. 1:—

Liabilities.	July 25.		Aug. 1.
Proprietors' capital, paid up	£2,200,000	...	£2,200,000
Reserve fund	174,496	...	173,655

In reference to the state of the money market at Madras for the fortnight ending August 12, Messrs Dymes and Co. write as follows:—On the 8th instant the Bank reduced its rates 1 per cent. all round; they now stand at 5 per cent. for advances on Government securities, and 7 per cent. on private bills having three months to run. Madras Bank Shares—Since our last there has been but little doing; the latest sales reported are at 73 premium, being being about the previous quotation. Government Paper—Owing to news of an advance in Calcutta, there has been an improved demand recently at higher rates; 5½ per Cents. are now quoted at 10¼ to 10¾ premium, 5 per Cents. at 4¼ premium, and 4 per Cents. 8¼ to 9 discount. Exchange is again a trifle higher, being at 2s 0⅜d for first class credits, and 2s 0⅛d to 2s 0⅜d for document bills. The bank's drawing rate on London remains unchanged at 1s 11¾d 6 months' sight. Sovereigns—English, 10-7 rs each, Australian, 10-1-6 rs.

The following financial intelligence has been received from India, via the Persian Gulf:—Bombay, Sept. 16.—Exchange on London, 2s 0⅛d. Government Securities—Four per Cents., 91; Five per Cents., 104¼; Five-and-a-Half per Cents., 111¼. Calcutta, Sept. 15.—Exchange on London, 2s 0⅜d. Government Securities—Four per Cents., 91; Five per Cents., 104¼; Five-and-a-Half per Cents., 111.

Annexed is Messrs Sharp and Co.'s circular of bullion movements at Hong Kong for the fortnight ending July 28:—Gold—The arrivals have been $370,000 value; and the exports, inclusive of those per Rangoon last mail and excluding those to leave to-morrow, amount to $600,000. The market has had a drooping appearance throughout the fortnight. Silver—Our small supplies have been eagerly purchased for Indian remittance, and the market is now bare. The receipts amount to $100,000 and the exports to $250,000. Dollar Currency—The receipts, $660,000, have been almost entirely from the Coast and San Francisco. The sums sent away are in all $2,120,000, more than half of which will be coined into rupees. Clean Mexicans are less inquired for, being lower in Shanghai. Discounts and Mortgages—The value of money remains unaltered, and may be quoted as before from 7 to 9 per cent., according to the quality of the securities. Exchange—Bullion remittances offering more favourable outturns to shippers than the rates at which the banks are willing to draw rupee bills, the transactions in

Digitized by Google

exchange on India have not been large. In sterling but a small business has been done; rates closing much as last quoted. Shares—Business in shares has been very limited, and banks are slightly lower. Hong Kong and Whampoa Dock have been placed at $225 dollars per share premium. The Gas Company's shares are now inquired for at 30 to 35 per cent. prem. Closing Quotations—On London, 6 months' sight, Bank 4s 5½d; do. credits, 4s 5¾d to 4s 6d; on Calcutta, 3 days' sight, 216½ rs; on Bombay, 3 days' sight, 217 rs; on Shanghai, 10 days' sight, 71⅞ tls; do. 30 days' sight, 72¾ tls; on Foochow, 15 days' sight, ¾ per cent dis.; Amoy, 15 days' sight, 1¼ per cent. dis.; on Singapore, 3 days' sight, 2½ per cent. prem.; bar silver, (997 to 998), 10¼ per cent. prem.; Sycee, 8½ per cent. prem.; Mexicans, 2 per cent. prem.; Carolus dollars, 1 per cent. prem.; gold leaf, $22.70 per tael; American double eagles, $18.17 each; sovereigns, $4.45 each; discount, 8 per cent.; Hong Kong and Shanghai Banking Company shares, 4 per cent. prem.; Gas Company shares, 30 per cent prem.; Hong Kong and Whampoa Dock, 45 per cent. prem.; Union Dock shares, 6 per cent. prem.

During the first six months of 1864 the yield of the Victorian gold fields amounted to 759,461 ounces, and during the corresponding period of the present year the yield was 756,435 ounces. During the year 1862 there were employed an average number of 27,942 miners, the produce of whose labour was 1,702,460 ounces, which, calculated at 4*l* per ounce, gives the average weekly earnings of each miner at 1*l* 6s 9d. In 1863 the average number of miners employed was 92,292, who produced 1,578,079 ounces, which, on the same calculation, gives an average weekly wage to each miner of 1*l* 6s 3d and a fraction. During the year 1864 the average nnmber of miners employed was 83,394, who obtained, as the result of their labours, 1,557,397 ounces of gold, which gives the average weekly earnings of the individnal miner at 1*l* 8s 8¾d. During the first half of the present year the number of men engaged on our gold fields was 85,022. They produced 756,435 ounces of gold, and their average earnings were, therefore, 1*l* 7s 4½d per week. During the corresponding period of 1864 the number of men employed was 83,175. They produced 759,461 ounces of gold, and their average earnings were 1*l* 8s 1d per week.

Hides and skins brought into Great Britain from India, South America, or Australia, may now be exported to Irish ports, an order having been issued by the Privy Council rescinding the prohibition of the import of those particular descriptions into Ireland.

The following is a statement of coinage at the Mint of the United States, Philadelphia, during the month of August, 1865:—

	No. of Pieces.		Value dols	c
Deposits.

Subjoined is a report of the Albany lumber market for the week ending Sept. 4:—Lumber has been received to a fair amount, but not in sufficient quantities to balance the shipments, and the stock on hand is sensibly diminishing. Shipments have been large. Prices on all kinds are firm, with an upward tendency. Spruce, clear pine, and shingles are scarce, and prices have advanced. Receipts for the season to date—94,015,319 feet boards and scantlings; 7,811,000 shingles; 6,427,389 lbs staves.

During the week ending Sept. 20, the imports of the precious metals were:—Gold, 188,922*l*; silver, 21,828*l*. The exports were:—Gold 99,632*l*; silver, 54,569*l*.

The following returns show the state of the note circulation of the United Kingdom during the four weeks ending Aug. 19, 1865, compared with the previous month:—

	July 22, 1865.	Aug. 19, 1865.	Increase.	Decrease.
	£	£	£	£
Bank of England	21993548	22178744	185196	...
Private Banks	2882093	2843131	...	38962
Joint Stock Banks	2759162	2748203	...	10959
Total in England	27634803	27770078	135275	...
Scotland	4371737	4349669	...	22068
Ireland	5718427	5664013	...	54414
United Kingdom	37724967	37783760	58793	...

And, as compared with the month ending the 20th of Aug., 1864, the above returns show an increase of 446,170*l* in the circulation of notes in England, and an increase of 1,055,538*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks the following is the state of the circulation:—The English private banks are below their fixed issue 1,346,020*l*, the English joint stock banks are below their fixed issue 498,054*l*,—total below fixed issue in England, 1,824,074*l*: the Scotch banks are above their fixed issue 1,600,398*l*; the Irish banks are below their fixed issue 690,481*l*. The average stock of bullion held by the Bank of England in both departments during the month ending Aug. 16 was 14,341,313*l*, being a decrease of 1,433,377*l* as compared with the previous month, and an increase of 1,538,862*l* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month:—Gold and silver held by the Scotch banks, 2,394,656*l*; gold and silver held by the Irish banks, 2,040,184*l*; total 4,434,840*l*; being a decrease of 51,895*l* as compared with the previous return, and an increase of 267,664*l* when compared with the corresponding period last year.

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	21,843,863	Securities	31,813,637
Public Deposits	6,820,869	Coin and Bullion	14,219,842
Private Deposits	13,567,577		
	42,232,309		46,033,479

Dated the 21st September 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,801,170*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A decrease of Circulation of	£105,892
An increase of Public Deposits of	499,229
A decrease of Other Deposits of	293,402
No change in Government Securities.	
An increase of Other Securities of	88 919
An increase of Bullion of	64,264
An increase of Rest of	53,247
An increase of Reserve of	140.263

The internal demand for coin continues to be manifested by the movements in the bullion, the increase on the present occasion being only 64,263*l*, although 262,000*l* in foreign gold has been sent in during the week. The augmentation in the public deposits arises from the usual revenue payments towards the close of the quarter. A fair addition has taken place in the reserve.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.

In the corresponding week of 1855, the Anglo-French Commission, appointed to draw up a return of the "materiel" left by the Russians at Sebastopol, had commenced its labours. The London money market was rather easier.

In 1862, the withdrawal of the caimé, or debased paper money of Constantinople from circulation had been concluded. The stagnation in Lancashire, and the distress consequent on the stoppage of the cotton trade in the North of England, was still very severe.

In 1863, replies had been received from Russia to the notes addressed to St Petersburg, on the Polish question, by England, France, and Austria. The bombardment of Charleston had been discontinued. News had been received of a Japanese attack on English and American vessels, in consequence of which one of their ports had been bombarded. The Federal

Digitized by Google

Diet of Germany had decided on Federal execution in Holstein.

In 1864, an interview had taken place at Darmstadt between the Emperor of Russia and the King of Prussia. Advices received from Peru had stated that the Peruvian Congress had resolved to declare war against Spain, unless she abandoned the Chincha Islands. At Berne, the Federal Council had authorised the Department of Commerce to open negotiations for a treaty of commerce to be concluded with the Zollverein. At Athens the royal marriage had been communicated to the National Assembly. In America, the Federals under Burbidge had suffered a severe repulse at Saltville, Western Virginia. At Amsterdam, the minimum quotation of money was 8 per cent., being 1 per cent. above the official rate. In London the upward tendency in rates had caused some apprehension.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 7,242,401*l*; in 1862, a deficiency of 5,699,712*l*; in 1863, a deficiency of 6,862,945*l*; and in 1864, a deficiency of 7,510,682*l*. In 1865, the deficiency is 7,764,851*l*.

DISCOUNT AND MONEY MARKET.—The approach of the end of the quarter begins to exercise some influence upon the discount market, and although there is at present no great demand the rates remain firm. To-day, especially, some exceptional tightness was experienced—chiefly, however, from the falling due of a call of 400,000*l* on the shares of Overend, Gurney, and Co. The effect of the influx of foreign gold into the Bank continues to be neutralised by the withdrawals of coin for the provinces. Annexed are the quotations for paper of various dates :—

30 to 60 days	3⅞ per cent.
3 months	4 per cent.
4 months	4⅛ per cent
6 months—Bank bills	4⅛ per cent.
6 months—Trade ditto	5 per cent.

On the Stock Exchange the demand for money has been active at 3½ to 4 per cent. Some rather considerable sums were borrowed at the latter rate from the Bank by the brokers.

Annexed are the rates of interest allowed on deposits :—

Joint Stock Banks	*3 per cent.
Discount houses at call	3 per cent.
Do. with seven days' notice	3½ per cent.
Do. fourteen days	3½ per cent.

* At the London and Westminster 2 per cent. only on sums below 500*l*

About 45,000*l* in gold was taken to the Bank to-day. There were no operations in bullion yesterday.

The biddings for 200,000*l* Government bills on India took place at the Bank of England on Wednesday. The proportions allotted were :—to Calcutta, 105,100*l*; to Madras, 14,900*l*; and to Bombay, 80,000*l*. The minimum prices were 1s 10½d on Calcutta and Madras, and 1s 10¾d on Bombay. Tenders on Calcutta and Madras at 1s 11¾d will receive about 47 per cent., and on Bombay at 1s 11⅞d about 49 per cent.; above these prices in full.

The return of the Bank of France shows the following changes :—

	£
INCREASE.	
Bullion	28,000
Treasury balance	208,000
Advances	4,000
DECREASE.	
Bills discounted	520,000
Circulation	360,000
Current accounts	252,000

The prospectus was issued this afternoon of a proposed issue of 800,000*l* 6 per cent. bonds of the Erie Railway, at 75, repayable at par at the end of ten years. The holders will also have the option, at any time during that period, of converting them into the ordinary stock of the company, at the rate of five shares of $100 each for every 100*l* bond. With regard to the latter provision, it is observed :—

The importance of the option which is reserved to the bondholders, of conversion into ordinary shares, will be appreciated by an examination of the following figures, taken from the annual report to 31st December, 1864 :—Gross receipts for traffic to 31st December, 1862, $8,400,334; 1863, $10,469,481; 1864, $13,429,643. The traffic for the half-year ending 30th June, 1865 (as officially reported), $7,289,390; corresponding half-year 1864, $6,212,464; increase for the half-year, $1,076,926. This increase is mainly due to the development of the resources of the district; to the numerous coal, iron, and oil companies recently brought into operation; and to the opening of the Atlantic and Great Western Railway.

The committee of the Stock Exchange have appointed Friday, the 22nd inst., a special settling day in the shares of the Cheshire Amalgamated Salt Works Company (Limited), which, however, are not to be marked in the official list.

The committee have also passed the following resolutions :—"That this committee refuse to grant a settling-day in the shares of the London and Mediterranean Bank (Limited), in consequence of misrepresentations in the formation and bringing out of the company having been sustantiated."

With reference to the Peruvian Railways Company, the following resolution of the committee has been posted in the Stock Exchange :—"That in consequence of communications received by the committee, the case of the Peruvian Railways be adjourned, and that in the meantime no buying in of the shares be allowed without the sanction of the committee."

Subjoined are the rates of discount in the chief cities of the continent, showing a slight rise at Frankfort :—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	2¾
Vienna	5	5
Berlin	5	4⅞
Frankfort	4	3¾
Amsterdam	3	3
Turin	5	4½ 5
Brussels	4	4
Madrid	9	...
Hamburg	...	4¼
St Petersburg	6	6½ 7

ENGLISH FUNDS.—There has again been a general absence of business in the market for Government stocks, and a further slight reduction has consequently taken place. Consols, which left off last Friday at 89⅞ to 90 for the 10th October, closed this evening at 89¾ to 89⅞. For money, the last price was 89½ to 89⅝. Reduced and New Three per Cents. were quoted 87⅞ to 88, and India Five per Cents. 105⅛ to 105⅜, showing in the latter case no alteration.

The Government brokers continue to purchase daily 10,000*l* stock on public account.

Partly from the increasing demand for money, Exchequer bills have declined 1s, closing at 3s discount to 1s premium.

FOREIGN STOCKS.—Few transactions have taken place in the foreign market this week, and the general tone has been dull. A further reduction has taken place in Brazilian Four-and-a-Half per Cents., owing to the introduction of the new loan. Danubian Seven per Cents. also, at one one period, experienced a decline, but rallied to-day. Egyptian and Russian stocks have been generally heavy, and Turkish descriptions are mostly quoted a fraction lower. The Consolidés, after falling to 49⅝ to 49⅞, left off this evening at 49¾ to 50; and the 1862 loan at 74¼ to 74⅜. United States Five-Twenty bonds have relapsed to 68⅛ to 68⅜. The only upward movement has been in Mexican, which at one time was quoted at 25¼ to 25⅜, but receded this morning to 24⅞ to 25⅛. The 1864 stock was quoted 23¾ to 24. Spanish Passive and Certificates have been more offered, particularly this afternoon.

The new Brazilian loan, after advancing to 2½ premium, closed at 2⅛ to 2¼. The applications for allotment, both here and abroad, are understood to have been extremely large.

The final price of French Three per Cent. rentes on the Paris Bourse this evening was 68f 37c ex div., showing a recovery of an eighth compared with yesterday, but a decline on the week (allowing for the deduction of the quarterly dividend) of about a quarter per cent.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :—

RAILWAYS AND OTHER SHARES.—The principal movement in the railway market this week has been a considerable rise in North British stock, which has been followed by as sudden a reaction. North-Eastern descriptions have been in demand, and closed steadily at a slight improvement. Great Northern A stock is also higher. South-Eastern and Great Eastern at one period advanced, but subsequently experienced a relapse. London and North-Western, Midland, and Great Western have shown the principal heaviness, particularly to-day. The general transactions throughout the week have been on a very moderate scale.

In the colonial department, the only feature is a rise in Great Western of Canada and Buffalo and Lake Huron shares. Indian guaranteed stocks were mostly steady. In foreign descriptions, an improvement took place in Dutch-Rhenish, and a further decline in South Austrian and Lombardo-Venetian.

In the miscellaneous department the shares of the financial companies have been rather flat except General Credit, which closed slightly higher. Joint stock bank shares have been fairly supported.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day :—

RAILWAYS.	Closing prices last Friday	Closing prices this day.

FOREIGN EXCHANGES.—The rates this week have been generally firm, but without material change.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—There being no export demand for gold, all the recent arrivals have been taken to the Bank of England, the amount purchased being 157,000*l*. The arrivals since our last circular are the Persia, from New York, with 34,000*l*; the City of Washington, from New York, with 43,000*l*; and the Ceylon, from Alexandria (with gold from India), with 35,430*l*. The shipments are—per Mongolia, to Alexandria (in sovereigns), 10,000*l*; do. to Madras, 1,692*l*. 87,600*l* has also been shipped to Alexandria per Messageries steamer Moens, from Marseilles. The Australian mail brings advices of the following shipments from Melbourne:—Per the Essex, 483,000*l*; the William Duthie, 131,000*l*; the Lincolnshire, 282,000*l*. The first-named ship, which sailed on 23rd June, is now due.

Silver.—The silver market is not at present active, but owing to the very extensive sales of cotton at Liverpool this week, it is anticipated that shipments of specie may, ere long, be made to India. The limited amount of fine silver, brought by the Tasmanian from the West Indies, was sold at 60½d per oz standard. Sales have been effected within the last day or two at 60⅞d per oz standard, and but little could be purchased even at this rate, as the supply is exceedingly small. The amount despatched per the Mongolia from Southampton on the 20th instant, was only 5,000*l* to Hong Kong, and 3,385*l* to Shanghai.

Mexican dollars are difficult of sale at the price last quoted by us, viz., 59½d per oz. The shipments are—per the Mongolia, to Hong Kong, 109*l*; per ditto, to Yokohama, 2,160*l*; per ditto, to Shanghai, 6,240*l*. The Messageries steamer Moens, from Marseilles, took 180,640*l* to India and China, including 11,500*l* in dollars for Hong Kong; 10,000*l* in ditto for Singapore; 3,000*l* in ditto for Saigon, forwarded from London.

Exchange on India for drafts by the banks at 60 days' sight rules as follows:—1s 11¼d to 1s 11⅜d for Bombay, Calcutta, and Madras. The drafts by the India Council sold yesterday were allotted to Calcutta and Madras at 1s 11⅜d, 47 per cent.; Bombay, at 1s 11⅞d, 49 per cent. Applications above those prices in full.

Indian Government loan notes may be quoted as follows:—5½ per Cents., 108½ to 109½; 5 per Cents., 101½ to 102½; 4 per Cents., 89 to 90.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, fine, 77s 9d per oz std; ditto, refinable, 77s 10½d per oz std, last price; Spanish doubloons, 75s 0d to 75s 6d per oz; South American doubloons, 73s 9d per oz; United States gold coin, 76s 2¾d per oz. Silver—Bar silver, 5s 0⅞d per oz std.; ditto, containing 5 grs gold, 5s 1d per oz std; Mexican dollars, 4s 11⅞d per oz; 5-franc pieces, 4s 11½d per oz; Quicksilver, 8*l* per bottle; discount, 3 per cent.

FAILURES AND MERCANTILE EMBARRASSMENTS.—Advices from Melbourne mention the failure of Messrs Benjamin and Rappiport, with liabilities estimated at 21,833*l*, against assets amounting to 22,485*l*, showing a surplus of 652*l*.

PUBLIC COMPANIES—The directors of the Bank of Australasia have notified that a dividend at the rate of 6 per cent. per annum, and a bonus at the rate of 8 per cent. per annum, free of income tax, being together equal to 2*l* 16s a share for the half-year, will be payable on the old capital of the bank on the 17th October. The dividend and bonus at the same rates will amount to 2*l* 2s per share on the new shares.

At the meeting of the Oxford and Canterbury Music-hall Company, held on Monday last, a dividend of 10 per cent. and a bonus of 2s per share were declared.

The meeting of the London Bank of Mexico and South America was held on Tuesday last. A dividend of 10s per share, being at the rate of 9 per cent. per annum, was declared.

The Freemasons' Tavern Company (Limited) have declared a dividend for the half-year ended 31st July last, at the rate of 8 per cent. per annum. A call of 2*l* per share is to be paid by the 21st October.

An extraordinary meeting of the Locomotive Cotton Press Company took place on Tuesday last, when it was unanimously decided that the undertaking should be voluntarily wound up.

MISCELLANEOUS.—It is notified that the half-yearly interest on the bonds of the Venezuela 6 per Cent. loan of 1865, negotiated by the General Credit Company, falling due on the 1st October, will be paid on the 30th inst.

Messrs Baring Brothers and Co. have announced the dividends due the 30th instant on the Chilian loans, and have also advertised the particulars of the progress of the sinking fund.

According to the report recently issued by the directors, the gross receipts per mile of line open on the Scinde Railway during the half-year, ending June 30 last, were 369*l* 15s 2d, the number of passengers conveyed during that period being 58,567. The receipts from goods traffic for the six months were 30,576*l*, against about 37,000*l* in 1864. The gross earnings of the Indus Steam Flotilla, for the six months ending June 30, were about 37,000*l*, against 52,170*l* in the corresponding period in 1864. The traffic receipts on the Punjaub Railway are satisfactory, and amounted in the last week in June to 1,405*l*.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 1½ per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is nearly 1-10th per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.6¾ per 1*l* sterling. Standard gold at the English Mint price is, therefore, rather more than 1-10th per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 109¼ to 109⅜ per cent. At this rate there is no profit on the importation of gold from the United States.

MAILS ARRIVED.

LATEST DATES.

On the 15th September, CAPE OF GOOD HOPE, per steam ship Saxon, via Plymouth —Table Bay, August 14; St Helena, 22; Ascension 26.

On the 15th September, AMERICA, per steam ship Persia, via Queenstown—New York, August 6.

On the 17th September, AMERICA, per steam ship City of Limerick, via Queenstown —New York, September 6.

On the 19th September, AMERICA, per steam ship City of Washington, via Queenstown—New York, September 9.

On the 19th September, AMERICA, per steam ship North America, via Greencastle —New York, September 9.

On the 20th September, AMERICA, per steam ship Hansa, via Southampton—New York, September 9.

On the 21st September, MEDITERRANEAN AND AUSTRALIAN, overland, by steam ship Ceylon, from Alexandria, via Southampton—Alexandria, September 7; Malta, 12; and Gibraltar, 16.

On the 21st September, AMERICA, per steam ship Pennsylvania, via Queenstown—New York, September 9.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended Sept. 16, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	62,441 4	44 7
Barley	6,179 0	50 10
Oats	5,329 1	20 11

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

Corresponding week in	Quantities Sold. Wheat.	Barley.	Oats.	Average Prices. Wheat.	Barley.	Oats.

COMMERCIAL EPITOME,

FRIDAY NIGHT.

The supply of English wheat on sale at Mark lane, to-day, was very moderate. The condition of the produce was tolerably good, and sales progressed steadily, at fully Monday's currency. For foreign wheat, the trade was quiet; nevertheless previous quotations were well supported. Barley was in short supply, yet the demand ruled inactive, at late rates. Malt commanded more attention, at full prices. There was a steady demand for oats, at fully late rates. Beans and peas, being in short supply, changed hands at full quotations. Barrel flour was firm; but other kinds met a slow sale. This week's imports amount to 17,700 quarters of wheat; 3,310 barley; 38,520 oats; and 340 sacks of flour.

At Liverpool, this morning, both wheat and flour commanded more attention, and prices were somewhat higher. For maize there was a steady demand at full quotations. The wheat trade at Wakefield was firm, and the best samples were rather dearer.

The Liverpool cotton market has been very animated throughout the whole of the present week, and the transactions have been very large, the total sales amounting to 188,000 bales, of which spinners have taken 85,000 bales, speculators 64,000, and exporters 39,000 bales. Quotations are raised for Americans, ¾d to 1d; Surats, 1d; Bengals, Chins, and Japans, 1d to 1¼d per lb. The Liverpool stock is reduced to the extent of 80,000 bales. The market closes very strong, at extreme rates: sales, 20,000 bales.

During the week ending Aug. 28, the cotton trade at New Orleans was very quiet, the total sales amounting to about 1,250 bales. As regards prices, a decline of 1c per lb took place. Ordinary was quoted at 31c to 33c; good ordinary, 36c to 37c; low middling, 39c to 41c; and middling, 42c to 44c per lb. The receipts since Sept. 1, 1864, had amounted to 265,510 bales, while the exports had been 183,929 bales. The stock on the 28th ult. was 86,156 bales.

From Mobile, we have intelligence to Aug. 26. The cotton trade had been firm, and prices had somewhat improved: middling was quoted at 37c to 38c; low middling, 36c to 37c; and good ordinary, 33c to 35c per lb. The exports during the week had been 9,326 bales, viz., 2,669 bales to Liverpool, 916 New Orleans, the remainder to New York. The receipts since Sept. 1 had been 96,618 bales, and the exports, including nearly 12,000 bales destroyed by explosion, 60,043 bales. The stock at latest date was 34,575 bales.

Via the Persian Gulf, we have intelligence from Bombay to Sept. 16. During the week the cotton trade had been firm, at higher prices. Broach was quoted at 10.171d; and Dhollerah,

Digitized by Google

10,510 per lb, including freight. The shipments had been about 16,000 bales. For Manchester goods, the market had ruled active. Freight to Liverpool was 20s per ton.

Postal advices from Calcutta are to Aug. 8. The cotton trade was firm, and transactions had taken place for export to China, on higher terms. Very little, however, was doing for shipment to Great Britain. The export in July was as follows:—To Great Britain, 13,507; to France, 990; to China, 2,463 bales.

The demand for cotton at Madras during the fortnight ending Aug. 11 was far from active. The arrivals of the *new* crop had been considerable, and the stock of all kinds at latest date was estimated at 17,000 bales. Western produce was quoted at 9¾d per lb. The subjoined table of exports is from Messrs Dymes, Cartwright, and Co.'s circular:—

EXPORTS of COTTON from MADRAS in SEVEN MONTHS.

	Great Britain. cwts.	France. cwts.	Elsewhere. cwts.	Total. cwts.
In July, 1865	63,050	2,689	268	66,007
In previous 6 months	146,995	4,867	963	152,822
Total for 7 months	210,045	7,556	1,231	218,829
Against same period 1864	197,647	14,222	1,876	213,745
— — 1863	201,867	22,614	3,259	227,740
— — 1862	124,204	8,833		133,037
Against the whole of 1864	297,235	15,809	2,557	315,601
— — 1863	422,101	35,177	6,741	464,019
— — 1862	234,745	11,475		246,220

We have intelligence from Alexandria to Sept. 13. At that date the cotton trade was firm, with an upward tendency in price. Fair open-ginned produce have realised 16¾d, good fair do., 17¾d per lb., cost and freight. The arrivals, from Aug. 27 to Sept. 5, were 25,000 bales, whilst the sales during the same period reached about 30,000 bales. Freight to Liverpool, by steamer, was ¾d per lb.

With the exception of a good demand for raw sugar, on rather higher terms, and a firm market for refined, on the basis of 43s for common brown lumps, the amount of business passing in the market for colonial and foreign grocery produce, this week, has been only moderate. Very little change has taken place in prices, but their tendency, notwithstanding the want of animation in most departments, has been decidedly in an upward direction. Last week, duty was paid in London on 1,237,251 lbs of tea, whilst the export for the week ending Sept. 14, amounted to 500,354 lbs, making a total of 1,737,605 lbs, against 1,790,748 lbs last year.

The tea trade at most of the Chinese ports, at the date of our latest postal advices, was somewhat active, and prices, both of black and green produce, ruled firm. The export to Great Britain, since the opening of the season, had been 23,839,200 lbs, against 34,068,000 lbs—to the United States, 2,631,100 lbs, against 397,600 lbs last year.

Advices from Colombo are to Aug. 16. The amount of business doing in coffee—both plantation and native—was very moderate: the former was quoted at 12s 9d to 13s per bushel, the latter at 45s per cwt for unpicked, and 53s for picked and dried. The annexed statement of exports is from Messrs Fryer, Schultze, and Co.'s circular:—

The public sales of colonial wool will be brought to a close to-morrow. During the last few days they have passed off rather languidly at about last week's quotations, good and fine wools being firm at the full prices of last sales, whilst inferior qualities have sold at a decline of ½d per lb, as compared with the same period. During the present series, owing in some measure to their extensive transactions at the July-August sales, foreign buyers have operated to a very moderate extent. The English wool trade is decidedly firm at extreme rates.

Hemp continues steady at 29*l* 10s for clean Russian. Flax has commanded more attention, and has fully supported last week's currency. Jute has changed hands freely, and in the value of certain qualities an improvement has taken place.

A report from Shanghai, dated July 21, thus alludes to the state of the silk trade during the preceding fortnight:—"This market has been very active, and the settlements may be estimated at 8,000 to 8,500 bales. The higher classes of Tsatlees, as they arrive from the interior, have found ready buyers at advanced rates, though for the past few days, owing to the late heavy rains, the arrivals have been moderate. Prices have further advanced 30 tls, and dealers are firm for higher quotations. The reports of the second crop are unsatisfactory; the silk is said to be deficient in colour and quality, and the yield not so large as expected." The following table shows the receipts, settlements, and exports since the commencement of the season, as well as the unsold stock at latest postal date:—

	1865-6. bales.	1864-5. bales.	1863-4. bales.
Receipts	24,250	9,800	21,500
Settlements	22,250	4,500	6,500
Exports	19,165	3,388	5,763
Unsold stock	2,000	5,300	15,000

From Yokohama, under date July 12, we have received the following report of the silk trade:—The inquiry has been limited to a few foreign houses only, and the transactions during the fortnight have not therefore been very extensive. Old silk finds purchasers at the undermentioned rates, but it is not quickly taken off the market. Most of the parcels received of the new crop (hanks) show a want of care in the reeling, are badly cased, and mostly of a green to greenish colour, whilst the small proportion of white is also inferior. These new arrivals have been sold at from $680 to $705 for the better parcels, and from $630 to $670 for the medium to inferior lots.

QUOTATIONS.

	Best. per picul. dols		dols	Medium. per picul. dols		dols
Maibash and Sinchu	0	to	0	600	to	670
Sodai	0		0	540		600
Oshiu	0		0	530		630
Echizen	600		610	520		570
Hatchojee	540		560	0		0

Exports of silk from June 1 to date:—To Shanghai, 83 bales; to Hongkong, 83; to England, 648; to Europe, 359—total, 1,090 bales; against the same time 1864-65, 718 bales.

The silk trade at Calcutta, during the fortnight ending Aug. 8, was very quiet, which inactivity was chiefly caused by the large shipments of produce to Europe from Chinese ports. The export to Great Britain for the seven months ending July 31 was, 7,963 bales, against 5,653 bales; to France, 2,623 bales, against 632 bales last year.

For metals, there has been only a moderate inquiry. Iron and tin plates continue firm in price, and most other descriptions are without material change in value from last week. Scotch pig iron 57s 6d cash, mixed numbers.

The oil trade has continued very firm. The principal change is in sperm, which is now worth 110*l* to 115*l* per tun. Linseed oil commands 38s, and fine palm, 40s per cwt. Turpentine moves off slowly, at 46s for French spirits on the spot. In petroleum, a further improvement has taken place—American refined being quoted at 3s 1d to 3s 3d per gallon. The shipments of petroleum from all ports from the United States, from Jan. 1 to Sept. 2, were 11,955,029 gallons, against 21,035,564 gallons last year, and 20,490,494 gallons in 1863.

Tallow has continued to fluctuate in price. New P.Y.C. is now quoted at 46s per cwt on the spot; 46s 9d for December, and 47s for January to March deliveries. At St Petersburg, the quotation is 51 silver roubles.

During the week ending Sept. 9, the demand for cotton and woollen goods at New York was very active, and a further advance took place in prices; many descriptions of goods, indeed, were selling at very high rates. Foreign goods had been in active request, and an advance of 3 to 5 cents. was realised in most descriptions. The foreign imports of dry goods during the preceding week were valued at 566,680*l*, against 293,370*l* last year; and 313,250*l* in 1863. All descriptions of grocery produce, notwithstanding a perceptible falling off in the demand, changed hands at fully late rates. The export inquiry for wheat and flour was extremely limited, but there had been a good demand for home consumption, and prices had improved. The export of flour, from Sept. 1 to Sept. 5, was only 19,243 barrels, against 40,505 barrels; of wheat, 33,192 bushels, against 51,985 bushels; but of corn the shipments had amounted to 34,882

Digitized by Google

bushels, against 25,528 bushels last year. The fluctuations in the premium on gold were from 143⅞ to 145 per cent. The stock of bullion in the banks on the 2nd inst. was 2,888,770*l*, against 4,027,310*l* last year, 6,397,880*l* in 1863, and 7,227,790*l* in 1862; whilst the balance in the Sub-Treasury at the same date was 12,339,870*l*. Subjoined is the official statement of the extent of the public debt on the 1st of September; the calculations are made at the rate of 4s the dollar:—

	Amount. £		Interest. £
Debt bearing interest in coin	221,662,140	...	12,900,120
Do. in lawful money	254,895,620	...	14,706,210

Debt bearing no interest	74,679,650	...	...
Total	551,538,020	...	27,606,330

THE COTTON TRADE.

LIVERPOOL—Sept. 15.

At the time of our going to press, our Liverpool letter had not arrived. During the whole of the week, the market has been very active, and a large business has been transacted. The sales amount to 188,000 bales, of which spinners have taken 85,000 bales, speculators 64,000 bales, and exporters 39,000 bales. The quotations exhibit an important advance, American produce being ¾d to 1d; Surat, 1d; Bengal, China, and Japan, 1d to 1¼d per lb higher than on Friday last. In consequence of these extensive operations, and only a moderate import, the stock shows a reduction from last week of about 80,000 bales.

LONDON—Sept. 22.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—Since our last there has been a very large demand, at gradually advancing prices, and with the exception of Western Madras, which is only ¼d to ½d dearer, we raise our quotations ¾d to 1d per lb, the market closing firm, but not quite so excited as during the earlier part of the week. Owing to the small quantity on the spot, the principal business has been for arrival, the latest sales showing an advance of ¾d to 1d per lb on last week's prices.

NEW YORK—Sept. 9.

There has been a good demand for cotton, this week, and the sales amounted to about 16,000 bales. Very little change has taken place in prices; but a slight improvement is apparent. Middling Upland produce, 43½ cents per lb. The arrival since the 1st of the present month amounts to 27,268 bales, about 13,000 bales of which are from New Orleans, and about 6,600 bales from Mobile. The following are the prices current:—

	New York Classifications. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary	36	36	36	36
Good ordinary	38	38	38	39

The export from Jan. 1 to Aug. 31, was 55,974 bales, against 27,020 bales during the corresponding months last year. Freight to Liverpool is 3-16d per lb.

MARKETS IN THE MANUFACTURING DISTRICTS.

The trade for goods throughout the manufacturing districts has continued active, and, in some instances, a further advance has taken place in prices. The iron trade remains firm, and the late advance in the quotations is supported. Coals are in request, and prices rule somewhat high.

MANCHESTER, Sept. 21.—A large and general advance has been established this week on all Manchester staples. Fine yarns from 80's upwards have been bought eagerly for Glasgow and other places at 2d to 3d per lb over the rates of last week, and as producers of these numbers are full of orders great length of time has been allowed for delivery. In the medium and lower numbers great activity has also prevailed, and the advance on these may be stated generally at about 1½d per lb. In cloths, large sales have been made for America, along with other markets, mainly to order, as stocks have been almost cleared. In shirtings and other goods for India, now relatively low, speculators have come in and taken the few lots which were accessible at some advance over last week. Some small abatement of the excitement has been perceived to-day, but the market remains dearer, or tending upwards.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—Our wool market continues animated, and somewhat firmer in regard to price. A good deal of wool has been changing hands, but the demand is to supply the wants of consumers, and in no degree of a speculative nature. Spinners of yarns are now very fully employed. The demands of our home manufacturers increase, and export buyers are more disposed to operate. There is no abatement in the demand for piece goods for America. Orders continue to pour in on a large scale. Prices are in some instances higher than last week.

LEEDS.—The woollen cloth markets have been moderately well attended. Prices of all seasonable goods are firm. A good bulk of meltons and tweeds continues to change hands. Wools are quite as high as last week.

ROCHDALE.—The manufacturers of heavy as well as light goods are well employed, and stocks are not heavy. There is no change in the Yorkshire goods trade, which remains rather dull, with prices nominally unchanged. The wool market is also quiet, but prices are very firm.

NOTTINGHAM.—The lace trade continues extremely dull. There is less doing than for some time past. In the silk branch, black laces are in less demand. In hosiery there is a good amount of business doing, both for the home market and for export, and the workpeople are well employed. Yarns continue firm, and all descriptions are higher in price.

HUDDERSFIELD.—Piece-dyed black doeskins and better class fancy trouserings have been chiefly inquired for, while selections from middle-priced fancy goods of all kinds have been very cautiously made. Woollen and Bedford cords still sell readily, more especially in the better qualities. There have been very considerable orders given on account of American houses for various descriptions and qualities of fancy unions.

DUNDEE.—Our flax market continues very firm; there has been more inquiry for the article, and consumers (in consequence of the active demand for their productions) having shown a greater inclination to operate at present rates, but no advance can yet be noted. Jute has been in improved demand, and an increased amount of business has been doing at full prices. In linens an extensive business is doing in almost all descriptions of our local manufacture, at stiffening prices.

BELFAST.—A good business has been done in linens, and prices are well maintained. A steady demand continues to prevail for yarns at full rates. The country markets are now well supplied with new flax, which is generally of good quality.

BIRMINGHAM.—For fancy goods generally there is an average demand for the time of year. The demand for material is moderate, but most of the rolling mills are working full time. The edge-tool makers report business slack.

SHEFFIELD.—The home trade continues languid in nearly all the principal branches, including steel, saws, files, tools, and cutlery. There is still a moderate business doing in stove-grates, and the sheepshear makers are still exceedingly busy.

NEWPORT.—The recent firmness is fully maintained in the iron trade, and the ironmasters continue well placed for orders. Steam coal is in fair export request.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Sept. 9.—Although the export demand for produce is far from inactive, the market for flour and wheat is decidedly firm, and the quotations have a strong advancing tendency. The improvement at present is chiefly in the better qualities. The week's receipts amount to 65,455 barrels of flour, 227,896 bushels of wheat, and 535,881 bushels of corn. For corn, there has been a steady demand, and considerable business has been done for export. Annexed are the quotations:—Flour—State, superfine brands, $6.95 to $7.50; State, extra brands, $7.80 to $7.95; State, choice brands, $8 to $8.25; Ohio, common brands, $8.75 to $9.15; Ohio, fancy brands, $9.20 to $9 25; Ohio, good and choice extra brands, $9.30 to $11; Michigan, Indiana, Wisconsin, &c., $7 to $8.45; Genesee, extra brands, $8 30 to $11; Missouri, $12 to $14; Canada, common, $7.90 to $8.25; Canada, good to choice extra, $8.30 to $11 per barrel. Wheat—Chicago spring and Milwaukee Club, $1.58 to $1.62; amber Milwaukee, $1.63 to $1.64; new amber State, $2.10; choice amber Michigan, $2.18; inferior Chicago spring, $1.45. Corn—Western mixed, 90c to 91½c; unsound ditto, 83c to 89c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING

Up to our market, this week, the arrivals of English wheat have been on a moderate scale, but in somewhat improved condition. The demand has been far from active; nevertheless, the quotations have been supported. The supply of foreign wheat has not increased. Good and fine qualities have changed hands at full prices; but all other kinds have been quite neglected. There has been very little inquiry for barley; yet the currencies have been supported. The malt trade has continued in a sluggish state, on former terms. For the time of year, the receipts have been rather extensive. The imports of foreign oats have been liberal. The oat trade, however, has ruled steady, at previous quotations. Beans and peas have been in short supply, and heavy request, at barely stationary prices. The demand for flour has been much restricted, at about last week's quotations. The imports of foreign have been very limited.

Nearly the whole of the crops have now been secured in England. In Ireland and Scotland considerable progress has been made in harvest work, and our advices respecting the yield of the new wheat and barley are satisfactory. Oats, beans, and peas, however, are deficient. The continental markets have been somewhat heavy for wheat; but all other kinds of grain have changed hands freely, at full quotations. The shipments of both wheat and flour from America have not increased.

In Scotland, wheat has met a dull inquiry, at the late decline in prices. Most descriptions of spring corn have sold at full currencies.

The Irish markets have been in a very inactive state for nearly all kinds of produce. In prices, however, the fluctuations have been unimportant.

The supply of English wheat on sale at Mark lane, to-day, was only moderate. The condition of the produce was tolerably good, and the trade ruled firm, at full currencies. For foreign wheat the inquiry ruled far from active; nevertheless, previous quotations were well supported. Barley moved off slowly, at late rates. In malt, an increased amount of business was transacted, at previous quotations. Oats were in fair demand, at late prices, whilst beans and peas, owing to the small supply on offer, realised full quotations. The flour trade was quiet, on former terms.

As regards the state of trade in floating cargoes, Mr George Dornbusch writes as follows:—Arrivals at ports of call since last Friday—79 cargoes, viz., 37 wheat, 28 maize, 2 barley, 4 rye, 2 milletseed, 1 linseed, 1 rapeseed, 3 cottonseed, and 1 oilcake. Trade inactive: wheat quiet, maize dull, barley quiet, rye nothing doing. Sales—Wheat arrived, 4 cargoes: Taganrog Ghirka at 39s 6d, Odessa Ghirka at 39s 9d, Marianopoli at 40s 3d and 41s per 492 lbs. On passage, 2 cargoes: Taganrog Ghirka at 40s per 492 lbs, Salonica at 38s 6d per 480 lbs. To be shipped: 13,000 qrs Odessa Ghirka, at 40s 6d to 41s 6d per 492 lbs. Maize arrived, 3 cargoes: Danubian at 28s 6d to 30s 3d per 480 lbs. One cargo on passage: Danubian, at 28s. Shipped or to be shipped: one cargo Odessa, at 30s per 492 lbs. Barley, one cargo on passage: Nicolaieff, at 22s per 400 lbs.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT"

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market shows unabated steadiness, and prices are in most cases 6d per cwt higher than on Friday last. Total deliveries in London now exceed those of last year by 38,250 tons, while the imports show a very trifling increase, and the stock is 3,500 tons less. Up to yesterday (Thursday), 3,720 casks West India had sold, including Barbadoes by auction at 31s to 38s per cwt. Low sugars are still in demand, and various floating cargoes have sold for the United Kingdom at extreme rates. The Netherlands Trading Company's sale on Wednesday went off at rather higher prices.

Mauritius.—The sales on Tuesday passed off steadily, 4,701 bags being disposed off: soft grey and yellow, 31s to 34s; grainy, 35s 6d to 38s 6d; low to good brown, 28s 6d to 30s 6d per cwt. A portion taken in at higher prices, but afterwards sold together with some other parcels privately. A floating cargo of brown chiefly at 21s 6d per cwt.

Bengal.—624 bags sold as follows: Gurpatta date, low yellow, 32s 6d. Middling to good has sold privately at 33s 3d to 34s 6d.

Madras.—800 tons low Jaggery have sold to arrive at 27s 6d. 200 tons grainy at 29s.

Manilla.—14,000 bags unclayed have sold privately at 29s to 29s 6d. 10,000 bags clayed at 32s to 32s 6d per cwt.

Other Foreign.—A full amount of business has been done in Porto Rico at 35s 6d to 37s. 1,500 boxes Havana, No. 11 to 11½, 37s 3d to 37s 6d. 655 casks Porto Rico by auction part sold at 33s to 37s. 585 boxes Havana were chiefly sold: grainy, at 12s 10d duty, 40s 6d to 42s; 11s 8d, 38s 6d to 39s 6d. Yesterday, 1,177 boxes were taken in at 35s 6d to 40s. 610 boxes Cuba sold: good to fine dry yellow clayed, 37s 6d to 40s 6d. A floating cargo Cuba has sold at 24s; two of Havana, No. 12, at 26s 6d; No. 13, 27s 6d; one of brown Pernambuco at 23s 3d; one of Bahia at 22s 6d per cwt.

Refined.—The market has been firm, with buyers at rather higher rates.

MOLASSES.—270 puncheons West India have sold: St Lucia, 13s 6d; Antigua, 16s 6d per cwt.

RUM.—A quiet market, but prices are unchanged. Good Demerara in puncheons has sold at 1s 8½d to 1s 9d. A small quantity of Penang is reported at 1s 6d per proof gallon.

COFFEE.—The market continues very firm, and prices are rather higher in several cases. Various parcels of East India have found buyers during the week. 111 cases 3,000 bags went as follows: fine, 92s to 95s; pale to middling, 71s to 81s; Manilla, 70s. 235 bags Singapore sold at 72s 6d to 73s 6d for good. 1,270 casks 421 barrels and bags plantation Ceylon realised extreme prices, and all sold at from 77s to 85s. 762 bags native realised 65s 6d to 67s 6d, with fine ordinary, 68s. 682 bags Rio about one-third part sold at 65s to 68s. 892 bags washed brought 74s to 80s. Of 250 packages Mocha, a few lots of Bombay import sold at 93s per cwt for fair long berry. Alexandria held above the value.

COCOA.—224 bags Guayaquil offered by auction sold at 70s, and the chief part of 423 bags Trinidad at full prices, ranging from 65s to 100s. 740 bags Bahia were taken in at 39s to 45s per cwt.

TEA.—At the public sales on Tuesday and Wednesday there was a steady inquiry for most kinds of congou, especially blackish leaf. Common dusty leaf realised full prices, from 9½d to 10½d per lb. Of 17,053 packages in the catalogues, about 12,100 packages, sold principally "without reserve." The market is steady by private contract.

RICE.—Sales of soft grain descriptions have been made privately within the past fortnight, but the prices do not transpire. 10,000 bags new Necrancie Arracan have sold this week at 11s to 11s 3d. A floating cargo of Bassein has sold at 11s for a near port, or 11s 9d for the United Kingdom.

IMPORTS and DELIVERIES of RICE to Sept. 16, with STOCKS on hand.

	1865.	1864	1863	1862.
Imports ...tons	27200	37850	26550	73710
Deliveries	48720	54900	57750	44050
Stock	19930	28900	42870	59550

TAPIOCA.—1,137 bags Penang offered by auction part sold at 2¾d to 3d per lb.

SPICES.—A large quantity of white pepper has been offered, viz., 1,513 bags Singapore, which only partly sold at 5½d to 5¼d middling to fair, barely supporting the previous value. Black active for common shipping sorts. Penang has sold at 2¾d to 3d. 155 bags good brown Tellicherry realised 4d to 4⅛d, being cheap. 75 cases brown nutmegs went as follows, being partly sold: small brown, 1s 2d to 1s 4d; middling to good, 1s 5d to 2s 9d. 74 cases Penang cloves sold at 11½d to 1s 0¾d. 7 cases mace, 1s 4d to 1s 8d; good, 2s 6d. 229 bags pimento were taken in above the value. Privately, good has sold at 3d per lb. Cassia lignea has commanded a further advance privately, and 560 boxes by auction sold at 87s to 92s for coarse to good. 230 cases Cochin ginger, rather wormy, 66s. 417 barrels Jamaica sold steadily at 61s to 100s per cwt.

SALTPETRE.—A large business has lately been done in Bengal, of which particulars were withheld. Fine, on the spot, sold at 23s to 23s 3d cash; 650 tons to arrive at 24s, on usual terms. 50 bags Belgian refined offered by auction were taken in at 23s per cwt, refraction 2 per cent.

IMPORTS and DELIVERIES of SALTPETRE to Sept. 16, with STOCKS on hand.

	1865	1864	1863	1862
Imports ...tons	6240	11070	12000	12950
Deliveries	7950	9500	10250	12550
Stock	5680	8720	5570	3520

COCHINEAL.—A few sales have been made at last week's rates, and the market is now steady. The stock is reduced to 4,460 serons, a quantity smaller than for many years past, and the imports have fallen off materially.

SAFFLOWER.—128 bales Bengal sold steadily at 4*l* 10s to 6*l* 10s per cwt.

OTHER DRYSALTERY GOODS are steady. Turmeric has been in demand.

Digitized by Google

SHELLAC is firmer, with diminished shipments to Great Britain.

METALS.—The sales have been smaller than for some time past, although the market is steady. Straits tin steady, with sales at 88*l* to 88*l* 10s. Nothing of interest has been reported in spelter. Scotch pig iron advanced to 57s 6d per ton cash. Spelter dull.

HEMP.—The market is firm. Some fair to good roping quality has sold at 35*l* to 36*l* per ton.

JUTE.—The sales on Wednesday went off steadily, 6,830 bales being sold at 11*l* 10s to 22*l* per ton, which showed some advance on the low to middling qualities. The deliveries have exceeded those of 1864 by 18,000 tons, and the imports have increased only about 3,400 tons.

OILS.—Linseed has further advanced to a considerable extent, 38s paid on the spot, 37s for delivery to the end of the year. Smaller packages for America in proportion. Rape is dearer. Foreign refined, 48s; brown, 47s, and rather scarce. Cocoa-nut higher for Cochin—viz., 47s 6d, owing to expected short supplies. Palm firmer. A floating cargo of Lagos has sold—present quotation, 39s to 39s 6d per cwt. Olive is again rather dearer. Sperm cannot be obtained under 105*l* to 106*l* per tun; but these high prices check demand. Petroleum: Refined has advanced to 3s 2d to 3s 3d per gallon.

LINSEED.—The market continues to manifest an upward tendency, there being still a demand for America. On the spot, Calcutta has sold at 61s to 61s 6d, and Bombay at 63s per quarter. For arrival, business has been done in Calcutta, August to October sailing, at 61s; a cargo of Black Sea on passage at 59s, and one for shipment to end of Nov. at 50s 3d per quarter to a direct port.

TALLOW.—The market is firm and dearer. 1st sort new Petersburg Y.C., 46s; January to March, 46s 9d to 47s; March only 47s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, September 18, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is still very firm, though with an upward tendency. 1,365 casks West India sold, including the parcels by auction, making 5,088 casks for the week. 4,663 bags Mauritius were partly disposed of on previous terms, the remainder being taken in above the value. 100 bags native Madras sold at 28s 6d to 30s. 6,000 bags clayed Manilla are reported at 32s 3d to 32s 6d. 370 casks Cuba at 35s. A floating cargo of Mauritius, at 26s 6d per cwt.

COFFEE.—72 casks 2,337 bags native Ceylon partly sold on former terms, from 65s 6d to 67s; fine, 70s. 381 casks plantation obtained full quotations, also 35 cases 149 bags Tellicherry.

SALTPETRE.—1,101 bags Bengal, refracting 6¾ to 5½, were taken in at 23s 6d. 532 bags Scinde, refraction 25½, at 21s. The former since sold at 23s 3d per cwt.

RICE.—2,950 bags Rangoon paddy were sold at 9s 6d to 10s 6d.

GINGER.—339 cases wormy Cochin part sold at 63s to 70s per cwt.

OIL.—730 casks cocoa-nut, by auction, sold at 47s 6d to 49s per cwt.

TALLOW.—685 casks Australian chiefly sold: beef, 45s 3d; mixed melting, 46s 3d to 46s 6d. 70 casks South American, 44s to 55s 6d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues firmly supported, no material alteration to note as respects prices. Dutch crushed and loaves are 6d higher, with a fair business doing.

GREEN FRUIT.—A moderate business doing, which is in character with the season. No improvement in the price of lemons, the quantity of inferior compared with those of good quality keeping prices in check. Lisbon grapes are in good demand; some parcels, sold by Keeling and Hunt at public sale, went at prices in character with condition and quality. Value of nuts of all kinds well sustained, with a good prospect for the autumn and winter demand.

DRY FRUIT.—Fine new currants, after a period of great demand, are quieter, and though prices are firm, business has fallen off. The leading dealers are fairly supplied for the present. Low new is at present neglected. Some sales of provincial are reported at 25s to 26s. Old is in demand, and several parcels have changed hands during the week. In new Valencia raisins, fine only attract attention, as they sell freely at full prices. Low out of condition fruit is plentiful, but held at present for too high rates. New Turkey figs were first offered by auction this week, and sold from 66s to 73s. New Sultanas unsaleable.

ENGLISH WOOL.—Long wools in better demand.

COLONIAL WOOL.—Prices very firm; competion brisk. Sales close on Saturday next.

FLAX.—Market firm.

HEMP.—Market steady, and a fair business doing.

SILK.—More doing, with rather firmer rates for the best qualities.

TOBACCO.—There is a decided better feeling for American growths. Holders of fine qualities are firm, at top market rates. There has been a better demand during the past week, and there is now but little of ordinary descriptions on sale.

LEATHER AND HIDES.—The improvement in the leather market that has existed for some weeks is still maintained, but as the supplies are, with but little exception, fully equal to the demand, no advance in prices has taken place. At Leadenhall, on Tuesday, the attendance of buyers was small; there was a fair supply of fresh leather,—the articles least abundant being good crop hides, 45 lbs to 50 lbs, bellies, English and foreign, the heaviest English butts, calfskins, prime kips, and horse hides.

METALS.—There has been rather more business transacted during this week. Copper has found some buyers for India, both of manufactured and tiles. Iron is steadily maintained in merchant kinds, and Scotch pig is still further improved. Tin has been kept steady by some little buying of Straits for American account. Spelter is quiet. Lead in slightly better inquiry. Tin plates in great request at still higher prices.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	48	9
Fat by ditto	2	4
Yellow Russia	47	6
Melted stuff	36	0
Rough ditto	20	0
Greaves	20	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 18.—The total imports of foreign stock into London, last week, amounted to 25,089 head. In the corresponding week in 1864 we received 14,303; in 1863, 15,217; in 1862, 11,620; in 1861, 12,948; in 1860, 11,522; and in 1859, 9,893 head.

The supply of foreign stock on sale in our market to day was very large. Generally speaking, the quality both of beasts and sheep was inferior. The trade was quiet, at about last Monday's currency. There were some good Normandy beasts on offer. Fresh up from our own grazing districts, the arrivals of beasts were very limited. The supply from Ireland was but moderate; whilst the receipts from Scotland were confined to 18 head. There was a great scarcity of prime stock on offer, and the very few choice breeds exhibited for sale changed hands at full prices; otherwise the beef trade was dull, and the quotation indeed somewhat irregular. The top price was 5s 4d; but this value was realised in only a few instances, the bulk of the primest breeds on offer, which was really of only secondary quality, having sold at 5s to 5s 2d per 8 lbs. The supply of sheep on sale was moderate, but the quality of the stock was very middling. Good and prime Downs, half-breds, and Lincolns moved off freely at extreme rates; otherwise, the mutton trade was steady, at last Monday's quotations. The top price was 6s 8d per 8 lbs. Lambs were in request, and the limited supply on offer realised higher prices. A few choice breeds sold at 8s per 8 lbs. There was a fair demand for calves, and prices ruled firm. The top price was 5s 6d per 8 lbs. The pork trade was firm, at fully late rates.

SUPPLIES.

	Sept. 19, 1864.	Sept. 18, 1865.
Beasts	6690	6240
Sheep and lambs	24230	28470
Calves	405	316
Pigs	630	312

THURSDAY, Sept. 21.—The supply of beasts here to-day was moderate. Generally speaking, the quality of the stock was inferior, and the trade ruled quiet at about Monday's currency. The few choice breeds on offer realised 5s 4d per 8 lbs. The supply of sheep on sale was tolerably large. For most breeds there was a steady demand at full quotations. Prime Downs and half-breds sold at 6s 8d per 8 lbs. The veal trade was firm at fully late rates. In pigs there was a steady demand at quite previous quotations.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, Friday, Sept. 22.—Our market is well supplied with new hops. Good and fine qualities are in steady request, but inferior pockets are a dull inquiry. Yearlings and old hops command very little attention. Annexed are the quotations:—New Mid and East Kents, 105s to 160s; New Weald of Kents, 95s to 126s; New Sussex, 90s to 110s; Yearlings, 90s to 135s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Sept. 22.—The supplies of potatoes on sale are tolerably large. Good and fine qualities move off steadily; otherwise, the trade is dull. Prices range from 40s to 110s per ton.

COAL MARKET.

FRIDAY, Sept. 22.—Wallsend Haswell 20s—Hetton 20s—South Hetton 20s—Hartlepool 19s 9d—East Hartlepool 19s 9d—Tees 19s 6d—Braddyll's Hetton 19s 3d—Byron 18s 6d—Harton 18s—Hetton Lyons 18s—Heugh Hall 19s 3d—Kelloe 19s—Russell's Hetton 18s 6d—Eden Main 18s 9d—South Kelloe 19s 3d—Tunstall 17s 9d—Wharncliffe 18s 3d—Byass's Bebside West Hartley 18s 6d—Cowpen Hartley 18s 6d—Hastings' Hartley 18s 6d—Holywell Main 16s—Wylam Moor 16s. Ships at market, 72; sold, 33; gas contracts, 37—70; unsold, 2; ships at sea, 35.

HAY MARKETS.

THURSDAY, Sept. 21.—The supplies of hay and straw on sale are tolerably large. The trade rules heavy, on easier terms.

Per load of 36 trusses.

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Hay	85 to 115	90 to 120	85 to 115
Clover	95 to 135	95 to 140	95 to 135
Straw	30 to 38	34 to 40	30 to 38

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 22.—The demand for all useful kinds of foreign continues very good, and if holders were less stiff in prices the amount of business would no doubt assume a larger extent than has been the case hitherto.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 22.—Fair attendance. Wheat in more general demand. Red 1d per cental dearer. No change in white. Flour moderate demand at late rates. Indian corn firm. Mixed American, 29s 3d. Beans steady. Oats and oatmeal slow at firmer prices.

The Gazette.

TUESDAY, Sept. 19.

BANKRUPTCY ANNULLED.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 9th of September, on 12,241 miles, to 752,637*l*, and for the corresponding week of last year, on 11,905 miles, to 705,336*l*, showing an increase of 336 miles and, of 47,301*l*. The gross receipts on the 14 principal railways amounted in the aggregate, on 8,759 miles, to 622,756*l*, and for the corresponding week of 1864, on 8,464 miles, to 588,021*l*, showing an increase of 295 miles and an increase of 34,735*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Sept. 18.—The share market was inactive to-day, but the few alterations in the closing prices were generally towards firmness. In English railways, Blackwall and South Devon advanced 1 each, Manchester, Sheffield, &c. ¼ each, Great Eastern (East Anglian), and North British (Edinbourgh, Perth, &c.) ⅛ each, and ditto (original) ¼; Great Western and North-Western declined ¼ each. In colonial, Demerara improved 1. In foreign, Eastern of France and Great Luxembourg recovered ½ and ⅛ respectively, Pernambuco improved 1, and Lombardo-Venetian receded ⅛. In American, Illnois Central shares advanced ½, and Erie shares (paid up) a further ¼. In British mines, Margaret advanced 1, Chiverton and Great Wheal Busy ¼ each, and Grenville a further ¼; and East Lovell declined ½. In foreign mines, Frontino Gold and Port Phillip improved ½ and ⅛ respectively, and St John del Rey receded 1.

TUESDAY, Sept. 19.—In the share market to-day there was no peculiar feature, but the banks closed with firmness, while in the other descriptions there was no average alteration. In English railways, Great Eastern improved ½, North British a further ½, and ditto (Edinburgh, Perth, &c.) further 1½, and South Western and Metropolitan declined ⅛ each, and Midland (9*l*) ½. In colonial, Scinde and Delhi (stock) advanced ½ each. In foreign, Paris and Orleans advanced ½, and Dutch-Rhenish ⅛. In American, Atlantic and Great Western (New York, 2d mortgage) and Pennsylvania railroad (sterling bonds) advanced 1 each, and Erie shares (paid up) relapsed ¼. In British mines, East Bassett improved 2, and Chiverton, Great Wheal Busy, and Granville a further ¼ each; and Providence declined 2, and East Caradon and South Condurrow ½ each. In foreign mines, Don Pedro North del Rey improved ¼.

WEDNESDAY, Sept. 20.— In the share market to-day there was no increase of business, but English and Canadian railways and the banks closed with increased firmness, no material change appearing in the other descriptions. In English railways, Great Northern (A stock) and Brighton improved 1 each, North-Western, North-Eastern (Leeds), ditto (York), and North Staffordshire ½ each, and North British (of both descriptions) a further 1 each. In colonial, Grand Trunk of Canada (1st preference) and Great Western of Canada (5½ per cent. bonds) advanced 1 each, ditto (6 per cent.) 1½, and ditto (shares of both descriptions) ½ each. In foreign, Dutch-Rhenish advanced a further ⅛, and ditto (paid up) ¼; and European Central declined 2, and Lombardo-Venetian ⅜. In American, United States (5-20) declined ¼, and Erie shares (paid up) a further ⅛. In British mines, Clifford Amalgamated and Great Laxey advanced ½ each, East Grenville ¼, and Chiverton further ¾; East Bassett relapsed 2; and Wheal Buller declined 2, and East Wheal Russell ¼. In foreign mines, Yorke Peninsula receded ⅛.

THURSDAY, Sep. 21.—In the share market to-day there was no recovery of animation, and there was no average change in the closing prices of either of the descriptions, except a shade of weakness in foreign, and a continued tendency to firmness in English railways, of which latter description Chatham (of both descriptions) advanced 1 each, Great Eastern (East Anglian) and North-Eastern (Berwick) ½ each, South-Eastern ¼, and North British (of both descriptions) a further 1 each; Great Northern (A stock) relapsed ½, and North-Western ¼; and Midland declined ¼. In colonial, Grand Trunk of Canada (4th preference) improved ½, and Buffalo and Lake Huron ¼; and Eastern Bengal declined ½. In foreign, Great Luxembourg improved ⅛; Dutch-Rhenish relapsed ⅛; and Paris and Orleans declined ½; and Lombardo-Venetian a further ¼. In American no alteration occurred. In British mines, Providence advanced 1, and East Lovell ½; Great Laxey relapsed ½; and Great Wheal Bury receded ¼, and Wheal Buller a further 1. In foreign mines, Pontgibaud Silver and Santa Barbara declined ½ and ¼ respectively.

FRIDAY, Sept. 22.—The railway market was rather dull, and a decline of ¼ per cent. occurred in Great Western, South-Eastern, and Great Eastern stocks. Lancashire and Yorkshire improved ⅛. Foreign and colonial railway shares were quiet. Lombardo-Venetian ruled firm, while Great Western of Canada and Dutch-Rhenish showed dulness.

NEW EDITION.—POST FREE.

GABRIEL'S PAMPHLET ON THE TEETH (illustrative and descriptive).

Explaining the only effectual mode of supplying Artificial Teeth without pain, to answer in every particular the purpose of natural masticators.

These Teeth are supplied on the principle of capillary attraction and suction, thus dispensing entirely with springs, and are supplied at moderate charges.

London:—27 Harley street, Cavendish square, W.

City Establishment:—36 Ludgate hill.

(Four doors from the railway bridge).

Country Establishments:—134 Duke street, Liverpool; 65 New street, Birmingham.

Messrs GABRIEL guarantee every case they undertake.

WHERE SHALL WE DINE? Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and file Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.

N.B.—Lists of Heirs at Law, Next of Kin.

SALOM'S NEW OPERA AND FIELD GLASS.—The Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." "Rev. Lord Scarsdale approves of it." Lord Gifford of Ampney—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sendey, Royal Small Arms Factory, Enfield Dock, begs to enclose 10s 10d for a reconnoitrer glass, having just tried that sent to Lieut. Hopkins, and found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met an article that so completely answered the recommendation of its maker, nor, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an inspensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

THE ADVERTISER, WHO possesses twenty years' commercial experience, gained partly in a Colonial Broker's and latterly in a large East India Merchant's office, desires to obtain an Appointment, either as Secretary to a public company or Manager of a good private concern. Highest references.—Address X, care of Mr Hopcraft, Newavendor, Mincing lane.

PARTNER WANTED.—A London Broker is desirous of meeting with a working or sleeping Partner with a capital of £3,000 or £4,000, upon which a high rate of profit will be realised without risk. Every facility will be offered for an investigation of the accounts.—Apply, in the first instance, to Messrs Price, Holyland, and Waterhouse, 13 Gresham street, E.C.

PARTNERSHIP.—A MOST advantageous opportunity offers to an active business man, to join a well-established concern in the City, where the profits are assured. The capital required would be from £5,000 to £10,000.—Apply, by letter only, to Messrs C. F. Kemp, Cannan, Ford, and Co., Accountants, 7 Gresham street, E.C.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

ATLANTIC AND GREAT WESTERN RAILWAY.

Observe the real seal pink lable, and cork branded "Kinahan's LL Whiskey

---

BROWN AND GREEN'S KITCHEN RANGES.

The Prize Medal, 1862.

THE NEW PATENTS (granted April, 1865).

"A close Range with an open Chimney" combines the perfect cure of Smoky Chimneys, and the unequalled advantage for which Brown and Green's Ranges have long been celebrated, with free ventilation of the kitchen and increased economy and convenience. No Close Heat or Smell. Prospectuses free by post.

Frederick Thomas, 72 Bishopsgate within.

STARCH MANUFACTURERS TO H. R. H. THE PRINCESS OF WALES.

GLENFIELD STARCH, Awarded the PRIZE MEDAL, 1862. This unrivalled Starch is USED in the ROYAL LAUNDRY, and Pronounced by Her Majesty's Laundress to be the FINEST STARCH SHE EVER USED. HER MAJESTY'S LACE DRESSER declares it to be the BEST SHE HAS TRIED, and the above Award, by some of the most Eminent Scientific Men of the Age, CONFIRMS ITS SUPERIORITY.

WOTHERSPOON and CO., Glasgow and London.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped,

"G. and J. Deane, London bridge,"

and the box, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed,

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

THOMAS TURTON AND SONS, Manufacturers of CAST STEEL for cutters, punches, taps and dies, turning tools, chisels, &c. CAST STEEL piston rods, crank pins, connecting rods, straight and crank axles, shafts, and forgings of every description. FILES marked T. Turton. Superior to any other make. (See results of trial in the TIMES, July 26, 1851.) TOOLS of all kinds, for engineers, railways, contractors, &c., &c. EDGE TOOLS marked Wm. Greaves and Sons. Electro-Boracic steel, warranted to wear out three tools made of cast steel. DOUBLE SHEAR STEEL, BLISTER STEEL, SPRING STEEL, GERMAN STEEL. Springs, buffers, and cast steel tyres for locomotive engines, railway carraiges, and waggons. SHEAF WORKS and SPRING WORKS, SHEFFIELD.

London Warehouse, 35 Queen street, City
Paris Warehouse, 10 Rue du Grand, Chantier.
New York Store, 102 John street.

Where the largest stock of steel, files, tools, &c., &c., may be selected from.

TEETH, 2s 6d EACH. Sets, 40s each. In a few hours; painless and perfect; guaranteed, or no fee accepted. By Messrs ESKELL and SONS. Stoppings, 2s 6d; extractions, 1s each. The same moderate fixed prices throughout. Attendance 9 to 8 o'clock daily. Consultations free—ESKELL and SONS, 13 Tichborne street, Quadrant. No other address.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN and SIMEON MOSELY and SONS, 30 Berners street, Oxford street, and 448 Strand, opposite Charing Cross Railway Station.

Their painless artificial teeth are unequalled for economy, durability, comfort, and all purposes of articulation and mastication. Operations of every kind being unnecessary, the most nervous patient can be supplied without fear of pain or inconvenience.

Consultation free. Teeth from 5s. Sets from 5 to 25 Guineas, warranted.

MANAGER—Augustus Wildy, Esq.

SECRETARY—John Henry Koch, Esq.

This Association negotiates Public Loans, and conducts Monetary and Financial operations.

It undertakes the sale and purchase of Railway Shares, Debentures, and other securities, and makes advances thereon.

Money received at interest, FOR FIXED PERIODS, on liberal terms.

Debentures of the Association, bearing interest at 5 per cent., payable half-yearly, are issued for periods of three, five, or seven years. Forms of application to be had at Office.

All letters and communications to be addressed "To the Secretary."—By order,

JOHN H. KOCH, Secretary

South Sea house, Threadneedle street, London.

INTERNATIONAL INSTITUTE AT BRUCHSAL (Baden), between Heidelberg and Baden, authorised by the Government. Specialities, living languages and commerce.

IMPORTANT ANNOUNCEMENT.—JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

VENEZUELA SIX PER CENT. LOAN, 1864.

The half-yearly interest on the Bonds of this Loan, negotiated by the General Credit and Finance Company of London (Limited), falling due on 1st October, 1865, will be paid on the 30th September, and any succeeding day (except Saturday), between the hours of 11 and 2 o'clock, at the temporary offices of the said Company, 27 Austinfriars.

The coupons, with lists arranged in numerical order, must be left three clear days for examination.

Forms to be obtained at the offices on and after Friday the 22nd current. R. J. BUTLER, Secretary.

Sept. 16, 1865.

ITALIAN STATE DOMAIN FIVE PER CENT. LOAN, 1865.

The Half-Yearly Interest falling due on the above on the 1st October, 1865, will be Paid (on account of the Societa Anonima per Vendita di Beni del Regno d'Italia. Turin) to the holders of the Provisional Scrip issued by the General Credit and Finance Company of London (Limited), at the temporary offices of the said Company, 27 Austinfriars. The scrip, with lists arranged in numerical order, to be left three clear days for examination. Forms to be obtained at the offices.

Against payment of interest as above the October coupon will be detached from the definitive bond.

27 Austinfriars. R. J. BUTLER, Secretary.

LOAN, HALIM PASHA, of the 31st March, 1863, for £310,000, secured by mortgages upon several valuable estates in Egypt, and reimbursable by fifteen annual drawings on the 31st March. Interest at the rate of 8 per cent, per annum, payable half-yearly on the 31st March and 30th September, at Alexandria, at the offices of the Egyptian Commercial and Trading Company, Limited.

Bondholders desirous of encashing their dividends in Europe are informed that the Interest on the above Loan will continue to be paid in London at the offices of the Egyptian Commercial and Trading Company (Limited), No. 6 East India avenue, and in Paris at Messrs Marcuard, Andre, and Co., on the 15th October and 15th April of each year, in accordance with the terms of the advertisements published on the 7th and 9th March, 1865.

LOANS ON DEBENTURES.

JOHN BROWN AND COMPANY (Limited).

Capital, One Million, in 10,000 shares of £100 each.

The Directors are prepared to receive LOANS, for periods not exceeding seven years, at five per cent., on security of their DEBENTURES.

The security consists of uncalled capital, to the extent of £600,000, with all the extensive and valuable property belonging to the Company. It affords a most ample and safe investment for trust and other moneys, all the shares being held by responsible persons. Interest payable half-yearly.

Apply to the Secretary, at the Company's Offices, Atlas Steel Spring and Iron Works, Sheffield.

JOHN HEWETT, Secretary.

DEBENTURES OF THE LAND MORTGAGE BANK OF INDIA (CREDIT FONCIER INDIEN), Limited.

Subscribed Capital, £2,000,000. Paid-up, £400,000.

Debentures of this bank are issued in Bonds to Bearer, or Registered Proprietor, of £20. £100, £500, and £1,000 each. Redeemable at Par within 30 Years by Half-yearly Drawings.

Interest, £5 per cent. per annum.

Payable Half-yearly or Quarterly, as stated below.

The price of Issue, is £87 for every £100.

The Debentures of the bank are secured by the whole of its Invested Funds, and by the additional guarantee of the uncalled Capital, which at present is £1,600,000 represented by a proprietary of 1,500 shareholders The investment of the bank's funds is restricted, by the Articles of Association, to Real Estate in India and Government Securities, and the Issue of Debentures can never exceed the sum so invested. The amount of Debentures already issued exceeds Half-a-Million Sterling, and the amount invested on mortgage of Real Estates in India is upwards of Three Quarters of a Million Sterling.

The above price of issue gives to the Subscriber 5½ per cent. Interest on the amount invested, and a Cash Bonus of £ 4 18s 10d per cent. on the redemption of the Bonds at par by the half-yearly drawings, which, averaging the period of drawing, yields a return of 6½ per cent.

The Bank also issues Debentures at par for fixed periods of Three, Five, Seven, and Ten Years, bearing 5½ per cent. interest.

The Bonds are payable either to bearer—transfers passing from hand to hand without endorsement, and free of further stamp duty—or to persons duly registered in the Debenture books of the Bank, ownership changing only by transfer deed. Coupons for the half-yearly interest are attached, payable either 1st January and 1st July, or 1st April and 1st October, by which means investors have the option of drawing their interest half-yearly or quarterly. The quarterly receipts of interest are secured by part of the investment being made in bonds, with interest payable January and July, and part in those, the interest of which is payable April and October.

Applications to be made at the Offices of the Company, 17 Change alley, Lombard street, E.C., where any further information may be obtained.

NEW THEATRE ROYAL ADELPHI,

Sole Proprietor and Manager, Mr B. Webster.

Great Hit of Mr Jefferson in a new Drama written expressly for him by Dion Boucicault, Esq., called RIP VAN WINKLE; or, THE SLEEP OF TWENTY YEARS.

On Monday, and during the week, GOOD FOR NOTHING. Mrs Mellon, and Mr Felix Rogers. At 8, RIP VAN WINKLE; or, The Sleep of Twenty Years. Rip, Mr Jefferson, supported by Messrs P. Bedford, R. Phillips, Billington, Felix Rogers, Ashley, Eburne, C. J. Smith; Mrs Billington and Miss H. Simms. And the WIDOW'S VICTIMS. Mr Felix Rogers, and Miss Jenny Willmore. Commence at 7.

LONDON LIBRARY.—12 St James's Square, London. Founded in 1841.

PATRON.—H.R.H. The Prince of Wales.

PRESIDENT.—The Earl of Clarendon.

The following are the terms of admission to this Library, which contains 80,000 volumes of ancient and modern literature in various languages. Subscription, £3 a year, or £2 with entrance fee of £6. Life membership, £26. Fifteen volumes are allowed to country, and ten to town members.

Reading room open from ten to six.

Prospectus on application. Catalogue (new edition) just published.

ROBERT HARRISON, Secretary and Librarian.

MERSEY DOCK ESTATE.

LOANS OF MONEY.

THE MERSEY DOCKS AND HARBOUR BOARD hereby give notice, that they are willing to receive LOANS of MONEY on the security of their Bonds, at the rate of Four Pounds Ten Shillings per centum per annum interest, for periods of Three, Five, or Seven Years.

Interest Warrants for the whole term, payable half-yearly at the Bankers of the Board in Liverpool, or in London, will be issued with each bond.

Communications to be addressed to George J. Jefferson, Esq., Treasurer, Dock Office, Liverpool.—By order of the Board, JOHN HARRISON, Secretary.

Dock office, Liverpool, July 20, 1865.

FIVE PER CENT. GENERAL DEBT of the OTTOMAN EMPIRE. CONVERSION of the INTERNAL DEBTS.

The General Credit and Finance Company of London receive CONSOLIDES, &c., daily (except Saturdays) for examination and verification, ultimately to be exchanged for Bonds of the General Debt. The following are the rates of exchange:—

100 L.T. Consolides=£110 sterling General Debt.
100 L.T. Tahviliati Mumtaze=£130 sterling General Debt.
11,000 Piastres Serghis=£100 sterling General Debt.

At these rates the Conversion will remain open till 14th November, after which Bonds will be convertible only for six weeks and at a reduction of 10 per cent.

Full details at the offices.

For the General Credit and Finance Company of London, 27 Austinfriars, Agents for the Contractors,

JAMES MACDONALD, General Manager.

ATLANTIC TELEGRAPH COMPANY.

Notice is hereby given, that an Extraordinary General Meeting of the shareholders in the Atlantic Telegraph Company will be held at the London Tavern, Bishopsgate street, in the City of London, on Thursday, the 12th day of October, 1865, at Half-past One o'clock precisely, for the purpose of considering, and if the meeting think fit, of passing the following resolutions, viz.:—

1st. That the resolution passed at the Extraordinary General Meeting of the shareholders, held on the 9th August, 1865, authorising the issue of a further amount of the remaining unpaid capital of the Company, not exceeding £800,000, be and the same is hereby rescinded.

2nd. That the resolution passed at the said meeting, held on the 9th August, 1865, conferring upon the said capital of £800,000, or so much thereof as should from time to time be issued in common with the consolidated 8 per Cent. Preferential Stock of the Company, a Preferential Dividend of 8 per cent. per annum, and a certain share in other dividends of the Company, be and the same is hereby rescinded.

3rd. That the capital of the Company be increased to an amount not exceeding £2,000,000, by the creation and issue of not exceeding 160,000 new shares of £5 each, and that such new shares shall bear, and be entitled to a preferential dividend at the rate of £12 per cent. per annum on the amount for the time being paid up thereon, in priority to any dividend or on any other capital of the Company, and shall also in proportion to the amount for the time being paid up thereon, be entitled to participate equally with the other capital of the Company in any moneys applicable to dividend, which upon each declaration of dividend may remain after paying or providing for the said dividend of £12 per cent. per annum, the preferential dividend of £8 per cent. per annum payable on the Consolidated 8 per cent. preferential stock of the Company, and a dividend at the rate of 4 per cent. per annum on the Consolidated Ordinary Stock and ordinary shares of the Company; or in lieu of or in addition to the resolutions above set forth, or any or either of them, such other resolution or resolutions as the meeting may think fit for rescinding or amending the resolutions passed at the said meeting of the 9th August, 1865, or any or either of them, for increasing the capital of the Company by the issue of new shares, and for conferring upon the new shares or any portion thereof such preference or priority in the payment of dividends, and such special privileges and advantages as may, by the resolution creating the same, be prescribed or authorised.

J. STUART WORTLEY, Chairman.
GEORGE SAWARD,
Secretary and General Superintendent.

The Political Economist.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The Investor's Manual *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* Supplement *to the* Economist, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE RISE IN THE RATE OF DISCOUNT.

The Directors of the Bank have been justified in raising the rate of discount to 4½ per cent., though there is still, we think, no reason to expect any important or continuous rise. If we compare the state of the banking department with its condition on the 3rd of August, when the Bank rate was raised to 4 per cent., we find the liabilities and reserves to stand thus:—

Liabilities	3rd August.	27th Sept.
	£	£
Public deposits	5,214,377	7,330,010
Private do.	14,681,727	13,789,628
Seven-day and other bills	557,427	530,883
	20,453,531	21,650,521
Reserve of notes and coin	6,461,318	7,108,174

which shows a rather better proportion between the reserve and the liabilities than there was two months ago. Still, the proportion is barely one-third, which ought to be the minimum; and since last week the change has been unfavourable. The "other securities," which are best worth observing in times like these, have increased very rapidly in the week by no less than 1,189,888*l.* and stand very much higher than they did at any period during August. This shows that the demand of the public is increasing, and, as both the note reserve and the reserve of bullion have diminished, the Directors were amply justified in doing what they have done.

THE UNITY OR PLURALITY OF BANKS OF ISSUE.

Nothing can better illustrate the fundamental difference, not so much of opinion as of habit of thought, which separates Continental discussion on the currency from English discussion, than that an elaborate and careful writer like M. Coullet should have said all he could say against the plurality of issuers without once alluding to the argument which proved fatal to the plurality of issuers in England and Scotland. What remains of plurality in these countries is a vestige of the pre-Peelite period. The argument dwelt on in Sir R. Peel's time, and embodied in the recognised expositions of his policy, was and is, that the issues of the English country banks and the Scotch banks were not regulated by the exchanges, did not augment when the bullion increased or lessen when the bullion diminished. M. Coullet does not even advert to the existence of such an argument, and he is right in not adverting to it. This argument, if it proves anything, proves that the business of banking should be wholly separated from the function of issue. No issues can correspond less with the variation of bullion than that of the Bank of France; they often increase when it diminishes and diminish when it increases. The single issuing bank is as much in contravention with the principles of 1844 as the multiplicity of issuing banks.

M. Coullet begins by a rather dangerous mode of argument. He attempts exceedingly to simplify the discussion. He says:—"We must, before raising any question of fact, pre-"sent to our readers a reasoning principle, which makes us "regard as *absolutely inadmissible* the permission to all bankers "to issue notes payable to bearer." Nothing is so dangerous as a sentence which is to tell you the whole of a great subject. If a person says, "I will explain to you the currency question "in five minutes," do not give him the five minutes—you will be only wasting them. The necessary considerations cannot be so compressed, any more than the gentlemen who profess to teach French in five lessons can really do so. There is much to be said and much to be repeated before a large and involved topic can be really apprehended.

M. Coullet's short argument is not new. It is simply that bank notes are practically taken without a true option on the part of the taker; that he must take them; and that therefore, as he cannot choose for himself, the State should choose for him; the State should see that all notes thus passing on compulsion are good. "A merchant," says M. Coullet, "obtains, by discount of his bills, a certain number of bank "notes; he goes home; he makes payments and purchases; "he carries on his business. Who can say in what hands "these notes may be found after a few hours? They may be "in the hands of an artisan, a professor, an artist, a servant, "who not only do not know the name of the merchant who "discounted the bills and set the notes in circulation, but "who do not know precisely what a bank note is—who only "take them because every one else takes them, because "they know the frontispiece." And he concludes that these ignorant and almost involuntary takers should be protected. But, granting this, they are better protected by taking good security from all issuers than by allowing a single bank of issue to emit without security. All that a holder of a note cares to know is that he can have his money if he wants it; who issued the note he does not care at all.

The second of M. Coullet's arguments is that too many notes may be issued if there are many issuers. But we showed last week that the multiplicity of issuers developes banking; that

Digitized by Google

in no known instance has minute and diffused banking been effectually developed by other means; and whatever augments banking, diminishes currency. The more numerous the banks, the more multiplied the current accounts, the less the note circulation. At first, as we showed, a single issuer will not issue so many notes because he will not displace gold so fast; but in the end he will issue more notes, for he will have left true banking still in its infancy. At the first introduction of paper money into a country, it is desirable that notes should augment with considerable, though not excessive rapidity. The previous circulation is by hypothesis metallic, and a great work is to be done by economising it. A still greater work is to be done by encouraging true banking. It is desirable that these ends should be effected gradually of course, but still quickly.

M. Coullet fears that by the pressure of competition, a bank which is one of many, will issue notes in the discount of bad bills, and he draws a picture of a note-holder ruined in consequence. But if the circulation be secured, the note-holder will not be ruined. And why should an issuer *with* competitors be more ready to take bad bills, in order to get his notes out, than an issuer *without* competitors? It is contrary to the true interest of both to take any bill which will not be paid at maturity. As soon as the notes issued in payment of a bill come in for payment, that loss will be incurred. But the notes of a single issuer are not likely so soon to come back to him. He has no competitors. Every issuing banker wants not only to keep out his own notes, but to keep in the notes of others. Every such bank sends in the notes of all other such banks for payment as soon as possible. But the notes of a single issuer are unchecked; all other bankers being non-issuers do not send them in for payment unless they want coin. The notes of a multiplicity of issuers do not therefore on an average stay out so long as the notes of a single issuer. The competing issuer, therefore, is more likely to pay soon the notes which he issues upon a bad bill, and is therefore practically more likely to shrink from that bill. Neither ought to take the bad bill; both will suffer by taking it: but the issuer who is one of many, will upon the long run suffer quicker than the monopolist—a single issuer.

Lastly. M. Coullet breaks ground upon what is to most people upon the Continent just now the most vital part of the whole subject. Will the allowance of many issuers of notes lower the rate of interest? Will our bills—such is the shopkeeper's question—be discounted cheaper? The common notion is that competition will bring down the price; that there is no restriction on the circulation of notes but the will of the issuer; that if you only get people enough to issue notes, you can bring down the value of money as low as you please.

This idea, though not in its crude form now believed in England by any important class, has left some vestiges of its former existence, and occasionally crops up in minor fallacies where it is least expected. It is quite true that many issuers or one issuer can, by reckless loans, *for a moment*, reduce or keep down the rate of interest. But it is not true that they can permanently lower it. They increase the demand against themselves. They raise prices, increase business, develop trade. Securities increase in value, and people *can* borrow more; people *want* to borrow more, for the things which they borrow to buy are become dearer. For every hour that the rate of interest is artificially lowered by undue issues of paper, there comes another hour in which it is equally augmented. The banker has power for the instant, but only for the instant. The steady laws of trade and capital hem him in, and, in spite of his blunders and errors, make the average price of his article just what it would have been had he committed no errors. But his own condition will be very different. If he neglect to raise the rate of interest when he ought to raise it, his reserve will first be diminished, then exhausted, and he will fail. And this will happen to many bankers as much as to one;—to a plurality of issuers as well as to a single issuer. The attempt to keep down the rate of interest by an issue of notes, is like an attempt to cure a famine by a drug which augments appetite. The more people took the drug, the more food they would want; and the more you make money unduly cheap, the more money you will be asked to lend.

M. Coullet, on the other hand, contends that the multiplicity of issuers makes the interest *dearer*. He says that many issuers, keeping many reserves, will need a larger supply of the precious metals than a single issuer keeping a single reserve. But even if this be granted (and there would be something to say on it if we had space to say it), it would not follow that the rate of interest would be permanently higher. If the transition from many issuers using a large reserve to a single issuer using a small reserve could be at a single moment effected, for that moment the sudden economy would lower the rate of interest. But the effect would be only momentary. The metals so saved would be dispersed over the civilised world; they would have been economised once, and could not be economised again. The permanent causes which regulate the rate of interest would resume their imperious effect.

We might argue from what we think the cardinal consideration of the whole subject—that the rate of interest would be lower. We might say that a multiplicity of issuers, as we have said so often, develops banking, and so brings a vast loanable capital into the field. But we do not rely on this; we do not so argue. The growth of banking generally so stimulates and quickens other trades, that the demand for loans is likely to augment even as quickly as the loanable capital itself augments. The borrowing power commonly increases as quickly as the lending power, and so the rate of interest remains just where it was.

These are the defects which M. Coullet imputes to a multiplicity of issuing banks, and it will be for our readers to say whether they are of sufficient weight to counterbalance the development and growth of banking proper which that multiplicity undeniably tends to produce. Whether the creation of currency ought or ought not to be, as in the Bank of England, separated from the trade of banking, is, we must again remind our readers, a different question, to be settled by other arguments, and not everywhere now raised as a practical question upon the Continent.

BARON RICASOLI ON THE ITALIAN CHURCH.

It is evidently expected in Italy that the new Parliament will finally settle, or at all events endeavour to finally settle, the relations of the State to the Church. The clerical party is accordingly mustering all its strength, and the political leaders are trying hard to frame programmes which, while definite enough to serve as a basis for action, shall yet not offend the religious section of the nation. Of these latter, one issued by Baron Ricasoli has, as was natural, attracted most attention. That eminent statesman, to whose firmness and insight Italy owes so much, has hitherto displayed much of the true statesman's reluctance to interfere prematurely with religious questions, has preferred to act rather than talk, but he has in this crisis thought it incumbent upon him to speak out. In an address to the Liberal Association, which reached England last week, he lays down as the ideal to be sought by all liberal Italians, Cavour's favourite dogma, "A free Church in a free State," or, as he himself puts it, "the immediate separation of Church and State." Such a proposal, from such a man, has of course attracted much attention, not only in Italy, but throughout Europe; and it is worth while to inquire what the project really is at which the great Italian hints. It is the more worth while, because it may, we think, be accepted that he does not mean what an Englishman would mean by the use of the same expression. In England or Massachusetts the separation of Church and State means that the clergy shall thenceforward be paid by voluntary subscriptions, that they shall either be elective or appointed by elective Bishops, and that the legal status of the priesthood shall be that of voluntary members of a great association. This can scarcely be what Baron Ricasoli intends. In the first place, he himself highly approves of a scheme under which—though the monastic establishments will be despoiled—the parish clergy will enjoy greatly increased allowances, and cannot intend, therefore, to deprive all clergy of all aid from the State. Such an attempt would, indeed, involve the virtual destruction of the parochial system. Italians are not accustomed to voluntary subscriptions and very unwilling to make them, and in the poorer parishes of the less advanced districts they could not raise them in sufficient quantity. The result of pure voluntaryism would, therefore, be in part of the country a suppression of religious services which the peasantry would not bear,—some services being essential, in their judgment, to salvation,—and which no prudent statesman would enact. Nor would the Italian Government, with its French system of interference and continental ideas of repression, quite consent to so perfect an abstinence

Digitized by Google

from interference as a free Catholic Church would involve. Even the British Government with its trained habit of non-intervention finds it a little difficult to abstain from control in Ireland, and in Ireland it has an advantage which the Italian Government has not, the support of another nation over which priests have no influence. A scheme very much short of that which would be approved by English Nonconformists would to Italians seem to involve "freedom" for the Church, and it must be on some such scheme that Ricasoli's thoughts are fixed.

What, then, are to be the limits of "freedom?" Is the Pope to appoint all Bishops without the consent of the Sovereign, while the Bishops to present to all livings? In that case the Pope will be master within Italy of a corporation as powerful as the State, with a tendency to ever-increasing wealth, the clergy having no spendthrift heirs. and no compulsion to divide their property, and the old difficulty is sure to arise. May clergy paid by the State declare the oath of allegiance impious? Is a sentence of deprivation to carry loss of allowances? If it does, the Pope will have virtual control of a great State revenue, and the clergy will be surrendered to him absolutely, and the possibility of clerical freedom will die out of the land. If it does not, then a civil court must intervene to see the power fairly exercised, and the ultimate judge on theological questions will be, as in England, a lawyer, and not an ecclesiastic. With that principle and a State-paid clergy, the Church would only be "free" in the sense of being free from lay patronage,—a kind of freedom which is apt to increase the hostillty between the laity and the clerical body,—and the State would be as much burdened with responsibilities as ever. It is a sense of the dangers arising from this interlapping of the spiritual and temporal affairs which has in all ages induced Catholic Sovereigns to retain either an initiative or a veto on the appointment of Bishops, and to limit or prohibit the circulation of Papal decrees. Of course, if Catholicism admitted of congregational subdivision, the difficulty would be less, but the very essence of that faith is the unity of its worship, and, consequently, the corporate character of its clergy. Ricasoli says himself that his object is to prevent the clergy from using privilege as a weapon against the State; but surely the mighty corporation, set free from its bonds and retaining its revenues, would be only the stronger for such a battle. It would, moreover, be always inclined for one, for the Catholic faith, as a cult really requires for its full development the assistance of the secular arm. Suppose a priest marries and has children; are they legitimate? The Church says inexorably no; the State, if the ecclesiastical code is no part of its system, is bound to say yes. Education, again, will be another and incessant bone of contention, as it is in Ireland, one in which—the mothers being on the clerical side—the State might possibly lose a battle which Italian statesmen neither can nor will consent to lose. A decree of the great corporation might empty at once all the national schools, an event which we believe did once happen, so far as Catholic children are concerned, in the United States. Englishmen are accustomed to argue that because the State in England and America gets along very well with the religious independent denominations, therefore their independence is easy for the State, and forget that they have never yet seen the phenomenon of a single free Church with a purely clerical government embracing an entire nation. That does not exist even in Ireland, for even there, where Church and State are more thoroughly dissociated than anywhere in the world, the property-holders are not members of the free Church, and the clergy being voluntarily paid by the laity, are amenable to lay compulsion. The true analogy is only to be reached by imagining all Englishmen members of the Wesleyan body and their Church governed by the "Conference," which only contains ministers. How long would Parliament—*i.e.*, the collective laity—be able to abstain from putting the chain upon the neck of Conference—*i. e.*, the collective clergy. There is even a better analogy actually embodied in our own constitution. Suppose Convocation free, competent to make spiritual laws for the whole body of paid clergymen, and to dismiss any disobedient or heretical incumbent, not only from his cure, but from the emoluments of that cure, and we should have in England the precise system which Baron Ricasoli seems to suggest for Italy. How long should we, whose clergy are married and, therefore, amenable to the ordinary influences which govern human beings, be able to endure a genuine "revival of Convocation." Italian statesmen will, we fear, find that their objects are to be attained, not by releasing the priesthood, but by bringing them more and more under the control of the State, by maintaining the initiative in the appointment of Bishops, and by declaring that while a curé can be silenced by his ecclesiastical superior, his allowances shall be confiscated only under the decree of a lay tribunal. The increase in the salaries of the parochial clergy is a wise step, but if those salaries were placed beyond the control of Rome, the power of the corporation would be gradually diminished without any effect upon Catholic doctrine or mode of worship.

AUSTRIA.

The advance which the Emperor of Austria has at last made to the Eastern portion of his Empire is one which every careful political observer had anticipated for at least two months, ever since it was understood by what influence the last change of Ministry was effected. We pointed out, many weeks ago, to our readers that the situation would involve in fact the recognition of two Diets, one for the East and one for the West, and some attempt at a practical compromise between the two. The rescript of Thursday week verifies almost to the letter that prediction. In it the Emperor candidly confesses his attempt at parliamentary government without the consent of the Hungarians and Croatians as a failure, and, while adhering to the principle of a Central Parliament, offers to submit the diploma of October, 1860, and the patent of February, 1861—the laws regulating the parliamentary organisation—to the Hungarians and all who have never sent representatives to the Reichsrath, and promises even to modify that fundamental law, at the wish of his people, in any way not incompatible "with the existence of the Empire in its integrity and power." In short, the Emperor admits freely that the Hungarians have beaten him by their passive resistance, that he cannot get on without their hearty concurrence, and that he is willing to make just sacrifices for that concurrence. He wishes, he says, "for the *free* participation of *all* the peoples" in the work of organisation; and to this end he suspends the present working of the Constitution, that the dissentients may freely discuss, amend, and accept it as amended, to be then remitted in its amended shape to the consideration of the Western people, who had already accepted it in its original form. A very foolish fuss has been made about the arbitrary form of this rescript, which in fact puts an end to the lesser Reichsrath without its own permission, and gives the Emperor the opportunity, as the Vienna papers point out, of continuing to govern altogether arbitrarily in case he does not persuade the Hungarian Diet to accept the Constitution in any form "complete with [what the Emperor thinks] the existence of the "Empire in its integrity and power." We think these criticisms are really cavils. Every act of this kind must be interpreted by the light of the events which lead to it. There is no doubt but that Count Belcredi's Government was formed expressly to conciliate Hungary, and defer to its wishes in the matter of the Constitution, and there is still less doubt that it was thus formed because financially every effort to regenerate Austria was hopeless that did not rest on the policy of conciliation to Hungary. Hence, there is no doubt that the change was not, and could not have been, made as a first step towards a despotic reaction. Nor, granting that it was necessary in some way to submit the constitution to the Hungarian people, is it possible to see how any intervention but the Emperor's would be effective for that purpose. It would not have been possible to ask the Reichsrath to abolish itself in order that Hungary might consider its Constitution *de novo*; and certainly it would not have been possible to submit to the consideration and amendment of Hungary the very rejected Constitution under the provisions of which deputies were sitting and debating at Vienna in opposition to the express wish of the Hungarian nation. If the object is to treat the Constitution of 1860 and 1861 as still open to discussion and amendment, the only power to effect this must be the Emperor, who gave the Constitution of 1860-61, and who is, therefore, the only source of law when that Constitution for any reason fails. No doubt it is an arbitrary act to treat this incomplete Constitution as not binding him. But it is an arbitrary act done in the interests of freedom, and only intended to lead the way to a Constitution which will press heavier on the Emperor's prerogative than this has ever done. When you have given a promise to treat the part as the whole, you must either do what is unjust by keeping it,

Digitized by Google

or what is illegal by breaking it, and the Emperor has chosen to do what will enable him in future to give a more binding and more satisfactory promise to every part of his Empire, instead of to a mere portion of it. If any one will show us how the Emperor could have asked the Hungarians to consider the Constitution as merely offered to their acceptance, without unsettling it altogether, we may be convinced that this arbitrary looking act might have been avoided. Practically, we have no manner of doubt that it is a liberal, and not a despotic act.

The true difficulty, however, is yet unsolved, namely, whether the Hungarians will be disposed to insist on modifications which the Emperor does *not* think "compatible "with the integrity and power of the Empire." Unquestionably, the German Austrians will be disposed to insist, as the Emperor himself is, on a practically omnipotent power somewhere for the purposes of war and foreign relations. The Hungarians, as led by M. Deak in 1861, were not disposed to concede anything but the "*personal*" Union in the Sovereign. They demanded for their Diet the control of their own army, and the power of refusing its aid to any foreign war of the Emperor's of which they might disapprove. They insisted on having a distinct Hungarian War Office and a Hungarian Budget, and granting subsidies to the Emperor according to their own standard of wisdom. This may probably be considered by the Emperor as incompatible "with the integrity "and power of the Empire;" and the two important questions at the present moment are:—(1) Will the Hungarians ask as much again as they asked in 1861? (2) If they do, will the Emperor be disposed to concede it?

For our own parts we should expect, we may almost say hope, that the Hungarians will yield something of the constitutional ground they rightly took in 1861, now that the political power of their passive resistance has been appreciated, and has extorted from the Emperor in his turn the desire to concede something to them. For the Emperor to ask anything that could give *less* power to the Central Government than the American Federation possesses, would in fact be to ask for what would not really stand as a Union at all;—in short, to prepare for an imminent dissolution of the tie between the component parts of the Austrian Empire. Hungary may indeed not be prepared to enter into any bond so strong as the American Union has after all proved. Hungary may think present suffering a small price for future independence, and in that case she will still be right in standing out. But there is this difference between the situation now and the situation in 1861, that Hungary's strength of passive resistance has been tried and found adequate to the occasion, and that the Government of Austria have also given, since that time, many proofs of the *bonâ fide* character of the parliamentary organisation proposed. Hungary now *knows* that if she consents to submitting questions of war and finance to a Central Parliament, that Central Parliament will really have a paramount influence, and Hungary an immense weight in the Central Parliament. The question for her therefore is, whether she may not wisely look to a permanent connection with a *Parliamentary* Austria, and do her utmost to win political influence *in* the Austrian Parliament rather than *against* the Austrian Parliament. Austria will probably gladly concede to the Hungarian Diet all the State rights conceded in America to the individual States; in other words, all matters of local justice, local finance, and local education. But if the Empire is to exist at all, there must be some common Federal Power, and Federal War Department, and Federal Foreign Office, over which only the Federal Parliament can assume any control. If Hungary can but think Austrian promises of freedom sincere, it seems to us clear that some concession of powers should be made on these matters to the Imperial Parliament. Whether these considerations *will* influence M. Deak and his party is is more difficult to say. From all that we hear at present, we augur moderation in the Hungarians, who have in fact won the battle against the statesmen of 1861, and know that they have won it.

If, however, Hungary should stand out for the strict theory of personal Union and nothing but personal Union, if she should declare that the Emperor of Austria, though King of Hungary, has no power over Hungary beyond what the Diet and the old Constitution gave him, we doubt if anything can be done. To concede this much is simply to take the first step towards a dissolution of the Empire, as the Hungarian Diet would doubtless always be at cross purposes with the German Reichsrath. It is *possible* the Emperor may yield thus much in his extremity, but we think it hardly probable, as he would scarcely gain anything but a few subsidies by doing so, and the concession of the principle would be, in his eyes, as fatal to the Empire as a successful revolution itself.

There is, we think, every reason to hope that Austria is now really in earnest in her liberalism, and disposed to give away despotic power altogether in exchange for a real parliamentary centralism. Hungary ought to obtain a very large share in such a Parliament, and might we think well consider herself compensated by the dignity and estimation she would gain in forming part of an Empire really governed by the popular voice, for the insularity she would lose by delegating some of the strict rights of the Hungarian Diet to a Constitutional Federation.

THE COLONIAL CONNECTION.

A VARIETY of circumstances are just now combining to force on public attention all the very difficult questions, both theoretical and practical, which arise out of the connection between Colonies and the Mother Country. The incessant New Zealand wars, the prospect of another Kaffir war, the transportation controversy, the dangers and defences of Canada, and now the proposed fortifications of the seabord cities of Australia, make it impossible for us to turn away our thoughts from the subject for any long intervals of time, and would seem to render it almost imperative upon us to arrive at some definite ideas, and above all at some leading principles, by which we may guide our conduct in dealing with our various dependencies. We have made considerable advances, it is true, towards something like a system in our treatment of our principal colonies; but these advances, like everything else in England, have been empirical rather than scientific, have been by no means rigidly or universally acted upon, and still leave some of the most pressing questions of practical politics unsettled. We have come to the conclusion that in the case of all the colonies which possess Legislative Assemblies and what is termed "Responsible Government," the right and wise plan is to leave them as much as possible to themselves, and never to veto an Act of the Provincial Parliament unless it is clearly at variance with the settled principles of Imperial legislation, or trenches on the distinct prerogatives of Metropolitan jurisdiction, or is unjust to the rights and interests of other provinces of the Empire. Nay, more: even this privilege of vetoing what would be obviously unfair, impolitic, and indecorous, we exercise with the greatest unwillingness and on the rarest occasions; and in every dispute with fractious colonies we give way whenever it is decent or feasible to do so—indeed whenever an excuse can be found for doing so. Thus we allowed United Canada to pass a law indemnifying rebels; we submitted when the Cape took the insolent and disloyal step of refusing to allow a ship load of convicts, sent there in our extremity, to set foot on shore; and when the colonies of Victoria and New South Wales went to the very verge of sedition in order to compel us to abandon transportation to the distant Province of Western Australia, we took advantage of a happy accident to concede their demands in substance, while administering a gentle rebuke for the manner in which those demands had been put forth. Probably, almost the only cases in which we should now resolutely disallow any Act of Legislature passed by one of the more important colonies would be in case of a tariff imposing discriminating or avowedly protective duties, hostile to Imperial interests and in defiance of the Imperial policy of free trade,—or if the welfare of the aborigines was menaced or neglected,—or in case of action in reference to the disposal of waste lands inconsistent with the interests of British subjects in the aggregate, for whom those lands are held in trust by the nation. Once or twice the Australian colonists have shown a disposition to claim an absolute right of property over the whole of the colonial territory; but the unreasonableness of the claim was distinctly pointed out by Lord Grey, and, while much practical liberty in dealing with the unsettled lands was conceded to the provincial authorities, the untenable demand itself was peremptorily negatived, and has never been renewed. It was made plain to them and to the nation that a whole Continent, or even a whole unpeopled Province, could not *belong* to the million of residents who lived in a corner of it when the claim

Digitized by Google

was preferred, any more than to the hundred thousand who constituted the colony when a free Parliament was conferred upon it, or to the ten thousand who formed the original nucleus of the settlement. It clearly could belong only to the Empire of Great Britain, and every English subject must have precisely the same claim to go thither and to live there as a citizen of Sydney or of Melbourne.

Another conclusion to which we are just coming, if indeed it is not already established, is this:—that, though the Mother Country cannot relinquish a strict control over Provincial legislation in reference to such dependencies as the West Indies, where a once slave race is still subject to the *legislative* authority of its former masters, and where a vigilant protection is likely to be still needed to prevent injustice and oppression, —yet in the case of colonies which have been planted among savage and hostile tribes, as the Cape and New Zealand, it is at once wisest and most merciful to leave the Colonists and the Natives to fight out their contests by themselves. We have come slowly and tardily to this doctrine. We have done our best, we have done at least all that the most earnest and sincere intentions could do, towards enforcing justice and kind treatment towards these unfortunate aborigines; but in every case we have failed; in nearly every case we have blundered; in nearly every case our well-meant interferences have made the wars more frequent and more sanguinary, and the catastrophe more certain and more rapid. The colonists have been more careless about provoking hostilities than they would have been had they had only their own unaided resources to rely upon; —regular troops have fought the natives at a disadvantage where irregular colonial forces would have met them in their own way and beaten them at their own weapons;—and conflicts have thus lasted for years and been frequently renewed, which the settlers, if left to themselves, would have ended more harshly perhaps, but certainly sooner and more decisively;—while the Mother Country has been placed in the false position of having practically to side with the colonists in quarrels of which it did not recognise the original justice, which it did nothing to bring on, and which it found it very difficult to bring to a successful end. We had in fact to defend men whom we could not effectually control, and to defend them, it might be, in a wrongful cause;—for when once the sword was drawn we could never have suffered the English settler to be overpowered by the Kaffir or Maori.

Another obscure subject on which we are beginning, and only just beginning, to see daylight is the *joint* defence of our Dependencies by the Colonists and Mother Country. The discussions on the Canadian fortifications last session, both here and in the colony, threw a faint glimmer of illumination among our unarranged ideas. It was admitted that on Great Britain lay a certain obligation of protecting her colonies against foreign aggression, —especially against aggressions brought upon them simply in consequence of their being portions, and vulnerable portions, of the British Empire. It was admitted at the same time that she could not, and was not called upon, to undertake this onerous duty in the case of colonies which either desired to be independent, or which set no value on the Imperial connection, or which were not willing to make adequate exertions and to contribute a fair share towards the expenses of their own defence. It became clear that—as England assuredly derives no pecuniary advantage, and scarcely any definable advantage at all from her various colonies now that free trade is her established policy, but on the contrary incurs very considerable outlay on their behalf for which she receives no return,—she, however ready to protect her children and to keep up her parental relation towards them, can only be expected to do so in the case of those which cling to her, and will show by their own spontaneous loyalty and active preparations that they do cling to her. Gradually our common ideas seemed to be consolidating into something of this empiric shape:—that we should incur the permanent expense of the needed fortresses, and that the colonies should undertake the defence of them when constructed, with the aid, in time of danger, of an auxiliary British force. This week we receive from the colony of Victoria an address to Her Majesty on the subject of the defence of Melbourne, which puts the whole question so sensibly and moderately, and with such a spirit of fairness, that we are glad to reproduce it here. There is no danger, of course, that any foreign power in case of war with Great Britain would attempt to seize and hold our Australian possessions; but very great probability that they would make sudden descents on the ports and populous towns near the coast for the sake of plunder and destruction; and against a contingency of this kind the Victorians are wise to provide in time.

The following address to the Queen, on the subject of the defences of the colony, has been adopted by both Houses of the Victorian Legislature:—

May it please your Majesty,

We, the members of the Legislative Council and of the Legislative Assembly of Victoria, in Parliament assembled, beg leave to approach your Majesty with renewed assurance of loyalty and affection.

We humbly desire to express to your Majesty our earnest wish that adequate provision may be made for defending the colony against foreign aggression.

Your Majesty's Ministers have been pleased to acknowledge, on several occasions, that Victoria has taken upon herself a larger share of the cost of her defence than any other of your Majesty's possessions. Since the year 1856 the sum of 233,000*l* has been expended upon arms, defensive works, and barrack accommodation. An armed vessel had been purchased and maintained at a cost of 123,000*l*. The amount contributed to the pay and allowance of your Majesty's forces stationed here has been 356,000*l*. A body of volunteers, of all arms, has been maintained for the last nine years at a cost of 169,000*l*; and by effective regulations for a liberal encouragement of the patriotic and self-reliant spirit of the people, we have secured not only a large number of men, but a well-trained and disciplined force.

But while the fortification of our army remains incomplete, the expenditure we have incurred, and the measures we have taken, will avail us little in case of an attack upon Melbourne from the sea. We therefore desire, by the completion of our works of defence, to be protected against the loss and degradation of such an attack as might now be made with impunity.

We beg leave to submit to your Majesty that in such an event, while the people of this country would suffer much material loss, our fellow-subjects in Great Britain would suffer more.

We learn from the records of the Custom-house that four-fifths of the ships annually frequenting the port of Melbourne are the property of British owners, and that of their total estimated value—4,770,000*l*—4,000,000*l* represent the interest which British merchants have in them. The cargoes which these ships bring to our shores every year, from the United Kingdom and other British possessions are worth 10,000,000*l*, and the colonial produce they take away, consisting chiefly of gold and and wool, is worth 9,750,000*l*. Both ships and cargo appear to be for the most part insured in British offices, so that, in the event of their destruction or capture by an enemy, Great Britain would sustain the principal loss. The property of the banking and other financial institutions in Victoria is estimated at 10,000,000*l*, and 8,000,000*l* of this amount may be said to represent British capital; while the supply of British commodities stored in the Melbourne warehouses is seldom less than sufficient for six months' consumption, worth 5,000,000*l*.

It would therefore appear that, as a matter of mere material advantage, the subject of our defence must be regarded as one of imperial as well as of local concern; and we have observed with great satisfaction the declaration of your Majesty's Ministers in Parliament that, apart from this consideration, it is the duty of your Majesty's Government to protect, against foreign aggression, all your Majesty's possessions, for the honour and credit of the kingdom. Your Majesty's subjects in Victoria desire that the privilege of forming part of the great empire over which your Majesty happily reigns may ever be theirs, and it is with no wish of avoiding the risk of war incidental to our relation to the empire, or of making the connection a burden upon Great Britain, that we now approach your Majesty.

Relying upon the opinions expressed by your Majesty's Ministers, and by officers of high rank in the civil service and in your Majesty's navy, we propose to make provision for our works of defence in the belief that your Majesty will be graciously pleased to grant our request for assistance in such proportion as to your Majesty's advisers may seem just.

We deem it unlikely that any serious attempt will be made to invade and hold our territory; and while we are not sufficiently numerous and wealthy as a people to undertake, without assistance, the cost of a complete system of harbour defence, we are prepared to maintain, in addition to your Majesty's troops, whatever force may be necessary to resist invasion.

We are aware that, in despatches upon the subject of colonial defences, your Majesty's Ministers have accepted the responsibilities of our defences from attack by a fleet, which it is presumed, would not escape the vigilance of your Majesty's navy; but the fact that single ships have entered our principal harbour unobserved, and the opinion expressed by naval and military officers from whom advice has been sought, strengthen our belief that we shall always have to rely upon local defences to resist an attack by a ship or a squadron, and it is against this danger that we desire to provide.

For these reasons, therefore, we venture to hope that your Majesty may be advised that the work of defending Victoria should not be left entirely to the colonists; and we trust that our willingness to undertake the maintenance of our defences when established may influence the decision of your Majesty's Government upon the request we now prefer —that we may receive such aid in their creation as may be commensurate with the importance of the imperial interests involved.

IRELAND IN TRANSITION.

We endeavoured last week to trace the origin and industrial character of the Irish cottier. As may be remembered, we found his origin in those events of Irish history which had prevented in Ireland the growth of a peasant proprietary—the transference, namely, of the land of the country to alien owners at a time when in the natural course of things the tribal

Digitized by Google

domain would have been broken up and divided amongst the members of the tribe; while his peculiar industrial characteristics, as well as the rapid growth of the class in recent times, were shown to be incidents of the artificial system of agriculture introduced into Ireland towards the end of the 18th century, and carried ultimately to so great a pitch under the forcing influence of protection. To the same events may also be traced two more of the leading *dramatis personæ* of the Irish territorial stage—the Irish landlord and the Irish middleman.

It would be occupying to little purpose the time of the reader were we to spend many lines in recalling to his recollection the once familiar features of the typical Irish landlord—the drinking, fox-hunting, duel-fighting, utterly reckless, and altogether tyrannical and worthless squireen to whom for centuries was largely committed the political and industrial destinies of Ireland; nor would it be more profitable to dwell at any length upon his inferior copy—the middleman, or profit-renter—"the class of small country gentlemen," as Arthur Young drew them from the life nearly a century ago, "who, living on the spot surrounded by their little under-"tenants, prove the most oppressive species of tyrants that "ever lent assistance to the destruction of a country. "They re-let the land at short tenures to the occupiers of "small farms, and often give no leases at all. Not satisfied "with screwing up the rent to the utmost farthing, they are "rapacious and relentless in the collection of it." Still, though both these personages have mainly passed from the scene, they must not be omitted from a review of the causes which have conducted Ireland to her present state. The evil which they have done lives after them, and the traditions of their reign, though weakened, are, unfortunately, still strong in Ireland. They had their origin, as we have said, and they will find their explanation, in the same events which produced the Irish cottier, of whom, indeed, they may be considered as the social complement—the great confiscations of the 17th and 18th centuries, and the effect of the French wars and Protection in this.

A circumstance of a negative kind should also not be omitted from our retrospect of the causes of Ireland's present condition—the very limited scope of her manufacturing and mercantile industry. How far this result is due to want of natural facilities, more particularly to deficiencies in point of coal and iron, how far to the low condition socially of the population, unfitting them to take part in avocations requiring intelligence, steadiness, and skill, and how far to the wretched commercial jealousy of England, it would perhaps be idle now to inquire. It is certain that everything that legislation could do to crush the germs of trade and manufacturing industry in Ireland was for centuries zealously performed by English statesmen; and that, as the result of this, with the other causes we have named, trade and manufactures, with the exception of a single staple in a portion of Ulster, never attained in Ireland to any considerable growth. A possible vent was thus closed for the overflowing rural population, aggravating all the other causes of disaster. The land remained the sole means of subsistence for the Irish nation; and this single resource was absolutely at the command of such landlords and middlemen as we have described.

The whole tenor of events in Ireland thus tended steadily for centuries to two results—a pauper population greatly in excess of what the country could sustain competing for land as for life, and a landed proprietary, idle, extravagant, reckless, cut off by race, religion, and language, from all sympathy with the people, who were thus by force of circumstances brought absolutely into their power—the whole resting upon an artificial system of industry which all the growing influences of modern civilisation were tending steadily to undermine. It was this state of things which received its *coup de grâce* from the famine. It remains now that we indicate the leading features of the system which is taking its place.

And already in the transition we may note three capital facts. 1. An immense decrease of population. 2. An extensive conversion of tillage land to pasture. 3. A change in the character both of the owners and occupiers of the land; while, as the result of the whole movement, a large reduction has taken place in the cottier class, tending apparently towards its ultimate extinction.

1. On the decline of the Irish population we need scarcely dwell. It may be stated roundly that in a period of 20 years the population has been reduced by a third of its numbers—a fact, we believe, in its actual dimensions quite without precedent in the history of the world. In the lamentations which have been raised over this event our readers will not expect us to join. We have endeavoured to show that it was absolutely inevitable—as inevitable, at least, as the progress of modern society—determined as much by the good government, and best influences of modern times, as by the wretched government and unfortunate social conditions of the past; and we believe it will be as certainly beneficial in the result, as it is painful in the progress. The thing to be lamented is not that education has revealed to the Irish peasants the existence of a new and more hopeful world across the Atlantic, not that the progress of the art of navigation, concurring with free trade and extended commercial intercourse, has facilitated and cheapened the journey till the Atlantic may almost be said to be bridged, not that the resources of the country are being turned to that account for which nature designed them, but that through mistaken legislation and the historical causes we have attempted to describe, the people of Ireland should have been brought to that depth of wretchedness from which a wholesale emigration offered the only escape.

2. The movement towards pasture, though visible on the face of the country, and that of which a traveller in Ireland will hear most, whether in the way of complaint or gratulation, is not at once evident, at least on the scale on which it is actually proceeding, on the surface of the agricultural returns. On looking, for example, to the returns of land under crops in Ireland in the interval between 1847—the year in which the accurate collection of Irish agricultural statistics commenced—and 1864—the last for which we have published returns—we find a positive increase in this department of agriculture.

In 1847 the land under crops was 5,238,575 acres
In 1864 it was..... 5,672,980 acres

showing an increase of nearly 500,000 acres. Here are no indications of that conversion of tillage to pasture of which we have spoken. But we turn to the column showing the acreage under "arable land,"—a convenient general term employed in the returns to express tillage *plus* grass, and we find of

Arable land in 1847 ..... 13,461,301 acres
— in 1864 ..... 15,399,763 acres.

Thus while the land under crops had increased by rather less than 500,000 acres, that described as arable land, or land under general cultivation, had increased by upwards of 1,900,000 acres. Deducting the former from the total increase, we find the increase of grass land in the period under review to have been about 1,200,000 acres.

This shows the amount, but not the process; for it might at first view seem as if the addition to grass land was obtained by simply bringing fresh land under cultivation. But, as every agriculturist knows, newly reclaimed land is never in the first instance, or for many years after its reclamation, laid down permanently in pasture. The results which we have stated are reached by means of two processes which are now going forward in Ireland side by side,—a reclamation of waste land, which is at once placed under crops, and a conversion of land formerly under crops into pasture; the addition to the tillage through the former process rather more than compensating what is withdrawn from it by the latter. We are thus justified in stating broadly that in her transition from the agricultural *regime* of the past, at least 1,200,000 acres of the soil of Ireland have already passed from the condition of tillage to that of grass.

The double process which we have just described deserves notice for another reason: it explains what without explanation would seem an ominous circumstance. From tables furnished by Dr Hancock, it appears that in the period extending from 1847 to 1862, there has been a remarkable, and on the whole a steady, decline in the productiveness of all the principal crops. Thus, potatoes which in 1847 yielded 7.3 tons per acre, and in 1852 4.9 tons per acre, yielded in 1862 but 2.1 tons. In oats, the decline was from 5.23 qrs per acre in 1847 to 3.13 qrs in 1862. In turnips from 15.5 tons in the former year to 10.1 in the latter; and in most of the other crops the same result is observed. These facts seem to point to a positive decline in the fertility of the Irish soil; and it is not impossible, bearing in mind the kind of cultivation which long prevailed in Ireland, that this may to some extent be the fact. The phenomenon, however admits of another and more satisfactory explanation. It is mainly due to the double process we have just described—the

Digitized by Google

extensive reclamation of waste land going forward concurrently with a conversion of tillage to pasture. The land now under crops in Ireland, though equal or greater in extent than the land under crops eighteen years ago, is not the same land. The richest portions of the old tillage have gone into pasture, while the land which supplies their place has just been reclaimed from the mountain and the bog.

The consideration of our third topic we must reserve for a separate paper. J. E. C.

BOARD OF TRADE RETURNS.

THE returns issued by the Board of Trade, showing the value of the shipments of British and Irish produce and manufactures during the first eight months of the present and two previous years, are favourable. The amounts stand thus :—

	£
1863	89,751,851
1864	103,716,219
1865	102,400,696

Compared with 1864, there is a decrease in the exports of 6,315,523*l*; but an increase, compared with 1863, of 12,648,845*l*. During August only, the shipments were :—

	£
1863	14,086,814
1864	16,274,269
1865	14,158,648

The value of the goods and produce imported during the first seven months was :—

	£
1863	98,207,602
1864	119,068,429
1865	94,528,004

The annexed return shows the increase and decrease in the real value of the principal articles imported in the first seven months of 1865, compared with the same period of 1864 :—

Articles.	1864. £	1865. £	Increase. £	Decrease £
Coffee, raw	1,697,171	2,020,278	323,107	...

Total of wine	14,718,735	14,253,696

Agriculture.

STOCK AND STOCK-FARMING.

THE current of rural opinion has now set strongly in the direction of stock-farming, and we have no doubt that it will lead to very beneficial results. At the same time, it will not do to go hand over head into stock-keeping, or to suppose that it can be profitably adopted otherwise than in combination with the best plans of management approved by experience in our various agricultural districts. Stock-keeping requires judgment, care, and, commonly, additional capital to that previously employed on a farm. Assuming such and all similar conditions observed, it cannot be too much pressed on farmers that stock will, in most cases, afford their sheet anchor. The new number of the "Journal of the Royal Agricultural Society" indicates fully this tendency of opinion, for the greater part of the papers in that number deal with some kind of live stock, and the supplying of our markets with meat.

Thus, Mr Herbert furnishes his usual terse account of the "Statistics of Live Stock and Dead Meat and Wool," from which we learn that "compared with several previous years, the supplies of English beasts on sale in the great Metropolitan market have been limited, and the condition but middling." Foreign imports have gone on increasing, and thus the "total is very little below that of the corresponding period in 1864." Mr Herbert is of opinion that from the inroads which have been made of late years upon our stock of cattle in England that "it is difficult to determine at what point the upward movement in prices will be arrested." Sheep also are scarce, and flockmasters are holding back their sheep

Digitized by Google

to consume the heavy crops of turnips grown this year. We may mention, however, that the recent dry weather has almost universally mildewed the swede turnips, and will thereby greatly lessen the great promise of which those crops offered at the end of August. There is unquestionably an extraordinary growth of after-grass, which has contributed to the high price of sheep. At the fair at Stratford-on-Avon, where there were no less than 250 lots of sheep and lambs sold in fives and tens by auction, scarcely any store sheep sold for less than 50s per head, and in many cases for much more. Mr Herbert considers that the pastures of Lincolnshire, Leicestershire, and Northamptonshire contain now fewer beasts than the last season, but this may easily be accounted for by the severe drought of last year, which rendered graziers extremely careful in their purchases this year. We think these, and the midland counties generally, contain a full average stock of sheep. That more might be kept this season on the actual quantity of grass is certain, and it is an abundance of grass, together with the fear of bringing home diseased cattle, which has run up the price of sheep so much. Should, however, Professor Symonds' report that some lambs conveyed the cattle plague to a farm in Norfolk prove correct, farmers will buy sheep with less confidence than heretofore.

A very important essay "On the Management of Sheep on Light and Heavy Land," forms the leading paper of this number, and it deserves attentive perusal. The management of sheep on light land is pretty well understood, though we believe in many districts it is capable of considerable improvement. To manage sheep profitably on heavy land is to bring a new power to bear on the meat-producing capacity of such soils. Mr Coleman, the writer of the essay, justly says, that in the actual position of the English farmer and flockmaster, "he must see that he breeds the sheep which are best suited to the climate and soil, that the food and treatment they receive are calculated to bring the highest return, and that as many are kept as are consistent with profit." The light soils being the natural habitat of the sheep, management there is made the chief subject, and then the specialities incident of heavy land management are detailed. We can only indicate a few of the general points made by this essay on the main question of increasing our sheep stock.

As Mr Coleman says, "At the present day our aim is to combine plenty of wool, weight of carcase, aptitude to feed, and good quality of flesh," and which points, he alleges, "are not united in any of the old distinct breeds." He then enumerates the various cross-breeds, and generally most profitable—*i.e.*, to the feeder,—and adds that "care and judgment, however, are required to maintain the form and character of breeds so comparatively recent; still, under good management, they will probably continue to increase." It is certain that the cross-breeds can only be perpetuated as modifications of one or the other of the two pure bred animals which have contributed to the cross. Thus, the Shropshire Down—originally a Down and Cotswold cross—has now assumed a tolerably distinct type as an enlarged and heavy-woolled Down; while the more recently formed sheep, called Oxford Down, and which its breeders assert to have attained some degree of fixity of type, is a modified Cotswold. We have no doubt that very useful and profitable sheep may be found amongst all sorts of crosses, for the purposes of the grazier, who will, of course, judge whether the animal before him is likely to feed well or not, without any kind of reference to the question whether such sheep employed as a breeder would produce an offspring of equal merit.

But when we are considering how to increase our sheep, it will be necessary to apply our attention mainly to breeding flocks. And such is Mr Coleman's view. He says: "Light arable farms, or mixed arable and grass-land farms, are most suitable for a breeding flock, whether kept alone or together with a breeding flock." The recent price of sheep proves that "the breeder comes in for the lion's share of the profits." Regretting the absence of statistics on the subject, Mr Coleman thinks "the probability is, that we have slowly increased in breeding sheep, especially during the last few years, in consequence of the great improvements in Highland farming; but that this increase has not been at all proportionate to our wants, and that in many instances a much heavier stock may be kept with advantage, is beyond question."

The two principal changes required for this purpose, are (1) an improved application of the turnip crop, and (2) the adoption of such modifications in the ordinary rotations of crops as will give yearly more sheep feed. As to the turnips, which are commonly abused rather than used, Mr Coleman, says: "Hitherto farmers have supposed that a bellyful of turnips was necessary for a breeding animal, and have based their calculations on their stock of roots that were to be thus wasted. The past winter has taught us to give these roots in a healthier form, eking out the supply by a nice admixture of other food supplied in a palatable form. I have lately inspected a flock of Hampshire Down ewes that did not have a root before lambing. They ran on grass land during the day, being hurdled at night so as to dress and improve the pasture. Morning and night they got trough food, consisting of straw and hay chaff, two-thirds of the former to one-third of the latter; bruised oats and palm-nut meal; the cost of the artificial food amounted to 2¾d per head weekly; not one ewe died during the winter, and I never saw animals in a more promising state for lambing." It is a matter of common observation in Norfolk that a very abundant crop of turnips is always followed by a bad lambing season. Mr Coleman proposes that from 6 to 8 lbs of turnips and 1 to 1½ lbs of straw united as pulp and chaff, should be the extreme limit of root food supplied to in-lamb ewes. This plan, however, is difficult to adopt when turnips are fed off; yet then, if the turnips are cut, given in much more limited quantities, and a full supply of straw furnished in racks—the coarser portions of the straw left unconsumed by the sheep being spread over the fold—will keep the ewes "in a much happier and healthier state than if out on the wet land digesting a bellyful of turnips." In order to use straw for feeding sheep, the corn should be cut before it is dead ripe, and the order in which the different kinds of straw should be used is, first, barley straw until Christmas, then oat and bean straw, and at last, until lambing, pea straw and a little hay if possible. Small quantities of artificial food, such as linseed cake, or pea, barley, or palm-nut meal, should also be given. The expense, at a quarter of a pound per head daily from Christmas to 1st April, will be 1s 7d, and at half a pound each 3s 4d, will be well repaid "in the improved condition of ewe and lamb, while the value of the manure will emain as clear profit."

Secondly, the re-arrangement of rotations of crops with a view to increase the breadth of sheep food. In regard to the now common suggestion of laying down land to grass for the sake of keeping more stock, Mr Coleman says, "though mutton is, perhaps, never so economically produced as on rich pastures, or even moderate clay lands laid down to grass in a moist climate, still dry and light soils are not generally suitable for permanent sward; and in such districts mutton may be more economically, as well as extensively, produced by alternate cropping, with the aid of the plough." He then suggests the following rotation:—1. Vetches, roots, &c.; 2, oats or barley, part seeded down; 3, part seeds, mown and fed, or fed entirely, and part pulse crops; 4, part seeds fed, then rape or late turnips, &c., after pulse, vetches, and supplementary forage crops; 5, wheat. "If it is desired to have more corn, we may take a barley crop after the wheat, and thus make a six years' course. The farm-yard manure would, if possible, be divided between the roots and seeds, or possibly all applied to the seeds, the soil being enriched by artificial food consumed on seeds, vetches, and root crops."

These extracts show that the best practical farmers of the day are quite alive to the necessity of increasing the breeding stock of the country, and are discussing the best means of re-arranging their management to that end.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 28th inst. The return for the previous week is added:—

The Bank return is better as regards discounts than that of last week, there being an increase of 11,714,000f in the accommodation afforded. The change in the stock of coin and bullion is insignificant—a decline of 7,230,000f. In the circulation of notes there is a diminution of about 6,000,000f, and the deposits are 12,802,000f less.

The principal incident on the Bourse has been a decline in the

Digitized by Google

Italian loan, caused by the unfavourable account of the financial situation given by the Italian Ministers. In the Comptoir d'Escompte there has been a marked advance, owing to the important operations confided to it, and although the quotation to-day is only 991f 25c, it has been as high as 1,000f. The Credit Mobilier has also improved, and in other quotations the changes are not important. Subjoined are the prices :—

The negotiations between the Compagnie Immobiliere and an association of English capitalists headed by Mr Goschen, for the purchase of a large tract of building ground at Marseilles, have, after lasting a long time and encountering more than one difficulty, been brought to a conclusion; and a convention was signed between the parties at the Credit Mobilier on Friday last. The purchase-money to be paid is very considerable—somewhere, I believe, about 28,000,000f (1,120,000*l*); but the dates of payment have not been communicated to me. The Compagnie Immobiliere considers that it has made an excellent bargain; and Mr Goschen and his friends on their part see their way, I am told, to the realisation of large profits on an early day.

The affair of the new Bank of Mexico is concluded, the necessary documents having been signed, under the auspices of His Excellency M. Fould, Minister of Finance, by M. Pinard, of the Compteir d'Escompte, M. Hidalgo, Mexican Minister at the French Court, and Count de Germiny, President of the Mexican Financial Commission in this city. It was at first intended, as stated in my last, to bring the project on the market at once; but it is to be delayed, in order to enable the papers to be submitted to the Emperor of Mexico, in compliance with a suggestion of the Emperor of the French. This is a mere piece of formal deference; and there is no reason whatever to anticipate, as we learn is done by certain persons at London, that the Emperor Maximilian will object to the arrangement come to. In fact, His Majesty, as regards financial matters, places himself entirely in the hands of the French Government; and glad indeed is he that it consents to advise and aid him therein. It is said that a portion of the shares will be reserved for subscription in Mexico, and another portion for the shareholders of the Comptoir d'Escompte, so that the part offered to the European public will not be large.

In consequence of the delay in the bringing out of the Bank of Mexico, it is thought probable that the conversion of the Mexican 1864 loan (that raised by Messrs Glyn and Co. and the Credit Mobilier) into 6 per cent. bonds with lottery prizes, and double reimbursement, like that of 1865, will not take place quite so soon as was intended.

Abundant as money is just now, there will soon be ample employment for all that can be spared. First, there is the last Mexican (1865) loan to complete; next, a large instalment to be paid up on the new City of Paris loan; thirdly, 50,000,000f (2,000,000*l*) to be provided for the Bank of Mexico, and a not unimportant sum to relieve the French Government of the bonds of the first Mexican (1864) loan, which were given to it in part payment of what Mexico owes it; fourthly, the loan of 75,000,000f to the Viceroy of Egypt; fifthly, the payment of a large part of the capital of the great Society of Algeria, and it may be also of what remains unpaid on that of the Société Generale; sixthly, a loan to Austria, very probably likewise a new one to Italy, and another to Moldo-Wallachia. Then calls have to be provided for the Parisian Gas (see below) and for several other Companies in France, whilst the railways will continue, as hitherto, to borrow largely on debentures. Besides this, the French have to pay calls in numerous foreign enterprises, and are prepared to take part in others.

As to a loan of 100,000,000f or 125,000,000f for Spain, which has been much talked of, there seems at the present moment no chance of one being realised, no bankers being willing, on account of the bad repute of that country among the lending public, to have anything to do with it. Even the Credit Mobilier, notwithstanding its desire to please the Spanish Government in order to get something done for the North of Spain Railway, is unwilling to entertain any such project. That nothing whatever was said about a loan, between the Emperor and the Queen of Spain, or the Spanish Ministers, in the recent interview at Biarritz, is, as intimated in my last, quite certain.

Notwithstanding the Bank of France returns testify that for some time past commerce has not been active, the receipts of the principal railways have for several weeks been greater per kilometre than in 1864. The last reports are for the week ending the 9th of this month, and they show that, compared with the corresponding week of last year, there was on the Northern line an increase of 9.68 per cent. per kilometre; on the Orleans of 0.65; on the Western, 9.7; Eastern, 11.83, and new network, 1.88; Mediterranean, 4 45; Southern, 0.32.

The Bank de Depots et de Comptes Courants has fixed the dividend of the first six months of the present year at 6f per share of 125f. It is to be paid from the 2nd November.

The Credit Industriel et Commercial Bank announces a dividend of 11f 25c for the first half of 1865, payable from the 1st November. As the bank is believed to have sustained rather heavy loss on one or two important operations, and as the value of money during the whole six months was low, the dividend is not only satisfactory, but higher than was expected.

The directors of the Lyons and Mediterranean Railway have decided that 25f per share on account of the dividend of 1865 shall be paid from the 1st November next.

The Parisian Gas Company announces the payment from the 6th October of 25f on account of dividend of the present year; and it makes a call of 200f per share to be paid from the 1st October.

Among the most violent adversaries of the treaty of commerce with England were the ironmasters; and to this day they denounce it with great bitterness. Yet (as stated in my last) the commission for fixing the value of goods imported and exported, declares that in 1864 the production was so large that prices actually declined, in spite of a diminution of imports and an increase of exports. They had predicted that the treaty would make them blow out all their furnaces! Their situation at the present moment seems even better than it was last year, for I find in a report on the iron market that in the North of France they are maintaining an advance in prices obtained some time back; that in the district of the Moselle, they have proclaimed an advance of 10f the ton until further orders; that in the district of St Dizier business is satisfactory; that the same is the case at Paris; that in the East and in the neighbourhood of Lyons, a rise of 10f has been declared; that in the South certain sorts of iron are much demanded; and that in the West "foreign competition is somewhat paralysed." The Customs returns, too, show how wrong the ironmasters were in dreading the foreigners;—the duties received on the import of bar iron and rails having fallen from 3,155,000f in the first seven months of 1862 to 9,000f in the same period of 1865, and those in cast iron from 3,027,000f to 896,000f. It is true that the duties on some descriptions of iron were reduced on the 1st of October, 1864, but that does not account for the enormous difference. It is owing exclusively to a decline in the *quantities* brought in. Of bar iron and rails, for example, the import in the first seven months of 1862 exceeded 45,000 tons; in the same period of this year it was only 715; cast iron fell from 123,000 tons to 46,000; and in all other sorts of iron the decline was equally considerable.

When the Emperor was in Algeria he learned that the Custom-houses on the Morocco frontier did not collect duties sufficient to pay their expenses, and that they were loudly complained of both by the Moors and the Algerians. He accordingly promised that they should be suppressed. Expecting the suppression to be immediate, the Moors collected large quantities of wool, leather, ostrich feathers, and other articles, but they were told that the goods could not be allowed to cross the frontier without payment of duty. At this both they and their Algerian customers expressed great dissatisfaction, but nothing has yet been done for them. As, however, the Emperor in the pamphlet on Algeria, which he printed for private circulation, proposed the total abolition of Customs in the colony, and as one of the colonial newspapers recently announced that the measure was about to be carried into effect, the traders on the frontier of Morocco will probably not have long to wait.

In the recent issues of new books of Messrs Guillaumin and Co., is one entitled *Le Marche Monetaire et ses Crises depuis cinquante Ans*, by M. de Lavaleye, Professor of Political Economy in the University of Liege. This work is divided into two parts, the first containing a concise, but complete history of the great commercial crises of the first half of the present century; the second, an examination into the causes of crises and the remedy for them. M. de Laveleye adopts fully the doctrines on these points which now generally prevail in England, namely, that crises come from an abusive extension of credit, combined with a derangement in one or more important branches of commerce, necessitating an unusual export of specie; and that the remedy is an energetic raising of the rate of discount, in order to attract the precious metals from other countries. M. de Laveleye exposes his views with great clearness, and maintains them with vigorous argumentation: he, moreover, backs them by quotations from the ECONOMIST, from Mr Goschen, Mr Stuart Mill,

Digitized by Google

and other English authorities. His book is calculated to do great good on the Continent, where very singular opinions respecting commercial crises and the remedy for them are entertained.

Although a meeting of the shareholders of the Mediterranean Telegraph was held more than a month ago, the report of the directors has not been published. But it is known that it presented the situation of affairs in an unfavourable light, and that in particular it stated that the attempts to obtain an indemnity from the Italian Government had not succeeded. The shareholders expressed great dissatisfaction at it, and refused to sanction the accounts that were communicated to them.

The market report is subjoined :—

FLOUR.—Business is not very active, millers being in want of water from the long continued dry weather, having no reason to purchase; but prices have an upward tendency. Yesterday, the quotation according to quality, was 48f to 52f the sack of 157 kilogs. Six marks current month and October was 52f; three months of October, 51f 25c; four months of November, 51f 75c. Type Paris, the 101 kilogs, current month, was 31f 50c; October same price; November and December, 31f 75c.

WHEAT.—At *Paris*, yesterday, offers were not numerous, and prices were firm. New choice white, 28f the sack of 120 kilogs; choice red, 27f 25c to 27f 50c; first quality, 26f 50c to 26f 75c; good, 26f; other sorts, 25f down to 21f. Old wheat was 27f to 27f 50c for choice red; 28f to 28f 50c choice white.

COTTON.—Business was very active at *Havre*, in the week ending Friday, the sales having amounted to 14,331 bales. The imports were 6,274, and the stock, 84,375. The closing quotations were 10f higher for Egypt, Tinnevelly, Madras, Bengal, Kurrachee, and China; 8f higher for Brazil and Coconada; 5f for Surat, but United States was unchanged. Low New Orleans was consequently 245f the 50 kilogs; good ordinary qualities in Broach, 176f; in Tinnevelly, 170f; Madras, 180f; China, 170f; Egypt, 230f. This week, there has been great activity, and yesterday, New Orleans was 247f 50c and 240f; Madras for delivery, 175f; Broach, 165f; Oomrawuttee, 172f 50c to 177f 50c, and for delivery, 155f fo 172f 50c; Bengal, 125f; China, 175f and 170f.

COFFEE.—The demand was more active at *Havre*, in the week ending Friday. 192 sacks Hayti Port-au-Prince, 80f the 50 kilogs, in bond; 480 Cape, 83f 50c to 85f; 400 Gonaives, 86f; 1,200 Jeremie, 79f; 400 ditto, 76f, indifferent quality; 1,400 La Guayra, 90f; 300 Rio, not washed, 74f; 2,625 ditto, for delivery, 73f to 84f; 300 Rio washed disposable, 97f; 200 ditto for delivery, 101f. By auction, some different sorts of damaged were sold; also 25 sacks Rio Capitania sound, from London, 70f. The arrivals were about 13,000 sacks and 170 casks. This week, Rio washed for delivery, 106f and 101f in bond; disposable, 75f to 88f; Porte-au-Prince, 81f 50c. At *Nantes*, last week, there were no sales. This week, by auction, Ceylon native, 108f to 118f 75c; Porto Cabello, non-grage, 115f 75c to 117f 50c, and grage, 121f 75c to 122f 75c; Malabar, 115f to 121f 50c. At *Bordeaux*, last week, 472 sacks La Guayra non-grage, at established prices; 100 at 139f; 200 Rio not washed, 86f, 170 at prices not stated; 400 Mysore, 118f; 30 bales Mocha, at established prices. This week, La Guayra, 94f and 92f; Mysore at prices not stated; Rio washed 92f. At *Marseilles*, last week, 800 sacks Rio, 75f. No sales this week.

SUGAR.—At *Havre*, in the week ending Friday, 620 casks French West India went at 47f 25c the 50 kilogs, bonne quatrieme, duty paid; 100 at 47f 50c; some usine, 43f to 51f, duty paid; 212 casks Havana, 31f, No. 12, in bond; 400 ditto old, by English ship, same price and number; 474 ditto, by Spanish ship, 30f 85c, same number. By auction, some damaged West India was sold. The arrivals were not important. This week, French West India, 48f; Havana, by English ship, 31f, No. 12; by Spanish ship, 30f 25c and 30f, same number. At *Bordeaux*, last week, some French West India usine went at 58f, 57f, and at prices kept secret; 3,452 sacks Reunion, 52f, bonne quatrieme; 11,422 Mauritius, 53f, ditto; 230 Santiago. 29f, No. 12 of Holland, in bond; 2,019 Havana, 31f 50c, No. 12; 230 Santiago, 29f, No. 12. This week, French West India, 48f, bonne quatrieme; usine at prices not stated. At *Nantes*, last week, 2,000 sacks Reunion gros grain, 51f 50c, bonne quatrieme; 497 ditto superior, 44f 56c; 1,042, 50f 50c; 320 common, 45f 75c; various lots of French West India, 47f to 47f 50c, bonne quatrieme; some usine, 49f 50c to 58f 25c. This week, French West India, 46f 50c to 47f 50c, bonne quatrieme: usine, 57f; Reunion, indifferent quality, 45f. At *Marseilles*, last week, by auction, 3,095 casks Havana, sound, by English flag, No. 9 to 15, 21f to 31f 25c; 903, by Spanish ship, No. 10 to No. 15, sound, 26f 75c to 31f 25c. No sales have been made this week, but prices are firm.

INDIGO.—The sales at *Havre*, in the week ending Friday, were 17 chests Bengal new, part at 55c above the estimates, part at prices kept secret; and 8 old at prices not stated. The arrivals were 4 chests from London. No sales this week. At *Bordeaux*, last week, 165 chests Bengal and 18 Kurpah were sold. For Bengal, the prices previously demanded were given, though a short time before refused by buyers. This week, Madras and Bengal at prices not given.

HIDES.—The sales at *Havre*, in the week ending Friday, were 458 Buenos Ayres dry ox, 107f 50c the 60 kilogs; 1,000 ditto salted cow, for delivery, 47f 50c; 1,150 Monte Video salted ox, disposable, 59f to 60f; 260 Rio Grande dry, 75f; 700 ditto salted ox, 55f 50c; cow, 46f 50c; 1,293 Rio Janeiro salted ox, 51f; 100 cow, 40f; 12 Martinique salted, 37f 50c. At an auction, 11,005 hides and 562 skins were offered, but only 2,931 of the former were taken. The prices realised were: Monte Video salted ox, 56f; Buenos Ayres salted ox, 53f to 53f 25c; and slightly damaged, 46f to 46f 50c; Rio Janeiro salted cow, 39f; small ox and cow, 34f to 35f 25c; Valparaiso salted calf, 24f 25c; Tampico drysalted cow, 59f 50c; ditto ox and cow, slightly damaged, 49f 50c; ox, 58f; Guadaloupo salted, 47f. The arrivals were about 2,000. This week, Rio Grande salted ox, 53f 50c and 56f; Monte Video ditto, 59f and 60f; cow, 49f 50c; Buenos Ayres dry, 92f 50c; and cow, 90f; salted cow, 48f and 47f 50c; Valparaiso drysalted, 67f; Rio Janeiro salted cow, 39f.

WOOL.—At *Havre*, in the week ending Friday, 330 bales La Plata unwashed, went part at prices kept secret, the rest at 1f 30c to 2f 25c the kilog; 4 bales Chili unwashed, 1f 85c. The arrivals were about 450 bales. This week, Buenos Ayres unwashed, 75c to 2f 5c and 100f to 205f the 100 kilogs.

TALLOW.—In the early part of the week ending Friday, prices fell, but in the latter part they rallied. 325 pipes 97 casks La Plata disposable or in port, 55f to 57f 50c the 50 kilogs; 1,130 pipes for delivery, 55f 75c to 58f 75c; 27 New York a la marque, 58f. The arrivals were 846 casks. This week, La Plata, 56f to 58f; inferior by auction, 52f 75c. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 126f 20c.

SPIRITS.—At *Paris*, yesterday, 3-6, first quality, disposable, was 48f and 47f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg, 57f; 3-6 beetroot, first quality, 90 deg, 55f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Washington Government have entered into a contract for ten years with the American Pacific Mail Steamship Company for a monthly line of steamers between California and China, with a subsidy of 100,000*l* per annum. As the company will have to build four first-class steamers of 3,500 to 4,000 tons, expressly adapted to the service, it will not be possible to commence full operations until the limit assigned in the contract—the 1st of January, 1867—unless suitable vessels can be chartered in the interval. The precise route does not appear to have been determined upon. Via Kanagawa it would be 6,200 miles, and via the Sandwich Islands it would be 6,980.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 16th day of September, 1865 :—

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 27th day of September, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,778,725	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	13,128,725
		Silver Bullion	...
	27,778,725		27,778,725

BANKING DEPARTMENT.

	£		
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10,384,309
Rest	3,811,178	Other Securities	22,522,316
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	7,230,010	Notes	6,276,080
Other Deposits	13,789,628	Gold and Silver Coin	832,094
Seven Day and other Bills	530,883		
	40,014,699		40,014,699

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22,033,528	Securities	33,003,525
Public Deposits	7,230,010	Coin and Bullion	13,960,819
Private Deposits	13,789,628		
	43,153,166		46,964,344

Dated the 28th September 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,811,178*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£189,665
An INCREASE of Public Deposits of	509,141
An INCREASE of Other Deposits of	222,051
No change in Government Securities.	
An INCREASE of Other Securities of	1,189,888
A DECREASE of Bullion of	259,025
An INCREASE of Rest of	10,008
A DECREASE of Reserve of	442,613

The changes in the above return explain the rise in the rate

Digitized by Google

of discount. The increased demand for money has caused an augmentation in the other securities of as much as 1,189,888*l.* At the same time, there is a decrease in the bullion of 259,023*l*, owing to withdrawals of sovereigns for internal circulation, and in some degree for the Irish banks, about 50,000*l* on balance of foreign gold having been sent in during the week. Owing to the influx of payments on account of the revenue, and an addition to the other deposits, the reserve has declined not more than 442,613*l.*

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 21,174,428	£ 22,565,351	£ 22,321,747	£ 20,751,741	£ 22,033,528
Public deposits	8,144,209	8,486,834	9,270,486	7,083,958	7,330,010
Other deposits	11,437,955	13,595,337	13,717,460	12,588,902	13,789,628
Government securities	12,125,026	11,257,556	11,141,284	10,797,095	10,384,209
Other securities	13,915,763	19,791,341	22,513,119	20,404,489	22,522,316

Bank rate of discount	5 p. c.	2 p. c.	4 p. c.	9 p. c.	4½ p. c.
Price of Consols	87⅛	93⅞	93⅜	87⅜	89½
Average price of wheat	77s 3d	53s 2d	43s 9d	40s 11d	42s 9d
Exchange on Paris(shrt)	25 30 40	25 17½	25 25 22½	30 25 27½	37½ 25 20 27½
— Amsterdam ditto	11 12½ 18¼	11 14¼ 15½	11 17 17⅛	11 18½ 19⅛	11 18¼ 19
— Hamburg(3months)	13 9¼ 9½	13 7½ 7¾	13 8½ 8¾	13 9½ 10	13 9¼ 10

In the corresponding week of 1855, General Simpson's despatch to Lord Panmure on the fall of Sebastopol, had been received. Advices from America were more satisfactory. The Bank of Bengal had raised its rate to 12 per cent. The English funds were depressed.

In 1862, there was no movement of importance in the money or stock markets, and there was an equal absence of interest in general politics.

In 1863, several engagements had taken place in Poland in which the Russian troops had been worsted. The acceptance of the Mexican throne by the Archduke Maximilian had been published.

In 1864, great disturbances had taken place at Turin, and the National Guard had been called out in consequence. The King of Italy had summoned General de Lamarmora to form a new Cabinet. The betrothal of the Princess Dagmar to the Czarewitch had been determined on. The Prince and Princess of Wales had paid a visit to Stockholm. At Berne, the Council of the States had sanctioned the Franco-Swiss treaty of commerce. In China the Imperialists had captured Nankin. In America General Grant was preparing for another attack upon Lee. General Sheridan had defeated General Early, with heavy loss, in the Shenandoah Valley. The Bank of Holland had raised its rate from 5½ to 6 per cent. In London the money market was rather more favourable.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 8,477,808*l*; in 1862, a deficiency of 6,196,004*l*; in 1863, a deficiency of 8,795,659*l*; and in 1864, a deficiency of 7,815,587*l.* In 1865, the deficiency is 8,732,688*l.*

Discount and Money Market.—The Directors of the Bank of England yesterday raised their rate of discount from 4 per cent., at which it was fixed on the 3rd August, to 4½ per cent.

Although it was known that great pressure had existed upon the resources of the Bank, owing to the customary increase in the demand for money towards the close of the quarter, a rise in the rate was generally unexpected, the practice of the Bank being at these periods to avoid if possible making any change. In the open discount market, the supply of money has been limited, and the quotation for the best paper has been fully equal to 4½ per cent., with an indisposition to do much business, except for regular customers. Hence an exceptionally heavy pressure has been thrown upon Bank, and has necessitated the present advance. In some quarters, it is thought that a further rise is imminent. Annexed are the charges for paper of various dates :—

30 to 60 days	4½ per cent.
3 months	4½ per cent.
4 months	5 per cent
6 months—Bank bills	5¼ per cent.
6 months—Trade ditto	5½ per cent.

On the Stock Exchange, loans on Government securities have been in considerable request, and some large amounts have been taken from the Bank at 4½ per cent.

The discount houses and joint stock banks have raised their allowance on deposits a half per cent., the following being the present terms :—

Joint Stock Banks	*3½ per cent.
Discount houses at call	3½ per cent.
Do. with seven days' notice	3¾ per cent.
Do. fourteen days	4 per cent.

* At the London and Westminster 2½ per cent. only on sums below 500*l.*

There were no bullion operations at the Bank to-day. Yesterday, about 45,000*l* in foreign gold was sent in, and a hundred thousands sovereigns were withdrawn on Irish banking account.

The amount of Government bills on India, for which tenders will be received at the Bank of England on Wednesday next, is 200,000*l.*

The return of the Bank of France for the week shows the following changes :—

	£
Increase.	
Bills discounted	470,000
Treasury balance	888,000
Decrease.	
Bullion	288,000
Circulation	250,000
Current accounts	552,000
Advances	5,000

The committee of the Stock Exchange have passed the following resolution :—"That pending an inquiry into the circumstances connected with the General Estates Company, the 'buying-in be suspended.'"

The following are the rates of discount in the chief cities of the continent, showing an advance at Paris and Hamburg :—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	3	3
Vienna	5	5
Berlin	5	4⅞
Frankfort	4	3¾
Amsterdam	3	3
Turin	5	4½ 5
Brussels	4	4
Madrid	9	...
Hamburg	...	5
St Petersburg	6	6½ 7

English Funds.—Owing to the rise in the Bank rate, and the general pressure for money, the funds have been flat at a decline of about ¼ per cent. Consols for the account, which left off last Friday at 89⅞ to 89⅞, closed to-day at 89¼ to 89⅜, with a tendency to further depression. For money, the last price was 89⅜ to 89½. Reduced and New Three per Cents. were quoted 87½ to 87½; and India Five per Cents., 105 to 105¼, showing in the latter case only a fractional decline.

Exchequer bills have receded to 5s to 1s discount.

Foreign Stocks.—The chief movement in the foreign market has been a rise in Mexican bonds, on the announcement of the successes of the Emperor Maximilian's troops, and the report that the new Empire will shortly be recognised by the United States. At one period to-day the price was 27 buyers, but a partial reaction subsequently occurred to 26¾ to 27. Spanish Passive and Certificates and the Confederate loan are also a fraction higher, but in the latter case the quotation is merely nominal. Brazilian descriptions, except the new loan, continue comparatively dull, notwithstanding the news of the victory over the Paraguayan army. Greek, Portuguese, and New Granada bonds have likewise fallen, the last on the accounts of the state of anarchy in that republic. Turkish Consolides have been flat throughout the week, and receded to-day to 49⅜ to 49⅝, owing to the postponement by the Government of the dividends due this month on the three first issues. The Anglo-Turkish loans have been generally steady. United States 5.20 bonds have been in active demand, and have risen to 70 to 70¼.

The new Brazilian loan has steadily advanced to 3⅞ to 4 premium.

The closing quotation of French 3 per Cent. rentes on the Paris Bourse this evening was 68f 55c, showing a rise of ⅛ to ¼ per cent. compared with yesterday and last Friday.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :—

RAILWAYS AND OTHER SHARES.—The railway market has been rather heavy, and closed this afternoon at a general decline on the week of about ½ to 1 per cent. The late rise having induced realisations, the supply of floating stock has increased, while the high prices have for the moment checked investments. At the fortnightly settlement, this week, the rates for carrying over purchases to the next account were consequently rather higher than of late, although on the whole moderate. In common with other securities, railway stocks, particularly the heavier descriptions, have been unfavourably affected by the rise in the Bank minimum. To-day has shown increased flatness, and the closing quotations were nearly the lowest of the week.

In the colonial department, the most noticeable feature is an advance in Canadian securities. Indian guaranteed stock remains quiet, but steady. Foreign shares have been firm, and a recovery has taken place in South Austrian and Lombardo-Venetian. An active demand has prevailed for American descriptions.

The new Erie Railway loan is quoted 3 premium.

In the miscellaneous department, the chief alteration is an improvement in Credit Foncier and Mobilier shares.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day :—

FOREIGN EXCHANGES.—Owing to the increased value of money here, the rates have been generally firm.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper :—

Gold.—The demand for gold continues inactive, and 194,000*l* has consequently been purchased by the Bank of England. 100,000 sovereigns have been withdrawn during the past week. The arrivals are :—The Africa, from Boston, with 8,000*l*; the City of Manchester, from New York, with 82,000*l*; the Shannon, from the West Indies, with 114,000*l*. The shipments are—per Pera, for Alexandria (sovereigns), 10,000*l*, and per Messageries steamer of 29th, from Marseilles (in sovereigns) 124,000*l*.

Silver.—As indicated in our last circular, there has been more inquiry for silver for India, and some considerable sales have been effected at Marseilles for steamer of 5th October, at 61 1-16d per oz standard. The price for the limited amount on sale in London has been 60⅜d per oz standard. The Shannon, from the West Indies, has arrived with about 80,000*l*, chiefly in Doré or refinable bars, The Pera, which left Southampton on the 25th instant, took 100,575*l* for Bombay.

Mexican Dollars remain without alteration at the price last quoted by us, viz.—59⅜d per oz. The Shannon has arrived with about 80,000*l* in this coin, and probably to effect sales some reduction in price may have to be accepted.

Exchange on India for drafts by the banks at 60 days' sight is 1s 11⅛d to 2s per rupee for Bombay, Calcutta, and Madras.

India Government loan notes may be quoted as follows :—108 to 110 for 5½ per Cents. ; 101½ to 102½ for 5 per Cents. ; and 89 to 90 for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price ; ditto, fine, 77s 9d per oz std ; ditto, refinable, 77s 10½d per oz std, last price ; Spanish doubloons, 75s 0d to 75s 6d per oz ; South American doubloons, 73s 9d per oz; United States gold coin, 76s 2½d per oz. Silver—Bar silver, 5s 0⅞d per oz std, ; Mexican dollars, 4s 11⅛d per oz ; 5-franc pieces, 4s 11¾d per oz ; Quicksilver, 8*l* per bottle ; discount, 3 per cent.

The Scotia has arrived from New York with 67,000*l* in specie.

FAILURES AND MERCANTILE EMBARRASSMENTS.—A third dividend of 2s 6d in the pound is announced as payable in Norwich next week to the creditors of the East of England Bank, by the liquidators, Messrs Gibbons and Tillett. This bank stopped payment in July, 1864, with liabilities amounting to about 600,000*l*. and the dividends paid previously to this amount to 15s in the pound.

PUBLIC COMPANIES.—The directors of the Bank of British Columbia have issued their report in anticipation of the meeting to be held on the 3rd October. The undivided profits are stated at 20,878*l* 13s 8d, out of which a dividend of 10 per cent. per annum is proposed. 7,000*l* is to be carried to the reserve fund, which will leave a balance of 3,703*l* 13s 8d to be carried forward to next half-year.

The directors of the Thames Iron Works Shipbuilding, Engineering, and Dry Dock Company have determined upon the payment of an ad interim dividend at the rate of 10 per cent. per annum.

At the meeting of the South African Land and Financial Company (Limited), held on Wednesday, it was agreed that the deposits should be returned to the shareholders, but without interest.

The half-yearly meeting of the Mutual Tontine (Westminster Chambers Association) was held to-day, when the report was unanimously adopted, and the Chairman stated that the lettings were such as to enable the Board to calculate in future upon the payment of a dividend which should, at the very least, equal the amount of interest hitherto paid on capital, namely, 4 per cent. per annum.

A general meeting of the Mauritius Land Credit and Agency Company (Limited) took place to-day. The report, which showed that the net profits of the Company to the 30th June was 3,502*l* 16s 11d, or nearly 15 per cent. for the nine months preceding, and recommended a dividend of 10 per per cent., which was adopted, and the dividend declared accordingly.

At an extraordinary general meeting of the shareholders of the Russian Iron Works Company (Limited), the resolution passed at the meeting of the 13th September was confirmed. The object of the resolution was to rescind article 26 of the articles of association, to which some objection was made, and to substitute another in lieu thereof.

The directors of the National Bank of Australasia invite proposals for the issue in London of 10,000 new shares with 4*l* paid, at 2 premium. These constitute a part of the 35,000 new shares recently created, of which 25,000 have been placed in the colonies at the above price. The institution is one of the most prosperous in Australia, and the last dividends have been at the rate of 10 per cent. per annum.

The extensive cotton-ginning and pressing factory of Mr Robert Corkling, at Mansorah (the largest establishment of the kind in Egypt), together with his cotton agency and general mercantile business at Alexandria, have just been transferred to a joint stock company with a capital of a 500,000*l* in 500 shares of 1,000*l* each, the first issue being limited to 250,000*l*, the whole of which has been privately subscribed through Messrs Chadwick, Adamson, M'Kenna, and Co.

Digitized by Google

Gale's Protected Gunpowder Company, Limitcd, is announced. Capital, 200,000*l* in shares of 25*l* each. "The Company," says the prospectus, "is formed for the purchase and use in the United Kingdom of Mr Gale's valuable invention for rendering gunpowder non-explosive and explosive at pleasure, and for protecting gunpowder from damp—an invention admitted to be of national importance.

The prospectus has been issued of the Dunraven United Collieries Company, Limited, with a capital of 200,000*l*, in 8,000 shares of 25*l* each. This company has been formed for the purpose of purchasing some extensive collieries in the county of Glamorgan, which, hitherto, have been worked successfully.

The London and Australian Agency Company, with 1,000,000*l* capital has been announced. This company commences business with a guaranteed profit of 30,000*l* per annum, *i.e.*, that the vendors agree to forfeit so much of the purchase money of their good-will as they fall short of making such profit. The sources of the profits are, first, interest on the money advanced; second, commission, ditto; third, commission on wool sold by weekly auction; fourth, charge for storing all wool; fifth, difference between the cost of borrowing money here and lending at the colonial rate.

MISCELLANEOUS.—The half-yearly dividend, due on the 18th October, on the Turkish Six per Cent. Loan of 1854, is announced for payment in due course, together with the bonds, amounting to 50,700*l*, which were drawn in July last.

The subjoined notice has been posted in the Stock Exchange respecting the Atlantic and Great Western Railway:—

"M. Slaughter, Esq., Secretary,
Railway Department, Stock Exchange.

"Sir,—I have to inform you that we have received from New York remittances, amounting to thirty thousand seven hundred and fifty-nine pounds, twelve shillings, and tenpence (30,759*l* 12s 10d) on account of the Atlantic and Great Western Railway Company for interest account. —I am, Sir, your obedient servant,

(Signed) "W. C. BOORIE, Manager.

"Consolidated Bank (Limited), Sept. 27."

The following relates to the Venezuela, New Granada, and Ecuador debts:—

VENEZUELA SIX PER CENT. LOAN, 1864.

The General Credit and Finance Company of London (Limited) are in receipt of advice from their agents, Messrs H. L. Boulton and Co., dated La Guayra, 9th September, 1865, of duties collected as follows on account of the above loan:—Per statement No. 57, from Puerto Cabello, $1,346.20; ditto No. 45, from La Guayra, $3,476.74; ditto No. 46, ditto, $13,646.7; ditto No. 47, ditto, $1,283.66;—total, $19,752.67.

NEW GRANADA DEBT.

Messrs Baring Brothers and Co. have received by this mail, per account of New Granada dividends, the following remittances:—From Custom-house, Santa Marta, which includes $112,453 from Rio Hacha, 6,894*l* 5s 5d; from Custom-house of Cartagena, 690*l*; making a total of 7,584*l* 5s 5d.

DEBT OF ECUADOR.

The mail from Guayaquil has brought a remittance of 1,001*l* 4s 5d on account of the dividends on the debt of Ecuador.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 2 per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is at about the same price in in London and Paris.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.6⅝ per 1*l* sterling. Standard gold at the English Mint price is, therefore, nearly 1-10th per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 109 to 109¼ per cent. At this rate there is no profit on the importation of gold from the United States.

The Commercial Times.

POST OFFICE ANNOUNCEMENT.—On the 1st October next, and thenceforward, the entire postage, British and foreign combined, chargeable upon newspapers and other printed papers addressed to Switzerland must be paid in advance (instead of part only of such postage as heretofore), and no further postage will be levied on their delivery. It must be understood that if more than one newspaper be enclosed in a packet, postage will be chargeable on each newspaper. Patterns or samples of merchandise of no intrinsic value may be transmitted by post between the United Kingdom and Switzerland, under the same regulations that are applicable to patterns sent to France and Algeria, and at the following rates of postage, which must be paid in advance:—For a packet not exceeding 4 ozs in weight, 4d; above 4 ozs and not exceeding ½ lb, 8d; above ½ lb and not exceeding 1 lb, 1s 4d; every additional ½ lb, 8d.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended Sept. 23, 1865:—

	Quantities Sold.	Average Price.
	qrs bush	s d
Wheat	69,988 5	42 0
Barley	14,367 1	30 2
Oats	7,796 4	20 10

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

COMMERCIAL EPITOME,

FRIDAY NIGHT.

The supply of English wheat on sale at Mark lane to-day was very moderate. The trade, however, was rather quieter than on Monday, nevertheless that day's currency was well supported. In most descriptions of foreign wheat sales progressed slowly on former terms. Barley—although the supply of English produce on sale was small—was in slow request at late rates. Oats were in good supply: the best samples changed hands at full prices, but inferior parcels were rather lower in value. Beans and peas sold steadily at full currencies. The flour trade was steady on former terms. This week's imports amount to 12,210 quarters of wheat, 6,390 barley, and 32,120 quarters of oats.

Very little change took place in the value of wheat, flour, and maize at Liverpool this morning. The trade, on the whole, was steady.

There has been a very animated demand in the Liverpool cotton market throughout the present week; the total sales amount to 189,000 bales, of which spinners have taken 82,000 bales, speculators 84,000 bales, and exporters 23,000 bales. Quotations for American are raised 2¼d per lb, for Surats 2d, for Bengal 1½d, and for China and Bengals 2½d per lb. To-day the market closes with extreme animation, with sales of 35,000 bales, at an advance of 1½d upon yesterday's prices.

During the twelve months, ending Aug. 31 last, the exports of cotton from New Orleans amounted to 192,351 bales, of which 21,326 bales were to Great Britain, 402 North of Europe, 167 to Spain, and 164,504 bales coastwise, 144,190 bales of this quantity being to New York. A large proportion, however, of this supply was believed in bad condition.

At Savannah, during the week ending Sept. 9, the cotton trade was dull, and prices declined 1c to 2c per lb. Ordinary was quoted at 27c to 28c; middling ditto, 33c to 35c; and good middling, 36c to 38c per lb.

The arrivals of cotton at Charleston, from Sept. 1 to Sept. 9, amounted to 1,250 bales. Middling sold at 33½c to 35c per lb. The stock on hand, on Sept. 1, was 1,972 bales. The receipts since had been 1,263 bales, and the exports 1,613 bales. The stock, on Sept. 6, was 1,621 bales.

Postal advices from Bombay are to Aug. 24. During the great part of the preceding fortnight, the cotton trade ruled inactive. "Prices," observe Messrs Nicol and Co, "keep quiet, however, but more from the great scarcity of good cotton than from any great demand on the part of purchasers. The arrivals by rail have been on a smaller scale than usual, and we do not expect much addition to our stock now for fully another month. The quality of the small stock we have is positively wretched, and at the quotations will leave little profit to purchasers at the prices ruling in the Liverpool market at the date of our last advices, namely, 13½d, and we fear a large portion of the shipments of the past two months will prove much inferior to the average of the shipments of former years during the same season. The transactions have been again, as formerly, confined to Oomrawuttee Akote at 287 rs to 285 rs, and sales in the same description are reported for next month's delivery at 288 rs. Dhollerah has found a purchaser upon two occasions, once at 311¼ rs, and again at 315 rs. Broach, which is more sought after, has been sold at 305 rs for a small parcel. In other descriptions, we do not hear of any transactions. Tinnevelly—We have advices from Colombo to 17th inst. Tinnevelly was then nominally 145 rs, with a downward tendency; previously there had been a good demand, and purchases were made to a fair extent at from 160 rs to 152 rs. The following are our quotations:—

CURRENT PRICES of COTTON at BOMBAY, Aug. 24.

	Market Value. Per candy, 784 lbs.	C. F. I. Exchange 2s 0¼d. Freight 1l. per lb
	rs	d
Broach	300	10.37

America	706	800
Grand total	732,450½	710,419

Via the the Persian gulf, we have intelligence from Bombay to Sept. 22. At that date, the cotton trade was very firm. The export for the week amounted to 11,000 bales. Dhollera was quoted at 330; Sawginned Dharwar, 355; Oomrawuttee, 310; and Compta, 315 rupees per candy. For goods, there had been an active demand, at advancing prices.

From Alexandria we have intelligence to Sept. 25. At that date the cotton trade was very active, at rapidly advancing prices—fair open-ginned qualities being being quoted at 19¾d; and middling do., 17¼d per lb., cost and freight. The arrivals from the interior had been very small. Freight to Liverpool was ⅞d per lb.

The market for raw sugar has been very active, and a large amount of business has been transacted, at an advance in prices of 6d to 1s per cwt. Coffee has moved off steadily, and, in some instances, the quotations have improved 6d per cwt. Tea has changed hands to a fair extent, at full prices. Last week, duty was paid in London on 1,202,833 lbs, whilst the export for the week ending Sept. 21, amounted to 503,152 lbs, making a total of 1,705,985 lbs, against 1,208,946 lbs last year. From China, we learn that the export to Great Britain had reached 45,350,000 lbs since the opening of the season. In other descriptions of grocery produce, a fair, but by no means extensive, business has been transacted, at full prices.

During the month of August the sugar trade at Havana was very quiet. The principal demand was for shipment to the United States, the inquiry on European account being limited. According to Messrs Morales and Co.'s circular, the rates current Sept. 6, and the shipments, including those from Matanzas and Cardenas, from Jan. 1 to Aug. 31, were as follows:—

To—	1865. boxes.	1865. hhds.		1864. boxes.	1864. hhds.
United States	387,239	83,995	...	141,841	50,312
United Kingdom and Continent of North Europe	554,161	27,261	...	704,065	36,186
Mediterranean	146,201	...	...	108,226	96
Spain	230,823	59	...	208,473	157
Other ports	36,405	2,026	...	22,964	3,295
Total	1,354,829	113,341	...	1,185,569	90,946

In the English wool trade there has been considerable activity.

Annexed is Messrs Hazard and Caldecott's report of the public sales of colonial wool which were concluded on Saturday last:—The sales now concluded opened on the 17th August; the following quantity of wool has been brought forward:—Sydney, 34,573 bales; New Zealand, 35,652; Port Philip, 22,320; Van Diemen's

Digitized by Google

Land, 10,980; Adelaide, 9,729; Swan River, 506; Cape of Good Hope, 25,302;—total, 139,062 bales. Throughout the series, there has been good attendance and competition. The home trade bought largely; foreign buyers operated only to a small extent at the commencement, but towards the close of the sales showed much more anxiety to purchase. Prices throughout have been very firm at opening rates, and in many instances an advance has been obtained. Sydney and Queensland wool, of which the quantity brought forward was larger than usual, sold very irregularly. New Zealand sold well throughout. Port Philip wool has not improved either in quality or condition; many flocks which were good in quality and light in condition, owing to their burry state, sold much lower than they otherwise would have done. Van Diemen's Land wool has gone off in condition, many of the flocks turning out very shivey. Adelaide sold pretty regularly, and at fair prices. Swan River wool was about the same, both in quality and condition, as last season. Cape of Good Hope wool was eagerly competed for throughout the series; some of the scoured was well got up, and brought good prices. On the other hand, much of the handwashed was in very bad condition. The next series of sales will probably be commenced on the 16th of November. The arrivals to date are:—Sydney, 8,807 bales; Port Philip, 1,910; New Zealand, 1,067; Van Diemen's Land, 45; Adelaide, 1,053; Cape of Good Hope, 11,144;—total, 24,026 bales.

The silk trade has been rather more active at full prices. Flax has continued firm; and there has been considerable activity in the demand for jute at fully late rates.

In metals, there has been continued firmness. Tin especially is in request, and Straits has sold as high as 91*l* cash. Scotch pig iron has reached 58s 4½d, cash, mixed numbers.

With the exception of linseed oil, which has fallen to 37s 9d per cwt, the recent advance in the value of oils has been well supported. Turpentine, however, is dull at 44s 6d for French spirits. American refined petroleum commands 3s 2d per gallon. Tallow is firm at 45s 9d to 46s for new P.Y.C., on the spot.

The demand for cotton and woollen goods at New York, during the week ending Sept. 16, was much quieter than in the preceding week. There was, however, continued firmness in prices, and the high rates then current were fully supported. In breadstuffs for export, very little had been done, but there was a fair home demand, at a slight reduction in the quotations. The fluctuations in the premium on gold were from 142¾ to 144¾ per cent. The stock of bullion in the banks, Sept. 9, was 2,751,170*l*. The balance in the Sub-Treasury amounted to 13,647,090*l*. The shipments of specie, from Jan. 1 to Sept. 9, amounted to 4,144,630*l*, against 6,543,380*l* last year, and 5,922,330*l* in 1863.

THE COTTON TRADE.

LIVERPOOL—Sept. 29.

The large business in cotton last week has been followed by very extensive operations, and prices have continued to advance, particularly on Tuesday and Wednesday, the confidence of holders being stimulated by the widely extended demand for consumption at home as well as on the continent, while advices from America and elsewhere give no certain prospect of increased supplies. Yesterday, pending the declaration of stock, with the advance of the Bank rate to 4½ per cent. the market was comparatively quiet. Sea Island continues in active request, at full prices. American has been in general demand, and has become very scarce, commanding an advance of 2½d per lb. The demand for Brazil has again been large, at an advance of 1¼d to 1½d per lb. In Egyptian the transactions have been very extensive throughout the week, and quotations are about 2d per lb dearer. In Smyrna a moderate business has been done at 1d per lb above former rates. East India descriptions have changed hands to a very large extent, at daily advancing rates; the supply has been liberal, but the inquiry has been so great as to enable holders to raise the quotations, on the average, 1½d per lb. Bengal is only 1d per lb higher in the week, while the advance in China varies from ¾d to 1½d per lb, good cotton being especially scarce.

To arrive, the transactions continue very large, at an advance corresponding to the value of cotton on the spot, and the latest quotations were for New Orleans middling, not sailed, 21d per lb —Mobile, middling, sailed and not sailed, 20½d—Maceio, fair average, ship named, 19d—Egyptian, fair open, due, 21d—ship named, 20d, 20¼d, and 20½d; October delivery, 20¼d; October shipment, 20d—Broach, due, equal sample, 15d; fair merchants', ship named, 15d; June sailing, 15½d—Dhollera, merchants', not sailed, middling fair, 14d; fair, 15d; fair new merchants', June and July sailing, 15½d—Oomrawuttee, fair merchants', ship named, 15¼d; June sailing, 15½d; sample guaranteed, July sailing, 15d—Western Madras, fair new merchants', sailings June, 15d; July, 15d; late July, 14½d; June, July, and August, 15¼d; August, 14½d, and 14¾d; ship named, 14d, 14½d, 14¾d, and 15d; Bengal, fair merchants, July sailing, 10¼d; not sailed, 10d per lb.

The sales of the week amount to 188,830 bales, including 84,230 on speculation, and 23,170 declared for export, leaving 81,430 bales to the trade. The actual stock in the port declared this morning proves only 8,785 bales above the estimate. The market opens this morning with great animation, after the declaration of stock, and the sales will probably be very large, at advanced rates.

LONDON—Sept. 29.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—The market has been very excited during the past week; the business has been of large extent, and would have been much larger had holders offered supplies more freely. Very little cotton has been obtainable on the spot, and for arrival extreme rates have throughout been

Digitized by Google

required. For the few transactions in China and Japan an advance has taken place during the week of 1d per lb, whilst other descriptions are 1¼d to 1½d per lb higher both on the spot and for arrival. Owing to the quietness at Liverpool, and the raising the Bank rate to 4½ per cent., there was less activity yesterday, and the market closed with a dull tone. Advices from New York to the 19th September quote middling Uplands 45 to 45½ cents, and gold 144.

NEW YORK—Sept. 16.

There has been a good demand for cotton during the present week, and the total sales amount to 22,000 bales. In the early part, the market was very active, at higher prices, but the quotations are now somewhat beneath the recent highest point. Middling upland produce is quoted at 44 cents per lb. The total receipts amount to 24,537 bales, of which 8,770 bales are from New Orleans, 4,525 from Mobile, and 4,351 bales from Savannah, the remaining quantity being chiefly from Charleston, ports in North Carolina, and by railroad. The imports since Sept. 1 amount to 51,805 bales. The export from Sept. 1 to Sept. 12, was 6,174 bales, against 49 bales last year. Present quotations:—

MARKETS IN THE MANUFACTURING DISTRICTS.

There has been a very large business doing in cotton goods this week, chiefly for shipment to India, at an advance of 2s per piece. In other departments, trade has been somewhat inactive. The iron trade has ruled steady, and coals have sold briskly on rather higher terms.

MANCHESTER, Sept. 28.—The American demand has continued unabated up to-day, influencing proportionately all other articles; and, as fine goods are now quite bought up, it has descended to rather lower grades. Some houses in that branch of trade have orders for delivery monthly up to the end of May, and never in the whole career of the piece-goods trade with the United States, has such a rush for goods of all sorts been known before. In the beginning of the week the general inquiry was very animated. Yarns were sold readily at 1½d to 3d per lb above the rates of Friday last, and on Tuesday 2s 6d per lb was paid for good printing cloth. To-day, however, the rise in the Bank rate, and the reported excess of stock in Liverpool over the estimate, have caused a decided check on further progress, and buyers, especially for distant markets, have of a sudden come to a stand.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

BRADFORD.—A rather quieter tone seems to pervade our wool market. The demand seems to be less exclusively for bright-haired hogs. Yarns—Spinners have advanced their quotations fully 3d a gross for single yarns, and somewhat less than that for twofolds. The large demand for the home trade is unabated, while shippers seem disposed to do more. There seems to be no slackening in the demand for piece goods.

LEEDS.—The markets in both the cloth halls have not been quite so well attended by buyers as for the last few market days. The continuance of summer-like weather keeps operations somewhat in check, but in other respects the trade remains active, the manufacturers being well employed, and stocks being below rather than above the average for the period of the year.

LEICESTER.—There is continued activity in all branches of the hosiery trade. Manufacturers remain well employed in the warehouses, and orders are plentiful. Worsted yarns continue firm, and spinners are well engaged. Cotton yarns command very high prices.

NOTTINGHAM.—There is no revival in the lace trade at present. Cotton fabrics generally are dull, and prices continue exceedingly high. There is not much doing any class of silk goods. The demand for hosiery goods continues very active. There have been several American buyers in the market.

ROCHDALE.—The flannel market has been dull, and purchases were only made with a view to equalising stocks in hand. Business in Yorkshire woollens is very flat, and manufacturers still confine their purchases of wool to very small parcels.

CARDIFF.—The collieries of the district have been working with tolerable regularity, and merchants are fairly off for orders. There is an average continental demand, and the exports to the Eastern markets are increasing.

WOLVERHAMPTON.—The demand for finished iron continues steady, and the works are generally pretty fully employed. The orders from the Continent are good, and there is a fair home demand.

SHEFFIELD.—The home market for steel and finished goods gives tokens of improvement, and there is a prospect of a good autumn trade in those branches, the men being kept well employed. There is no movement of importance to notice in the Britannia metal and silver plate trade since last week, but there is no falling off in the orders.

BIRMINGHAM.—The trade of this town has slightly rallied; the factors have had a better supply of orders, and the metal dealers report that there has been a better demand for material, which confirms the accounts as to the increased activity in business generally.

GLASGOW.—Iron in hand of makers, g.m.b., No. 1, 58s; No. 3, 57s 3d; Gartsherrie, No. 1, 66s; No. 3, 57s 6d; Eglinton, No. 1, 55s 6d; No. 3, 54s 6d; Calder, 59s 6d; Langhorne, 59s; Glengarnock, 58s 6d; Kinniel, 57s 6d; Carron, 57s 6d; Forth, 57s.

BELFAST.—The linen trade continues active, and stocks are within moderate limits. Foreign demand continues active, and with the United States especially a large trade is being done. An active demand prevails for all qualities of yarns, and a further advance in prices has taken place. Prices of flax are very firm, especially for the coarser qualities.

HUDDERSFIELD.—A few unions and other low-priced goods have again been selling for the American market, but orders have not been so freely given as they were last week. A few selections from better-class fancy trouserings have been made, as also parcels of black doeskins and woollen cords, but middle-priced fancy goods of all kinds have been comparatively little inquired for.

DUNDEE.—There has been more animation in our flax market, and a considerable amount of business has been done, both in goods on the spot and on contract. In jute there is no change to notice; good qualities are held firmly for full rates, but the demand is not very active. Linens continue to move off very freely, in some instances at better prices.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Sept. 16.—The market has ruled very dull, and, speculative orders on Western account having been withdrawn, prices have materially declined, especially for flour and wheat. The prospects of increased supplies at this market during the balance of the season of canal navigation are improving. The high prices are stimulating deliveries, and at all the Western markets the receipts are considerably larger than last year. The large crop raised in Canada is being diverted almost entirely to this market; and the large drafts made upon us by Southern millers have almost ceased. The following are the quotations:—Flour—Superfine State and Western, $6.85 to $7.25; extra State, $7.50 to $8; shipping roundhoop Ohio, $8.25 to $8.75; extra Western, common to good, $7.75 to $10.40; double extra Western and St Louis, $10.50 to $13.50; Southern, supers, $9 to $10.20; Southern, fancy and extra, $10.25 to $13.50; Canada, common to choice extra, $7.75 to $10.75; rye flour, fine and superfine, $5.75 to $6.10; corn meal, Jersey and Brandywine, $4.75 to $5 per barrel. Wheat—Chicago spring, $1.15 to $1.62; Milwaukee Club, $1.57 to $1.63; red Winter, $1.95 to $2; amber Michigan, &c., $2.5 to $2.10 per bushel. Corn—Western, mixed, 75c to 89c; Western, yellow, 90c.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING

Very moderate supplies of English wheats have been on offer here, this week, coastwise and by land carriage; but most of the samples have arrived in good condition. The demand has somewhat improved, and prices have advanced 1s per quarter. The imports of foreign wheat have been on a fair average scale; but the business doing in all kinds has been much restricted. In the quotations we have no change to notice. Good and fine barleys have moved off steadily—other qualities slowly, on former terms. There has been rather more doing in malt, at late currencies. The supply has been reasonably extensive. Good sound oats have sold at full prices; but heated qualities have ruled the turn lower. Beans and peas have commanded very little attention, and the quotations have been with difficulty supported. The sale for both English and foreign flour has slightly improved, and prices may be considered tolerably firm.

In the various local markets, fine wheats have produced rather more money; but the sales for them has been by no means active. Most kinds of spring corn have realised extreme currencies.

The continental markets have been fairly supplied with wheat, barley, &c. Generally speaking, the trade has ruled firm, at full quotations. The exports of breadstuffs from America continue very moderate. Harvest work in the North of Europe has progressed rapidly.

In the North of England, as well as Ireland and Scotland, very little grain now remains in the fields. The wheat crop is considered nearly, or quite, an average.

In Scotland, only limited quantities of wheat have been on offer. The demand, however, has been somewhat inactive. Barley and oats have moved off freely, at full quotations.

The Irish markets have been scantily supplied with wheat. Most descriptions have realised former terms; but the trade has been chiefly confined to small parcels. Barley and all other articles have sold at full prices.

At Mark Lane to-day, the supply of English wheat exhibited for sale was very moderate. The trade was rather quiet, but at full prices. Foreign wheat was in moderate demaad, and the quotations ruled firm. Barley moved off slowly, at late rates. Oats were dull, and inferior qualities were rather cheaper. Beans and peas were dull, at late prices. For flour, there was a moderate demand, on former terms.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has continued excited, the moderate quantities brought forward being disposed of at a further advance of 1s per cwt, with transactions of fair extent by private contract. 2,484 casks West India had sold in three days, including Barbadoes by auction at 32s 6d to 38s 6d per cwt. The supply of most kinds is much reduced, and the importers will not sell freely at present quotations. Low sugars continue in great demand. The total deliveries have exceeded those of last year by 40,250 tons, and the stock shows a decrease of 9,950 tons.

Mauritius.—Only 1,192 bags were offered on Tuesday, which sold steadily, as follows: brown and soft grey, 32s to 34s; crystallised, 39s to 39s 6d. Many parcels have changed hands privately: brown, 29s 6d to 32s 6d; crystallised up to 39s per cwt.

Bengal.—Sales of Gurpatta date have been effected privately at 33s 6d to 36s. 550 bags offered by auction were taken in above the value. A small parcel of white Benares has sold at 38s 6d.

Madras.—Large sales of Jaggery privately. Common at 28s; grainy, 29s to 29s 9d. To arrive, 1,000 tons; grainy at 29s 6d to 29s 9d; common at 28s

Penang.—2,896 bags offered by auction sold as follows: brown, 32s 6d to 33s 6d; grainy, 36s to 36s 6d per cwt.

Foreign.—About 85,000 bags clayed Manilla have changed hands during the week at 33s to 33s 6d: one parcel at 34s. 8,600 bags unclayed at 30s 3d to 30s 6d. 800 tons to arrive at 30s 6d. 2,400 boxes Havana on the spot, at from 37s to 40s. 2,400 casks Cuba at 35s to 36s 6d. 3,500 casks Porto Rico at 36s to 37s 6d. 1,500 bags Siam at 37s. 4,000 bags Paraiba at about 32s. 670 casks Porto Rico by auction partly sold at 34s to 39s 6d. 2,187 boxes Havana were chiefly bought in at 35s to 40s. Two floating cargoes of Cuba have sold, for the United Kingdom, at 25s per cwt.

Refined.—Dry goods and prices have further advanced, the former being quoted 44s to 45s per cwt for low to fair quality.

MOLASSES.—300 puncheons West India have sold at high prices, viz., 15s to 17s 6d. 562 casks Cuba by auction were taken in at 14s, since sold at 13s 6d per cwt.

RUM.—Few sales have been made this week, including some fine Jamaica, at 3s 4d to 3s 9d per gallon. The Government invite tenders for 50,000 gallons on the 9th proximo.

COCOA.—382 bags Trinidad offered by auction partly sold at 63s 6d to 85s; a few lots fine sold up to 100s, being rather cheaper. 226 bags 125 barrels Surinam partly sold at 56s to 80s. A few lots common Grenada have sold at 55s to 56s per cwt.

COFFEE.—A good demand still prevails, the public sales having gone off with an undiminished spirit. Native Ceylon is rather dearer than last week, 49 casks 3,611 bags being sold at 66s to 67s 6d, according to quality and packages. 1,072 casks 660 bags plantation sold at very full prices: pale small berry, 76s to 88s; low middling to good, 78s 6d to 86s; fine up to 90s. 1,370 cases 1,514 bags East India sold at extreme rates, from 77s to 86s 6d; pale, 71s to 72s. 22 casks 49 barrels Jamaica, 63s 6d to 78s. 646 bags Guatemala, 67s to 72s. 1,152 bags sea-damaged Rio, 59s 6d to 60s 6d. 136 bags Costa Rica taken in at 74s. 646 bags Guatemala went at 67s to 72s per cwt. The deliveries for export continue very large, exceeding those of last year by 4,810 tons, and the stock shows an increase of 2,075 tons.

TEA.—The market generally is steady. A vessel has arrived from Canton with new teas, and a fair business is reported in scented kinds, at high prices.

RICE.—The transactions of the week have been limited, including old Rangoon at 10s 6d; Necrancie Arracan at 10s. Quotations remain steady, and the market is very firm. A floating cargo of Necrancie Arracan has sold for the United Kingdom, at 11s 3d per cwt.

IMPORTS AND DELIVERIES of RICE to Sept. 23, with STOCKS on hand.

SAGO.—1,432 boxes chiefly found buyers: good small grain, 20s 6d to 21s 3d; fine, 22s 6d per cwt.

SPICES.—Most descriptions are in good demand, and many sales have been recently made for America. Cassia lignea has further advanced, 90s to 94s being paid for second and first piles. Black pepper is in good demand, and slightly dearer: 550 bags Singapore by auction, sold at 3¼d to 3½d. 2,276 bags Penang West coast, at 3d to 3⅝d. 683 bags Tellicherry, part sold at 4d to 4⅛d. Some small parcels of other kinds bought in. 662 bags Singapore white all sold at 5⅛d to 5¼d. 700 bales Zanzibar cloves at 3⅛d to 3¼d. 16 cases of mace were chiefly taken in. 133 cases brown nutmegs partly sold at 1s 1d to 1s 6d. 21 casks limed were bought in at 9d to 1s 1d per lb. 105 barrels Jamaica ginger realised 63s to 72s. 245 bags Bengal partly sold at 27s. 193 cases Cochin sold steadily at 65s to 75s. Business has been done privately in Bengal ginger under 27s per cwt.

SALTPETRE.—The market is firm, with few parcels offering. 450 bags Bengal have sold at 23s 6d per cwt cash, refracting 4½ to 2½. No further sales are reported for arrival.

Delivered last week, 210 tons.

COCHINEAL.—On Wednesday there were offered 843 bags, of which the chief part sold, and prices were in many cases 1d to 2d dearer. Honduras silver, 3s 3d to 3s 6d; pasty,. &c., 1s 9d to 3s; Teneriffe silver, 3s 4d to 3s 6d; black, 3s 6d to 4s 4d per lb.

OTHER DRYSALTERY GOODS are unaltered, and transactions have been of moderate extent.

SHELLAC.—A better demand has sprung up, and prices are higher. Fine orange 5*l* 15s per cwt.

METALS.—There has been an advance paid upon Straits tin. The sales last effected were at 91s to 92s, chiefly for cash. Scotch pig iron is still in demand. Good mixed brands sold at 58s 9d, but yesterday at rather less, cash, on board at Glasgow. Other metals unaltered in value. Copper is rather firmer. Spelter has sold, for delivery, special brands at 21*l* 10s per ton.

HEMP.—Some contracts have been made in Manilla, chiefly at 35*l* to 37*l* per ton for roping sorts, and the market is now very firm.

JUTE.—A large business has been done for arrival, at rather higher prices, and the public sales on Wednesday, comprising 5,520 bales, went off steadily at 11*l* 5s to 22*l* per ton for ordinary to fine.

LINSEED is firm at the advance of last week. Three cargoes of Black Sea, off the coast, sold at 58s 9d to 59s 6d. A large business in Petersburg, to arrive, at 58s; and Calcutta, afloat, has brought 61s to 61s 6d per quarter.

PETROLEUM scarce on the spot, at 3s 3d, but lower rates accepted for forward delivery.

OIL.—Linseed has declined in value: present quotalion, 37s to 37s 3d. Rape has advanced, owing to the number of speculative contracts uncovered. Olive has been active, with some demand for America. Palm has further advanced: Lagos, 40s to 41s. Higher prices are paying for cocoa-nut: Ceylon, 46s 3d to 47s; Cochin, 49s 6d to 50s 6d per cwt. For sperm, 110*l* has been paid, and 120*l* per tun is now the price named.

TALLOW.—The market is firm, with a good business doing. New Y.C., on the spot, 46s; for the remainder of the year, 45s 9d, and 46s since reported paid; January to March, 47s 9d per cwt.

PARTICULARS OF TALLOW.—Monday, September 25, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is steady to-day at the advance already quoted. 623 casks W.I. have sold, including the parcels by auction. Week's transactions, 3,110 casks. 1,861 bags Mauritius sold upon previous terms. 3,040 bags native Madras part sold at 29s to 33s. Privately, 3,000 bags clayed Manilla have sold at 34s per cwt. 713 bags Natal part sold at 32s to 36s 6d per cwt.

COFFEE.—214 casks 2,100 bags native went steadily at previous rates, with fine as high as 70s te 70s 6d. 224 casks 220 barrels and bags plantation realised previous rates. 344 bags E.I. part sold at 69s to 69s 6d for fine ordinary Malabar. 822 bags Costa Rica went at steady prices.

SALTPETRE.—1,000 bags Bengal, refraction 5½, were taken in at 24s per cwt.

WHITE PEPPER.—315 bags Singapore sold at easier rates, from 5d to 5¼d.

OIL.—680 casks cocoa-nut, by auction, went as follows:—Cochin sold at 49s 6d to 50s 6d; Ceylon, part sold, 46s 3d to 47s 3d. A few lots Sydney at 44s to 45s 6d. 203 casks palm sold at 38s 6d to 41s 6d per cwt.

TALLOW.—Y.C. and town unaltered. 1,400 casks Australian, by auction, sold at 44s 9d to 47s 9d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been firmly supported this week at about 1s advance for most description of goods, and closes firmly. The Dutch market is again higher, and sales of B. H. superfine loaves made at 32s 3d A. S. R. superfine at 32s, and R. S. R. No. 1, crushen, at 30s 6d, in barrels, for forward delivery, f. o. b. Holland.

GREEN FRUIT.—Market well supported, fine weather being in favour of consumption. Lemons of good quality in request; some parcels Naples sold by Keeling and Hunt at public sale, went at an advance of 10s per case. Lisbon grapes meet with a ready sale. Nuts of all descriptions in moderate demand.

DRY FRUIT.—Fine new currants are scarce, and late arrivals are not up to the earlier receipts. A fair business has been done in all descriptions. Valentias unchanged.

ENGLISH WOOL.—Good demand for long wools; in downs very little doing.

FLAX.—Market firm.

HEMP.—Market firm, and higher prices demanded.

SILK.—Fair business doing, prices unchanged; and, indeed, prices for best classic China silk rather firmer than otherwise.

TOBACCO.—We have to report a firm market for all descriptions of American; a quiet business has been done and inquiries still continue, which are likely to result in sales. Substitutes in active demand; holders firm.

LEATHER AND HIDES.—The transactions in leather during the past week have not equalled the recent average. At Leadenhall, on Tuesday, the supply of fresh goods was limited; so that, although the attendance of buyers was small, there was no important increase of the stocks in hand, and former prices were supported. The articles most wanted were strong English butts, and bellies, English and foreign, prime kips, light calf skins, and English horse hides.

METALS.—Rather more business has been doing in metals all the week. Copper has found buyers to a considerable extent, and prices are mostly a shade stronger. Iron keeps steady without any material change. Tin has been in good demand, and Straits has become about 40s a ton dearer. Spelter is unchanged. Tin plates in good demand.

TALLOW.—Official market letter issued this evening:—

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 25.—The total imports of foreign stock into London, last week, amounted to 22,578 head. In the corresponding week in 1864 we received 22,424; in 1863, 17,372; in 1862, 13,477; in 1861, 11,763; in 1860, 8,672; and in 1859, 8,563 head.

There was a very large supply of foreign stock on sale in our market, to-day, of but middling quality. The trade was firm and prices were rather higher than on Monday last. The supply of beasts from Normandy was received in good condition. Fresh up from our own grazing districts the arrivals of beasts were small. From Scotland they amounted to only 10 head; but a tolerably good supply was received from Ireland. The quality of the stock generally was very middling. For the primest breeds there was a somewhat active inquiry at 5s 4d, 5s 6d, and in some instances 5s 8d per 8 lbs: otherwise the beef trade ruled firm, and the quotations were, in most transactions, 2d per 8 lbs higher than on Monday last. The arrivals from Lincolnshire, Leicestershire, and Northamptonshire comprised 1,100 head; from other parts of England 300 of various breeds; from Scotland 10 Scots and crosses; and from Ireland 300 oxen and heifers. The arrivals of sheep from English counties were small; but there was a moderate supply of Scotch and Irish breeds in the pens. The trade was firm, and last Monday's currency was well supported. The general top price was 6s 8d per 8 lbs. In some instances as much as 7s per 8 lbs was realised. Calves were in fair supply and steady request, at fully late rates. The top price was 5s 6d per 8 lbs. The pork trade was firm, and higher prices were obtained.

SUPPLIES.

	Sept. 26, 1864.	Sept. 25, 1865.
Beasts.....	6930	5720
Sheep.....	28790	32140
Calves	386	324
Pigs	590	420

THURSDAY, Sept. 28.—Although the supply of beast in to day's market was only moderate, the demand for all breeds was heavy, at a decline in the quotations compared with Monday of 2d per 8 lbs. The top figure was 5s 4d per 8 lbs. We had a very fair inquiry for sheep, at 2d per 8 lbs less money. The general top price was 6s 6d per 8 lbs. Calves were in good request, at enhanced rates. The quotations ranged at from 4s 6d to 5s per 8lbs. There was a good sale for pigs, on rather higher terms. The general quality of the stock was very middling.

Per 8 lbs to sink the offal.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 29.—There is a steady though not very extensive business doing, and prices show considerable firmness, as spinners and manufacturers continue well employed and are constant buyers, confining their purchases however only to the supply of present wants.

The Gazette.

TUESDAY, Sept. 26.

BANKRUPTCY ANNULLED.

The Railway Monitor.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 16th of September, on 12,252 miles, to 755,184*l*, and for the corresponding week of last year, on 11,915 miles, to 704,642*l*, showing an increase of 337 miles, and of 50,542*l*. The gross receipts on the 14 principal railways amounted in the aggregate, on 8,771 miles, to 628,295*l*, and for the corresponding week of 1864, on 8,474 miles, to 591,245*l*, showing an increase of 297 miles and an increase of 37,050*l*.

Annexed are the traffic returns of some of the American railways for August:—

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Sept. 25.—In the share market to-day there were but few transactions, and, with the exception of a rather general upward tendency in American securities, there was no material variation from Saturday's prices in any of the descriptions. In English railways, Metropolitan recovered ½, Great Northern declined 1, and Metropolitan District remain at 104 to 105. In colonial, Grand Trunk of Canada and Great Indian Peninsula advanced ½ each. In foreign, Buenos Ayres improved ½, and Lomardo-Venetian a further ⅛; and Dutch-Rhenish declined ⅛. In American, Virginia (6 per cent.), Atlantic and Great Western (New York, 1st mortgage) and ditto (Pennsylvania, 1st mortgage) improved 1 each, Illinois Central shares a further 1, Erie shares a further ½, and United States (5-20) a further ¼. In mines, Chiverton improved ¾, and Washoe Gold (of both descriptions), ½ each.

TUESDAY, Sept. 26.—In the share market was inactive to-day and closed with slightly downward tendency in English railways, banks, and miscellaneous shares, but American securities, colonial railways, and British mines were firmer. In English railways, Great Western (Newport) advanced 1, and Metropolitan (new) ¼; South-Western, South-Eastern, and Midland declined ½ each, ditto (9*l* shares) ⅜, and Lancashire and Yorkshire and North-Western ¼ each; and Metropolitan District (paid-up) were steady at 104 to 105. In colonial, Scinde, Delhi (stock) and Buffalo and Lake Huron improved ½ each, Grand Trunk of Canada (1st preference) 1, ditto (deferred) 2, and Great Western of Canada (shares of both descriptions) ¼ each. In foreign, Great Luxembourg improved ⅜, and Northern of Buenos Ayres receded 1. In American, Virginia (6 per cent.) further advanced 2, and United States (5-20), Erie shares, and Illinois Central shares ¾. In British mines, Clifford Amalgamated, East Lovell, and Tin Croft improved ½ each, and Chiverton and Hingston Downs ¼ each, and East Bassett declined 1. In foreign mines, Don Pedro North del Rey improved ⅛.

WEDNESDAY, Sept. 27.—In the share market to-day there were very few transactions, but Canadian and American securities showed a considerable tendency to further improvement, with which exception there was no material alteration of tone. In English railways, Midland further declined ¼ and ditto (9*l* shares) ⅜, and Metropolitan remains at 104 to 105. In colonial, Grand Trunk of Canada stock advanced 2, and all the several kinds of preference stock and bonds an average of 1⅜ each, Atlantic and St Lawrence 2, and Great Western of Canada shares (of both descriptions) further ⅝ each; and Bombay and Central India receded ½. In foreign, Dutch-Rhenish improved ¼, and Sambre and Meuse and Lombardo-Venetain declined ⅛ each. In American, Erie shares and Illinois Central shares further improved 1¼ each, Virginia (6 per cent.) 1, and United States (5-20) ½. In mines, Chiverton and Grenville improved ¼ each.

THURSDAY, Sept. 28.—In the share market to-day but little animation was exhibited, and this being the preparation for the settlement at the end of the month, the majority of the transactions were for the account. English railways closed with a slight tendency towards flatness, and mines and miscellaneous shares were firm. Of the English lines, Great Eastern declined 1, South-Eastern ¾, and Great Western, ½; and Metropolitan District remains at 104 to 105. In colonial, Buffalo and Lake Huron receded ¼; Great Western of Canada shares (of both descriptions) relapsed ½ each, and Grand Trunk of Canada ½; and ditto (1st, 2d, and 3d preference) further advanced ¼ each, and ditto (1st preference deferred) 2. In foreign no alteration occurred. In American, Virginia (6 per cent.) further advanced 2, and United States (5-20's) relapsed ¼. In British mines, New Seton improved 7½, East Grenville, East Wheal Russell, and Great South Tolgus ¼ each, Grenville a further ¼, and Chiverton a further ½. In foreign mines, Frontino Gold and United Mexican improved ¼ each, and Kapunda ⅛, and Port Phillip declined ⅛.

FRIDAY, Sept. 29.—The railway market was dull to-day, and a decline of ¼ per cent. took place in Metropolitan, London and North-Western, South-Eastern, and Great Eastern stocks. Lombardo-Venetian and Bombay and Baroda Railway shares advanced, while Great Western of Canada exhibited reduction.

During the week ending Sept. 27, the imports of the precious metals, were:—Gold, 88,644*l*; silver, 26,102*l*. The exports were:—Gold 167,001*l*; silver, 51,220*l*.

PROPRIETARY SCHOOL,
GRAVESEND.

Head Master, Mr M. GUTTERIDGE, B.A.

The course of study combines the main features of the best middle schools with the distinctive characteristics of our ancient classical schools, and is such as to fit a boy either for business or professional life. It includes the Classics and Mathematics; History, General and Sacred; Geography, Physical and Political; English Grammar and Composition, Spelling and Arithmetic, Drawing and French and the practice of good Handwriting.

Pupils are prepared for the Civil Service Examinations, for the Oxford and Cambridge University Local Examinations, and for Matriculation at the London University.

For terms and prospectuses, apply at the School.

PRICE 6d EACH VOLUME.
Preparing for Publication,
THE YOUNG MAN'S LIBRARY
OF
USEFUL AND ENTERTAINING KNOWLEDGE.

Vol. I., price 6d,
THE ECONOMY OF LIFE:
SELF-HELP TO WISDOM, WEALTH, AND WORTH.

"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilius in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire and from the examples that are brought before the reader, he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

Vol. II., price 6d,
PATIENT BOYS,
AND HOW BY PATIENCE THEY BCEAME GREAT MEN.
PATIENCE IS GENIUS

"The mind and will of man may be said to be almost infinite. It is true he cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSEVERANCE, he MAY NOT KNOW, and nothing which he MAY NOT DO.

"'By INDUSTRY and PATIENT thought,' says Sir Isaac Newton, 'the first dawning opens gradually—by little and little—into a full clear light. If I have done anything, it is due to nothing but INDUSTRY and PATIENT thought.'

"Buffon is not far wrong in his assertion 'that the genius of great men consists mainly in their patience.'"—PATIENT BOYS.

Vol. III., Price 6d, preparing in the Press.
LIGHTS AND SHADES OF EVERY DAY LIFE.

"Pope asserts that 'the proper study of mankind is man.' If mankind is the proper study of man, life-drawn histories of men in their social relations cannot be considered prejudicial to youth or age. The crude notions of youth have ripened into wisdom, while the forward heart has been tuned to gentleness and affection by the natural painting of a Shakspeare or a Scott; a Goldsmith or a Burns."—STREAMLET THOUGHTS.

London: Tweedie, 337 Strand.

Just published, 1s. Illustrated, Second Edition.
THE HEAD AND HEART LEGACY.

"Po assessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £30 in thy pocket, and say to thee, Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

Any one acquainted with the current literature of the metropolis, or its littérateurs, will have no difficulty in identifying the author of this interesting volume. The pages abound with sensible observations, attention to which will be found absolutely necessary to gain even a moderate share of success in this busy world of ours."

London: Tweedie, 337 Strand.

PRACTICAL OBSERVATIONS
on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE. F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practioner.'—MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

WILLIAM ROBERT WALKINGTON, Esquire, deceased.—Notice is hereby given, pursuant to the Act of Parliament 22nd and 23rd Victoria, cap. 35, intituled "An Act to further amend the Law of Property and to relieve Trustees," for all Creditors and others having any claims or demands against the Estate of William Robert Walkington, late of the Stock Exchange, in the City of London (who died at No. 4 Upper Hill street, Richmond, in the county of Surrey, on the fourteenth of August, one thousand eight hundred and sixty-five, and whose will was proved in the principal Registry of Her Majesty's Court of Probate on the 5th of September one thousand eight hundred and sixty-five, by Emma Georgina Page, of No. 22 Panton street, Haymarket, in the county of Middlesex, widow, the sole executrix therein named), to send in to the said executrix, at the office of Messrs Garrard and James, No. 13 Suffolk street, Pall Mall East, London, S.W., full particulars of such claims or demands by or before the thirty-first of October, one thousand eight hundred and sixty-five, as after that day the said executrix will proceed to distribute the assets of the said testator amongst the parties entitled thereto, having regard only to the claims (if any) of which she shall then have notice, and will not be liable for the assets so distributed, or for any part thereof, to any persons of whose claim she shall not then have had notice.

Dated this 9th day of September, 1865.
GARRARD and JAMES,
13 Suffolk street, Pall Mall East, S.W.,
Solicitors to the Executrix.

DUBLIN	At Crampton quay.
CORK	At Cook street.
EDINBURGH	At 47 North bridge. At 11 Union street lane.
GLASGOW	At St Vincent street.
PARIS	At 279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Casks and Bottles, and on Draught, genuine, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

MICHAELMAS RENEWALS.

NORTH BRITISH AND MERCANTILE INSURANCE COMPANY.

Incorporated by Royal Charter and Acts of Parliament

FIRE DEPARTMENT.

Policies should be renewed within fifteen days from the 29th instant. Receipts may be had of the various agencies and branches, and at the head office.

London, 61 Threadneedle street, E.C., September, 1865.

IMPERIAL FIRE INSURANCE COMPANY, No. 1, Old Broad street, and Nos. 16 and 17, Pall Mall, London. Established 1803. Subscribed and invested capital and reserve fund, £1,900,000.

Insurances due at Michaelmas should be renewed within fifteen days therefrom (last day October 14), or the same will become void.

All Policies are now chargeable at the reduced rate of duty, viz., 1s 6d per cent.

ANDREW BADEN, Superintendent.

MICHAELMAS FIRE RENEWALS.

GENERAL ASSURANCE COMPANY. Established 1837. Capital One Million. 62 King William street, London, E.C.—The Michaelmas Fire Renewal RECEIPTS are NOW READY, and may be had at the Head Office, or of any of the Agents of the Company.

Fire Duty, 1s 6d per cent.
No charge for Policies.
Transfers from other Companies at the same terms, and without expense.
Settlements prompt and liberal.

THOMAS PRICE, Secretary.

ACCIDENTS TO LIFE OR LIMB, in the FIELD, the STREET, or at HOME, provided for by a Policy of the RAILWAY PASSENGERS' ASSURANCE COMPANY, 64 Cornhill, London, E.C.

Compensation has been paid for 10,000 Claims.

£1,000 in case of Death, or £6 per Week while laid up by Injury, secured by an annual payment of £3 to £5 5s.

For particulars apply to the Clerks at the Railway Stations, to the Local Agents, or at the Offices, 64 Cornhill, and 10 Regent street.

WILLIAM J. VIAN, Secretary.

NORWICH UNION FIRE OFFICE.

The full benefit of the reduction of duty to 1s 6d per cent. is given to insurers effecting policies with this Company.

By this reduction and the BONUS SYSTEM of the NORWICH UNION, the cost of insurance will be reduced to a minimum amount.

EXAMPLES of PREMIUMS REDUCED BY BONUS.

No. of Policy.	Sum Insured.	Annual Premium.	Reduced Premium now payable.
	£	£ s d	£ s d
441,411 ...	92,540 ...	222 4 4 ...	120 19 2
450,156 ...	12,000 ...	63 0 0 ...	35 0 0
484,173 ...	6,800 ...	35 14 0 ...	19 16 8
506,975 ...	5,000 ...	7 10 0 ...	4 6 4

The rates of premium are in no case higher than those charged by the other principal offices giving no bonus to their insurers.

The duty paid to Government for the year 1863 was £84,152 11s 9d; the amount insured on farming stock was £10,202,272.

For prospectuses apply to the Society's offices, 29 Fleet street, E.C.; and Surrey street, Norwich.

THE LONDON ASSURANCE (Incorporated by Royal Charter A.D. 1720), For FIRE, LIFE, and MARINE ASSURANCES.

West-end Office—No. 7 Pall Mall, S.W.

Bonamy Dobree, Esq., Governor.
Patrick F. Robertson, Esq. Sub-Governor.
Richard Baggallay, Esq., Deputy-Governor.

DIRECTORS.

Nathaniel Alexander, Esq.	Edwin Gower, Esq.
John A. Arbuthnot, Esq.	A. C. Guthrie, Esq
Henry Bonham Bax, Esq.	John A. Hankey, Esq.
James Blyth, Esq.	Louis Huth, Esq.
Edward Budd, Esq.	Charles Lyall, Esq.
Mark Wilks Collet, Esq.	John Ord, Esq.
Sir Fredk. Currie, Bart.	Capt. R. W. Pelly, R.N.
Frederick G. Dalgety, Esq.	David Powell, Esq.
John Entwisle, Esq.	William Rennie, Esq.
Geo. L. Monck Gibbs, Esq.	Lestock P. Wilson, Esq.
Robert Gillespie, Esq.	William B. Watson, Esq.
Harry George Gordon, Esq.	

FIRE DEPARTMENT.

Special Notice.—The Directors are now prepared to issue policies insuring every description of Property at the reduced duty of 1s 6d per cent. per annum. Insurances now due will have full benefit of the reduction.

Notice is also hereby given to persons assured against Fire that the Renewal Receipts for insurances due at Michaelmas are ready to be delivered, and that such insurances as shall remain unpaid after Fifteen Days from the said Quarter day will become void.

Fire Insurances effected at moderate rates upon every description of property.

Damage caused by explosion of gas made good.

Commission allowed to brokers and agents effecting foreign and ship insurances against Fire.

LIFE DEPARTMENT.

This Corporation has granted Assurances on Lives for a period exceeding One Hundred and Forty Years, having issued its First Policy on the 7th June, 1721.

Two-thirds of the entire profits, without any deduction for expenses of management, are allotted to the assured. This arrangement will be found to be more advantageous to the policy holders, than an apparently larger proportion of the profits, subject to the expenses of management.

MARINE DEPARTMENT.

Marine Insurances are effected at the head office of the Corporation. JOHN LAURENCE, Secretary.

FIVE PER CENT. GENERAL DEBT of the OTTOMAN EMPIRE.

CONVERSION of the INTERNAL DEBTS.

The General Credit and Finance Company of London receive CONSOLIDES, &c., daily (except Saturdays) for examination and verification, ultimately to be exchanged for Bonds of the General Debt. The following are the rates of exchange:—

100 L.T. Consolides=£110 sterling General Debt.
100 L. Tahvilati Mumtaze=£130 sterling General Debt.
11,000 Piastres Serghis=£100 sterling General Debt.

At these rates the Conversion will remain open till 14th November, after which Bonds will be convertible only for six weeks and at a reduction of 10 per cent.

Full details at the offices.

For the General Credit and Finance Company of London, 37 Austinfriars, Agents for the Contractors,
JAMES MACDONALD, General Manager.

IMPERIAL TURKISH SIX PER CENT. LOAN of 1854.

Notice is hereby given, that the Half-Yearly Dividend, due on the 10th October next, on the outstanding Bonds of the issue of £3,000,000 of the above Loan, negotiated by the late Baron J. L. de Goldsmid and J. Horsley Palmer, will be Paid at the offices of Messrs Dent, Palmer, and Co., the agents of the Loan, No. 11 King's Arms yard, London, E.C., or Messrs Bischoffsheim, Goldschmidt, and Co., 15 Rue de la Chaussée d'Antin, Paris, on that day, or any subsequent day (except Saturday), between the hours of eleven and three.

The coupons, with a list in numerical order, must be left for examination two clear days previously. Coupons are not received on Saturdays. Printed forms of the lists may be had on application.

The income tax of 4d in the pound will be deducted from all coupons, with the exception of those accompanied by the new forms for exemption required by the Board of Inland Revenue.

Notice is also given, that the bonds drawn in July last, for redemption on 10th October next, as advertised by the Turkish Ambassador, amounting to £50,700, will be paid off at par on that day, or any subsequent day (except Saturday), between the hours of eleven and three, on presentation to Messrs Dent, Palmer, and Co., London, or Messrs Bischoffsheim and Co., Paris, as above. Bonds must be left for examination the previous day.

London, Sept. 25, 1865.

VENEZUELA SIX PER CENT. LOAN, 1864.

The half-yearly interest on the Bonds of this Loan, negotiated by the General Credit and Finance Company of London (Limited), falling due on 1st October, 1865, will be paid on the 30th September, and any succeeding day (except Saturday), between the hours of 11 and 2 o'clock, at the temporary offices of the said Company, 27 Austinfriars.

The coupons, with lists arranged in numerical order, must be left three clear days for examination.

Forms to be obtained at the offices on and after Friday the 22nd current. R. J. BUTLER, Secretary.
Sept. 16, 1865.

WOTHERSPOON and CO., Glasgow and London.

IMPORTANT ANNOUNCEMENT.—

JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

Temporary Offices—21 Great St Helens.

This Company is formed for the purchase of certain valuable and well-known estates situate in the Cachar Districts, consisting of 44,000 acres more or less.

These estates, with their plantations, are all in the best part of the tea district, and are admirably situated with respect to land and water carriage, and also with respect to local labour. The cultivated portions, about 3,700 acres, consist of the Appin and Lalla, Dilkoosha, Dickseea, Laasingah, Luckeeopore, Putteemara, Sylhet, Kistiepore, and other gardens.

The estates, with the exception of a small portion which is freehold, are held direct from Government for 99 years, under the old rules of land tenure, convertible at any time at a small cost into freehold.

From reports of Messrs Sandeman, Davis, and Stuart it appears there are 3,450 acres under plant of the following growth, namely:—

321	acres of 5 years'	growth and upwards,
310	—	4 years' growth.
1218	—	3 —
991	—	2 —
610	—	1 —

And in nurseries upwards of 2,000,000 seedlings, sufficient to plant from 500 to 600 acres.

The statement of the age of the plants, and of the area under cultivation, is believed to be substantially correct, but to guard against any error it is agreed that compensation shall be made by the vendor for any deficiency that may exist in the statement of the age of the plants or the area under cultivation; the Company, on the other hand, paying an equivalent for any excess.

The vendor has entered into a contract for the sale to this Company, in consideration of the sum of £300,000, of the whole of these estates, together with all buildings, implements, stock-in-trade, and unexpired contracts for labour.

The purchase money has been arranged to be paid to the vendor as follows:—£25,000 on allotment, £45,000 on approval of title, £80 000 on the completion of the purchase by acceptances maturing in June next. The residue in debenture bonds for £150,000, £50,000 due in three years, £50,000 in five years, and £50,000 in seven years.

The vendor has agreed to make over to the Company the whole of the crops for the current season, free of cost, and guarantees to the shareholders a dividend of 15 per cent. on the paid-up capital to the 31st December of this year, and further guarantees a sum of £16,000 as the minimum value of the season's crops.

The Directors estimate that, from a fair average yield of tea from these estates, the future dividends of the Company will not fall below 15 per cent. per annum.

The rapid extension of the railroad from Calcutta to the eastern parts of Bengal will greatly facilitate the transport of material and of coolies to and from the tea districts of Cachar; and with reference to the labour question generally, it must be borne in mind that an Act of the Bengal Government has been passed regulating the contract between planter and coolie, which is expected to remove many of the difficulties heretofore connected with this important question.

The vendor agrees to subscribe to the capital of the Company to the extent of £50,000.

Applications for shares must be accompanied by a deposit of 10s per share. In the event of no allotment being made, the deposit will be returned in full. Should a less number of shares be allotted than are applied for, the deposit will, so far as is required, be applied towards the payment due on allotment.

The contract for the purchase of the estates and the articles of association may be inspected at the offices of the Company.

Prospectuses and forms of application for shares may be had of the bankers, brokers, solicitors, or at the offices of the Company.

THE CACHAR COMPANY
(Limited).

Notice is hereby given, that the LIST of APPLICATIONS for SHARES in this Company WILL CLOSE for London on MONDAY NEXT, the 2nd October, and for the country on TUESDAY NEXT, the 3rd October proximo.—By order of the Board.

W. W. BAINBRIDGE, Secretary.

Temporary Offices—34 Coleman street.

PROSPECTUS.

This Company is established to facilitate the investment of English capital in Australia, and to assist generally in developing its resources.

Its business will consist chiefly in making advances to the pastoral tenants of the crown lands and others, and by taking security on their stations, stock, freehold land, and wool, in accordance with the mortgage and lien acts of the colonial legislatures; in acting as agents for the sale of wool or other produce in Australia, or for its shipment to England; in effecting the sale of stations and stock; and in conducting a financial and general agency business.

The Company, therefore, will advance capital only when fully secured, and do not intend to enter into any transactions involving a risk on their own account.

Operations will be commenced by taking over the business of Messrs J. H. Clough and Co., of Melbourne, which has been established upwards of ten years, and which shows an average profit per annum for the last six years as follows:—

From June, 1858, to June, 1864, six years.

Commissions earned.	Trade Expenses paid.	Profit.
£232,674 13 6	... £32,943 18 8	... £199,730 14 10

Average profit, £33,288 9 1 per annum.

These profits have been realised principally by commissions on advances and sales of wool stock and stations.

The extensive connection with the producers thus acquired will form the basis of the Company's operations: the returns of the business show, as above, an average profit during the last six years of upwards of £30,000 per annum, and the facilities for the extension of the business, to be afforded by the introduction of augmented capital and credit, will enable the Company to realise proportionately increased profits.

The purchase of the goodwill of the business has been effected on very advantageous terms, the amount to be paid being less than two years' profits, the whole of which will be received by the vendors in shares, subject to proportionate reduction should a net profit of £30,000 per annum on a three years' average not be realised, as stated in the terms of purchase, copy of which, and also of the articles of association, can be seen at the offices of the solicitors.

One-half of the amount of the above purchase-money will be paid to the vendors by six thousand shares (with £5 per share paid up) out of the present issue, and the remaining half in debentures of the Company, to be converted into shares of the next issue, such debentures or converted shares to be held by the Board for the purpose of guaranteeing a dividend of 10 per cent. per annum for three years; and the vendors have also agreed to place their services at the disposal of the Company for the same period to co-operate with the manager, who will be appointed by and act under the direction of the Board in London.

The premises in which the business is at present carried on have been purchased by the Company, subject to a valuation; they are situated in the principal street in the city of Melbourne, in immediate proximity to the terminus of the Government Victorian Railways, and for proportions, style, and convenience, surpass any buildings for similar purposes in the Austral an colonies. They were erected at a cost of about £30,000 by the present proprietors, and were especially designed for the wool trade, with stowage room for from 15,000 to 20,000 bales, having hydraulic presses, lifts, and all other necessary appliances.

The business thus secured and connection obtained will enable the Company at once to assume a position and obtain results which would otherwise take years to effect.

It is proposed to take powers to borrow money on bonds or debentures; the difference between the English rate of borrowing and the high colonial rates for lending on mortgage will form an additional source of revenue to the Company; and powers are also proposed to be taken to increase, if required, the capital of the Company.

The prospects of the Company are identified with the progress of the Australian colonies, which, without doubt, present the most valuable field for investment of British capital now known. The progressive increase in the quantity of wool exported from Victoria alone is seen in the following statement, viz.:—

		lbs.
1861-2	It amounted to.....	16,274,699
1862-3	—	20,136,836
1863-4	—	26,413,862

and that large securities exist on which the capital of the Company can be profitably employed is shown by the fact that although the value of the live stock property of the squatters of Victoria alone, estimated from Government returns in 1862, was £10,000,000 sterling, yet the registered amount advanced to them on such securities in the same year was under £2,000,000.

Under the articles of association, the qualification for each director is fixed at £4,000 at the least, to be held by him in his own right in the shares of this Company.

The success of the vendors, their confidence in the prosperity of the Company—evidenced by their willingness to accept the purchase-money of the goodwill of their business in shares, and by giving the material guarantee above named—and the wide scope for the profitable employment of capital, justify the Directors in recommending this undertaking as an investment of the most satisfactory kind, especially as the liability, risk, delay, and competition which the establishment of a new business involves will be avoided, while the operations will be increased by a Company, the capital and credit of which will form a guarantee for all additional business entrusted to it.

In the formation of this Company, no promotion fees will be paid.

Prospectuses and forms of application for shares may be had of the bankers, brokers, solicitors, or at the offices of the Company.

Applications for shares must be accompanied by a deposit of £1 per share; in the event of no allotment the money will be returned in full: if a less number is allotted than is applied for, the surplus amount paid on application will be applied towards the payment of the £1 due on allotment, and the balance, if any, returned.

APPLICATION FOR SHARES.

To the Directors of the London and Australian Agency Company (Limited).

Gentlemen.—Having paid to your bankers the sum of £ , being a deposit of £1 per share on shares in the above Company, I request that you will allot me that number, and I agree to accept such shares, or any less number you may allot to me, and I further agree to pay the sum of £1 per share on allotment, and also to sign the articles of association when required, and I hereby authorise you to insert my name on the register of shareholders for the number of shares so allotted.

NEW OPERA AND FIELD GLASS

and the Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." Earl of Bredalbane—"I find it all you say, and wonderfully powerful for so very small a glass." Earl of Caithness—"It is a beautiful glass." "Rev. Lord Scarsdale approves of it." Lord Gifford—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sandey, Royal Small Arms Factory, Enfield, "found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

SECRETARY—T. C. Simmons, Esq.

Temporary Offices—10 Cullum street, E.C.

This Company is formed with a view of purchasing from the proprietor the Dunraven, New Brithdir, and Blaenclydach Collieries, in the county of Glamorgan, for the purpose of developing and further improving the property; and full powers have been taken for efficiently carrying out the same.

These properties are sold entirely in consequence of the vendor's capital being insufficient effectually to work so large a concern.

The Dunraven Colliery consists of the Dunraven and Henarewen estates of about 1,000 acres of the celebrated Aberdare smokeless steam coal; the seams known in the Aberdare valley have been all proved to exist in this taking. The Rhondda branch of the Taff Vale Railway runs into the estate, which is distant 24½ miles from the port of Cardiff.

The coal is equal in quality and hardness to the best steam coal shipped at Cardiff. The yield from this portion of the colliery is now about 120 tons a day, but on completion of the pit now sinking, and which has already struck the coal, will, in the course of the year, be doubled.

The Graig and Abergorki seams are worked by level. These form the best known coal for locomotive purposes, and the output is 100 tons a day, and capable of great extension.

This property is held under two leases, of which 50 years are unexpired, and the term may be renewed for 40 years of a portion of the property containing about 400 acres, on payment of a fine of £100. The royalties are much lower than usual, ranging from 5d to 9d per per ton of 2,520 lbs. The property contains the whole of those valuable beds of fireclay and ironstone, now worked so extensively for the ironworks in Merthyr and Aberdare, and also extensive quarries of building stone.

Being the key as regards position to a large tract of minerals, the taking may be at any time largely increased on advantageous terms, but even from the present area, at least 1,000 tons of coal a day may be raised, and with an additional pit a larger quantity.

The Blaenclydach Colliery consists of 460 acres, held at favourable royalties under agreements for leases of which 56 years are unexpired. It is situate on the Rhondda Branch of the Taff Vale Railway, and about 18 miles from Cardiff. The seam is the well known No. 3 Rhondda or "Coffin's Seam," and is, without exception, the best bituminous coal in the district, and for cooking and manufacturing purposes is unrivalled. The present yield is 120 tons a day, and may be increased.

The New Brithdir Collieries consist of 300 acres of unworked coal. The whole is opened out, and is worked by level, and yields 300 tons a day.

This taking includes 500 acres of enclosed land, with very extensive right of common, held for a term of which 17 years are unexpired at a rent of £252 per annum. The purchase includes a lot of 1,000 sheep, horses, and other stock.

The mining lease is for a term of which 30 years are unexpired: the royalties are moderate.

There are 74 coking ovens of the newest and best construction upon the property, which are in constant work. The coke is in high repute for iron-making and shipment.

The property is situate on the Rhymney Railway, and has also a communication with the Bargoed branch of the Brecon and Merthyr Railway, by which means the communication is complete with South Staffordshire and with the ports of Newport, Cardiff, and Swansea, and the midland counties of Wales.

The proprietor has 310 waggons on redeemable agreements, spreading the payments over seven years. The majority of the waggons have been held for nearly three years. These agreements (which are of considerable value) are included in the proposed purchase.

Any contracts which may be existing, together with the trade connection of these collieries of the proprietor, who has been 20 years in the trade, are included in the purchase.

The proprietor has guaranteed to the satisfaction of the Directors that for the first five years after the formation of the Company 10 per cent. per annum shall be paid upon all the paid-up capital (taking the average of profits over such period). He will also continue to manage the whole business of the Company, at a salary fixed by the Directors.

There is sufficient plant at each of the collieries efficiently to work a much larger quantity of coal than has been named.

The purchase money for the whole of the above-named properties is £130,000, and the same is to be paid by instalments spreading over two years. The proprietor will take shares to the extent of £50,000.

The price to be paid is based upon valuations made by several well-known and experienced colliery engineers, all of which have been thoroughly verified. The originals may be seen at the offices of the Company.

The proprietor includes in the purchase the lease of offices in Bute cresent, Cardiff, together with the office fixtures and furniture.

Prospectuses and forms of application for shares may be obtained of the bankers, at any of their branches, brokers, solicitors; of James Wright, Esq., C.E., 12 Copthall court, London; of Messrs Smith and Pickering, solicitors, Merthyr Tydfil. and at the temporary office of the Company, 10 Cullum street, E.C.

GALE'S PROTECTED GUNPOWDER COMPANY (Limited).

Incorporated under the "Companies Act, 1862," with Limited Liability.

Capital £200,000, in 8,000 Shares of £25 each.

Deposit £1 per Share and £2 on Allotment.

Calls not to exceed £3 per share, and at intervals of not less than three months.

1,000 shares fully paid up will be reserved for the Inventor.

It is contemplated that not more than £10 per share will be required for a considerable period of time.

SECRETARY (pro tem.), Mr David Ker.

Temporary Offices, 132 Gresham House, Old Broad street.

This Company is formed for the purchase and use in the United Kingdom of Mr Gale's valuable invention for rendering gunpowder non-explosive at pleasure, and for protecting gunpowder from damp, an invention admitted to be of national importance.

The objects of the Company will be as follows:—

1. To manufacture and sell the protecting material ready for use.

2. To grant royalties and licences to gunpowder manufacturers and others for the use of the invention.

3. To purchase or manufacture gunpowder and supply it to the public in a protected state.

4. To enter into contracts for the storage and transit of gunpowder to any part of the kingdom or elsewhere; and the application of the invention to all the other purposes of which it is capable.

The inventor has obtained certificates of protection under the Patent Laws, and has agreed to sell—free from all incumbrances, and free from the expenses attending the formation of the Company, such as printing, advertising, brokerage, law expenses, &c.—the whole of his interest in the invention so protected, so far as the same applies to the United Kingdom, for the sum of £50,000, to be paid £25,000 in cash and the remainder in fully paid-up shares of the Company. The shareholders will thus be relieved of all the preliminary expenses connected with the formation of the Company prior to the allotment of shares.

Mr Gale has consented to act as Consulting Manager for three years.

The following extract from the TIMES newspaper of the 3rd of August last will show that the invention has been thoroughly tested by repeated experiments before the Government authorities and others:—

"EXPERIMENTS AT WESTMINSTER.—These interesting experiments—having for their object to show how gunpowder can be rendered non-explosive, and yet have its explosive properties restored at pleasure—were repeated yesterday at Westminster, in presence of a distinguished company. They have already been performed at Devonport, in presence of Lord Templetown, Admiral Freemantle, and a number of other military and naval officers of distinction assembled for the purpose; at Mount Edgecumbe, in presence of their Royal Highnesses the Prince and Princess of Wales; at Wimbledon, on the grounds of the National Rifle Association, before the Secretary for War; and afterwards, by the noble lord's desire, in the presence of the Ordnance Select Committee at Woolwich; at the French Embassy; and on Tuesday last, in presence of His Royal Highness the Commander-in-Chief, the Quartermaster-General, the Adjutant-General, and other heads of the military profession."

The following extract from a recent report of G. P. Bidder, Esq., the eminent civil engineer, shows in concise terms the importance and commercial and practical value of Mr Gale's process:—

"In short, I may sum up the results by stating that gunpowder may now be conveyed, stored, and used by means of this process with absolute safety to the public.

"On the whole, therefore, I am clearly and decidedly of opinion that for all commercial purposes Mr Gale's process may be introduced with the certainty in almost every case of securing an absolute economy to the consumer, while at the same time securing the public from the recurrence of those distressing accidents to which the use of unprotected gunpowder is necessarily exposed.

"No one resident in a town of any size can be certain that he is not within the influence of an explosion of from one to two cwt of gunpowder. Our police reports indicate the reality of the source of danger; but if it is rendered illegal for any person whatever to have in his possession any quantity of gunpowder, except as a compound, the cause of apprehension would cease."

The above extracts demonstrate that Mr Gale's invention affords an absolute protection against explosion.

As an illustration of the risks inseparable from gunpowder in a non-protected state, it may be mentioned, that during the last twelve years upwards of fifteen serious explosions have been recorded in the public journals, by which more than 600 persons have been killed, and many thousand persons wounded, and property to the extent of more than two millions has been destroyed. And the "United Service Magazine" observes: "In all probability numbers of missing vessel have totally disappeared in the midst of the ocean in consequence of having gunpowder as part cargo."

The Directors will at once commence operations with the supply of blasting, rifle, sporting, and other kinds of gunpowder in a protected state.

As a large portion of the gunpowder manufactured in England is shipped in an irregular manner and without appearing in the ship's manifest, it is impossible to estimate the total amount of the manufacture. It is however certain that if only a fourth of the gunpowder made is protected by Mr Gale's process, and a very small Royalty paid upon it, a large revenue will be derived from this source alone.

The danger and difficulty which at present attend the transport and sale of gunpowder so enhance its price as to leave room for a large margin of profit on the sale of the protected gunpowder, and some of the leading railway companies and shippers have already expressed their willingness to arrange for the carriage of the protected article at greatly reduced freights.

In addition to the revenue to be derived from the sale of the protected gunpowder, and from royalties and licences, it is believed that a considerable amount will be received from the other sources named above, such as the sale of the protecting material and the contracts for the storage and transport of gunpowder.

The materials used in the manufacture of the protecting powder are of an inexpensive character, whilst the working of the invention is simple, and can involve no elaborate or costly machinery. It is, therefore, believed that but a small proportion of the capital will be required to be called up.

The articles of association are open for inspection at the offices of the Company, and also at the Solicitor's office, 30 Great George street, Westminster.

In the event of no allotment being made, the deposits will be returned in full.

Applications for shares, accompanied by a remittance for the deposit, may be made to the Bankers and Brokers on the accompanying form.

SPECIAL NOTICE.

SECRETARY (pro tem.)—Richard Learmonth, Esq.

TEMPORARY OFFICES—No. 28 Bucklersbury.

National and commercial interests require that the Imperial Government and the merchants of Great Britain should be placed in direct and independent Telegraphic communication with the Western hemisphere.

Experience proves that the scientific and commercial success of an Ocean Telegraph must depend on two considerations—first, the nature and construction of the cable; and, secondly, the expense attendant on its working.

This Company has secured the exclusive right to use the well-known cable and system of deep sea telegraph perfected and patented by Mr Allan, between Great Britain and America, which effects a saving of about 33 per cent. on first cost, with about 50 per cent. extra working powers as compared with others.

The cable, from its peculiar principle of construction, smallness of bulk and weight, renders the carrying and submerging it a simple mechanical operation, comparatively without risk of injury to its electrical integrity for ocean depths and distance.

The object of this Company is to establish telegraphic communication between London and New York, the two great termini or centres of telegraphic communication in the Old and New World, by submarine line or lines from Falmouth to Halifax, Nova Scotia, the inlet to all the telegraphic lines already in operation on the American continent, thus organising a telegraphic communication between Great Britain, the Canadas, British Columbia, and America generally.

Although the Directors are satisfied that, with the system of cable adopted, the direct line from Falmouth to Halifax could be safely and satisfactorily laid, it is proposed, as a measure of prudence, to carry out the extension of Transatlantic telegraphic communication, in the first instance, by a less direct route, and to construct firstly the section from England to Oporto, the length of cable for which distance will be only about 600 miles, and would be highly remunerative in itself; it will also fully demonstrate the practicability of safely submerging and working this form of cable in ocean depths.

The length of cable from Oporto to Flores, one of the Azores, would be about 900 miles, and from thence to Halifax about 1,400. Thus, this route has the great advantage of its longest unbroken distance being only 1,400 miles.

As it is perfectly certain that one line will not suffice for the expected traffic, the next may be carried direct from Falmouth to Halifax.

About 600,000*l* will be required to complete the communication to Halifax, including incidental expenses, and the following is an estimate of what may calculated upon as a return for that outlay:—

	£
Estimating the cost of a message at 80s, and the transmission at the low rate of 15 messages (not exceeding 20 words) per hour, and assuming 20 hours as the working day, the aggregate receipts for the year would amount to	438,000
Deduct the cost of management, &c	58,000
Would leave a net profit of	380,000
Deduct 20 per cent. on capital to be placed to reserve fund...	120,000
Will leave	260,000

Equal to a dividend of 43 per cent. on the estimated construction capital.

The two unsuccessful attempts of the Atlantic Telegraph Company place them in the following comparative financial position with this Company:—

First cable totally lost	Capital	£500,000	
Second cable	£700,000		
Bonus if laid with success	137,000		
		837,000	
New cable proposed to be laid	500,000		
Bonus if laid with success	100,000		
		600,000	
			£1,937,000
Allan's cable estimated cost to America			600,000

Should the Atlantic Company be unsuccessful in recovering the second cable, and succeed in laying a third, they would have to pay dividends upon upwards of three times the capital of this Company; or one cable must pay dividends on the cost of three, to say nothing of the difference in expense of working.

It must necessarily follow that this Company, being able to adopt a much lower tariff than the Atlantic Company, would always command preferential and full employment.

The payments for the licence are £10,000 out of the capital for the first section, and 5 per cent. in fully paid-up shares on the future capital as raised, together with a royalty of 10 per cent. on the net profits. Said royalty not to take effect until the net profits exceed 10 per cent.

A provisional contract has been made for the construction and submerging the first section of cable, from Falmouth to Oporto, including all expenses in forming the Company, up to the allotment of shares. for the sum of £130,000, and the contractors stipulate that they shall receive 1,500 fully paid-up shares in part of same.

Prospectuses and forms of application for shares, with statement of Allan's System of Ocean Telegraphy, can be had at the offices of the Company, or at the Brokers, where the articles of association and specimens of the cable may be inspected.

Especial care has been taken that the articles of association agree with the prospectus in every particular.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE BANK OF ENGLAND AND THE RISE IN THE RATE OF DISCOUNT.

THE Bank return of the 4th inst. is one of the most remarkable of recent years. On the liability side of the account it shows in one week an increase of 1,300,000*l* in the circulation of notes with the public; on the asset side it shows an increase of 1,600,000*l* in the other securities, and a decrease of 2,000,000*l* in the reserve of the banking department, and a decrease of 800,000*l* in the total bullion.

The changes of the Bank minimum since July last have been:—On 3rd August a rise from 3½ to 4 per cent.; on 28th Sept. a rise of 4 to 4½ per cent.; on 20th a rise from 4½ to 5 per cent.; and on the 5th inst. a further rise from 5 to 6 per cent.

Prior to each of these changes the market rate has been fully up to the Bank terms; since the last rise to 6 per cent. the demand at the discount office has remained active; and the rate out of doors has been fully up to, and in many cases beyond, the minimum.

The following figures will bring into convenient comparison the weekly returns for September, 1865 and 1864:—

In 1864, the rate was raised from 8 to 9 per cent. on the 8th September, and remained at that figure till the 10th November (1864), when it was reduced to 8 per cent.

The special feature in the figures of 1865 is the suddenness of the increase in the private securities. On the 27th September they had risen 1,200,000*l*—on the 4th October 1,600,000*l* more—or 2,800,000*l* in a fortnight. In like manner, the circulation rose 1,500,000*l* in the same fortnight, —transferring, of course, under the present law, so much treasure from the banking to the issue reserve. The banking reserve fell in the fortnight from 7,550,00*l* to 5,100,000*l*,—or say, very nearly one-third. In 1864, the banking reserve was 6,300,000*l*, and the rate of discount was 9 per cent. It is perfectly clear, therefore, that the last three elevations of the Bank rate have been quite unavoidable, The directors had no choice but to raise the rate swiftly and largely.

The chief causes of this sudden change from the quietude of the first half at least of September to the high rates of the present time, is to be found in the remarkable revolution which has occurred in the Liverpool and Manchester markets during the last ten days. It has been discovered that the future supplies of cotton will be less than had been supposed, and that the stocks of manufactured goods on hand and speedily available will be inadequate to meet the demand. The effect of the adoption of these views has been a sudden start of 6d per lb in raw cotton, of 8d per lb in yarn, and of say 3s per piece on cotton goods. Orders for cotton have been despatched to all parts of the world, and there is again a vigorous demand for silver for the East. The phenomenon is one, therefore, of a sudden demand for capital to be employed in fostering the importation of commodities wanted speedily and in large quantities. This demand for capital happens, as in many former years, to coincide in time with the expansion which always occurs in the autumn in the note circulation; and hence it arises that the policy of the Act of 1844 subjects the Bank on this as on former occasions to a double strain at the same moment. The note circulation will gradually fall during the next five or six weeks—and *pro tanto* will strengthen the banking reserve.

It is quite possible that the immediate pressure for capital may be so urgent as to to compel the Bank to advance the rate still further. The present banking reserve is so small that the directors cannot afford to speculate on favourable chances —they must deal promptly with actual facts. The trade of the country is sound, and we believe remarkably profitable in most branches. But this very activity will tend to the pro-

Digitized by Google

longation of a rate of interest comparatively high. We said so long ago as July last, that even then the probabilities pointed to rising rates, and this anticipation has been verified. There is at present no occasion for alarm, but the public must not be surprised to see a few more sharp turns of the Bank screw.

THE IDEA AT THE BOTTOM OF THE IRISH CONSPIRACY.

WHATEVER the feeling of those of the Irish labourers who have taken part in this Fenian conspiracy, the evidence seems to be accumulating that their leaders had *not* national independence in view, but the destruction of the aristocracy and the division of the land. In short, the revolution has not been planned this time by patriots as such, but by *sans culottes*. The most remarkable documents which have as yet been put in evidence, are all outbursts of wrath against the great aristocratic landowners, against the Irish not less than the English territorial lords. So far as a political revolution was contemplated at all, it seems to have been as a means only to the end of a social revolution. Without destroying the English Government, of course the chance of extinguishing the great aristocracy, and getting the land to divide among the peasants, must have always remained a dream; and, accordingly, persons like O'Keeffe, probably his correspondent Luby, and others of the active leaders, wished to bring about the political revolution mainly as a step to the much greater social revolution (on the French pattern) which they contemplated. "The Duke of Leinster with 72,000 acres," says Mr O'Keeffe, "the Earl of Ormonde with 100,000, and the Marquis of Sligo "with 50,000 acres, may be regarded as the officers of that "great army of exterminating landlords who banish the Irish "people from their native country. They may not exter- "minate, themselves, but they are not less the *fons et origo* "of extermination. The French, knowing this, exterminated "their aristocracy, and every honest revolution must "imitate that of France. We must do the same. But you "asked me,—how are we to get at these men? My reply is, "'how did the French get at them?' They first wrote them "down by the pens of their Voltaires, and then slew them by "the hands of their *sans culottes*. Revolution as it is "understood on the Continent,—as it is understood in every "country where men are sane,—has no other object but the "subversion of the aristocracy. It can have no other object, "because they and they alone are the source of all the cala- "mities of which the producing classes complain, national "subjugation amongst the rest. To preserve them, Ireland "must be enslaved, chained, scourged, trampled on. To pre- "serve them, estates must be consolidated, to the utter "destruction of the working classes. Now the nature of pro- "perty determines the nature of law, because the primary "object of law is the preservation of property. Where that "property is aristocratic (exists in large masses), all the "laws are likewise aristocratic, ruinous, and destructive "to the working classes"; whence, of course, the policy of uprooting the aristocratic classes,—Mr Luby, we see, repudiates "assassination," and we suppose Mr O'Keeffe's proposal to "exterminate" them is strong enough,—follows as a very simple and necessary inference. Other letters, disclosing the general designs of the leaders, though not taking views quite so broad and commanding as Mr O'Keeffe's, all harp on the agrarian feeling, rather than on political disgust, as the true root of the rebellion. The letter seized in Mr O'Leary's possession, signed "J. O'Doherty- "Major," does not indeed propose as a preliminary reform to extirpate the aristocracy. It contemplates the much milder measures of "burning all the growing crops and houghing all "the cattle that may be on the land from which the people "have been so tyrannically and illegally ejected. Then the "tyrants would soon see that the hard-working people would "be preferable to waste lands." Every insight we have gained into the Irish conspiracy shows bitter agrarian feeling at the bottom of it, rather than any political enthusiasm,—an agrarian feeling which is quite as bitter against their own ancient leaders, the Fitzgeralds and the Butlers, as against the new English proprietors. Indeed, Mr O'Keeffe expressly says that the new English proprietors are not the root of what he calls the evil, but the old landed aristocracy. Remembering that for many years back almost all the violent crime of Ireland has been agrarian, there certainly appears something more intelligible in this than in a purely political insurrection. No doubt, the new homestead law of the United States, which has probably taken a strong hold on the imagination of the Irish at home as well as of the emigrants, has rekindled the feeling that the Irish working class ought to be *proprietors* of Ireland. And coming, as it has done unfortunately, simultaneously with that dispossession of a large agricultural population which was necessary for the transformation of land from agricultural into pastoral uses, and also at a moment when a great popular war on the other side of the Atlantic has ended successfully, it has probably stimulated far more than we are at all aware the desire to rescue the Irish territory from the hands of the great Irish proprietors. Of course the class of Irish who have joined in this conspiracy are far too ignorant to understand the difference between the condition of things in the United States, where land is unlimited, and the condition of things in a little, over-populated country like Ireland. Mr O'Keeffe even supposes that, in the France of the last century, the rising was against the landowners *as such*, and not as oppressors of the people such as Ireland has not had during this century. Such differences as these are absolutely invisible to the rude people who only see that in America the State makes a labourer the free owner of land, while in Ireland every acre has to be purchased at the full, often more than the full, value,—while even tenants are no longer secure of continuing to hold the land on which they have long toiled for a bare subsistence, if the owner sees a prospect of turning it to greater advantage in grass. These are the rough contrasts which strike the poor Irish imagination, and have prepared it for the crimes and folly which we are now witnessing. Doubtless, one secret of this conspiracy is the dream that the working class of Ireland ought to have a right to occupy Ireland, though Ireland has already, by the working of the laws of private property, got into the possession of an opulent class, just as the working class of America are permitted—for even there it is not a *right*—to occupy the waste lands of America to which no proprietor has ever established a claim.

If this be, as seems most probable, the *ratoinale* of the Fenian rising in Ireland, nothing can exceed the guilt of any man of culture and capacity who stirs such thoughts in the minds of the poor, and makes them believe such a territorial division feasible. The law of property, unlike the law touching personal rights, is always difficult to ground in the *consciences* of men. The proof of its advantage to society is demonstrative, but it is a proof not accessible to unlettered peasants, who can easily be made to feel the apparent injustice of great wealth possessed by men of little worth in the face of great poverty oppressing men of great worth,—and who, once roused by this mixed feeling of sheer greed and an indignation which they think righteous, are capable of any crimes, without entertaining any one definite or even conceivable view as to the system they would substitute in the place of individual property in land. The institution of property is the one least guarded by the rude natural conscience of men, of all that are essential to the order of civilised society. Hence it is the one on the grievances of which the true demagogue ever harps, and harps with most certainty of success. In the present instance, many circumstances, as we have seen, combined to make the poor Irish sensitive to the working of the actual property laws of Ireland, and if it can be shown that they have been played upon by designing men, themselves sufficiently educated to understand the kind of chaos they were attempting to introduce, and yet willing to plunge Ireland into all the horrors of a Jacquerie war for the sake of any spoil they might be able to appropriate, no punishment for such men could be too heavy. Of course the mass of the poor fellows who shouldered their pikes in the nightly drills were mere instruments for one or two more intelligent persons to play upon,—and instruments on which, in any connection with the land laws, it was very easy indeed to play. On the part of such men, instigations to rob and extinguish the aristocracy, and to turn the whole property laws of Ireland upside down, seem to us to involve guilt of an infinitely deeper dye than any mere instigations to political revolt against England. If instigations of this kind can be satisfactorily proved and brought home to any man of intelligent culture, we should regard him as much worse than a rebel,—as a man who knew well the weak place in his fellow-countrymen's hearts, and that the shortest path to a complete social anarchy would be by dressing up the covetous passions of ignorant men in a disguise of justice, and stimulating them into a general outburst. Such a man would

Digitized by Google

be much more than a traitor to his Sovereign,—a genuine traitor to his country and his race.

THE ANOMALIES OF SWITZERLAND.

VERY few of the many English who travel in Switzerland care at all for the people by whom they pass, or the Government under which for the time they are living. They think only of the precipices and the mountains which attract them thither. But to a grave observer the present state and constitution of Switzerland affords a singular accumulation of texts for political reflection. It is a mass of political anomalies, and though a dissertation upon them would be tedious, a simple enumeration and explanation of them may not be uninteresting.

First. Switzerland is a complete exception to the cardinal maxims of many modern politicians,—the doctrine of nationalities. It is generally laid down that unity of race, or at any rate unity of language, is essential to the successful action of a healthy Free State. But in Switzerland there is no such unity: it contains about two millions and a half of inhabitants, and about a half million of families, of which the division by race is this :—

German families	367,065
French do.	123,438
Italian do.	28,697
Speaking a romance dialect, do.	8,905
	528,105

The Latin race and the German race are not, here as often in modern Europe, compounded into a single new race, but exist separately, each keeping its own speech, its own mode of feeling, its own dress, and its own physiognomy. And to make the matter still worse, in the break up of the Latin language, two of the great modern languages into which it was decomposed (not to speak of the intermediate and very curious romance dialects), fixed themselves in these valleys. In consequence, there is no common political speech for political discussion. Newspapers appear in three languages, and three languages are spoken in the legislative assemblies. The German race undoubtedly predominates, not only because of its numbers, but because it is the most energetic and manufacturing, and also because its principal competitor, the French, is not exactly pure French, as any one may see who looks at the physiognomy of the people or listens to their conversation, but French with a strong German element thrown into and fused with it. Both the Northern invaders and the Romanised Gauls clung to the pleasant banks of the Lake of Geneva, and their descendants have a solidity reminding us more of Alsace or Normandy than of Paris or "the South." Nevertheless, two races there are in Switzerland, and three languages all vigorous, all likely to last and live, and so long as they do live, to be an invincible obstacle to the absolute universality of the "principle of nationalities."

Nor is Switzerland more united in religion than in race. A substantial predominance of some one religious creed has been thought an inseparable preliminary and is really an invaluable help to Free Government. Yet in this little Republic we have two religions both exercising a great sway over the people. The numbers are—

Protestants	1,482,000
Catholics	1,023,000
Jews	4,000
	2,509,000

And the danger of this religious division is the greater that the believers in the two creeds are not for the most part dispersed one among another. But each religion has its own localities, its own cantons, in which it lives, in which it nurtures its characteristic tendencies, where it excites its adherents to discuss and act. The Constitution even gives instruments for such sectarian and anti-national action. Each canton has its own Government, its own separate administrators and rulers, and by these each religious creed is able to disturb the common unity if its believers thought fit. In 1847, there was a sort of religious secession, a Sonderbund of European interest, though the greater events of 1848 soon pushed it out of European memory. But taking the whole history of Switzerland, and looking to its present religious state, it may be cited as a great example that political freedom may be firmly established, notwithstanding a fundamental diversity in religion as well as in race and language.

Thirdly. An Englishman cannot, in the midst of his present controversies, look without interest at a republic of the old world wholly based, and apparently thriving, upon universal suffrage. The old constitutions previous to 1848, it is true, presented every species of anomaly and singularity. They failed from age and time, and, no attempt having been made to reform them in time, new ones of a nineteenth century pattern were made to replace them. When the history is looked into, it will be found that these Swiss constitutions—some autocratic, some democratic, some having subject districts, but all as far as political action was concerned, one and indivisible, really perished—perished in vitality and real soul—at the first French revolution. Half the old institutions, in truth, fell then, and the ancient Swiss constitutions with them :—they were old houses, and could not last out that great tempest, and once down, their nature was such that, though they could be revived in part and in seeming, in real essence they could not be revived at all. They rested on hereditary associations, on a customary deference, on an admitted leadership; and when that admission, that custom, those associations were once broken and dissolved, they could never be re-combined. At present, the basis of the polity is the broadest possible. Every Swiss over twenty, not under some special disability, has a vote, and the representation of the different cantons in the "National Council"—the House of Representatives, as we should call it—is based on population only. The great division of property renders this not only practicable, but easy. The basis of society is a basis of equality. It is said, though we cannot vouch for it as a statistical fact, that there are as many landed proprietors in the single Canton de Vaud as in the whole of England. But, without precise figures, it is certain that "every rood maintains its man;" that the sides of the Lake of Geneva are lined with walls to protect the petty vineyards from their neighbours; that half the valleys look to an English eye like "allotment grounds," so minute is the patchwork of cultivation. The English notion that land is the bulwark of aristocracy is as out of place here as in France; the land here is the bulwark of democracy. So long as it is divided into minute parcels, so long political power will be divided—naturally and inevitably almost among the same units. The present constitution of Switzerland, anomalous though it be, or though an Englishman may think it so, has undoubtedly a singular suitableness to the society in which it is established and to the people by whom it is administered. An Englishman who is accustomed to examine political matters carefully will also find in the policy of Switzerland a singularity which will interest him the more because it in some degree resembles a peculiarity in his own polity. There is a great theory that in a political constitution the legislative and executive power should be entirely separated; that one should be lodged in the hands of one set of persons, and the other in the hands of another set; that they should be divided as they are divided in America. But by the practical English Constitution, the true executive, the Prime Minister, is appointed by the Legislative Assembly. So far from the Executive being an emanation from the people and the Legislature another emanation, the Executive is an emanation of the second order; it is the appointee of the Legislature. What the English Constitution, according to its refined nature, does artificially and by stealth, the Swiss Constitution does openly and distinctly. The administration is in the hands of the Federal Committee (conseil federal)—and this Cabinet is chosen by the legislative assemblies; out of this Committee the assemblies name yearly a President and Vice-President. The unity of legislative and executive authority is, however, less perfect than in England, since the Federal Committtee is named in advance by the Assembly for three years certain, whereas our Prime Minister and Cabinet are only chosen during pleasure, and can be removed when Parliament thinks fit.

Lastly. The Cantonal Government has for a political philosopher the same interest which an old fossil has for the geologist. It is of the primary period of free governments. Mr Grote, in his celebrated letter, observed that Switzerland had for him a peculiar attraction, "from a certain analogy "nowhere else to be found in Europe, with those who pro-"minently occupy my thoughts and on whose history I "am still engaged—the ancient Greeks." These small political communities,—united together, indeed, for many purposes, but still political units,—glorying in their separate individualities, and jealous of the power and interference of one another, recal to us two things;—first, that minuteness was

Digitized by Google

once as conclusively deemed a necessity for a Free State as we now deem it an obstacle. An ancient speculator would have been amazed at the English monarchy or the American commonwealth, but he would have been at home in Schwytz or Uri, and would have understood far more easily and nicely than an Englishman the difference between Great Basle and Little Basle, and the relations in former times between the superior Canton of Berne and the subject Canton de Vaud. Aristotle's eye, in looking over the puzzling complexities of modern Europe, would have fixed on these little communities as the sole free Governments in accordance with his conceptions and explicable by his experience. Secondly, we are reminded of what is a more important point, the extreme newness in the world of the present movement towards "unity of peoples." The old feeling is not towards union but disunion. There are—not only the Swiss Constitution, as it came down from mediæval times, but in the present Constitution, adapted as it is carefully and heedfully to modern thoughts and modern feelings,—*half* Cantons as well as Cantons. Unterwalden, Appenzell, and Basle, are each bisected in this way, and each half is commonly at political antipathy with the other half. "What one parish "hates is another parish," was the saying of one of the great reformers of our Poor Law system; and half the history of Free States is a comment on it. Until now all *great* States have been made by the sword, it is only now that we are making them without compulsion and by choice.

Notwithstanding this complication of anomalies, it is certain that the policy of Switzerland works well. Much strain, it is true, is not thrown upon it. It is not a regulating State in Europe; it is not required to have a *policy*. It cannot interfere, and so it need not discuss or think whether it ought to interfere. But on domestic matters its fruits are good. The finances, though bearing traces of the expensive age in which we live, are in complete order; its railways, in spite of peculiar engineering difficulties, are completed with singular rapidity; its telegraphs grow even faster. The banking system is developing with singular rapidity, and the interior credit economy of Geneva is so excellent as to be almost English. It has established free trade, and has a capital Customs revenue nevertheless. Its Constitution guarantees the liberty of the press, the free exercise of recognised Christian forms of worship, and what sounds odd enough, the inviolability of letters sent by post. It is drawn with a view to meet the most pressing and conspicuous wants of the nineteenth century, and, on the whole, it does meet them. A great country Switzerland could not be, but a comfortable country it certainly is; and a citizen of a great Empire like England, cannot but regard it as the constant inhabitant of a huge city is apt to regard a homely little village; he sees a life smaller and less refined, but yet simpler and more natural than his own.

IRELAND IN TRANSITION.

THE DECLINE OF COTTIERISM.

A STEP in the transition which we have been attempting to trace, not less pregnant with consequences than any we have yet noted, is the change which has taken place in the *personnel* of the Irish territorial system. Since 1848, one-sixth of the whole land of Ireland, representing about 30,000,000*l* sterling, and a revenue of at least 2,000,000*l*, has, under the operation of the Landed and Encumbered Estates Court, passed into the hands of new owners. These men have, for the most part, come from the mercantile and trading classes: they have displaced the most reckless and worthless of the old squirearchy, for whose maxims of management they are substituting the habits and ideas by which they rose to wealth; and they are leavening with their influence, slowly but effectually, the whole body of the Irish proprietary. Of the change which has taken place in the actual cultivators, some evidence will be found in the following table:—

Size of Holdings.	Number of Holdings in 1841.	Number of Holdings in 1861.
Not exceeding 1 acre	134,314	 40,080
Exceeding 1 acre, but not exceeding 5 acres...	310,436	 85,469
— 5 — 15 — ...	252,799	 183,931
— 15 — 30 — ...	79,342	 141,251
— 30	48,625	 157,833
Total holdings	825,516	 608,564

Two results come here very distinctly into view,—a large reduction in the aggregate number of the holdings, and a remarkable change in their size; the farms below 15 acres having declined to less than one-half their former number, while those above this limit have become greatly more numerous,—facts indicating an extensive change in the character, no less than in the number, of Irish cultivators.

Summing up briefly the steps which we have yet noted in Ireland's transition, we may state them as follows:—1. A population reduced to two-thirds of its former numbers. 2. Tillage land, to the extent of 1,200,000 acres, converted permanently into pasture. 3. One-sixth of the land of the country transferred from necessitous and reckless to solvent and prudent owners. 4. A still more extensive change in the actual cultivators, resulting in the substitution on a large scale of farms of moderate size for the very small holdings which formerly prevailed.

Passing now from these external features of the case, it will be instructive to look at the movement from its inner side, from the stand-points of the several classes concerned in it. We may thus be enabled to appreciate the personal motives through which the results set down have been accomplished, and to obtain a clearer view than mere general statements can give of the actual forces which are carrying the revolution along.

We will suppose the case of an Irish landowner — it may be an old proprietor who has stood the shock of famine and free trade, or a recent purchaser in the Landed Estates Court:—on coming to look into his estate, he finds it in some such condition as this—broken up into a number of small holdings, ranging from 1 to 8 or 10 acres; the occupiers wretchedly poor and ignorant, without the means or the idea of improvement, the greater number of them most probably largely in arrear of rent. We know how these people in former times contrived to subsist, and to keep on terms with their landlords. They are the cottiers, whom we attempted in a former paper to describe, living on the produce of their potato patches, and paying their rent, partly through their corn crop, chiefly in labour. It is evident now at a glance that all these resources have failed them together. Potatoes have become at once a greatly less productive and a greatly more precarious crop. Even could the cottier depend on his potato garden for subsistence, he has still his rent to pay. From what fund is this to come? Grain crops he can no longer raise with any hope of profit. Free trade prices forbid this, and we suspect that, free trade prices apart, the deterioration of the soil, worn out by the wretched cultivation so long pursued, would forbid it. At the same time the other resource, the sale of his labour, equally fails him; for the landowner and the large farmer are also curtailing the area of their tillage, and no longer need his services. Such is the posture of affairs. Under these circumstances what generally happens, when the landlord is a man of sense and humanity, is something of this kind. He comes to the most hopeless amongst his tenantry, and lays before them the conditions of the problem. So long as they pay their rent, of course he will not disturb them in their farms: he has no desire to press them harshly; but it is obvious they have not the means of paying him a reasonable rent for his land. He will then probably suggest emigration, agree to excuse arrears of rent, add the offer of a small sum to help them on their way. Some will eagerly embrace the proposal; others will hesitate, but the inevitableness of the step will soon be apparent to all. At the same time letters will be arriving from friends across the Atlantic urging to the same course. To these continued influences the cottiers,—at least the most wretched and hopeless of the class,—generally yield. Most of them, we imagine, emigrate; but some pass to the large towns or to England and throw themselves on the labour market; a few, for a time, while the work of consolidation and conversion is in progress, find employment on the lands which as tenants they formerly cultivated. By such means the estate in time is relieved of its superabundant population, and the landlord, at length master of the situation, proceeds to deal with his property according to his ideas of what is expedient. He may adopt any of several courses,—either retain the land he has taken up in his own hands, or consolidating it into two or three fairly sized farms, look out for substantial tenants, or, a not unfrequent course, dispose of it in augmentation of the holdings of the most promising of the small tenants who remain.

Some such course as this is what is now being pursued over a large portion of Ireland. We confess—while keenly alive to the distressing lot of the people, who are thus, for no fault of

Digitized by Google

theirs, virtually driven from their country—we are quite unable to find anything in the course of proceeding we have described either to reprobate or to deplore. What better can be done for these people, who are literally without the means of subsisting here save on the terms of a wholesale confiscation of landed property (and even this would furnish but a temporary resource), than to help them to a country where the market for labour—the only commodity they have to dispose of—is high? We say this is what happens when the Irish landlord is a man of sense, and has learned to recognise the existence of rights paramount even to those of landed property. Unfortunately, this description is by no means universally applicable in Ireland. Facts are constantly coming to light which show how strong are still the traditions of Irish landlordism. It was but the other day that a County Meath jury gave heavy damages against a landlord who had endeavoured, by a false pretence, to effect, without notice and without time for preparation, a wholesale eviction of his tenantry. In this case the law was violated; but it is but too plain what hardships might be inflicted by landlords, in the present circumstances of Ireland, while keeping strictly within their legal rights; it is obvious, too, how strong the temptation to rigour most often be, and how feeble the feelings which would oppose it.

The Encumbered Estates Court is commonly described as the greatest boon ever conferred upon Ireland. The praise is scarcely too high; yet it must be said that even the Encumbered Estates Court has not been without its drawbacks. It has favoured the admission to the rank of landlord of a class of men utterly unfitted, by their habits and past training, for exercising with due moderation a landlord's rights. There are in most of the thriving Irish towns some people—small tradesmen, country attorneys, cattle dealers, and the like—who, by dint of sheer parsimony, combined frequently with money-lending at usurious rates, have succeeded, in the course of a lifetime, in scraping together a few thousand pounds. These people are eager to invest their savings in land. They never, of course, think of turning farmers. They buy as an investment, and their only thought is to make their investment a good one. Delighted with their newly-acquired authority, they have no scruple at all in getting rid of every tenant who cannot at once make good his engagements, and of squeezing the highest possible rent from those who can. It is by no means uncommon on such properties to find rents raised two or three times consecutively in ten years, the tenants steadily sinking as the process goes on, with the prospect of eviction and emigration or the workhouse in the end. And why not? some reader will perhaps interpose. Is it not a question of demand and supply—an affair of contract—a "law" of political economy? Would you interfere with the rights of property? We may attempt on a future occasion to deal with this view of the case; meanwhile, we content ourselves with stating the fact. There may be a *nemesis* in store for such landlords; but for the present, when they are not shot, they make 10 or even 15 per cent. on their purchase money.

Cottierism, as a system, is thus passing away; and in place of the old cottiers there is arising a class of farmers, not altogether without capital, with holdings ranging from 15 to 30 and 40 acres; and a class of mere labourers employed chiefly by these latter. No one can doubt, however lowly he may estimate the condition of the new farming class—if we may so describe them—that they are at all events a vast improvement on the cottiers whom they have displaced. Can the same be said of the new labouring class? There are those who are sanguine on this point, and who see in the transformation of cottiers into labourers the germs of a great amendment. We regret we cannot join in these cheering views. We fail to perceive any solid improvement, scarcely any sensible improvement, in the present race of daily labourers in Ireland as compared with their predecessors twenty years ago. Wages no doubt have risen in money, probably, on an average of the whole of Ireland, from 30 to 40 per cent. But potatoes, still the chief subsistence of the Irish labourer, have also risen, and in far more than this proportion. Indian corn is a new resource, but it is by no means as cheap as potatoes formerly were. Tea and sugar have declined, but on the other hand whisky has risen. As for butcher's meat, it is of course as far as ever from the wildest dreams of the Irish peasant. On the whole, taking clothing into account, though it forms but a small item in his expenditure, the Irish labourer's condition is probably somewhat better physically than it was twenty years ago. This, we think, is about the utmost that can be truly said. But the important point is not as to the present physical well-being of the Irish labourer, but as to his "standard of comfort," as to the idea of what constitutes decent living prevailing amongst his class. On this point we must own we have looked in vain for the slightest indication of improvement. In the parts of Ireland with which the writer is best acquainted, it is the usual course of things for men to marry at one or two and twenty, the women being somewhat younger, and their joint wages frequently not exceeding 1s 6d a day. This is the hopeless feature of the case—a feature which appears likely to continue so long as the workman has no other measure of the prospects of his future than his vague conception of the chances of the labour market. J. E. C.

THE AUSTRIAN MANIFESTO AND ITS RECEPTION.

THIS document, which, if Austria has at last found a statesman, may become as famous as the charter of Runnymede, produced on its first appearance mingled feelings of consternation and satisfaction. Consternation, because it seemed to announce another political experiment in a country which cannot afford to try experiments; satisfaction, because on closer examination the Imperial manifesto bore no trace of implying a *coup d'état*. The fact is, the plan proposed by the new Austrian Minister is more constitutional than the system it modifies. The Vienna Reichsrath was rather ungraciously nicknamed, after its author, Schmerling's Theatre, because the people looked upon it as a fantastic creation, and as being in no respect a well-digested scheme of representation of the manifold races and ancient traditions of Austria. Transylvania, it is true, had a few months ago been bribed to send deputies to Vienna, but Hungary and the Czechs, Croatia, Dalmatia, and Venetia, sturdily and persistently refused.

Rightly to understand the signification of the manifesto we must remember the circumstances under which the change of Government last August took place. Several speakers in the Reischsrath, and especially Kaiserfeld, the member for Gratz, had insisted upon the necessity of measures being adopted for a reconciliation with Hungary. No Minister trusted by the Hungarians was in the Cabinet, and Schmerling, instead of promising to make reconciliation a cardinal point in his policy, jeered at the Hungarians for declining participation in his February Constitution, and declared that he, at any rate, could afford to wait. If Schmerling had been a great administrator like Sir Robert Peel, and used his four years of office to make Austria prosperous, he might have been able to play this game. But the Empire had grown neither in strength nor honour since the Schmerling-Rechberg Ministry took office in 1861. The foreign policy of the Government had been a signal failure, not to characterise it by a severer term. Instead of the authority of the German Bund and the aspirations of the German people being vindicated (the only excuse for the Congress of Frankfort in 1863 and of the Schleswig-Holstein war in 1864), Austria was dragged on by Bismarck from one concession to another. Diplomatists laughed at the Cabinet of Vienna, and the chivalrous army, beaten but not disgraced at Solferino and Magenta, was stung to the quick at its own Government inflicting on it humiliations more mortifying than battles lost in the field. The policy, therefore, which had for its object an alliance between Prussia and Austria ended in producing such exasperation that war between them was with the greatest difficulty prevented. Nor was Schmerling's home policy more commendable. Prussia successfully baffled the attempts of Austria to join the Zollverein, and Von Plener proved himself the most incompetent Finance Minister in Europe. Feeble abroad, timid and unsuccessful at home, the Schmerling Administration was not in a position to hold its own against the non-German races. Nothing, therefore, remained but for Ministers to be chosen who would make reconciliation with Hungary their first care. Count Belcredi, the able Governor of Bohemia, and known for his decentralising principles, and Majlath, the soberest and most statesmanlike of Hungarian patriots, were the men marked out as the natural successors of Schmerling.

The satisfaction, almost enthusiasm, with which the manifesto has been welcomed at Pesth and in all the non-German provinces, is a proof that the people whose traditions have most accustomed them to know the meaning of self-government see in in it no violation of constitutional liberties. And

Digitized by Google

we cannot be surprised at Pesth and Prague and Agram and Lemberg pronouncing a more favourable judgment on it than Vienna seemed disposed to do at first; because the most practical proof of respect and deference for constitutional rights was given by the Belcredi-Majlath Government in the simultaneous issue of rescripts convoking the local Landtags for the 23rd November and the Hungarian Diet for 10th December.

We have shown before how the Emperor in this manifesto laid marked stress upon the value of representative Government, "this sure guarantee for the further-"ance of the interests of the Empire as of the Provinces," and deplored the nonfulfilment of his expectations by the Hungarians not having joined the Reichsrath. Referring then to the solemn oath of fidelity to the Constitution, he decided to submit the diploma of October 20, 1860, and the patent of February 21, 1861, to the Austrian and Hungarian Diets for their acceptance. The proposals made by those Diets will then be submitted "to the legal representatives of the other kingdoms "and provinces in order to obtain and to learn their equally im-"portant judgment thereon." Meantime all matters of pressing urgency, and "especially those relating to the financial and "economical interests of the Empire," will be treated by the Ministry. But to prevent any chance of these momentous subjects being disposed of without due constitutional check and control, the authority of the National Debt Commission remains intact.

It may be, we think it is, a misfortune that the Hungarians did not send deputies to the Reichsrath, but as they could not be persuaded to do this, it is difficult to see what other course was left for the Government to adopt. It is easy to criticise the disadvantages of the Reichsrath being temporarily adjourned, but it is very difficult to suggest any other mode by which the rights and prejudices of the Hungarians could have been encountered with so fair a chance of arriving at a mutual understanding. Everything now depends upon the firmness, statesmanship and honesty, of the Ministers.

They have two great difficulties pulling in a contrary direction. The German provinces having exercised power through their deputies in the Reichsrath for several years, will be irritated and rendered suspicious by the determination of the Government that they should divide their power with the numerically equal, but intellectually inferior, non-German provinces. They will say, "We "obeyed the call and sent representatives to Vienna without "hesitation, and why should the unaccommodating Magyars "and Wallachs and Croats be humoured, and we have our "duties and power interrupted." This is, of course, one of the many difficulties which must arise in a country composed of races of so many different degrees of civilisation, and there is almost as great a difference between the metaphysical German and the primitive inhabitant on the Maros, as there is between a dweller on the banks of the Thames and on the Ganges.

The other difficulty will lie in the chance of demands being made by the Hungarians, consistent, perhaps, with ancient charters and traditions, but inconsistent with the centralisation necessary to the political authority of a first-rate Power. The fact is it is a misfortune that this great constitutional question has to be solved in the nineteenth century. The necessities of our civilisation require a considerable amount of centralisation. Autonomic rights may be pushed so far as to clash with the organisation indispensable for material progress and development. There was nothing, for instance, the Hungarians clung to with more tenacity at one time than separate custom-house frontiers between Austria and Hungary. Yet nothing could be more unreasonable or more absurd in these days, than to have two custom-house frontiers in the same State. Such sentiments of nationality degenerate into narrow-minded and pedantic provincialism. We have always sympathised with the attachment of the Hungarians to their "ancient charter." But every one interested in the civilisation of Eastern Europe will admit that it is of higher importance that the whole of Austria should be governed under an enlightened, progressive, and constitutional government, than that Hungary should, by the retention of obsolete and unreasonable privileges, make such a state of things in Austria impossible. The Hungarians have now a glorious opportunity for showing that they possess the moderation of practical men as well as the enthusiasm of patriots. Let them consult the interests of the nineteenth century as well as prove themselves learned in musty diplomas. Let them show Europe that they are statesmen as well as lawyers.

The new Ministers have already given signs of energy and economy, very rare in Austria. Count Belcredi and Count Larssch, the Finance Minister, have laid the axe ruthlessly to the overgrown and upas-like bureaucracy. The government offices, which had become a huge system of in-door relief for the nation, an official almshouse, are every day losing some of their inmates, and the army has undergone a serious reduction.

It is notorious that the capital in the country is insufficient for the development of its railways, its mineral and agricultural reaources. The money markets of Europe are governed by no sentimental politics. Superfluous capital will always flow into those countries whose trade is least restricted and life freest. The new Austrian Ministers have only to prove that they recognise the conditions of modern commercial life to see their most sanguine wishes for the prosperity of the Empire fulfilled.

Agriculture.

REPEAL OF THE GAME LAWS.

A REASONABLE SUBSTITUTE.

THE repeal of the game laws is inevitable. Sir Baldwin Leighton's Police-Game-Preservation Act has rendered such repeal a mere question of time. The game code has become simply intolerable, and must be abrogated. The action of the Scotch and English farmers in relation to this subject at the late elections has rendered that no longer a matter of doubt. And there are other signs that the game-law system is tottering to its fall. The game-preservers are driven to act defensively. They are offering apologies and excuses. Their organs in the press are attempting to argue their case, or are suggesting substitutes for the existing game law. Now this course is fatal to the game laws. So long as the upholders of the corn laws could silently write down Mr Villiers' annual motion for the repeal of the corn laws, they held their monopoly firmly, but the moment they were compelled by the pressure of public opinion — informed and ripened by the teaching of the Anti-Corn-Law League—to resort to argument, their cause was lost.

Just so it will be with the game laws. Indeed the difficulty of defending the game laws by argument is a hundredfold greater than was such a defence of the corn laws. In support of the latter, plausible sophisms, calculated to impose on the ill informed, might be adduced, but any true statement of the provisions and operation of the game law will insure its condemnation by all game-preservers.

The "Scottish Law Magazine" has an article on the game laws, in which some attempt at argument in their support is made. Thus, after admitting that the farmers have "a substantial grievance" in game preservation, the writer says "the evils of which the farmers complain have not their main seat in the game laws themselves. When men speak of abolishing the game laws, they generally mean abolishing the laws punishing trespass in pursuit of game. But were this done, the farmers might think that the crowds who might take to shooting in those happy times might be fully as injurious enemies." This is sheer nonsense. No one is likely to trespass on a farm who would do half the mischief to the farmer's crops, as would be done by a couple of hares. It is true, however, that the farmer may by contract bind himself to permit his landlord to preserve the wild animals, now called game, even if game laws were abrogated. The absence, however, of any special game code would greatly facilitate rational contracts on the subject of game between landlords and tenants. The writer's remedy is to make game property. He says: "It is time that the old fiction that game is not property were removed.....If the right to game were recognised as a right of property, the parties interested in it would see at once the folly of making workable contracts as to its enjoyment.....If hares were considered as much property as sheep, a tenant would as soon dream of consenting that his landlord should feed an unlimited quantity of the latter as well as the former on his turnips.....In the interests, therefore, both of tenant and landlord, the first improvement in the law would be to declare game to be property." Whether the results of such a declaration would as between tenant and landlord produce the results suggested or not, there can be no doubt that the illustration used forms in itself a sufficient condemnation of the existing game system.

Then the writer considers that if game be simply declared to be property, no special legislation would be "necessary for its protection beyond the provisions which the law makes for the protection of all property." The poacher would be punished as a thief, "and the paraphernalia of close times and game licences may disappear." He also says, that the special legislation for game gives it an "extravagant value and importance, creating inducements of a wrong kind to its production in preference to animals of a more useful character." There is some truth in that. But, supposing

Digitized by Google

game to be declared by law to be property, we come to the old, the inherent, difficulty of the subject. Game animals do not possess the necessary characteristics of property. They cannot be controlled or confined to the property of the quasi-owner, they cannot be identified, and in the absence of positive evidence by an eye-witness that they were taken on A's land nobody can prove that they are A's game.

The *North British Agriculturist* commenting on this article, justly points out, that one of the results of making game property, which from its nature wants the essential attributes of property, "would be a weakening of that innate sense of property which exists in the minds of the most unscrupulous of the rural population, and which is the greatest—almost the only—security that the domesticated animals of the farm – alike sheep and poultry—will not be appropriated."

The Scottish writer then proposes that having made game property, and abolished seasons and licences, the Scotch game law should be assimilated to that of England, by enacting that where there is no express reservation of the game to the landlord, it should belong to the tenant. This, however, does not prevent the game laws and game-preserving operating as oppressively in England as in Scotland.

The *North British Agriculturist* points to a passage in the "Edinburgh Review" of 1829, on the evidence [on the game laws] taken in the House of Lords in the previous year, and said to be by Lord Brougham, as indicating sounder opinions than are to be found amongst our landed legislators at the present day. The reviewer there says, "There is a moral and political condition in the title deeds of every estate—that it shall be used according to the interest of society, and not converted at one's own caprice into a public nuisance. If those places of ill fame (game preserves) are not removed voluntarily to a reasonable distance, one shall better understand the policy of the ancient law by which nobody could appropriate these establishments to look after and preserve game without an express permission from the Crown."

This was written prior to the change made in the English game law in 1832, whereby, in the absence of game reservation, it vested in the tenant, and game was made saleable. That these alterations of the law have utterly failed to abate the evil then complained of is too certain.

Now the true remedy for the "public nuisance" of game preservation is a simple repeal of all game laws whatever. The larger wild animals called game will then stand on precisely the same footing as the smaller, such as rats, mice, moles, sparrows, or blackbirds. They will belong to those who can catch them. But then it will be said that hares, pheasants, and partridges, offer temptations to trespassing, which are not presented by such small fry as rats and sparrows. That may be so. We have no doubt that any practical man who should attempt, in our actual legislature, to carry the repeal of the game laws, would deem it prudent to be prepared, as at least a temporary substitute, with some trespass law. Here, then, is the outline of such a trespass law.

Let trespass on another man's land for the purpose of taking the wild animals, now called game, found upon it, be by law what is called a *Tort*, *i.e.*, a wrong for which the actual occupant of the land shall have a civil remedy against the trespasser. Let recovery of damages for such tort be sought by plaint in the County Court of the district in England, in the Sheriff's Court in Scotland, and let the Judge of the Court be a liberty to award a limited sum, say not exceeding 40s, for the wrong inflicted by a wilful trespass without proof of special damage, and, in addition, any special damage which may be proved. The amount thus awarded to be a debt recoverable as other debts are recovered in these local courts. The main objection to such a plan is, that it would be too great a concession to the game-preservers to give them a special right to damages for what would only be an imaginary wrong. But it may be necessary to let down the old and inveterate evil of the game laws somewhat easily, and under the trained legal discretion of the judge or sheriff no serious oppression is likely to be exercised, while for proved damages—the taking of hares, pheasants, or partridges from A's land—a reasonable civil remedy would be afforded.

THE REVENUE.

	1,492,882,332	34	.....	1,450,576,557	67

The Bank return was waited for to-day with great interest. It shows a decline of 21,766,000f in the coin and bullion, and an increase of 68,120,000f in the discounts, of 48,418,000f in the circulation of notes, and 36,473,000f in the private deposits. In spite of the said decline, the bullion and coin of the Bank amount to 470,917,716f, whilst the liabilities that could be immediately exacted are 883,268,625f of notes and 217,360,539f of deposits. In presence of such a situation, the Bank was evidently under no direct obligation to increase its rate of interest; but in consequence of the augmentation at London, and in certain markets of the Continent, joined to the fact that bankers had begun to demand heavy discounts, in order to profit by the difference between the price of money abroad and that here, the directors of the Bank in their weekly meeting of to-day raised their rate from 3 to 4 per cent. for bills, and 4 to 5 for advances. As usual, the Bank will be attacked for this measure, by all these persons who believe or affect to believe that the value of money can be kept low in France when it is high abroad, and when the *encaisse* declines. But the general opinion will no doubt be that the Bank has acted prudently.

The Bourse has not been very animated since last Thursday, but to-day some agitation was produced by the elevation of the discount, and a fall in all securities was the consequence; it was, however, less than might have been expected. The following are the quotations:—

	Sept. 28. f	c		Oct. 5. f	c

The Egyptian loan of 3,000,000*l*, or to speak more correctly, the loan of the Viceroy of Egypt, since it is a personal affair, will probably soon be brought on the market, all the arrangements having been completed. That it will be eagerly subscribed is quite certain, seeing that it will be brought out under the auspices of the Comptoir d'Escompte, and that the conditions of it will be very favourable.

The supposition mentioned in my last, that the conversion of the Mexican loan of 1864 might be delayed a little in consequence of the delay in the launching of the new Bank of Mexico, has turned out to be erroneous. On Monday last the Comptoir d'Escompte announced that it has undertaken the operation. The conversion is to be effected on the terms already communicated to you;—namely, for bonds of 3*l* or 75f 60c, two obligations of 500f, bearing together 60f interest, payable half-yearly, are to be given. The total number of obligations to be issued for the 1864 loan is to be 500,000, representing a nominal capital of 250,000,000f. The said obligations are to take part in half-yearly lotteries, in which various prizes, amounting altogether to 1,500,000f, are to be gained, one of them being of 500,000f; and besides a certain number of the bonds are to be paid off each half-year at 500f, the whole being redeemed in fifty years. Moreover, there is to be invested in the French Three per Cents. a sum sufficient to produce at compound interest at the end of fifty years, the means of giving each bond a bonus, or second reimbursement of 340f. No doubt is entertained that the holders will readily accept the conversion. It is true that the 60f (2*l* 8s) they will get in cash are not equal to the 75f 60c (nearly 3*l* 0s 6d, the 6d being for exchange) they get now. But the chances of winning in the lotteries are estimated to be worth 12f per annum for the two bonds, and the substitution for a non-redeemable debt of reimbursement in fifty years at 500f of bonds which will be identical with those of the 1865 loan issued at 340f, and which consequently will gain a premium of 160f, is calculated to be worth for the two new bonds 6f 40c. In definitive, therefore, the converters will enjoy 78f 40c for their 75f 60c; only 18f 40c of the amount will be represented, not in hard money, but by chances and expectancies. And the sum will be further augmented if to the expectancies be added the present value of 340f payable after the lapse of fifty years. The conversion is to be effected before the 10th of November next, but it is not compulsory.

It appears from statements published in the official *Moniteur* that the commercial situation of Mexico is decidedly improving. The Customs receipts in the first half of 1865 were 10,266,272 piastres, and they were 5,042,567 more than in the same period of 1864. Some mining and other enterprises have been undertaken, and progress is making in colonisation and in the construction of the railway from Vera Cruz to the capital.

For some time past great uneasiness has prevailed in the financial world with respect to Spain, and it has been aggravated by the last news. The traffic on all the railways is declining. The seaports are encumbered with goods for which there is no demand; manufactures are languishing; agriculture is overwhelmed with debt and taxes; even the sale of articles of general necessity is declining; and the public treasury is empty. Yet the Government does nothing. It does not try to attract foreign capital by doing justice to the wronged holders of stock and railway shares; it does not attempt to give vigour to manufactures and commerce by a reform of the Customs laws; and it does not endeavour to reduce the burdens on the people by changes in the financial administration.

The Caisse des Depots et Consignations, by order of the Minister of Finance, announced at the Bourse, at the end of last week, that from the 2nd to the 31st October it would employ 398,000f daily in the purchase of 3 per cent. stock.

Messrs Rothschild and the Societe Generale have consented to advance the South Austrian and Lombard Railway Company a sum of 50,000,000f on its debentures. This loan will be of the greatest utility to the company, as it will enable it to continue its works without making a new issue of bonds to the public at an unfavourable moment.

In a meeting of the shareholders of Cail and Co., one of the most important engine-building establishments in France, a dividend of 80f per share, for the year ending 30th June last, was declared. It is equal to 16 per cent. on the capital engaged.

The Compagnie de l'Eclairage au Gaz et des Hauts Fourneaux et Fonderies de Marseilles, et des Mines de Portes et Senechas, has been paying since the 1st 14f per share as balance of the dividend of 1864. The Compagnie Centrale de l'Eclairage au Gaz (Le Bon and Co.) is paying 15f per share on account of dividend of 1865.

A curious incident has occurred in connection with the Charentes Railway. The directors recently called a general meeting for the 14th; a number of shareholders have since inserted an advertisement in the newspapers entreating the shareholders to attend the meeting, "as it will have a decisive influence on the future prosperity of the Company, and on the value of shares:" to-day the directors announce that this advertisement was inserted without their knowledge, but that they repeat its prayer.

M. Payoux, banker of Dinan, has suspended payment. He was in a somewhat extensive way of business, and his liabilities amount to 1,900,000f. The Tribunal of Correctional Police of the town has ordered his arrest for not having annually made regular inventories.

Much attention has been paid to the fact that the new Municipal Councils of Marseilles, Toulouse, and I believe one or two other important towns, have passed resolutions declaring that though compelled to provide for, they do not accept the responsibility of the financial situation left by their predecessors, that situation presenting a current expenditure considerably exceeding the income, with besides debts more or less heavy. This proceeding of the Municipalities is regarded as indicating the commencement of a reaction against the excessive outlays for the embellishment of towns which have hitherto marked the Imperial regime. Should the reaction extend in the provinces, it will probably reach Paris, and will there put an end to any more *Haussmannisation* of the capital, which, in the opinion of a considerable number of the inhabitants, is a thing devoutly to be wished.

Complaints are made of the dilatoriness of the Board of Customs in the publication of Customs tables. It issues annually a large volume entitled *Tableau General du Commerce de la France*, containing a mass of statistics of great value. We are now at the beginning of October, and the volume for 1864 has not appeared. Formerly the issues were made in June or July. The monthly Customs returns used to come out towards the 20th of the month, but for some time past most of the numbers have not appeared until the end thereof, and that of September was actually not distributed before the 2nd of this month of October. It is not assuredly from want of hands that this delay takes place, for the Board of Customs, like every other department of the Government, has about six times more clerks than it needs. The heads of the Board ought to remember that its publications are of real utility to the commercial world, and to numerous other persons, and that, consequently, promptness of publication is of the highest importance. Perhaps, also, the Board would do well to remodel altogether the monthly returns of the Customs. They are very elaborate and yet very incomplete. They give in oppressive detail the quantities and values of the imports and exports of the different varieties of various articles. Under the head of cotton tissues, for example, there are not fewer than 24 sorts set down, but they do not present the general totals of any of the articles (sugar excepted), so that in order to ascertain whether the import or export of any particular species of merchandise is increasing or declining, one must undergo wearisome labour. For cotton tissues, a comparison of the quantities of any periods of this year with the corresponding ones of 1864 and 1863, would necessitate the formation of three different tables of 24 items each, and the adding up of the same. An equally elaborate operation would be necessary to find what portion of the imports were taken for consumption and what portion of the exports were of French manufacture. Then again, the Returns give with great minuteness the quantities and values of every variety of every sort of goods imported from, or exported to, all the principal commercial countries with which France trades: but they do not contain a table showing at a glance how much has been sent to or received from each country. Consequently, if you desire to see how the trade between France and England stands, you must extract from not fewer than 130 pages, as often, on an average, as six times per page, nine different sets of figures, and must make nine separate additions each of 780 items, the greater part of the items being of six figures. And for any country the toil is almost as great.

The Customs returns that have appeared this week show that imports are continuing to increase and exports to decline. The value of the imports for consumption in the first eight months of 1865 was 1,770,097,000f (70,800,000*l* in round figures); whilst in the corresponding period of 1864 it was 1,634,259,000f; of 1863, 1,553,268,000:—and the value of exports of French production in the former period was 1,932,846,000f (77,300,000*l*.); in the second, 1,960,383,000f; and in the third, 1,642,549,000f. The Protectionists will assuredly lament over the augmentation in the imports, and still more over the falling off in the exports; but as regards these last they must not omit to note that they greatly exceed the imports.

The precious metals are not comprised in the above figures, and the following is a detail of them:—

	First eight months of 1865. francs		First eight months of 1864. francs		First eight months of 1863. francs
Imports of Gold.					
Bullion	41,794,644	...	79,851,042	...	56,572,437
Coin	256,073,325	...	227,488,869	...	215,878,443
	297,867,969	...	307,339,911	...	272,450,880
Imports of Silver.					
Bullion	61,430,389	...	39,838,761	...	19,773,670
Coin	107,120,803	...	140,222,326	...	84,455,025
	168,551,192	...	180,061,087	...	104,228,695
The imports of gold and silver united were consequently	466,419,161	...	487,400,998	...	376,679,575
Exports of Gold.					
Bullion	26,289,765	...	18,015,582	...	59,748,843
Coin	168,243,111	...	194,098,305	...	172,512,940
	194,532,876	...	212,113,887	...	232,261,783
Exports of Silver.					
Bullion	35,684,527	...	91,678,283	...	73,289,986
Coin	51,869,246	...	131,591,812	...	66,333,880
	87,553,773	...	223,270,095	...	139,623,866
The exports of gold and silver united were consequently	282,086,649	...	435,383,982	...	371,885,649

Deducting the exports of the first eight months of the present year from the imports, it will appear that the stock of the precious metals in France has increased by 184,332,512f (7,373,300*l*). The country from which in that period the largest import of gold was made was England, the amount being 41,794,644f in bullion and 76,649,580f in coin; and the largest import of silver bullion was from Italy, 48,202,228f; and of silver coin from Spain, 38,029,928f. The largest export of gold was to Italy,—bullion, 19,203,000f; coin, 100,444,650f; and of silver in bullion, to British India, 15,659,200f; and in coin, to Belgium, 9,212,000f.

The market report is as follows:—

Flour.—At *Paris*, though supplies are abundant, and though there is no great abundance, prices are firm, and some holders have obtained an advance. Yesterday, the quotation was 48f to 52f the sack of 157 kilogs. Six marks, current month, were 51f 50c; November and December were offered at 52f; four months of January, 52f 25c. Type Paris, the 101 kilogs, 31f 50c.

Wheat.—At *Paris*, sales are difficult. Yesterday, choice white, new, 28f the sack of 120 kilogs; choice red, 27f 25c to 27f 50c; first quality, 26f 50c to 26f 75c; good, 26f; other sorts, 21f to 24f.

Cotton.—The sales at *Havre*, in the week ending Friday, amounted to 20,651 bales, and the arrivals to 8,236; of the former, about 18,000 were Asiatic, and of the latter, 6,677 were from England. The stock was estimated at 36,775 bales. The closing quotations were 5f higher for United States, Guadaloupe, Hayti, Coconada, and Bengal; 10f higher for Egypt, Peru, Brazil, Surat, Surinam, Cayenne, Kurrachee, Tinnevelly, and Madras; 10f to 15f for China; and Cumana, Carthagena, and Porto Rico unchanged. Low New Orleans was 250f the 50 kilogs; good ordinary quality, in Broach, 180f; in Tinnevelly, 180f; in Madras, 190f; China, 185f; Jumel, 242f. The market was active on Monday and Tuesday, but was calm yesterday; the quotations befng—New Orleans, 260f; Georgia, 285f; Pernambuco, 265f; Oomrawuttee, 175f to 200f; Tinnevelly, 185f; Madras, 185f.

Sugar.—At *Havre*, in the week ending Friday, 450 casks French West India went at 48f and 48f 25c the 50 kilogs, bonne quatrieme, duty paid, and 540 usine, 54f to 56f 50c; 4,000 casks Havana, by English and French ship, 31f to 31f 25c, No. 12 in bond; 1,225 ditto, by Spanish ship, 30f to 31f; about 1,000 casks Cuba clayed, 52f to 54f, on sample duty paid; and 4,490 sacks Mauritius, 52f 50c, bonne quatrieme. There were no arrivals. This week, Havana, No. 12, 31f 75c to 32f 50c; French West India usine, 59f. At *Bordeaux*, last week, some French West India was taken at 48f, bonne quatrieme, and some usine, 54f to 62f; 1,000 sacks Reunion, 47f and 48f, bonne quatrieme, but of inferior quality. This week, French West India at prices not stated. At *Nantes*, last week, purchases were large, many of them for England: 620 sacks Reunion, common, in sample, 45f and 45f 75c; 3,636 ditto, bonne quatrieme, 49f 75c to 51f 25c; 1,552 gros grains, 52f, bonne quartrieme. Some French West India, bonne quatrieme, 46f 50c to 47f 50c; on sample, 55f 50c and 57f, and at prices kept secret; 778 Mauritius, 52f 62c, bonne quatrieme; 315 Mayotte, 46f 25c. This week, Reunion, 52f, bonne quatrieme; Guadaloupe, 48f; ditto, usine, 56f 75c on sample; Java at prices not stated. At *Marseilles*, last week, 3,400 casks Havana, by French ship, 31f No. 12. This week, prices have been firm, though a small lot of Havana has been ceded at 30f 50c.

Coffee.—The sales at *Havre*, in the week ending Friday, were 200 sacks Hayti, Port-au Prince, and Jacmel, 79f to 82f the 50 kilogs in bond; 400 Jacmel, for delivery, 79f 50c; 1,850 Rio, not washed, disposable, 72f to 85f 50c; 500 ditto, for delivery, 79f; 500 Rio washed, disposable, 88f to 89f; 636 ditto, for delivery, 101f to 106f. By auction, some damaged Hayti and Mysore were sold. The arrivals were not important. This week, Rio unwashed, 73f to 86f; washed, 90f; Capitania, 74f: La Guayra, 91f; Hayti, 73f 75c and 91f; Cape, 81f and 84f; Gonaives, 85f and 85f 50c; Jacmel, 79f 50c. At *Bordeaux*, last week, 350 sacks Mysore, 117f the 50 kilogs; 100 La Guayra, non-grage, 88f; 350 ditto, 92f; 140, 92f 50c; 86 Rio, not washed, 92f; 130 ditto, 89f; 70 San Domingo, 83f. This week, La Guayra at prices not stated. At *Nantes*, last week, 2,000 bags Reunion pointus and ronds, part, it was said, at 140f, the rest at 150f; 32 casks Santiago at prices not stated; some Guadaloupe, 150f and 100f. By auction, 1,465 Ceylon damaged native, 108f to 112f 50c; 84 Porto Cabello damaged, non-grages, 115f 75c to 117f 50c; 482 ditto, sound, grages, 121f 75c to 122f 75c. At *Marseilles*, last week, 1,000 sacks Maracaibo, 85f, indifferent quality; 2,900 Rio, 63f; 400 ditto, 75f; and 400 for delivery, 80f. No sales this week.

Indigo.—The demand at *Havre*, in the week ending Friday, was only for 23 chests Bengal, at established prices, and 20 serons Guatemala, at prices kept secret. No sales this week. At *Bordeaux*, last week, sales were active: 253 chests Bengal, at an advance of 15c to 20c the half-kilog for superior and good qualities, and of 10c to 15c for other sorts; 10 chests Madras and 1 Kurpah at preceding quotations. This week, Madras and Kurpah at prices not given.

Hides.—The sales at *Havre*, in the week ending Friday, were 3,730 La Plata dry, at 76f to 96f 50c for cow, and 105f for ox; 1,600 Monte Video salted, disposable, 59f to 60f ox, 46f 75c cow, old; 4,550 cow, salted La Plata, for delivery, 47f 50c to 48f; 1,000 Rio Grande salted ox, 53f 50c to 56f; 3,200 ditto cow, for delivery, 46f 50c to 47f; 100 Rio Janeiro salted cow, 39f; 600 Pernambuco salted, 46f 50c; 500 ditto salted ox, 65f; 500 Valparaiso salted damaged ox, 45f; cow, 42f 50c; 850 ditto drysalted cow, 67f; and 200 New Orleans salted, for

Digitized by Google

delivery, 41f. The arrivals were nearly 8,700. This week, Rio Janeiro salted cow, 30f; Valparaiso dry ox, 47f: Monte Video cow, for delivery, 48f; dry, 78f; Rio Grande salted ox, indifferent quality, 51f.

Wool.—At *Havre*, in the week ending Friday, the sales were 275 bales La Plata, unwashed, 1f to 2f 22½c the kilog; 10 Rio Grande ditto, 1f 15c to 1f 50c; and 16 Portugal, unwashed, 1f 40c. The arrivals exceeded 800 bales. This week, Monte Video, unwashed, 1f 80c.

Tallow.—The sales at *Havre* in the week ending Friday, were 465 pipes La Plata, disposable, 56f to 58f the 50 kilogs; 250, for delivery, 57f 50c to 58f; 15 New York, à la marque, 58f 50c. The arrivals were 216 pipes and 8 demi-pipes. The stock was 800 tons La Plata and 150 tons United States. This week, New York, à la marque, 58f 50c; La Plata, for delivery, 57f 50c to 58f 50c. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 125f 20c, but after the close of the market there was a fall of 1f.

Spirits.—At *Paris*, yesterday, 3-6, first quality, disposable, was 49f and 50f the hectolitre. At *Bordeaux*. the day before yesterday, 3-6 Languedoc, 86 deg., 55f; 3-6 beetroot, first quality, 90 deg., same price.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following relates to the state of the money market at Calcutta during the fortnight ending Aug. 21:—We have no alteration to quote in the value of money; supplies of specie continue heavy, while the demand for money is still but moderate, and loans can be obtained without difficulty at 3 per cent. Government securities, on 12th inst., had declined about 8 annas from our quotations of the 7th, and since then have scarcely fluctuated in value, the price of 5½ per Cents. to-day being 10-12 rs to 11 rs premium; the business done has not been large. Share Market—Considerable business has been done in certain stocks. Exchange has been steady, at a slight advance on our last quotations, and closes at 2-0 3/16d to 2-0¼d for 6 months' sight bank bills.

Messrs Dymes and Co., writing from Madras on the 25th of August, thus allude to the state of money affairs:—Money continues plentiful at previous rates, say 5 per cent. for loans on Government securities, and 7 per cent. on private bills at three months' date. Madras Bank shares have been in some inquiry, and a few have changed hands at 75 premium for old stock. Transactions are reported in new shares at 70 premium. The market is again a little quieter, and we quote prices to-day 74 to 75 premium. Government paper is a trifle higher, both in Calcutta and Bombay, but prices do not show any alteration here; we therefore repeat our quotations, 5½ per Cents. at 10¼ to 10¾ premium; 5 per Cents., 4 to 4¼ premium; and 4 per Cents., 8¾ to 8¼ discount. Exchange.—The tendency during the fortnight has been upwards, notwithstanding a decline in Bombay of ¼ per cent. We quote 6 months' sight document bills at 2s 0 1/16d to 2s 0¼d; and credit bills, with documents attached, 2s 0⅝d. First-class credits, 2s 0 5/16d. The banks' drawing rate has been raised to 2s for 6 months' sight bills. Sovereigns—English, rs 10-7-0 each; Australian, rs 10-1-6; both in some demand.

Annexed are the returns of the Bank of Bengal for the weeks ending Aug. 8 and Aug. 15:—

Liabilities.	Aug. 8.		Aug.

Subjoined is a portion of the circular relating to bullion movements at Hong Kong for the fortnight ending Aug. 12:—Gold—The receipts, including 12,000*l* in sovereigns, amount to $180,000 in value, whilst the total despatched, including the shipments per the Carnatic on the 29th ult., and excluding those per the Emeu to-morrow, is $490,000. Silver—Only about $50,000 has come in, and the shipments, including an amount sent forward in last steamer, are about $130,000. This is the whole of that which was in the colony, and the market is now bare of silver and sycee. Dollar Currency—The receipts during the fortnight are almost entirely from the coast, and sum up to $390,000. Exports are still principally made to India. Discounts and Mortgages—Loans on first-class acceptances have been arranged at 8 per cent., and mortgages have been done at 10. For terms of a few days, money has been obtained at lower rates. Exchange—Rupees on India just barely compete with bullion remittances. In sterling bills, the market has been wide, the orders received from head office being in some cases of a very stringent nature, and amounting to restraint on further operations. Closing Quotations—On London, 6 months' sight, Bank, 4s 5¼d to 4s 5½d; do. do. credits, 4s 5¾d to 4s 6d; on Calcutta, 3 days' sight, 217 rs; on Bombay, 3 days' sight, 217½ rs; on Shanghai, Bank, 10 days' sight, 72½ tls; on do., 30 days' sight, Bank, 73 tls; on do., 30 days' sight, private, 73½ tls; on Singapore, demand Bank, 2½ per cent. prem.; on do., 30 days' sight, private, par; on California, 60 days' sight, 18 per cent. dis.; bar silver, 17 dwts B., 10½ per cent. prem.; Sycee, 8½ per cent. prem.; Mexicans, clean, 1½ per cent. prem.; do., Singapore currency, 1½ per cent. prem; gold leaf, $22.80 per tael; gold bars, Pekin, $22.40 per tael; sovereigns, Sydney, $4.52 each; discount, 8 per cent.; Hong Kong and Shanghai Banking Company shares, 8 per cent. prem.; Hong Kong and Whampoa Dock, $215 per share prem.; Union Dock shares, 6 per cent. prem.; Gas Company shares, 8*l* per share prem.

The following is a translation of a decree recently issued by the Government of Venezuela, relative to the opening of certain ports of that Republic:—Art. 1.—Ciudad Bolivar, La Guayra, Puerto Cabello and Maracaibo are declared open to importation and exportation. The ports of Ciudad Bolivar and Maracaibo will also be open for the transit commerce with the United States of Columbia, in conformity with the existing rules regulating the same. Art. 2.—The ports of Camana, Barcelona, La Vela, Carupano, Guiria, Juan Griego and Pampatar are open to trade for the importation of their consumption and for exportation. Art. 3.—The fluvial ports of Las Tablas Soledad, and Barrancas, in the Orinoco, are open for the exportation of cattle and their products; the port of Cumarebo, Adicora, and Zazarida solely for exportation. Art. 4.—The Custom house of the ports open for the importation of their consumption cannot carry on the coasting trade in foreign goods, &c., with other ports of the Republic whether they be opened to trade or not. Are excepted, the ports of Cumana, Carupano, Guiria, Juan Griego, and Pampatar, which can grant permits (coasting trade), the first to Cariaco, the second to Rio Caribe, the third to Irapa, Yaguaraspors, and other places having communication by river with the Gulf of Paria; and the forth and fifth, for all the Island Margarita. Art. 5.—The customs of San Antonio del Tachira is open for the importations made for the United States of Columbia, and for other purposes defined by law.

Annexed are the traffic returns of some of the American railways for August:—

	Miles Open.	1865. dols	1864. dols	Increase. dols	Decrease. dols
Cleveland and Pittsburgh	218	243,417	264,688	...	21,271

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 4th day of October, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	27,090,285	Government Debt	11,015 100
		Other Securities	3,634,900
		Gold Coin and Bullion	12 440,285
		Silver Bullion	...
	27,090,285		27,090 285

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	10.894 209
Rest	3,823,042	Other Securities	24 170 280
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	6,891,910	Notes	4,362,125
		Gold and Silver Coin	743 552
Other Deposits	13,798.588		
Seven Day and other Bills	593,626		
	39,660,166		39,660,166

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	23,321.786	Securities	34 651,489
Public Deposits	6,891.910	Coin and Bullion	13 183,837
Private Deposits	13,798,588		
	44,012,284		47,835,326

Dated the 5th October 1865. GEO. FORBES, Deputy-Cashier.

The balance of Assets above Liabilities being 3,823,042*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

An INCREASE of Circulation of	£1,288,258
An DECREASE of Public Deposits of	438,100
An INCREASE of Other Deposits of	8,960
No change in Government Securities.	
An INCREASE of Other Securities of	1,647.964
A DECREASE of Bullion of	776,932
An INCREASE of Rest of	11,864
A DECREASE of Reserve of	2,002,497

The changes in the above return are very important, and indicate an exceedingly heavy pressure on the resources of the Bank. The increase in the private securities, and the decrease in the public deposits, owing in the latter case to the quarterly payments on account of the Government, have caused a decline of upwards of two millions in the reserve. The other deposits are almost stationary, showing that the money taken from the Bank has been really wanted.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank-post bills	£ 21,304,102	£ 22,157,670	£ 22,545,407	£ 21,915,817	£ 23,321 786
Public deposits	7.106,524	8,333,779	9,510,057	6,877,591	6 891 910
Other deposits	10,837,643	13,530,122	12,893,642	11,731.746	13,798,588
Government securities	11,413,143	11,252,556	11,141.227	10,597,035	10 3-4,209
Other securities	19,791.293	19,751,704	22,591,537	20,836.860	24,170,280
Reserve of notes & coin	5.987,726	9,628,331	7,737,662	6,294,595	5,105.677
Coin and bullion	12,279,281	16,548,156	14,856,037	12,996,210	13,183,837
Bank rate of discount	5½ p. c.	2 p. c.	4 p. c.	9 p. c.	6 p. c.
Price of Consols	87⅞	94	93⅛	88¼	88⅝
Average price of wheat	76s 6d	51s 1d	42s 2d	39s 8d	40s 10d
Exchange on Paris (short)	25 27½ 35	25 17½ 25	25 22½ 30	25 30 40	25 22½ 35
— Amsterdam ditto	11 18 18½	11 15 15¼	11 17 17⅛	11 18½ 19½	11 18¼ 19⅛
— Hamburg (3 months)	13 10¼ 10½	13 7½ 8	13 8½ 8¾	13 9¾ 10½	13 10 10¼

In the corresponding week of 1855, the revenue and trade accounts were considered satisfactory. A cavalry action between the French and Russians had taken place near Eupatoria, in which the latter had been defeated. Affairs in Mexico were in an unsettled state. The funds continued to decline, and the Bank had raised its rate of discount to 5½ per cent.

In 1862, news of the victory of the Federals, under M'Clellan, at Hagerstown, in Maryland, had been received. The suspension had been announced of the large houses of Faria and Brother of Brazil, and Lindheim and Co. of Vienna, with liabilities in each case exceeding 300,000*l*. Money in London was easy, at little more than 2 per cent.

In 1863, Mr Sumner's anti-British speech at New York had been reported in London. Much interest had been raised in Paris by the attempt of M. Emile Pereire to increase the capital of the Bank of Savoy, and to extend the issue of its notes throughout France. News of a defeat of the Federal General Rosencrans had arrived from America.

In 1864, the new Italian Ministry had been definitively formed. Advices from Japan stated that two English vessels had been fired into by a battery belonging to Prince Chosien. The negotiations at Prague between Austria and Prussia relative to the Zollverein question had been postponed. Advices from Lima had announced the discontent of the population and the commercial stagnation produced by the conflict with Spain. Prince Couza had issued a decree introducing the decimal system of weights and measures into Roumania. In America, General Early had again been defeated by General Sheridan with great loss. The Bank of Prussia had raised its rate to 7 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 8,953,650*l*; in 1862, a deficiency of 6,221,582*l*; in 1863, a deficiency of 9,697,895*l*; and in 1864, a deficiency of 9,105,114*l*. In 1865, the deficiency is 10,371,692*l*.

DISCOUNT AND MONEY MARKET.—The directors of the Bank of England, on Monday, raised their rate of discount from 4½ to 5 per cent., and yesterday adopted a further advance to 6 per cent.

The latter movement was generally unexpected, but is sufficiently explained by the very unfavourable Bank return. Throughout the week the demand for money has been extremely active, and although to-day there has been rather less pressure, the applications, both at the Bank and in the open market, remain numerous. No business has taken place below the official minimum, and in some quarters an advance was asked upon that rate. The following, however, are the current terms for paper of various dates :—

30 to 60 days	6 per cent.
3 months	6 per cent.
4 months	6½ per cent
6 months—Bank bills	6½ per cent.
6 months—Trade ditto	7 per cent.

On the Stock Exchange, the supply of money is moderate, and loans on Government securities are charged 5 to 5½ per cent.

The discount houses and joint stock banks have raised their allowance on deposits with each advance in the Bank rate, the following being the present terms :—

Joint Stock Banks	*4½ per cent.
Discount houses at call	4½ per cent.
Do. with seven days' notice	5 per cent.
Do. fourteen days	5¼ per cent.

* At the London and Westminster 3½ per cent. only on sums below 500*l*.

About 15,000*l* in foreign gold was taken to the Bank to-day, and 30,000*l* yesterday, while 100,000 sovereigns were withdrawn by the National Bank for Ireland.

The biddings for Government bills on India took place at the Bank of England on Wednesday. The proportions allotted were—to Calcutta, 102,700*l*; to Madras, 24,000*l*; and to Bombay, 80,000*l*. The minimum prices were fixed at 1s 11⅜d on Calcutta and Madras, and 1s 11¾d on Bombay. Tenders on Calcutta and Madras at 1s 11⅞d will receive in full, and on Bombay at 2s about 29 per cent.; above these figures, in full.

The return of the Bank of France for the week presents the following changes :—

	£
INCREASE.	
Bills discounted	2,768,000
Circulation	1,936,000
Current accounts	1,460,000
Advances	36,000
DECREASE.	
Bullion	870,000
Treasury balance	2,016,000

The following are the rates of discount in the chief cities of the Continent, showing a rise at Paris, Berlin, and Hamburg :—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	4	4
Vienna	5	5
Berlin	6	6
Frankfort	4½	...
Amsterdam	3½	3½
Turin	5	5
Brussels	4	4
Madrid	9	...
Hamburg	...	6
St Petersburg	6	6½ 7

ENGLISH FUNDS.—Consols this week have fallen nearly 1 per cent. on the adverse state of the money market, and the expectation that the present rise in the rate of discount is likely to continue. The closing quotation for the 10th inst., last Friday, was 89¼ to 89⅜, whence a decline had taken

Digitized by Google

place yesterday to 88⅞ to 89. To-day the market has been especially heavy on the Bank return. Consols opened at 88¾ to 88⅞, and receded to 88⅝ to 88½, the final quotation being at the lowest point of the week. For money the price was also 88⅝ to 88½, while for the new account on the 8th Nov. there were sellers at 88⅞. Reduced and New Three per Cents. were quoted at the official close 86⅝ to 86¾, and India Five per Cents. 104¾ to 105, being again rather lower.

Exchequer bills have again fallen to 9s to 4s discount.

FOREIGN STOCKS.—The foreign market has been depressed, and in a number of cases a reduction has taken place. Danubian, Greek, Mexican, Russian, and Turkish bonds have shown the chief heaviness, the Consolides having in particular receded to 47¾ to 48. Confederate, Italian, Venezuelan, and Egyptian securities are also lower. On the other hand, New Granada bonds have manifested a tendency to recovery. Brazilian scrip advanced at one period of the week to 4½ to 4⅝ premium, but subsequently relapsed to 2⅞ to 3⅛ prem. The new Erie Railway loan left off at 2⅝ to 2⅞ prem.

The closing price of French Three per Cent. rentes on the Paris Bourse, this evening, was 67f 90c for the end of the month, showing a decline of ⅜ per cent. compared with yesterday, and of about ¾ compared with last week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

CONSOLS.

RAILWAYS AND OTHER SHARES.—The advance in the value of money has caused a general decline in the railway market. The principal depression has been in London and North-Western, Midland, Lancashire and Yorkshire, Great Western, and Great Northern descriptions. North-Eastern and Metropolitan, particularly the latter, Caledonian, Great Eastern, and Manchester and Sheffield have been relatively well supported. Business in this department has been brought to almost a standstill, and the tone at the close to-day was exceedingly unfavourable.

In the colonial market, Indian guaranteed stocks have been dull, but Canadian descriptions are firm, and occasionally higher. Foreign shares have been rather flat, especially those of the French and Belgian lines, and of the South-Austrian and Lombardo-Venetian.

There have been few transactions in miscellaneous descriptions, and the general tendency has been adverse. A fair inquiry, however, has prevailed for Credit Foncier and Mobilier. Overend Gurney and Co.'s shares left off at 5¾ to 6 prem.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day:—

FOREIGN EXCHANGES.—Owing to the rise in the rate of discount, the foreign exchanges have shown more firmness, and close generally higher.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—There has been no export demand for bar gold this week, and it is probable that the arrivals specified below will be purchased by the Bank of England. About 60,000*l* has been so bought since our last circular, and 67,000 sovereigns have been withdrawn. The arrivals are:—The Scotia, from New York, with 67,000*l*; the City of New York, from New York, with 44,600*l*; the America, from New York, with 16,000*l*; the La Plata, from the Brazils, with 2,000*l*; the Essex, from Melbourne, with 483,000*l*. The shipments are—Delta, to Alexandria, with 29,000*l*; the Madras, with 1,170*l*. The Melbourne vessels at sea with gold are the Lincolnshire, sailed 22nd July, with 282,000*l*; the John Duthie, sailed 19th July, with 131,000*l*. Both these vessels are now about due. In addition, the shipment of 428,000*l* is advised; particulars will be furnished by the mail due in London next week. 52,140 sovereigns were shipped from Marseilles to Alexandria, per steamer of the 9th instant.

Silver.—Owing to the heavy sales of cotton at Liverpool, there has been a considerable demand for bar silver for the East, and extensive transactions have been entered into, chiefly via Marseilles, at prices ranging from 61 1-16d to 61 3-16d per oz standard; this last is about the current quotation. The small quantity of fine bar silver, ex Shannon, was sold at 61d per oz standard, and the Doré portion at 61⅛d per oz standard. 39,500*l* was shipped to Madras per Delta, which left Southampton yesterday. About 5,600*l* arrived per La Plata from the Brazils.

Mexican Dollars.—The dollars ex Shannon were disposed of at 59⅜d per oz, being a reduction of ¼d from the rates previously current. The market is inactive. The shipments per Delta, from Southamton, yesterday, were 20,000*l* to Hong Kong, 440*l* to Penang, 1,310*l* to Singapore.

Exchange on India for bank drafts at 60 days' sight is for Calcutta 1s 11¾d, and for Bombay 2s per rupee. Owing to the increased demand for remittances to India, the Council drafts disposed of yesterday realised higher rates. Tenders on Calcutta and Madras at 1s 11⅞d received in full, and on Bombay at 2s, 29 per cent. The allotments on 20th September, being 47 per cent. to Calcutta and Madras, at 1s 11⅞d, and 49 per cent. to Bombay, at 1s 11⅞d. The official minimum for these drafts was raised yesterday from 1s 10⅞d to 1s 11⅛d on Calcutta and Madras, and from 1s 10⅞d to 1s 11⅜d on Bombay.

India Government Loan Notes.—Prices are somewhat weaker than last week, and may be quoted 108 to 109 for the 5½ per Cents., 101½ to 102 for the 5 per Cents., and 88 to 89 for the 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price ditto, refinable, 77s 10½d per oz std, last price; Spanish doubloons, 74s 9d to 75s 3d per oz; South American doubloons, 74s per oz; United States gold coin, 76s 2¾d per oz. Silver—Bar silver 5s 1 1/16d per oz std; ditto, containing 5 grs gold, 5s 1⅜d per oz std; Mexican dollars, 4s 11⅜d per oz. Quicksilver, 8*l* per bottle; discount, 3 per cent.

About 200,000 or 300,000 sovereigns are expected to go out to Brazil next Monday, partly on account of the new loan, and partly to pay for cotton.

RAILWAY DIVIDENDS.—At the half-yearly meeting of the Tournay to Jurbise and Landen to Hasselt Railway Company, held at Brussels on the 30th of September, the dividend for the half-year ended the 30th June last was fixed at 6s 8d per share for the dividend shares, and 6s for the preferential shares, payable (less income tax) on the 2nd instant.

The directors of the Bahia and San Francisco Railway Company have issued their report, recommending a dividend of 12s per share, or 3 per cent. for the half-year.

PUBLIC COMPANIES.—At the half-yearly meeting of the Bank of British Columbia, held on Tuesday, a dividend was declared at the rate of 10 per cent. per annum. It is intended

Digitized by Google

to issue 2,500 new shares, in the proportion of one new for one old share.

At the meeting of the Queensland Sheep Company, held on Thursday, the available balance was stated at 2,102*l*, and the payment of a dividend of 5s per share, free of income tax, was recommended. After a strong discussion, however, the following resolution was carried:—"That the report and accounts be not received and adopted, but that the same be referred back to the directors for amendment, and that the dividend be not paid in the interim." The directors concurred in this motion,

A meeting of the Locomotive Cotton Press Company took place on Thursday, when the resolution passed at a previous meeting, in favour of winding up the undertaking voluntarily, was confirmed.

The balance sheet of the Ottoman Financial Association shows a gross profit for the past half-year of 23,292*l* 19s 8d. The suspension of the agents at Smyrna has compelled the directors to carry over the actual balance.

The Metropolitan Railway Warehousing Company (Limited) is announced. The proposed capital is 600,000*l*, in shares of 20*l* each. "This undertaking," says the prospectus, "is introduced under the auspices of the Metropolitan Railway Company to supply the want of warehouse and business accommodation in the metropolis, in connection with the railway system, and to take advantage of the opportunity offered by the unoccupied ground near Farringdon road."

The Tasso Brazilian Gold Company, with a capital of 200,000*l*, has been formed for the purpose of working certain mines in Northern Brazil. The assays hitherto made of the quartz imported from that quarter show large results.

The prospectus of the Merchants Company, Limited, has been issued. It is proposed to raise 500,000*l* for the purpose of carrying on the business of merchants under the Joint Stock Companies Act, with limited liability.

Messrs Brown, Shipley, and Co. have announced the dividend, due the 10th inst., on the Panama Railway Company's 1st mortgage bonds,

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.22½ per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is nearly 1-10th per cent. dearer in Paris than in London.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.6½ per 1*l* sterling. Standard gold at the English Mint price is, therefore, at about the same price in London and Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 109¼ to 109⅝ per cent. At this rate there is no profit on the importation of gold from the United States.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended Sept. 30, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	73,888 0	40 10
Barley	19,910 6	29 11
Oats	7,132 6	20 2

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

Corresponding week in	Quantities Sold. Wheat.	Barley.	Oats.	Average Prices. Wheat.	Barley.	Oats.

COMMERCIAL EPITOME,

FRIDAY NIGHT.

The trade for wheat at Mark lane, to-day, ruled quiet. In home-grown samples, sales progressed slowly at the rates current on Monday, whilst foreign qualities were in limited request at late prices. Barley—of which there was a very moderate supply on offer—sold slowly at late rates. Malt was in slow request at previous currencies. Oats were in good supply, and the trade ruled quiet at late rates. Beans and peas met a slow sale on former terms. The flour trade was steady at full currencies. This week's imports amount to 36,370 quarters of wheat, 7,720 barley, 42,460 oats, 390 sacks and 6,300 barrels of flour.

Both at Liverpool and Wakefield, this morning, the corn trade generally was very quiet. Prices, however, ruled firm.

On Friday last, upon the declaration of the stock, the cotton market at Liverpool became very animated, and an advance of ¼d per lb upon the prices of the day previous was willingly paid. The demand continued brisk until Monday, when the Bank raised their rate of discount ½ per cent. This caused a slight pause. When the Bank deemed it advisable to still further advance the rate to 6 per cent., the market again became depressed, and to-day's prices are equal to the quotations of Monday last. The total sales of the week amount to 179,000 bales, of which spinners have taken 70,000 bales; speculators, 99,000 bales; and exporters, 10,000 bales. To-day's stock is 218,000 bales.

Via the Persian Gulf, we have intelligence from Bombay to Sept. 25. At that date the cotton trade was firm: Broach was quoted at 10.897d, and Dhollerah at 11.504d per lb. Freight to Liverpool was 20s per ton.

At Calcutta, during the fortnight ending Aug. 21, there was a continuance of the demand for cotton on Chinese account, and several shipments had been made to that quarter. The inquiry for export to Europe was tolerably extensive, and prices of all qualities had an upward tendency.

We have letters from Madras to Aug. 25. For nearly all descriptions of cotton, the trade was firm, on higher terms. Western produce was quoted at 10d, Salem and Coimbatore ditto, at 8d to 8⅞d per lb. The shipments from Aug. 5 to Aug. 11 amounted to 5,396 bales.

In China, during the fortnight preceding the date of our latest advices, scarcely any business was transacted in cotton for shipment to Europe.

The rise of 1½ per cent. in the rates of discount at the Bank of England has been productive of less activity in the markets for colonial and foreign grocery produce. Speculation has been almost entirely checked; but as regards prices, a fair amount of firmness has continued to prevail. In sugar, the transactions have fallen off considerably, nevertheless the recent advance in prices is supported. Tea, coffee, cocoa, and rice have, on the whole, ruled steady. Last week, duty was paid in London on 1,137,946 lbs, whilst the export for the week ending Sept. 28 amounted to 411,361 lbs, making a total of 1,549,307 lbs, against 1,246,691 lbs last year.

Advices from the leading Chinese ports report a steady trade for all good and fine teas, with considerable firmness in prices, but at the same time a heavy market for inferior qualities, at barely late rates. The export to Great Britain, from June 1 to Aug. 11, amounted to 34,294,800 lbs, against 44,220,800 lbs last year, being a decrease of 9,926,000 lbs.

From Colombo, to Aug. 31, we learn that trade in coffee was heavy, on rather easier terms. Plantation produce sold at 13s per bushel; native do., unpicked, 47s; picked and dried do., 53s per cwt. The following table of shipments is from Messrs Fryer, Schultze, and Co.'s circular:—

EXPORTS of COFFEE from CEYLON from Oct. 1 to Aug. 29.

There has been less activity in the wool trade, yet prices have continued firm. Hemp commands higher rates—clean Russian being worth 30*l* 10s to 30*l* 15s per ton. Flax, jute, and coir goods fully support late prices.

According to the circulars of the brokers, considerable business was transacted in silk, last month, and, in some instances, an improvement took place in prices. The total stock on the 1st inst., was 18,150 bales China, against 14,558 bales; and 4,812 bales Bengal, against 5,888 bales last year.

During the fortnight ending Aug. 4, the silk trade at Shanghai was active, and the settlements amounted to about 4,000 bales. In prices, an advance of 10 to 25 taels took place. No. 3 Tsatlees were quoted at 515 taels per picul. The total export since the opening of the season had been 12,441 bales, against 4,299 bales last year. The following were the quotations:—Tsatlee, Chops No. 1, 80s 7d; ditto No. 2, 29s 6d; ditto No. 3, 28s 4d; market, No. 3, 27s 2d to 28s 1d; ditto No. 4, 26s 2d to 26s 11d; ditto No. 5 and com., 24s 7d to 25s 10d. Taysaam, chops, No. 1, 25s 10d; ditto No. 2, 24s 10d; ditto No. 3, 23s 3d to 23s 9d; ditto, 4, 5, and com., 21s 5d to 23s. Yuenfs, ditto No. 1, 25s 7d to 26s 2d; ditto No. 2, 24s 7d to 25s 1d; ditto No. 3, 23s 6d to

Digitized by Google

24s; ditto No. 4 and com., 21s 5d to 22s 5d. Hainings, 21s 5d to 25s 7d. Hangchow Tsatlee, 24s 7d to 26s 2d. Sewhings, 21s 11d to 24s. Laeyongs, 19s 10d to 20s 10d per lb.

We have advices from Yokohama to July 26. The silk trade at that date was very firm, and an advance of 30 dollars per picul took place in prices. The shipments during the preceding fortnight had been 545 bales. Mybash was quoted at 715 to 730 dollars per picul.

As regards the state of the leather trade last month, Messrs Powell and Co. observe:—A better feeling has pervaded the leather market. The demand, more particularly for heavy sole leather, has probably been retarded by the continuance of dry weather, but the opinion that prices of most articles are at their lowest seems generally to prevail, and that the stocks on hand, which have not recently increased, will prove no greater than the winter's consumption will require. Raw Goods—The tone of the market has been firm.

Messrs Grant, Hodgson, and Co. write as follows as regards the tobacco trade last month:—During the month the market has presented a far more animated appearance, and a better demand for all descriptions of American tobacco has prevailed than for some months past, resulting in considerable sales both for home trade and exportation. There still continues a good inquiry for leafy spinning classes, both of leaf and strips, for which top prices are asked, and freely obtained. Imports, 1,532 hhds. Deliveries, 976 hhds, against 1,046 hhds in the corresponding month of last year. Stock, 20,534 hhds, against 17,649 hhds in 1864; 17,020 hhds in 1863; 22,373 hhds in 1862; 27,541 hhds in 1861; and 20,693 hhds in 1860.

We extract the following from Messrs Churchill and Sim's circular:—

STOCK of TIMBER, DEALS, &c., at the PUBLIC DOCKS on Oct. 1.

	1865.	1864.	1863.
Foreign deals ..... pieces	1,705,000	1,159,000	1,259,000
Battens and boards	1,707,000	1,369,000	1,416,000
Fir timber ..... loads	73,300	38,400	63,000
Colonial pine deals & battens. pieces	1,063,000	499,000	1,014,000

Pine timber ..... loads	14,300	13,800	14,100
East Indian teake	18,700	9,700	20,600

A very moderate business has been done in metals. The principal change in prices is in Scotch pig iron, which is now quoted at 57s 9d cash, mixed numbers. Copper and lead command more attention, and their value has a tendency to improvement. The following table relates to Banca tin in Holland:—

	1865 slabs	1864 slabs	1863 slabs
Import in September	6,120	21,644	11,765
Previously this year	131,968	111,307	79,161

Quotation, Sept. 30	56½fl	61fl	74fl

The oil trade, on the whole, has ruled steady. Linseed oil is quoted at 37s 3d to 37s 6d; foreign refined rape, 49s per cwt. Turpentine is dull at 44s for French spirits, on the spot. American refined petroleum, 3s 1d to 3s 2d per gallon. Tallow is very firm, and new P.Y.C. is quoted at 48s per cwt on the spot. At St Petersburg, the price is 51 silver roubles.

On the whole, the state of trade at New York, during the week ending Sept. 23, was steady. Speaking generally, there was no activity apparent, and as compared with the preceding week, the transactions exhibited a slight falling off. But prices of most articles ruled firm, with, in some instances, a tendency to improvement. Imported cotton and woollen goods, especially, were firm; and were held at higher rates, whilst most descriptions of grocery produce commanded extreme quotations. The fluctuations in gold were from 143¼ to 144 per cent. The stock of bullion in the banks on the 16th ult. amounted to 2,920,900*l*, whilst the balance in the Sub-Treasury was 14,268,160*l*. The shipments of gold, from Jan. 1 to Sept. 16, reached 4,216,360*l*, against 6,677,330*l* last year; 6,092,880*l* in 1863; 8,271,070*l* in 1862; 652,990 in 1861; and 7,584,370*l* in 1860. During the week ending as above, the money market was easy, the quotation for the best short-dated paper being 7 per cent.

THE COTTON TRADE.

LIVERPOOL—Oct. 6.

On Saturday the sales were unusually extensive, with prices still rising, and on Monday also a large business was done at extreme quotations, the advance in the Bank rate to 5 per cent. having been too generally anticipated to have much influence. On Tuesday and Wednesday the comparatively quiet state of the Manchester market was followed by a reaction in Liverpool and some irregularity and decline. Yesterday the market opened with fresh activity and enhanced quotations, and 20,000 bales were sold, but after the announcement of the further advance in the Bank rate to 6 per cent. business was checked and prices became weaker. Extensive transactions in Sea Island have again been effected, and quotations of the higher grades are raised 2d, and of the lower 1d per lb. American, continuing scarce and in general request, advanced fully 3d per lb up to Monday, but closed about 1d below the highest point. The excited demand caused an advance in Brazil of fully 3d per lb, and the quotations are still 2½d to 3d over those of last week. Egyptian has fully shared in the fluctuation of the market, having attained an advance of 3½d per lb in the early part of the week, but closing at not more than 2½d per lb above last Friday's quotations. The supply of Smyrna has been limited, and prices advanced 2d to 3d per lb, closing about 2d above last week. Attention has been much directed to East India descriptions, which advanced 3d per lb in almost all kinds; the extreme quotations current on Monday are not now obtainable within ½d to 1d per lb, but the supply is limited, especially in the medium qualities with staple. Bengal and Scinde are about 2d to 2½d higher, but also close flatly. China and Japan are very scarce, at 2d to 2½d advance, and are held with great firmness.

To arrive, the transactions have been very numerous and extensive, at prices quite up to the advance upon the spot, but closing easier. The quotations were, yesterday: for Pernam, first quality, ship named, 23d per lb—Maceio, fair average, ship named, 21½d—Egyptian, fair open, at sea, 23d; ship named, 22½d and 23½d; middling fair, shipping or shipped, 22d; new, fair open, December or January shipment, 22½d; Oomrawuttee, fair and fair new merchants', July sailing, 17½d; ship named, 16½d; Western Madras, fair, June sailing, 16¾d; Tinnevelly Madras, fair, September shipment, 15½d; Bengal, fair new merchants', August sailing, 12d per lb.

The sales of the week amount to 179,190 bales, including 98,800 on speculation, and 10,290 declared for export, leaving 70,100 bales to the trade. The sales to-day will probably amount to fully 20,000 bales at advancing prices.

The actual export this week is not deducted from the stock, as it was included in the stock declared on the 29th ult.

LONDON—Oct. 6.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The declaration of stock in Liverpool on Friday caused an active demand at an advance of ¼d to ⅜d per lb. On Saturday and Monday there was considerable excitement, and a large business concluded at a further advance of ⅜d to 1d per lb; on that day the Bank rate was raised to 5 per cent., which, together with the small quantity offering on the spot, limited transactinas. Yesterday the market opened well, but the subsequent action of the Bank, in raising the rate to 6 per cent., had a depressing effect, and we close at barely Monday's prices. For arrival, a considerable business has been done at 1½d to 2d dearer than last week's quotations.

NEW YORK—Sept. 23.

NEW YORK, Sept. 23.—There has been a fair demand for cotton this week, and prices have ruled firm. The quotation for middling upland is 44½ cents per lb. The arrivals are about 18,000 bales, chiefly from New Orleans. Annexed are the quotations:—

	NEW YORK CLASSIFICATION. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c
Ordinary	37	37	37	37
Good ordinary	40	40	40	40
Middling	44½	45	45½	46
Good middling	47	48	49	50
Middling fair	50	50	52	52

MARKETS IN THE MANUFACTURING DISTRICTS.

There has been a good business doing in piece goods during the week, and prices have been supported. The shipments to India have continued on a very large scale. The demand for iron may be considered steady. The coal trade is unusually brisk, both for export and home use.

MANCHESTER, Oct. 5.—All current staples have this week marked higher quotations, notwithstanding the successive advances of the Bank rate. In the beginning of the week great excitement was manifest, and a considerable business was done at rising values, both on speculation, and for immediate wants. Yesterday and to-day, however, inquiry has sensibly slackened, and speculators who have laid in at lower rates are offering to re-sell. As the majority of producers are so engaged as to be quite unable to accept fresh orders, these small re-sale lots are the only source from which buyers can draw their supplies. Sellers, in general, also ask rates in proportion to the value of cotton, which no buyers are disposed to give. Hence transactions are becoming curtailed.

BRADFORD.—The unexpected further rise in the rate of discount has had a very quieting effect upon our wool market. The bouyancy and animation of the last few weeks has disappeared, yet prices are not as yet appreciably weakened. The effect upon the yarn trade has been of the same nature. There is also somewhat of a lull in pieces.

LEEDS.—There has been a slight improvement in the woollen cloth markets. The chief sales have been in seasonable fabrics of medium qualities, including a good portion of meltons in dark colours, and a fair proportion of tweeds and union cloths. The flax trade is active, and the prices of the raw material are firm. For threads and line yarns there is a steady demand, and quotations are steady.

ROCHDALE.—The flannel trade keeps quiet. The Yorkshire goods trade is far from being active, but prices are steady. Wools also, likewise all classes of flannels, keep steady, showing no sign of any probable abatement.

LEICESTER.—There is continued activity in the hosiery trade. Both plain and fancy hosiery are in demand, and the workpeople are fully engaged. Worsted yarns are firm, and spinners are working full time. In wools there is more firmness.

NOTTINGHAM.—The lace trade is without much alteration. There is a little doing in silk muslins and quillings, and a few small orders are in hand for black laces. The hosiery trade remains exceedingly active. All branches are well engaged.

SHEFFIELD.—The orders from America for cutlery and tools increase, and a good business is now being done with the United States in finished goods. The cutlery trade is busier than for a long time past.

WOLVERHAMPTON.—The iron trade continues steadily active. There is no falling off, but rather an improvement in the demand from most quarters. The home consumption is large, and the foreign demand fair, while railway requirements appear to be heavy.

BIRMINGHAM.—The trade of this town is steady; there are complaints of quietness in some quarters, but in almost all the staple trades a good average business is being done, and, with very few exceptions, manufacturers are working upon orders.

HUDDERSFIELD.—There has been little alteration in the character of the demand, black doeskins and woollen cords continuing in request, and selections, though of a limited nature, being made from better qualities of fancies, while operations have also taken place, but cautiously, in medium descriptions and low goods. The demand for heavy goods is restricted by the warm weather.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Sept. 23.—The demand for flour and wheat has ruled active, and considerable business has been done. Prices have improved. State flour is quoted at $7.10 to $8.25; Ohio, $8.60 to $10.90; Michigan, Indiana, Wisconsin, $7.10 to $8.35; Missouri, $11.40 to $14.50; Canada, $7.95 to $10.90 per barrel. Wheat—Chicago spring, $1.54 to $1.65; Milwaukee Club, $1.56 to $1.65; amber Milwaukee, $1.65 to $1.66; amber State, $2.6 to $2.8. Corn—Western mixed, 93½c to 94½c; unsound ditto, 89c to 93c per bushel.

EXPORT of BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND since September 1, 1865.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Notwithstanding that the supplies of English wheat on sale here, this week, have been very moderate, the demand for all except the finest samples—which have realised full prices—has been very inactive, at barely late rates. The imports of foreign wheat have been on a full average scale, and, owing in some measure to the advance in the Bank rate for money to 6 per cent., sales have progressed heavily, at barely last week's currency. The show of English barley has been trifling—of foreign tolerably good. Fine qualities have been disposed of at full quotations, but grinding and distilling sorts have commanded very little attention. In prices, however, no actual decline has taken place. There has been a good sale for malt—the supply of which has been seasonably extensive—at previous rates. Good sound oats have changed hands somewhat freely, at full prices; but inferior kinds have met a dull inquiry. The few samples of beans and peas on the stands have moved off slowly, on former terms. The sale for both English and foreign flour has fallen off, yet prices have been fairly supported.

The following return shows the extent of our imports of grain, &c., into London during the past quarter, compared with the corresponding period in the last two years:—

	Wheat. qrs	Barley. qrs	Oats. qrs	Beans. qrs	Peas. qrs	Flour. sacks	Flour. brls
English	67201	6498	14091	2767	3662	198851	...
Scotch	...	1415	3767	...	...	...	...
Irish	...	45	7801	...	...	...	...
Foreign	276134	84991	730890	10581	9906	4402	39890
Total	343335	92349	756549	13348	13568	203253	39890
— 1864	318265	59696	560271	14830	18422	158868	171683
— 1863	340943	76755	502437	30093	23309	164695	225544

The supply of English wheat on sale at Mark lane to-day was very moderate. The trade, however, was slowly at the rates current on Monday. Foreign wheat was in fair supply, and slow request, at previous quotations. For barley, oats, beans and peas, the trade ruled quiet, on former terms. Flour was in fair demand at late rates.

Most of the continental markets have been steady for fin wheat, as well as for most kinds of spring corn, at full quotations. In America, the sales of produce for shipment to England have been very moderate of late.

Harvest-work has now been brought to a pretty general close in this country. The yield of wheat is still considered a fair average. As yet, however, the quantity thrashed out is not large.

In Scotland, there has been a fair sale for fine wheat, barley, and oats, and the quotations have been well supported. Other kinds of produce have met a slow inquiry.

The Irish markets have been scantily supplied with wheat, in which only a limited business has been passing on former terms. In the value of barley and oats, very little change has taken place.

Mr George Dornbusch thus reports the state of the floating grain trade:—Arrivals at ports of call since last Friday, 68 cargoes, viz., 30 wheat, 23 maize, 3 barley, 1 beans, 2 millet-seed, 1 linseed, 3 cotton-seed, and 2 oilcake. The trade has not been so active a last week, still prices have been steady. Sales:—Wheat—24 arrived cargoes sold: Ghirka Taganrog, at 41s to 41s 6d; Odessa, at 41s to 42s 3d; Nicolaieff, at 41s; Berdianski, at 40s 6d to 42s 6d; Marianopoli, at 41s and 43s, all 492 lbs; Ghirka Taganrog, on passsage, at 41s 6d to 42s; hard Odessa, at 42s; Ghirka Taganrog, shipped or shipping, at 42s; Ghirka Odessa, shipped or to be shipped, at 43s and 43s 3d; Banah, from Trieste, at 42s, and hard Odessa to be shipped, at 42s. Maize—14 arrived cargoes sold; Odessa, at 30s; Galatz and Moldavian, at 31s and 30s 3d per 492 lbs; Kustendje, Bulgarian, Wallachian, and Ibrail, at 27s 9d to 29s 3d per 480 lbs. Barley—1 arrived cargo sold; Odessa, at 21s 1½d per 400 lbs. Oats—2 cargoes arrived from Nicolaeiff, at 18s 9d per 304 lbs. Linseed—An arrived cargo from Marianopoli, at 59s 3d per 424 lbs. Cotton-seed—2 arrived cargoes of Egyptian from Alexandria, at 7*l* 7s 6d per ton, and seed to be shipped, at 7*l* 7s to 7*l* 12s 6d per ton.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market opened firmly, but has since been unfavourably influenced by the sudden advance upon the Bank rate to 6 per cent. There is now less speculative business doing, but the trade have taken fair supplies of good to fine quality. Low sugars are unchanged. There were 1,867 casks West India sold in the three days, including various parcels by auction. Barbadoes, 35s to 41s; Jamaica, 31s to 36s 6d per cwt. The deliveries continue very large, being nearly 5,700 tons last week, making the total increase over the previous year's 41,931 tons.

Mauritius.—9,196 bags, offered by auction, partly sold: grainy and crystallised, 36s to 41s; muscovado sorts, brown and yellow, 31s to 37s. A moderate quantity has sold by private contract. A cargo of grainy has sold at 38s 6d per cwt, lying in Havre.

Bengal.—528 bags Gurputta date, offered by auction, were taken in at 37s to 37s 6d. Privately, several parcels have sold: Gurpatta date at 35s to 38s 6d; white Benares, 39s 6d per cwt.

Madras.—1,015 bags brown and yellow sold by auction at 29s 6d to 35s 6d. A parcel of grainy Jaggery has sold privately at 29s 6d per cwt.

Penang.—3,371 bags muscovado sorts sold at 34s 6d to 36s per cwt for brown to middling yellow.

Natal.—580 bags sold at 29s to 36s per cwt.

Foreign.—By private contract, on the spot, 900 casks Porto Rico have sold at 37s 9d to 38s; 3,800 bags brown Pernambuco, at 33s; 7,000 bags unclayed Manilla, at 30s 6d to 31s; 22,200 bags clayed, at 33s 6d to 34s; 3,700 boxes Havana, at 38s to 38s 6d; 450 cases brown Bahia, 32s 9d. 250 casks Porto Rico offered by auction yesterday partly sold at 34s to 41s per cwt.

Refined.—Dry goods are in moderate demand, and the common qualities may be quoted 44s 3d. Crushed and pieces sell readily; the former up to 43s 6d per cwt for fine quality.

MOLASSES.—150 puncheons West India have been disposed of: St Kitt's at 16s 6d, St Vincent at 15s 6d per cwt.

RUM.—Most common kinds are quiet, but the market is not freely supplied, and prices remain steady.

COCOA is dull. 105 bags Trinidad offered by auction only part sold: good at 81s to 86s 6d per cwt.

COFFEE.—The market has been less animated than last week, and there is a continued large supply of plantation Ceylon offering. Yesterday the heavy public sales passed off quietly, and the late extreme rates were not in all cases obtained. 1,250 casks 520 barrels and bags have

Digitized by Google

partly sold: low middling to fine, 79s to 90s. 1,232 bags native mostly sold from 65s to 68s; fine, 70s 6d; 254 casks were chiefly withdrawn. 636 cases 1,465 bags East India sold at the full rates, from 74s 6d to 93s; ordinary Mysore and Malabar, 69s to 71s 6d. 116 bales inferior Mocha sold at 80s to 81s 6d. 5,562 bags Santos were bought in at 61s to 65s. 221 bags Guatimala part sold at 68s to 73s 6d per cwt.

TEA.—The market is steady. At the public sales on Tuesday to yesterday inclusive, there were 24,880 packages submitted, of which 17,216 packages sold, nearly all printed "without reserve." Common to fair red leaf congou obtained 1s to 1s 3¾d; common black leaf, 11½d to 1s 1d. Two breaks fair souchong, 1s 2¼d per lb.

RICE.—Scarcely any business has been done in soft grainy kinds by private contract. 1,928 bags sea-damaged Necrancie Arracan offered at auction, sold from 10s 6d to 10s 9d. A limited quantity of white Bengal is reported privately at 14s 7½d to 15s. 1,500 bags old Necrancie Arracan, at 10s 3d per cwt.

IMPORTS and DELIVERIES of RICE to Sept. 30, with STOCKS on hand.

Deliveries	12100	12390	15930	14210
Stocks	4918	6340	8610	9290

METALS.—A steady inquiry has prevailed for most kinds, but the sudden change in the money market unsettled business yesterday. Copper is more readily saleable, at prices which could not be obtained lately. Welsh and Staffordshire iron remain steady. Tin has further advanced. Straits last sold at 91*l* cash, and 93*l* to arrive. The market is now lower. Tin plates are dearer and in great demand. The stock of spelter amounts to 6,810 tons, against 11,600 tons in 1864. Sales are reported at lower rates, viz., 21*l* to 21*l* 10s per ton. Lead is active.

HEMP.—The market is active. Russian has advanced. Petersburg clean, 32*l* 10s, owing partly to speculative influences. A good deal of business has been done in Manilla at 36*l* to 38*l*, and 39*l* to 40*l* per ton paid for Sorsogon. Stock, 3,270 tons; against 5,100 tons last year and 7,030 tons in 1863.

JUTE.—Transactions by private contract have been of fair extent at higher rates. 3,265 bales, on Wednesday, sold rather dearer for common to middling qualities, from 12*l* to 16*l* 5s; fair to good realised 18*l* to 20*l* 10s per ton.

OILS.—Linseed oil has again advanced, viz., to 37s 6d on the spot. Forward sales reported at 3d to 6d less. Rape is dull, and lower, the late speculation being covered. Foreign refined, on the spot, 49s to 49s 6d; brown, 47s 6d. Palm, influenced by the tallow market, has further advanced: fine, 42s to 42s 6d. Cocoa-nut firm: Cochin, 50s; Ceylon, 47s to 47s 6d per cwt. Sperm has risen in value to 115*l*. Olive continues active at much higher rates, ranging from 50*l* 10s to 55*l* per tun, on the spot. Several floating cargoes have sold.

LINSEED is firm, and the supply much reduced. Calcutta, 61s 6d; Bombay, 63s per quarter.

SPIRITS TURPENTINE.—French drawn, 44s per cwt.

PETROLEUM.—American refined quoted 3s 3d.

TALLOW.—The market is firmer and closes at an advance. 1st sort new Petersburg Y.C., 48s to 48s 3d on the spot and to the end of the year. January to March, 49s 9d to 50s; March only 50s 6d per cwt. The deliveries continue large.

PARTICULARS OF TALLOW.—Monday, October 2, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is quiet to-day. Several parcels West India sold by auction, making to-day's business 728 casks, and for the week 2,600 casks. Barbadoes went as high as 40s per cwt. 3,107 bags Mauritius brought very full prices. Privately, 1,000 casks Porto Rico sold at 38s 3d to 40s. 3,000 bags Bengal at 35s per cwt.

COFFEE.—782 cases 937 bags East India and 259 casks 569 barrels and bags plantation Ceylon partly sold on hardly previous terms.

SPICES.—1,721 bags Singapore pepper offered by auction were bought in at 3½d. 467 bags good Tellichery withdrawn at 4d. 68 bags pimento sold at 3d to 3½d per lb.

SALTPETRE.—1,017 bags Bengal sold by auction at 24s, refraction 6½ to 3¼ per cent.

SHELLAC is offered freely, and declined 5s per cwt to-day.

TALLOW.—Town was raised to 50s to-day. 763 casks, by auction, went 1s to 1s 6d dearer than on Friday last, including Australian beef, at 42s 6d to 42s 9d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been very quiet; no alteration as respects prices. Dutch crushed remains steady at former prices.

DRY FRUIT.—Fine new currants are in good request, while low new is at a discount. Old are steady, considering the large stock. Valencia raisins have advanced 2s to 3s, but now are dull: supply short. Figs, if fine, realise high rates, but low and medium are not inquired for, except at a great reduction.

COLONIAL WOOL.—Market firm at closing rates of the late sales.

FLAX.—Market firm.

HEMP.—During the week a large amount of business has taken place, and at an advance of 2*l* to 3*l* per ton. Market very firm.

SILK.—The silk market active. Prices firm, with rather upward tendency for fine and good silk.

TOBACCO.—There has been a brisk demand for all descriptions, and inquiries exist for coloury and leafy sorts, both of American and other growths. Prices generally are firmer.

METALS.—There is an appreciable movement in our market, in most branches. Copper is in good demand for all kinds, and foreign is mostly 1*l* to 2*l* dearer. Iron is steady, all makers being fairly supplied with orders. Tin rallied very materially, under the influence of some heavy buying for America, but that demand having ceased, the market is quieter. Spelter is in good request at quotations. Lead is rather active, and prices are firmer. Tin plates continue to be in full demand, with makers shy of further engagements.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	50	0
Fat by ditto	2	5
Yellow Russia	46	6
Melted stuff	37	6
Rough ditto	21	0
Greaves	20	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Oct. 2.—The total imports of foreign stock into London, last week, amounted to 27,039 head. In the corresponding week in 1864 we received 17,346; in 1863, 17,820; in 1862, 12,898; in 1861 12,734; in 1860, 8,743; and in 1859, 7,697 head.

There was a very large suply of foreign Beasts and Sheep on offer here to-day, in fair combation. Sales progressed slowly at 2d to 4d per 8lbs less money. The arrivals of Beast freh up from our own grazing district were only moderate. The recepts from Scotland were trifling, but a fair suply reached us from Ireland. Most breeds came to hand in but middling condition. The beef trade was heavy at a decline in the quotations compared with Monday last of from 2d to 4d per 8lbs. The general top price was 5s 2d, bnt a few cooice breeds realised 5s 4d per 8lbs. Fron Lincolnshire, Leicestershire, and Northamptonshire we recieved 1,300 Sothern, &c; from other parts of Engerland 300 of various breeds; from Scotland, 12 Scots and crosses; and Ireland 370 oxen, cows, and heifers. The total suply of sheep was very large; English breeds, however, were by no means plentiful, but their quality was tolerably good. The mutton trade was in a depressed state, and the quotations gave way 2d to 4d per 8lbs. Prime downs and half-dreds sold at 6s 4d; in some few instances at 6s 8d per 8 lbs. We were fairly supplied with calves, which moved off slowly on rather lower terms. The highest figure was 5s 6d per 8 lbs. The supply of pigs was rather limited. High prices were generally demanded; but the pork trade was inactive at from 4s to 5s 4d per 8 lbs.

SUPPLIES.

	Oct. 3, 1864.	Oct. 2, 1865.
Beasts	6740	6550
Sheep	26350	25650
Calves	406	454
Pigs	690	510

THURSDAY, Oct. 5.—Although the supply of beasts on sale in our market to-day was very moderate, the demand for all kinds ruled heavy at Monday's decline in the quotations. The top figure for beef was 5s 2d per 8 lbs. The show of sheep was rather limited; nevertheless, sales progressed slowly at late rates. A few very superior Downs sold at 6s 6d per 8 lbs. We had a slow inquiry for calves, the supply of which was moderate, on former terms—viz., from 4s 4d to 5s 6d per 8 lbs. The pork trade was much less active than last week, and prices were with difficulty supported. Milch cows were very dull.

Per 8 lbs to sink the offal.

HAY MARKETS.

THURSDAY, Oct 5.—Moderate supplies of hay and straw are on sale, and the trade rules heavy, on easier terms.

Per load of 56 trusses.

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Hay	80 to 105	85 to 110	30 to 105
Clover	90 to 126	95 to 130	90 to 126
Straw	26 to 33	28 to 34	26 to 33

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 6.—The inquiry continues fair both for home consumption and export, and prices are well supported. Public sales of East India wool, comprising about 18,000 bales, are announced to begin on Wednesday, the 18th inst., to be followed by the usual quantity of sundry other kinds of foreign wools.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 6.—Moderate attendance. Wheat and flour business not active; prices very firm. Oats and oatmeal scarce, and rather dearer. Beans slow. Barley and peas unaltered. Maize steady, at late rates.

The Gazette.

TUESDAY, Oct. 3.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 23rd of September, on 12,252 miles, to 740,058*l*, and for the corresponding week of last year, on 11,915 miles, to 696,392*l*, showing an increase of 337 miles, and of 43,666*l*. The gross receipts on the 14 principal railways amounted in the aggregate, on 8,771 miles, to 610,887*l*, and for the corresponding week of 1864, on 8,474 miles, to 582,476*l*, showing an increase of 297 miles and an increase of 28,411*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Oct. 2.—The share market was dull, and all the descriptions except mines, banks, and American securities, closed with a flat tendency, particularly English railways, of which South-Western, South-Eastern, North-Eastern (Leeds), and ditto (York), declined ½ each, ditto (Berwick) and Great Northern 1 each, ditto (A stock) a further 1, North Brittish further 1½, North-Western and Midland a further ¼ each, and Lancashire and Yorkshire and Great Western a further ¾ each; and ditto (Newport) relapsed 1. In colonial, Grand Trunk of Canada (Equipment bonds) advanced 1. In foreign, Mexican advanced 1; and Northern of France declined ½, Antwerp and Rotterdam and Dutch-Rhenish ¼ each, and Great Luxembourg a further ½. In British mines, Chiverton and Great Wheal Vor improved ½ each. In foreign mines MontesAureos recovered ½, St John del Rey advanced 1½, and Frontino, Gold declined ½.

TUESDAY, Oct. 3.—In the share market to-day the amount of business was small, but there was a general tendency to firmness at the close, particularly in English railways, of which Great Northern (A stock) recovered 1½, North-Western 1, Lancashire and Yorkshire ¾, and Great Western, South-Western, North Brittish, and South-Eastern ½ each, and Midland ¼; Metropolitan improved ½, and Bristol and Exeter declined 1, and Metropolitan District ½, the latter closing at 103½ to 104½. In colonial, Buffalo and Lake Huron recovered ¼, and Great Indian Peninsula and Great Western of Canada (5½ per cent. bonds) ¼ each; and ditto (6 per cent.) advanced 2, ditto (new shares) ¾, and ditto (paid up) further ⅝. In foreign, Great Luxemdourg recovered ⅛. In American, Virginia (sterling bonds) advanced 2½, and ditto (6 per cent.) a further 1; Illinois Central shares relapsed ½, and Erie shares (paid up) receded ½, and United States (5-20) a further ½.

WEDNESDAY, Oct. 4.—In the share market to-day only an occasional buisness was done, but Canadian and American securities closed with firmness; foreign railways were inclined to weakness, and the other descriptions showed no average alterations. In English railways, Great Eastern improved ½, Lancashire and Yorkshire a further ¼, North British a further ½, and Chatham (Metropolitan Extension) 1; ditto (original) declined 1, and Metropolitan District remained at 103½ to 104½. In colonial, Grand Trunk of Canada advanced ½, ditto (1st, 2d, and 4th preference) 1 each, Great Western of Canada (5½ per cent bonds) a further 1, and ditto (shares of both descriptions) a further ⅜ each; and Great Indian Peninsula relapsed ½. In British mines, Clifford Amalgamated, Great Wheal Vor, and Wheal Trelawney advanced ½ each, and North Wheal Crofty ¼; East Bassett relapsed 3, and Chiverton further declined 1½. In foreign mines, Cape Copper and St John del Rey improved ½ each; and Don Pedro North del Rey ⅛, and Washoe Gold receded ½ each.

THURSDAY, Oct. 5.—In the share market to-day dulness was the prevailing feature, and, with the exception of mines and banks, all the descriptions closed with a flat tendency. In English railways, Lancashire and Yorkshire and Great Eastern relapsed ½ each; and ditto (East Anglian), Great Western, and Metropolitan (extension) declined ½ each, ditto (new) ¼, ditto (original) a further 1, North-Western and Midland ¾ each, ditto (Birmingham and Derby) and Great Northern 1 each, ditto (A stock) 2, North-Eastern (Berwick) ¼, and ditto (York) ¾. In colonial, Great Western of Canada (paid-up) relapsed ⅛, and ditto (new) ¼; and Bombay and Central India receded ½, and East Indian a further ⅛. In British mines, East Caradon, East Lovell, Tin Croft, and Wheal Trelawney improved ½ each, Providence 2, North Wheal Crofty a further ¼, and Great Wheal Vor a further ½; Gronville declined ½, East Grenville ¼, and East Bassett a further 1.

FRIDAY, Oct. 6.—The railway market was flat to-day, and a decline varying from ¼ to ⅝ per cent. took place in most of the principal stocks. Metropolitan showed chief heaviness. Foreign and colonial railway securities were without change, with the exception of a reduction in Great Western of Canada.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN and SIMEON MOSELY and SONS, 30 Berners street, Oxford street, and 448 Strand, opposite Charing Cross Railway Station.

Their painless artificial teeth are unequalled for economy, durability, comfort, and all purposes of articulation and mastication. Operations of every kind being unnecessary, the most nervous patient can be supplied without fear of pain or inconvenience.

Consultation free. Teeth from 5s. Sets from 5 to 25 Guineas, warranted.

For the efficacy, utility, and success of their system, vide LANCET.

Daily attendance 30 Berners street, Oxford street; 448 Strand, London; 15 Whitefriargate, Hull; 10 Norfolk street, Sheffield; 4 East parade, Leeds; and 14 St Nicholas street, Scarbro'.

Observe—Established 1830. No connection with any of the same name

PRICE 6d EACH VOLUME.
Preparing for Publication,

THE YOUNG MAN'S LIBRARY OF USEFUL AND ENTERTAINING KNOWLEDGE.

Vol. I., price 6d,

THE ECONOMY OF LIFE: SELF-HELP TO WISDOM, WEALTH, AND WORTH.

"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilius in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire; and from the examples that are brought before the reader, he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

Vol. II., price 6d,

PATIENT BOYS, AND HOW BY PATIENCE THEY BCEAME GREAT MEN.

PATIENCE IS GENIUS

"The mind and will of man may be said to be almost infinite. It is true he cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSEVERANCE, he MAY NOT KNOW, and nothing which he MAY NOT DO.

"'By INDUSTRY and PATIENT thought,' says Sir Isaac Newton, 'the first dawning opens gradually—by little and little—into a full clear light. If I have done anything, it is due to nothing but INDUSTRY and PATIENT thought.'

"Buffon is not far wrong in his assertion 'that the genius of great men consists mainly in their patience.'" —PATIENT BOYS.

Vol. III., Price 6d, preparing in the Press.

LIGHTS AND SHADES OF EVERY DAY LIFE.

"Pope asserts that 'the proper study of mankind is man.' If mankind is the proper study of man, life-drawn histories of men in their social relations cannot be considered prejudicial to youth or age. The crude notions of youth have ripened into wisdom, while the forward heart has been tuned to gentleness and affection by the natural painting of a Shakspeare or a Scott; a Goldsmith or a Burns."—STREAMLET THOUGHTS.

London: Tweedie. 337 Strand.

Just published, 1s. Illustrated, Second Edition,

THE HEAD AND HEART LEGACY.

"Possessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

Any one acquainted with the current literature of the metropolis, or its littérateurs, will have no difficulty in identifying the author of this interesting volume. The pages abound with sensible observations, attention to which will be found absolutely necessary to gain even a moderate share of success in this busy world of ours."

London: Tweedie. 337 Strand.

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published. second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practioner.' —MEDICAL CIRCULAR.

"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

London: John Churchill; and may be had of all booksellers.

THE LONDON & BOMBAY BANK and GENERAL FINANCIAL and INSURANCE AGENCY CORPORATION (Limited).

Notice is hereby given, that an Extraordinary General Meeting of the Shareholders of the Company will be held at the London Tavern, Bishopsgate street, in the City of London, on Wednesday, the 20th day of December, 1865, at Twelve of the clock at noon precisely, for the purpose of passing the following Special Resolutions amending the Articles of Association of the Company:—

1. To amend Clause 2 of the Articles of Association in the 5th and 6th lines of that clause by striking out the words "The London and Bombay Bank and General Financial and Insurance Agency Corporation (Limited)," and substituting the words "The London, Bombay, and Mediterranean Bank (Limited)"; Clause 4, by striking out the words "and all matters which from time to time appear to the Directors to be expedient for attaining those objects:" Clause 18, by striking out the words "twenty-one" in the 4th and 5th lines of the said clause, and substituting the word "thirty:" Section 13 of Clause 102, by adding in the third line after the word "Company," the words "except the shares of the Company:" Section 17 of the said Clause 102, by adding in the fourth line after the word "securities," the words "except the shares of the Company;" Clause 120, by striking out the words in the last line, "or in such other manner," and substituting the words "except the shares of the Company;" Clause 121, by adding after the word "expedient," the words "except in purchasing the shares of the Company;" Clause 127, by striking out the word "two" in the last line of the said Clause, and substituting the word "three."

2. That the several regulations contained in Clauses 4, 12, 65, 66, 67, 81, 82, 95, 96, Sections 1 and 2, and 19 of Clause 102, Clauses 104, 105, 106, 121, 122, 123, 124, 125, 126, 127, and 128 of the Articles of Association of this Company shall be, and the same are hereby absolutely repealed, but so that the repeal thereof shall have no retroactive operation.

3. That in lieu and instead of Clause 4 there be substituted the following:—"The business of the Company shall include the several objects expressed in the memorandum of association, and all matters which from time to time appear to the Company in extraordinary meeting or Directors to be expedient for attaining those objects."

4. That in lieu and instead of Clause 12 the the following be substituted:—"The Company shall always have a first and paramount lien on the shares of each member for all the debts, liabilities, and engagements to the Company of such member solely or jointly with any other person, and the Company may refuse to register the transfer of any shares by any member who may be then indebted, or under any liabilities, to the Company, whether solely or jointly with any other person, or any account whatever; and the Company may at any time absolutely sell and dispose of the shares of any member who may be indebted to the Company, whether solely or jointly with any other person, and whether such member be the sole or a joint holder of such shares, and apply the proceeds of such sale, so far as the same will extend, in discharge or satisfaction of all debts, liabilities, or engagements from such member to the Company, and upon such sale the Company shall, without any further or other consent from the holder or holders of such shares, transfer the same in the books of the Company to the purchaser thereof."

5. That, in lieu of Clause 86, there be substituted the following:—"Subject to the provisions of the statutes and of these presents, and subject also to such (if any) regulations as are from time to time prescribed by the Company in meeting, the business of the Company shall be managed by the Board, who, in addition to the powers and authorities by the statutes or by these presents expressly conferred upon them, may exercise all such powers, give all such consents, make all such arrangements, and generally do all such acts and things as are or shall be by the statutes and these presents directed or authorised to be exercised, given, made, or done by the Company in meeting, but subject nevertheless, as aforesaid, that no regulation made by the Company in meeting shall invalidate any prior act of the Board which would have been valid if the regulation had not been made."

6. That in lieu of Section 19 of Clause 102 the following be substituted:—They may manage the business of the Company in relation to the transacting of every kind of banking business, the receiving deposits of money, whether at interest, or otherwise, the advancing and lending of money on real, personal, or mixed securities, on cash, credit, or other accounts, on bonds, debentures, bills of exchange, promissory notes, letters of credit, or other obligations, on ships or shares of ships (either British or foreign), on rates or tolls of trustees or commissioners, of public docks, harbours, or other public works, or of any other body of persons, whether corporate or otherwise, duly authorised to make, buy, or collect rates or tolls under the provision of any local or general Act of Parliament, the discounting bills of exchange, promissory notes, or other obligations, the advancing of money on the deposit of title-deeds, goods, wares, and merchandise, bills of sale and bills of lading, delivery orders, warehousemen's or wharfingers' certificates and notes, dock warrants, or other mercantile indicia, symbols or tokens, bullion, Government or public stocks or funds, whether British, colonial, or foreign, Exchequer and navy bills, Bank, East India stock, stocks and shares of bankers and of banking companies, of insurance companies, of railway, canal, gas, and water companies, and in general of all other joint stock companies, corporations, associations, and other undertakings, of whatever nature or description, whether British, colonial, or foreign, annuities, produce of every description, both home and foreign, materials of any kind, whether home or foreign, and on any other property, funds, and effects, of whatever kind or description; the making of purchases, investments, sales, or any other dealings in any of the above-named articles or securities, or in ships or shares of ships, both British and foreign; and generally to enter into all such contracts and engagements as may be necessary or deemed expedient for the due carrying out of the business hereinbefore mentioned; but they shall not transact any other business within the scope of the Memorandum of Association, or do any act or thing in relation to the carrying out of any of the other objects for which the Company is expressed in the Memorandum of Association to have been established without the express direction and consent of the Company in meeting previously obtained."

7. That the Directors shall not now, or at any time hereafter, for or on account of this Company, purchase or sell any of the shares of this Company, or in any way deal in the shares of the Company.

8. That in pursuance of Section 13 of the Companies Act, 1862, it is hereby declared and agreed that the name of the Company shall be changed to, and shall in future be known as "The London, Bombay, and Mediterranean Bank (Limited)," and that the Directors do forthwith obtain the consent of the Board of Trade to such alteration of name.

And notice is hereby further given, that an Extraordinary General Meeting of the Company will be held at the London Tavern, Bishopgate street, in the City of London, on Friday, the 5th day of January, 1866, at Twelve of the clock at noon precisely, for the purpose of confirming the above special resolutions, or such of them as may be passed at the Meeting to be held on the 20th day of December, 1865.

Dated the 2nd day of October, 1865.

By order of the Board,

GEORGE CUMMINGS, Secretary.

24 Old Jewry, London.

ROYAL BANK OF IRELAND.

27th September, 1865.

At the Annual General Meeting of the Shareholders, held, pursuant to the amended Deed of Settlement, at the Bank house, Foster place, this day,

JOSHUA WATSON, Esq., Chairman of the Board of Directors, in the Chair,

the following Report from the Board of Directors was submitted to the meeting, viz.:—REPORT of the Directors of the Royal Bank of Ireland to the Proprietors, at their twenty-ninth annual meeting, held 27th September, 1865.

The Directors, in submitting their twenty-ninth annual report, are impressed with the belief that it will afford satisfaction to the shareholders.

The high rates of discount prevailing during the first half of the past year were not maintained during the second period—which, on the contrary, was marked by terms rather under than above those ordinarily existing. The results, nevertheless, of the bank's operations exhibit unmistakeable evidence of a continued favourable action; and the shareholders, at the same time, will not fail to notice that the dividends this year had to be distributed over a considerably larger amount of capital than in preceding years.

The reserve fund on this occasion has only been nominally increased; but, while from the large addition made last year, it was not deemed necessary to add to it in any essential degree this year, the Directors retain the opinion they have heretofore expressed, that an increase of this fund should not, under fitting circumstances, be lost sight of; as experience has convinced them that the command of a resource of this nature is an important element in the successful working of the bank, by enabling it to carry on its operations independently, as well as on account of the increased confidence in the bank's stability, which it is calculated to afford.

In their last report, the Directors had to advert to the death of their then late Chairman, and it is now with extreme regret that they have to record the resignation of his successor, Mr Edward Atkinson, in consequence of ill health. This gentleman's time and abilities had been so long and so ably devoted to the service of the bank, that it was with unfeigned reluctance the Board accepted his proffered resignation, which, with a full sense of the loss they sustained, they, nevertheless, were compelled to do.

The vacancy created by Mr Atkinson's retirement has been filled up by the election to the board of Mr Robert Callwell, a gentleman so well known and so highly appreciated in the mercantile community of Dublin, that the Directors feel no doubt of their choice meeting the approval of the shareholders.

The two Directors who, under the provisions of the Deed of Settlement, should have retired from the Board by rotation this year, were Joseph Hone, jun., Esq., and Jonathan Pim, Esq., M.P.; they were eligible for re-election, and would have been proposed for that purpose on this occasion.

The sudden and lamented death of Mr Hone, which took place on Monday last, precludes the election of more than one Director at the present time; but the Board will give their earliest attention to the filling up of the vacancy which thus arises.—By order of the Board,

CHARLES COPLAND, Manager.

ROYAL BANK OF IRELAND.

The report having been read, the following resolutions were proposed:—

Moved by the Chairman, seconded by Edward Fox, Esq., and resolved unanimously:—

"That the report now read be received and adopted, and that the same be printed and circulated amongst the shareholders."

Moved by Alexander Findlater, Esq., seconded by Robert Callwell, Esq., and resolved unanimously:—

"That Jonathan Pim, Esq., M.P., be re-elected a director of the bank."

Moved by Alexander Parker, Esq., seconded by Alexander Boyle, Esq., and resolved unanimously:—

"That the proprietors of Royal Bank stock here assembled desire to unite with the Directors in an expression of sincere sympathy and condolence with the widow and family of the late Mr Hone, under the painful circumstances which attend a bereavement so sudden and unexpected as they have just sustained."

(Signed) JOSHUA WATSON, Chairman.

Mr Watson having been moved from the chair, and Alexander Parker, Esq., called thereto:—

Moved by Henry Peile, Esq., seconded by Robert Milliner, Esq., and resolved unanimously:—

"That the cordial thanks of the meeting be given to Joshua Watson, Esq., Chairman, and to the Directors of the Bank, for their able and successful conduct of its affairs during the past year."

Moved by Edward Fox, Esq., seconded by Robert O'Brien, Esq., and resolved unanimously:—

"That the grateful thanks of the meeting be given to Mr Copland, Manager, for his uniform zeal in promoting so successfully the best interests of the bank."

Moved by John Quinlan, Esq., seconded by Richard Wilson, Esq., and resolved unanimously:—

"That the warm thanks of the meeting be given to Mr North, Sub-Manager, and to the other officers of the bank, for their earnest and skilful attention to their duties, and for their uniform courtesy to the public."

(Signed) ALEXANDER PARKER, Chairman.

SECRETARY—John Henchman, Esq.
TEMPORARY OFFICES—17 Duke street, Westminster, S.W.

This undertaking is introduced under the auspices of the Metropolitan Railway Company to supply the want of warehouse and business accommodation in the metropolis, in connection with the railway system, and to take advantage of the opportunity offered by the unoccupied ground near Farringdon road, and the railway works in progress there, for the introduction into the heart of the metropolis of a block of buildings on a scale of unusual magnitude, which will combine railway communication below, warehousing accommodation above, and a magnificent range of exhibition galleries on the uppermost story.

The warehouses will afford the same facilities for the reception, deposit, and storage of goods conveyed by rail as are provided by the warehouses at the docks for goods carried by water, and will be designed and conducted on a scale and upon principles adapted to embrace upon equal and advantageous terms the general trade of London and the traffic of all the railways connected therewith.

The Metropolitan Railway Company having in contemplation the construction of an extensive goods station in the basement floor of land contiguous to Farringdon road and Holborn hill, it has been arranged with that Company that the warehouses shall be erected over that station. Hydraulic lifts of the most modern and improved principle will be provided for transferring the goods from the station to the warehouses.

Reference to a map of London will show that the site is the most central and advantageous which could be adopted for the general traffic and warehousing purposes of the metropolis.

By the Metropolitan line there will be continuous railway communication, adapted for both gauges, between the warehouses and all the railways on the Northern side of the Thames, and, by the Metropolitan extensions of the London, Chatham, and Dover Railway, with all the railways on the Southern side of the river.

There will thus be the means of receiving at, storing in, and transmitting from the warehouses goods from and to all parts of the kingdom without intermediate carriage, delay, or break of bulk.

The goods being left in the warehouses, the expense of the intermediate conveyance to the owner's premises before being forwarded for consumption will be saved; while on goods arriving and re-despatched by railway, there will be the double saving to the merchant.

The cost of haulage and warehouse establishment will, from the extended scale of organisation, be much less than each individual merchant or trader is now compelled to bear.

In addition to the great inducements which will thus be offered for the use of the warehouses, the goods deposited there will be transferable by indorsement of the Company's receipt, and that document will be as convenient and negotiable a security as the ordinary dock warrant. The Company may also, by the adoption of a judicious system of making or procuring advances on the goods in store, greatly enhance the accommodation to the depositors; these facilities will be such as to ensure the constant occupation of the warehouses.

The erection of the warehouses with the requisite working capital will be well covered by £600,000, one-third of which at least may be raised by mortgage at favourable rates of interest.

The Metropolitan Railway Company having consented to furnish the requisite site above their proposed goods station on the payment to them of a moderate rent-charge, subject to augmentation proportioned to the profits of the undertaking, no capital will be required for the purchase of land.

It is in contemplation, either by the action of this Company, or by the intervention of an independent association, to be formed by parties who are promoting such a project, and who would become lessees of this Company, to appropriate the top story of the building to a grand and attractive gallery for the exhibition and sale of goods, which would present equal inducements for the display of samples of both home and foreign merchandise as were offered by the Great Exhibitions of 1851 and 1862, with the additional advantage of being in immediate connection with the warehouses in which stocks of goods to meet current demands may be kept. For such a purpose the position is unparalleled, as not only would visitors from all parts of the country have direct communication with it by railway, but, as the building would be placed on the Inner Circle System of Metropolitan Railways, the most perfect access to it by trains, at intervals of three or five minutes, will be afforded to all the inhabitants of the metropolis.

The improvements at Holborn Valley will also furnish an excellent opportunity for extending the undertaking southward to Farringdon market, and such extension forms part of the project of the Company, in the confident expectation that it will meet with the cordial concurrence of the Corporation of the City of London.

It is intended that the portion of the ground floors forming the frontage to the streets on each side shall be divided into large and convenient shops; and it cannot be doubted that, looking at their very central position, and the great demand for shops which has been created by the destruction of property in the neighbourhood, and which will be largely increased when the Holborn Valley Improvement Works are carried out, they will let at highly remunerative rentals.

Careful calculations have been made on the footing of the warehousing rents paid under similar conditions, the prospect of a constant rental or other large profit from the Exhibition galleries, and the arrangements made with the Metropolitan Railway Company, which lead to the fair expectation that the net returns will be highly remunerative.

The articles of association, in addition to what it is believed may fairly be considered the usual formal clauses, contain provisions for the return of the deposits in full in case 10,000 shares be not taken and £2 paid upon each by the 31st of March, 1866; for the payment of certain preliminary expenses, but only in the event of the project being carried out; for increase of the capital; and to empower the Directors to borrow money. The articles have, however, been printed, and intending shareholders are earnestly invited to apply either to the secretary or the solicitors for a copy.

THE METROPOLITAN RAILWAY WAREHOUSING COMPANY (Limited).

Application for shares must be in the prescribed form, and accompanied with the requisite deposit, which will be returned in full if no allotment be made.

Forms of application may be obtained from the Secretary and brokers.

More than one-fourth of the first issue of shares has already been subscribed for by shareholders in the Metropolitan Railway Company; the remaining shares will be allotted without reserve to applicants in the order in which their applications are received. Immediately the full number has been applied for no further applications will be entertained. No notice of the time when the list will be closed can be given, but the fact will be published as soon afterwards as possible.—By order,
JOHN HENCHMAN, Secretary.

Offices, 17 Duke street, Westminster.

PANAMA RAILROAD COMPANY'S FIRST MORTGAGE BONDS.

The DIVIDEND on these BONDS, due on the 10th October next, will be PAID on that, or any succeeding day, between the hours of 10 and 2, at the Countinghouse of Messrs Brown, Shipley, and Co., Founders court, Lothbury, where lists may be obtained. Coupons must be left two clear days for examination.

PROSPECTUS.

Gold is plentifully diffused in veins, lodes, and deposits of auriferous earth throughout Northern Brazil. But, in the absence of capital and skilled labour for its extraction, gold in that country is confined to the acquisition of private adventurers or aboriginal tribes.

This Company, availing itself of the local knowledge and territorial possessions of Signor Jose Jacomo Tasso, situate in the heart of the gold district of Parahyba, has determined, therefore, to undertake the production of gold in Northern Brazil, on a scale and with such approved machinery as will render the enterprise one of immediate and great success.

In pursuance of this resolution the Company has entered into a provisirnal contract for the purchase and working of the estates of Signor Tasso at Pianco, in Parahyba, Brazil, on which estates eight gold bearing lodes have already been discovered.

An Imperial concession for these purposes has been obtained.

Assays of ore from the lodes have yielded on the average 1 oz 9 dwts 23 grs per ton of ore, and five samples obtained from different parts of the "Boa Esperanca" lode yielded 2 ozs 9 dwts and 15 grs of gold per ton.

Recent "extracts" from the lodes have given even more extraordinary results. A report on them says:—

"I send you herewith copy of the assays I have had made of your quartz, which are surprisingly rich, and which would pay enormously if the bulk should prove anything like the sample."

	ozs.	dwts.	grs.		
No. 5 Gold.....	3	... 10	... 12	per ton of	20 cwts.
Silver	0	... 18	... 0	—	—
No. 6 Gold.....	12	... 5	... 15	—	—
Silver	3	... 15	... 0	—	—

Another sample, assayed by Messrs Johnson, Matthay, and Co., of Hatton garden, yielded:—

Gold..... 6·350 ozs per ton of 20 cwts.
Silver ..... 4·250 ozs. — —

The grounds on which the adventure is recommended are:—

1. That the provinces of Parahyba and Pernambuco, over which the rights of the Company will extend, contain the richest gold mines in the empire.

2. That, besides the lodes of gold, the locality contains an enormous quantity of auriferous ore detached from the lodes, available at comparatively little expense.

3. That, the neighbourhood being populous and fertile, labour is cheap, and supplies of cattle, corn, and other produce are easily obtainable.

4. That a main road, along which a great part of the cotton exported from Pernambuco is now conveyed, runs through the site of the concession at Pianco.

5. And, finally, that a moderate outlay appears sufficient to ensure very large returns. If only 50 tons of ore per day were reduced, it is estimated that a year's operations at that rate would yield a profit on the cost of working of not less than £46,500.

Applications for shares, addressed to the Directors, will be received in London by Messrs Castello Brothers, 18 Throgmorton street, E.C., and by Mr Sleigh, 2 Austinfriars, Old Broad street, E.C.; in Liverpool by Messrs Tod and Ashton, Liver Chambers, Tithebarn street; and in Manchester by Messrs Mewburn and Barker, Moult street, Cross street. But no application can be considered unless a deposit of £1 per share on the number of shares applied for has been made. In the event of the Directors not being able to accede to a request, the sum deposited will be promptly returned; and in cases of reduced allotment, the balances will be applied towards the full deposit of £2 per share.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil Service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS, Baumschule Allée, Bonn.

THE MERCHANTS COMPANY, (Limited).

SECRETARY (pro tem.)—J. Langton Butcher, Esq.

Temporary Offices—25 Old Broad street, E.C.

PROSPECTUS.

This Company is formed for the purpose of carrying on the business of merchants, under the Joint Stock Companies Act, with limited liability.

The Company proposes to extend to mercantile operations (in which are comprised home and foreign banking and exchange) the principle of limited liability, which has proved itself so well adapted to banking and financial transactions. It is believed that the advantages arising from the publication of accounts, the security afforded by large uncalled resources, and the combined superintendence of an experienced Board of Directors, will be highly appreciated by all commercial classes, especially by consignors of goods and produce to this country.

The soundness of the principle which gave rise recently to the formation of the London Merchants' Company has been universally acknowledged, and the Directors have endeavoured to guard against those difficulties which apparently prevented the successful continuance of that Company.

In order to secure an immediate basis of operations, arrangements have been made with Messrs Lane, Hankey, and Co. for the transfer of their business. This firm will liquidate all its obligations independently of the Company, handing over only such current transactions and accounts as the Board may wish to accept. It is further proposed to bring in the businesses of other firms as favourable opportunities arise.

The good-will of the business of Messrs Lane, Hankey, and Co., has been purchased for £25,000, in debentures, payable one-fifth annually, with 5 per cent. interest, and 2,500 shares, with £15 each credited as paid hereon. In fixing this amount, the Directors have taken into consideration the profits of the firm during the last six years, the present prospects of the business and the manner in which payment for the good-will has been accepted. The vendors also guarantee by their personal covenant a minimum dividend of 10 per cent. per annum, during three years, on the paid-up capital, thereby giving a substantial proof of their confidence in the undertaking. This dividend the Directors, pending the full development of the Company's operations, propose to pay to the proprietors half-yearly, the first payment to be made on the 15th April, 1866. They may add, that they are most sanguine that this minimum guaranteed dividend of 10 per cent. will be largely exceeded before the expiration of the three years.

The Directors refer with satisfaction to the following letter from the eminent accountants, Messrs Coleman, Turquand, Youngs, and Co., in corroboration of the value of the business of Messrs Lane, Hankey, and Co.:—

16 Tokenhouse yard, E.C., London,
26th September, 1865.

To the Directors of the Merchants Company (Limited).

Gentlemen,—We beg to state that in compliance with the request of Messrs Lane, Hankey, and Co., we have carefully examined their books with the view of ascertaining what commissions they have made during the last six years, from 1st January, 1859, to 1st January, 1865, and find that the gross commissions during that period amount to £140,765 17s 9d, being an average of £23,460 19s 7d per annum; and after deducting therefrom "return" commissions, and commissions on goods bought and sold by the firm, either on their own account, or for the execution of orders on hand, the net commissions earned amount to £106,900 17s 4d, or an average of £17,816 16s 2d per annum. This is irrespective of the result of the firm's transactions on their own account, and of the insurance business.—We are, Gentlemen, your obedient servants,

(Signed)
COLEMAN, TURQUAND, YOUNGS, and CO.

Applications for a large number of the shares have been already received, and it is proposed to commence the business of the Company immediately after the allotment, which will be made without delay.

Prospectuses and forms of application for shares may be had of the bankers, brokers, and of the Secretary, at the temporary offices of the Company.

Applications for shares, accompanied by a deposit of £1 per share, may be made on or before Thursday, the 12th inst., when the list will be closed.

The memorandum and articles of association of the Company, which have been duly registered, may be seen at the offices of the solicitors, and a copy will be sent by post on application.

FORM OF APPLICATION FOR SHARES.

To be retained by the bankers.

No.——

To the Directors of the Merchants Company (Limited).

Gentlemen,—Having paid to the bankers of the Company the sum of £ being a deposit of £1 per share upon shares, I hereby request you will allot to me that number, and I agree to accept the same, or any less number that may be allotted to me, and to pay the amount due on allotment, and the calls as they may be made; and I hereby authorise and empower you to insert my name in the Register of Shareholders of the Company for the number of shares which you allot to me, and I agree to be bound by the Memorandum and Articles of Association of the Company as registered.

SOLICITORS—Messrs Bell, Brodrick, and Bell, 9 Bow churchyard, London.

SECRETARY—T. C. Simmons, Esq.

Temporary Offices—10 Cullum street, E.C.

ABRIDGED PROSPECTUS.

This Company is formed with a view of purchasing from the proprietor the Dunraven, New Brithdir, and Blaenclydach Collieries, in the county of Glamorgan, for the purpose of developing and further improving the property; and full powers have been taken for efficiently carrying out the same.

These properties are sold entirely in consequence of the vendor's capital being insufficient effectually to work so large a concern.

The proprietor has guaranteed to the satisfaction of the Directors that for the first five years after the formation of the Company 10 per cent. per annum shall be paid upon all the paid-up capital (taking the average of profits over such period). He will also continue to manage the whole business of the Company, at a salary fixed by the Directors.

There is sufficient plant at each of the collieries efficiently to work a much larger quantity of coal than has been named.

The purchase money for the whole of the above-named properties is £180,000, and the same is to be paid by instalments spreading over two years. The proprietor will take shares to the extent of £50,000.

The price to be paid is based upon valuations made by several well-known and experienced colliery engineers, all of which have been thoroughly verified. The originals may be seen at the offices of the Company.

Prospectuses and forms of application for shares may be obtained of the bankers, at any of their branches, brokers, solicitors; of James Wright, Esq., C.E., 12 Copthall court, London; of Messrs Smith and Pickering, solicitors, Merthyr Tydfil: and at the temporary office of the Company, 10 Cullum street, E.C.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West, N.W.

IMPORTANT ANNOUNCEMENT.—JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of temper quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition.

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

Mr T. Walliker.

SECRETARY (PRO TEM.)—Mr David Ker.

TEMPORARY OFFICES—132 Gresham House, Old Bread street.

This Company is formed for the purchase and use in the United Kingdom of Mr Gale's valuable invention for rendering gunpowder non-explosive at pleasure, and for protecting gunpowder from damp, an invention admitted to be of national importance.

The objects of the Company will be as follows:—

1. To manufacture and sell the protecting material ready for use

2. To grant royalties and licences to gunpowder manufacturers and others for the use of the invention.

3. To purchase or manufacture gunpowder and supply it to the public in a protected state.

4. To enter into contracts for the storage and transit of gunpowder to any part of the kingdom or elsewhere; and the application of the invention to all the other purposes of which it is capable.

The inventor has obtained certificates of protection under the Patent Laws, and has agreed to sell—free from all incumbrances, and free from the expenses attending the formation of the Company, such as printing, advertising, brokerage, law expenses, &c.—the whole of his interest in the invention so protected, so far as the same applies to the United Kingdom, for the sum of £50,000, to be paid £25,000 in cash and the remainder in fully paid-up shares of the Company. The shareholders will thus be relieved of all the preliminary expenses connected with the formation of the Company prior to the allotment of shares.

Mr Gale has consented to act as Consulting Manager for three years.

The following extract from the TIMES newspaper of the 3rd of August last will show that the invention has been thoroughly tested by repeated experiments before the Government authorities and others:—

"EXPERIMENTS AT WESTMINSTER.—These interesting experiments—having for their object to show how gunpowder can be rendered non-explosive, and yet have its explosive properties restored at pleasure—were repeated yesterday at Westminster, in presence of a distinguished company. They have already been performed at Devonport, in presence of Lord Templetown, Admiral Freemantle, and a number of other military and naval officers of distinction assembled for the purpose; at Mount Edgecumbe, in presence of their Royal Highnesses the Prince and Princess of Wales; at Wimbledon, on the grounds of the National Rifle Association, before the Secretary for War; and afterwards, by the noble lord's desire, in the presence of the Ordnance Select Committee at Woolwich; at the French Embassy; and on Tuesday last, in presence of His Royal Highness the Commander-in-Chief, the Quartermaster-General, the Adjutant-General, and other heads of the military profession."

The following extract from a recent report of G. P. Bidder, Esq., the eminent civil engineer, shows in concise terms the importance and commercial and practical value of Mr Gale's process:—

"In short, I may sum up the results by stating that gunpowder may now be conveyed, stored, and used by means of this process with absolute safety to the public.

"On the whole, therefore, I am clearly and decidedly of opinion that for all commercial purposes Mr Gale's process may be introduced with the certainty in almost every case of securing an absolute economy to the consumer, while at the same time securing the public from the recurrence of those distressing accidents to which the use of unprotected gunpowder is necessarily exposed.

"No one resident in a town of any size can be certain that he is not within the influence of an explosion of from one to two cwt of gunpowder. Our police reports indicate the reality of the source of danger; but if it is rendered illegal for any person whatever to have in his possession any quantity of gunpowder, except as a compound, the cause of apprehension would cease."

The above extracts demonstrate that Mr Gale's invention affords an absolute protection against explosion.

As an illustration of the risks inseparable from gunpowder in a non-protected state, it may be mentioned, that during the last twelve years upwards of fifteen serious explosions have been recorded in the public journals, by which more than 600 persons have been killed, and many thousand persons wounded, and property to the extent of more than two millions has been destroyed. And the "United Service Magazine" observes: "In all probability numbers of missing vessel have totally disappeared in the midst of the ocean in consequence of having gunpowder as part cargo."

The Directors will at once commence operations with the supply of blasting, rifle, sporting, and other kinds of gunpowder in a protected state.

As a large portion of the gunpowder manufactured in England is shipped in an irregular manner and without appearing in the ship's manifest, it is impossible to estimate the total amount of the manufacture. It is however certain that if only a fourth of the gunpowder made is protected by Mr Gale's process, and a very small Royalty paid upon it, a large revenue will be derived from this source alone.

The danger and difficulty which at present attend the transport and sale of gunpowder so enhance its price as to leave room for a large margin of profit on the sale of the protected gunpowder, and some of the leading railway companies and shippers have already expressed their willingness to arrange for the carriage of the protected article at greatly reduced freights.

In addition to the revenue to be derived from the sale of the protected gunpowder, and from royalties and licences, it is believed that a considerable amount will be received from the other sources named above, such as the sale of the protecting material and the contracts for the storage and transport of gunpowder.

The materials used in the manufacture of the protecting powder are of an inexpensive character, whilst the working of the invention is simple, and can involve no elaborate or costly machinery. It is, therefore, believed that but a small proportion of the capital will be required to be called up.

The articles of association are open for inspection at the offices of the Company, and also at the Solicitor's office, 20 Great George street, Westminster.

In the event of no allotment being made, the deposits will be returned in full.

Applications for shares, accompanied by a remittance for the deposit, may be made to the Bankers and Brokers on the accompanying form.

H. J. AND D. NICOLL, TAILORS to the Queen, Royal Family, and Courts of Europe.—For GENTLEMEN, the FASHIONS for the SEASON, for the promenade or demi dress—Superfine frock coats, with rich silk breast facings, or morning coats of superfine Melton cloths, the charge for the former being 3¼ to 4¼ guineas; for the latter. 2¼ to 3¼ guineas. For negligé purposes, morning coats with pocket flaps at the waist, also the negligé jackets; these are of Melton, fancy coatings, Angola and Cheviots, the prices from 25s to 4 guineas. The Angolas and Cheviots are also made in suits, at prices from 2 to 4 guineas; evening dress, black cloth of the finest quality. For overcoats—Melton, Beaver, and Witney cloths, from 2 to 8 guineas. For young gentlemen from eight years of age—The morning coat and negligé jacket; also suits of Angola and Cheviot, the prices according to size, commencing at 31s 6d the suit. For boys from four years of age—The knickerbocker and Highland costume of black velvet, or fine cloth for dress, and of Angolas and Cheviots for morning, the price of the first size knickerbocker, 1 guinea the suit. For overcoats—Melton, Beaver, and Witney cloths, from 1 to 2 guineas each. Foreigners and visitors to London, Manchester, and Liverpool, will find at Messrs Nicolls', garments ready for immediate use, or made to order at a few hours' notice.—H. J. and D. Nicoll, 114, 116, 118, 120 Regent street; 22 Cornhill, London; 10 Mosley street, Manchester; and 50 Bold street, Liverpool.

DEANE'S TWO-HOLE BLACK PENS which are unequalled for the durability and easy action, are adopted by the gentlemen of the Stock Exchange, and the principal bankers, merchants, and public companies of the city of London, besides several of Her Majesty's judges, the most eminent counsel, and the reverend the clergy. Their cheapness and popularity has induced many unprincipled people to put forth imitations of the genuine articles, which are equally useless to the purchaser, and disgraceful to the vender. The public are therefore cautioned, and respectfully requested not to purchase any as DEANE'S GENUINE TWO-HOLE BLACK PENS, unless each pen is stamped.

"G. and J. Deane, London bridge,"

and the ox, which contains exactly twelve dozen, has thereon a variously coloured label, inscribed.

"G. and J. DEANE'S Two-Hole Black Pens, 46 King William street, London bridge."

X. American Psychomancy.

London: Longmans and Co. Edinburgh: A. and C. Black.

Now Ready, Revised Edition (1865), 3s 6d,

THE MANUAL OF COMMERCE:
a Compendium of Popular Reckoning Tables, British and Foreign Moneys, Weights and Measures; Foreign Exchanges, including Law of Bills and Exchange Tables; and a Practical Epitome of Interest, Annuities, and Reversions, with numerous Cases and Tables. Also, an extensive Collection of Commercial and Banking Forms, and a Glossary of Terms used in Trade, Finance, &c. By W. WATERSON, Accountant, Bank of Australasia.

*** This Edition includes a concise description of the existing Currency System, and of the Accounts and Usages of the Bank of England; also a full account of the Metric System, with numerous Tables.

Edinburgh: Oliver and Boyd.
London: Simpkin, Marshall, and Co.

VENEZUELAN LOAN, 1862.—
A Copy of the Letter addressed to Messrs Baring Brothers and Co., by Senor A. L. Guzman, Fiscal Agent of the Government of Venezuela, may be had on application, either personally, or by letter enclosing a penny stamp, to F. H. Hemming, Consul for Venezuela, 25 Moorgate street, E.C.

SIX PER CENT. SECURED ON FREEHOLD PROPERTY in LONDON.
The Directors of the INNS of COURT HOTEL COMPANY (Limited) are ISSUING the remainder of the Company's SIX PER CENT. MORTGAGE DEBENTURES.

These Bonds secured as a first charge on the entire Hotel property (estimated as worth not under £120,000), are issued for three, five, or seven years, with coupons attached for payment of interest half-yearly, and investors have the option of paying in full, or by three instalments.

The Company cannot borrow more than £80,000.
H. T. L. BEWLEY, Secretary.
Offices of the Company, 63 Lincoln's inn fields,
July, 1865.

MERSEY DOCK ESTATE.
LOANS OF MONEY.

THE MERSEY DOCKS AND HARBOUR BOARD hereby give notice, that they are willing to receive LOANS of MONEY on the security of their Bonds, at the rate of Four Pounds Ten Shillings per centum per annum interest, for periods of Three, Five, or Seven Years.

Interest Warrants for the whole term, payable half-yearly at the Bankers of the Board in Liverpool, or in London, will be issued with each bond.

Communications to be addressed to George J. Jefferson, Esq., Treasurer, Dock Office, Liverpool.—By order of the Board, JOHN HARRISON, Secretary.
Dock office, Liverpool, July 20, 1865.

1865.—BONUS YEAR.

CLOSING SPECIAL NOTICE.

THE STANDARD LIFE ASSURANCE COMPANY.
Constituted by Special Acts of Parliament.
Established 1825.

The Seventh Division of the Company's Profits is appointed to be made at 15th November, 1865.

The fund to be divided will be the profits which have arisen since 15th November, 1860.

A policy effected before 15th November, 1865, will not only participate in the division then to be made, but will secure one year's additional bonus at all future divisions over policies of a later date.

The Assurances effected with the Company since the last division of profits in 1860 exceed Two Millions and a Half sterling.

Income upwards of Half a Million sterling. Accumulated and invested funds upwards of Three Millions.

A STANDARD POLICY.

The policies of the Standard Life Assurance Company are free from all unnecessary conditions.

Policies can be obtained without restriction as to residence abroad, the person assured being above 25 years of age, not engaged in military or naval service, and not liable to foreign residence from the nature of his business or position.

Extended facilities are given for payment of premiums; and should a premium fall into arrear, it may be paid at any time within thirteen months, subject to certain conditions.

All policies are unchallengeable on any ground whatever, after they have existed five years; and, subject to payment of premiums and extra premiums, if any, the policy becomes a simple obligation on the Company to pay the sum assured.

These valuable privileges were introduced into the practice of Life Assurance by the Standard.

WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary,
London—82 King William street, E.C.
Edinburgh—3 George street (Head Office).
Dublin—66 Upper Sackville street.
Glasgow—106 St Vincent street.

The Political Economist.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE BANK RETURN OF THIS WEEK.

THE Bank of England have this week borrowed on securities to a considerable amount, to which some persons who fancy that the Bank of England ought always to be rich enough for anything much object. But the Bank of England has as much right to use its securities as any other banker, and the borrowing on securities is, on many occasions, as now, a fitting accompaniment to the rise in the rate of discount. The latter raises the rate in Lombard-street,—the former, the borrowing on securities, raises the rate on the Stock Exchange.

The decrease in the bullion being entirely for internal purposes is not more than is usual at this season of the year. And, on the whole, though the account is not a good one, it is better than just at this juncture many people expected. The reserve of notes has been maintained where it was,—by borrowing no doubt,—still it has been maintained.

The critical question is, will a considerable bullion drain now arise for Egypt and India. *Some* bullion will go; orders are given for it, and some more will follow. But it is not easy, it is not possible, to say how much will be sent. If much should be sent, the pressure on the Bank of England will be considerable, and the rate will have to be raised. We do not, however, expect that such will be the case during the next week: the demand for the East is *certainly* not for the moment intense, and the high rate of discount will probably bring money here from the continent. We must wait for a few days, in order to see how much the Egyptian and Indian demands will be.

It will be evident to those who read our next article, that the other causes which have acted on our market are more ascertainable, and that their effect is not likely to increase but rather to diminish at the present moment.

WHY SEVEN PER CENT.?

THE great rise in the value of money has come upon the mercantile community with singular suddenness; it is not unalarming in itself, and seems more terrible because no one expected it; and it is especially important to have a distinct view of its causes, for many of the current explanations will mislead us if we accept and act upon them.

There is a great contrast between the state of the money market last year and the state this year. Both the Bank of England and the Bank of France had then been exposed to a sudden drain of bullion to the East. But this year there has been no such drain. The figures of the Board of Trade returns sufficiently indicate the history hitherto:—

	1864.	1865.
The exports of gold and silver bullion to Egypt and the East up to August 31st were...	£ 6,108,115	£ 1,752,235

As we last week observed the demand for silver is just again beginning to be felt. The new purchases of cotton caused by the sudden rise in prices have had an effect in the silver market. But they have not yet caused any considerable effect on the Bank till. These cotton speculations have had a great influence, as we shall presently show, on our capital account, but they have had *as yet* no considerable influence on our bullion account.

The present rise in the value of money is owing to the simultaneous occurrence of three causes. There is a sort of *tide* in the cash transactions of the country which periodically empties and periodically fills the Bank till. At the close of every quarter there is a strong outgoing current. The non-banking classes then get their money. Salaries are paid, wages are paid, small dividends are paid; each of these transactions is very minute, but their aggregate mass is very large. And it is *because* each of them is minute that the whole is effective. All rich people—all people in receipt of great incomes—nowadays, with scarcely an exception, keep a banker, and their transactions are settled by cheques in his ledger. As a rule, a rich man receives one bit of paper—a railway coupon say—and it is placed to his credit, and he pays away another piece of paper—a cheque—and it is placed to his debit; no actual money passes. But little people are paid in actual cash; they take so much from the Bank till, and until that money is paid away to some of the banking classes it does not find its way back to the Bank till. Speaking generally the middle of every quarter is marked by an incoming current towards the Bank, and the close of every quarter by an outgoing current from the Bank.

There is a prevalent impression that on the present occasion the efflux from the Bank of England, at the close of the last quarter, has been of unprecedented extent. But as far as *bank notes* are concerned this is not the case. In 1863, only two years ago, there was very nearly as large an outgoing.

	£
On the 23rd Sept., 1863, the reserve of *notes* only was ...	8,545,450
— 14th Oct., — — — ...	6,401,371
	2,144,079

And in a little while afterwards the reserve went still lower.

Digitized by Google

Whereas now the figures are :—

	£
On the 20th Sept., 1865, the reserve of *notes* only was	6,672,810
— 11th Oct. — —	4,294,145
	2,378,665

So that there is no such extravagant difference in favour of the present year ; and what there is will be easily accounted for presently. In September, 1863, there was a 4 per cent., and a favourable foreign exchange, just as there was in September last. In both cases the demand which drained the Bank till was not a foreign but a home demand.

Why at one time or another the quarterly craving for cash is greater or less, it is often hard to say. Being the aggregate of an immense number of minute desires, that craving is itself subject to a still greater number of incalculable microscopic influences. The only rule we can lay down is, that it is greater in times of increasing manufacturing employment, and less in times of diminishing manufacturing employment. Speculation, whether in cotton or silk, has no effect on it, but an increase in wages earned and salaries paid in silk or cotton or anything else has an immediate effect. The summer quarter of 1863 and 1865 was marked by an augmenting industry, and therefore by an augmented payment to the smaller industrial classes. There never indeed was a time when the internal trade of many districts leaped forward so rapidly as now. The Americans are buying in every market. A great country, long shut out from many kinds of consumption, is again beginning to consume. Prices are rising in a multitude of articles. The cash payments in Manchester early in October surpassed all previous experience. The trade of Bradford is profitable almost beyond precedent. If ever the customary periodical demand for cash was to increase, this is the time for it to increase.

But though the outgoing of notes from the Bank of England has not been much greater than in 1863, the demand for coin has been greater. And this brings us to the second of our causes —one so odd and happily so minute that it seems absurd to name it. Nothing, however, is so extraordinary in the present complicated state of the money market, as the number and the variety of the causes which act upon it. In 1859, if any one had foretold that slavery in America would convulse the world in Lombard street, he would have been laughed at. Yet for several years we have been suffering from a cotton drain due to that cause and to no other. So now it seems absurd to say that the Fenian movement in Ireland should have any, the slightest influence on the English money market, and yet it has had a little influence; about 500,000*l* in coin has been sent to Ireland to meet the partly real and partly feared run on the Bank there, and this is about the difference between the diminution of coin in the Bank now and two years since.

In 1863—

	£
The coin and bullion was on 23rd September	15,432,838
It fell on 14th October to	14,573,611
	859,227

This year—

	£
The coin and bullion was on 20th September	14,219,842
— — — 11th October...	12,736,346
	1,483,496

The difference between this year and 1863 does not of course exactly coincide with the amount of the Irish demand. But 100,000*l* or so is of no moment in such calculations as the present. And it is very possible that more coin may have gone to Ireland than is known. Very much larger sums than that are constantly added to and constantly taken from both the note circulation and the coin without exciting remark or being susceptible of explanation.

It is to be observed that this Irish demand, though ultimately a demand for coin only, also lowers the reserve of notes. To get the coin the Irish Banks, by the sale of securities or otherwise, first obtain a credit at the banking department, then change that credit into notes, then cash those notes at the issue department, and this additional cause amply explains why the demand for notes in 1865 is greater than in 1863.

This Fenian disturbance is an influence, happily infinitesimally slight, acting on the credit of the country, and the periodical demand for circulation is a cause acting on the cash and coin of the country, but there has been a larger cause in operation acting on our *capital*. This is the cotton speculation. This affects the rate of discount in the simplest of all ways ; it brings new bills and securities into Lombard street. The man who wishes to buy cotton must get a credit at his banker's to buy it with, and he must raise that credit by borrowing upon or selling some property. Accordingly, during the first ten days of October there was a sudden access of bills into Lombard street, conspicuously evinced by the rise in the private securities, to which we last week very pointedly drew attention. It is known to every person who has studied the subject how wholly separate this demand for discount is from the demand for actual cash. But it is not often easy to set it before common persons by an effective illustration. It so happens, however, that a few weeks since a very clear and concise paper was read by Sir John Lubbock before the Statistical Society, which gives almost exactly the information required. Sir John Lubbock examined 19,000,000*l* of payments by the London customers of the Bank, and found that they were effected as follows :—

	£
By cheques and bills.....	18,395,000
Bank notes.....	408,000
Country do.....	79,000
Coin.....	118,000
	19,000,000

so that only about a thirty-third fractional part, or less than eightpence in the pound, of this large sum of transactions was effected in what would commonly be called cash. The pettiness, so to speak, of the sphere in which alone coin and Bank notes are used could not be made more evident, and any one who considers these instructive figures will have no difficulty in understanding that a very great augmentation could take place in the business of Lombard street without any appreciable increase in the active circulation of notes and sovereigns.

These three causes would not have caused so great an effect if they had come at an ordinary time, but they fell upon a period predisposed to aggravate their consequences, as we have so often shown. The capital market of the country is in an unusually delicate state. The investments in which it has been embarked, especially in 1864, though not above its strength, were sufficient for its strength, and the new Companies, whose characteristic use is to act as borrowing brokers for other nations, are sure to keep us low, as far as their credit extends, and begin to act with effect so soon as the rate of interest has long been low. As we have said, the trade of many districts has been rapidly starting forward. In the early part of October, any cause creating an unusual demand for capital was sure to produce an uncommon effect. Unhappily, the *cash* market, if we may so speak, was more delicate still. The reserve of notes, which in 1863 ranged from 8,500,000*l* to 6,400,000*l*, without producing an important effect, has now fallen from 6,600,000*l* to 4,300,000*l*, and the result is what we see. So soon as the reserve of notes is under 5,000,000*l* the public begin to feel nervous, if not alarmed, and the Bank directors have learn by severe experience that it behoves them to act promptly and effectually.

These influences acting upon a world so predisposed to receive them are quite enough to explain the rise in the rate of discount. How far these influences are due to irremediable nature, and how far to improvable policy or alterable legislation, we shall discuss in our next issue.

THE ALABAMA CORRESPONDENCE.

THE correspondence published between Mr Adams and Lord Russell on the subject of the injuries inflicted by the Confederate cruisers on American commerce, and the asserted responsibility of England for those injuries, has assumed, since the close of the war, an aspect not altogether free from menace to the pacific relations of the two countries. We do not mean that Mr Adams has ever adopted any tone unworthy of his high character—any tone containing even the faintest element of vulgar bluster. His despatches are always marked by courtesy and dignity even when they are most severe in their reflections on the policy of England ; and as regards mere manner, there is nothing to regret on either side in the important correspondence between him and Lord Russell. But though there is no ground of anxiety in the temper either of our own minister or the American diplomatist, there is some reason to fear that they have come to an irreconcileable difference of opinion with respect to the responsibility

Digitized by Google

of the British Government for the depredations of the Confederate cruisers,—a difference which allows of little room for compromise on the part of either Government, although an urgent necessity for some agreement exists if pacific relations are to continue. We do not mean that there is any serious ground for fear, but only that a critical stage of the question is reached at which the utmost prudence must be exercised not only by the Governments, but by the people of both countries, if we are not to have serious ground for fear before long. The very grave tone of Mr Adams's last despatch, dated 18th September, is, no doubt, in great measure due to the irritation caused in the United States by the piratical ravages of the Shenandoah among the whalers in Behring's Straits last July, committed long after the Confederate Government had entirely ceased to exist. And as in the individual case of the Shenandoah at least, there is absolutely no room for any charge against our Government, we may regard this as a purely *incidental* aggravation of the American sensitiveness on the subject, which may be fairly expected to pass away. Still it will require firmness and moderation in public discussion, no less than in diplomatic controversy, if the serious difference of opinions which exists is not to have more serious consequences.

Rightly to understand the drift of the long discussion between Mr Adams and Lord Russell is, in reality, by no means difficult, and is the first condition of a reasonable state of mind, as it will show how much there is that is plausible to be said on both sides, though, as we think, more that is both plausible and irresistible on our own than on that of the United States. First, it is conceded by the United States that the action of the British Government, though precipitate in one respect and inefficient and dilatory in another, with respect to its treatment of the Confederate Government and cruisers, has never been hostile—or, indeed, otherwise than friendly—in *intention*, that there has been no wish at all to refuse justice to the Government of the Union. Next, it is conceded by the British Government that vessels have undoubtedly escaped from their ports which, had they known more of them in time, they would never have suffered to leave, and whose destructive career they regret. The only practical question upon which the whole discussion turns is therefore this,—whether, though friendly and just in *intention* to the United States, the British Government have yet been guilty of blunders or negligences flagrant enough to warrant any claim for damages against them. "Inasmuch as the relations between nations "not less than individuals must depend," remarks Mr Adams, "on the mode in which they fulfil their obligations towards "each other, rather than upon their motives, the questions "which have grown out of the events of the late war appear "to lose little of their gravity from the reciprocal disavowal, "however complete, of ill-will on the part of the respective "Governments." We can scarcely agree in this, as the admitted absence of any injurious *animus* is a condition certainly very favourable to conciliation. But no doubt the practical question, after motives are cleared, of the right to an award of substantial damages remains still open. Want of foresight, and absence of malignity, can never be pleaded as a sufficient argument against a legal claim for damages. There are two main accusations against the British Government which are relied upon by Mr Adams as proving our practical responsibility. The first is that by our "unprecedented and precipi- "tate" recognition of the belligerent rights of the Confederates, we brought the Confederate navy into existence. The second is that by the inadequency of our Foreign Enlistment Act, the refusal of the Government to strengthen it, and the weakness of the departmental action under it, we permitted ships to escape which we might fairly have been expected to detain. Let us see what is said on each head by the contending diplomatists.

As to the first point,—the impulse given to the Confederate navy by the acknowledgement of their belligerent rights,—no one in fact denies it. Of course without such a recognition the Confederate ships would have been accredited by no recognised Power, would therefore have been pirates, and could have taken shelter in no ports but their own which were seldom accessible to them. But Lord Russell maintains, we think with unanswerable justice, that this recognition, so far from being "precipitate," was demanded no less by considerations for the interests of the Federal Government, than by consideration for ourselves, the neutral commerce of the world, and lastly for the Confederates. It was evident to all the world, says Lord Russell, that a great war had begun which would last at least for years,—so great were the resources on both sides;—the Federal Government had already claimed, or appeared to claim, some of the privileges which a belligerent has over a neutral on the high seas, by its promulgation of a blockade; our admirals on the Atlantic and West India stations were anxious to know how to act in case they came across vessels of either party;—as a nation abounding in commercial speculation it was of the first importance to our merchants to have their true position and duties defined at once;—and on all accounts, therefore, it seemed the simplest and most natural course to acknowledge existing facts and assert our neutrality. Mr Adams goes into a long and ingenious argument to show that we were precipitate in this course. The usual plan is, he maintains, to ignore such communications as these as long as possible until a practical case *requires* a decision, such as an encounter with the ship of war of the unrecognised belligerent, or the enforcing of the laws of blockade on the high seas against one of our own ships. Mr Adams is probably right as to the usage. But it is not denied that whereever the facts are sufficiently strong to justify it, a nation *may* choose its own time for recognising belligerence, and still less can it be denied that in a case affecting so large a commerce, and so great an extent of coast, it was eminently convenient for all parties that we should choose as early a moment to define our policy as possible. Mr Adams wants us to believe that, had we not acknowledged the South as belligerent, the blockade, in an *international* point of view, might never have been declared at all,—that a municipal blockade, not affecting vessels on the high seas, might have been sufficient, and that we forced the Government of Mr Lincoln to make the blockade one of an international character by our premature steps. We must say this looks to us exceedingly like a very far-fetched theory of what might have been, invented *after* the event expressly in order to make a reasonable and national act seem precipitate. It is simply irrational to suppose that the Federal Government would have voluntarily diminished its own chances of cutting off the Confederates from foreign supplies of arms and munitions of war so immensely as it must have done, had it waived the right of search on the high seas and limited its blockade to its own waters. The blockade was difficult, and for a long time ineffectual enough as it was. To have conceded a complete security to neutral ships up to the three mile limit would have made blockade running even more profitable and secure than it really was. We may be sure such an idea idea never entered the mind of the Federal Government, though it is thrown up now to make our proclamation of neutrality seem precipitate. Lord Russell is clearly right in saying that the great scale of the rebellion on the one side, and our commerce on the other, made it a matter of clear prudence and wisdom, no less beneficial to the United States than to ourselves, to take our line early and lay it down clearly. Nor can any precedents taken from comparatively small and languishing wars, when the area of commercial intercourse involved was petty, affect our duty in this case. Doubtless the concession of belligerent rights rendered the creation of a Confederate navy possible, but it was a concession which at furthest must have been made in a month or two, and would have been forced upon us even sooner by the Federal Government itself in its eagerness to arrest all supplies beneficial to the Confederates. No impartial judge could consider the promptness of our action anything but praiseworthy and needful for our own interests, no less than for those of the contending parties.

Mr Adams's second charge is the weakness of our Foreign Enlistment Act, our refusal to strengthen it, and the dilatory and negligent enforcement also of such provisions as it rendered legitimate,—the escape of the Alabama being of course his strong point. Lord Russell replies with much force that weak as our Act may be, it was not found so inefficient as the American Act in the case of the Portuguese war against the dependencies of Portugal in 1816-20; that whereas three or four English ships escaped to make war against the Union with the Confederates, thirty or forty American ships escaped in like manner to make war on Portugal under the flag of a revolted dependency, and that as the American Minister—Mr Adams—steadily disowned responsibility for these cruisers,

Digitized by Google

saying it had done all it could within the jurisdiction of the United States, and could not accept any responsibility for what went on outside that jurisdiction, so the English Minister could but repeat his words when another Mr Adams urged against him the old claims which Portugal had urged incessantly, but in vain, between 1820 and 1850. Mr Adams replies that at the instance of Portugal the American Cabinet *did* strengthen the Foreign Enlistment Act, in accordance with the suggestions and requests of Portugal, while we steadily refused to do the same, and, therefore, that America had really done all that was in the power of the Executive, which we had not; and he asserts that our law is not *now* so efficient as the American law was made in 1819. The answer, however, is obvious, that we could not be expected to alter our law without reason to believe that it would *strengthen* it,—and that we had seen by the example of the United States how inefficient the law, so strengthened, still was; that our law, as it is, seems to have done more for the Union than the American law did for Portugal; and that, therefore, our refusal to alter the law cannot be said to be the cause of its partial failure.

Lord Russell's refusal to submit the question of our responsibility to arbitration is a natural consequence of this position, and we fear that his counter-proposal to submit to a mixed commission all these reciprocal claims of the two nations for compensation for injuries caused by the war, *which their respective Governments shall agree* so to submit, cannot issue in any practical compromise. Of course he means to imply that we should *not* agree to submit the losses caused by the Alabama and the other Confederate cruisers, to arbitration, and as this is the *real* point on which the pride of the United States Government is centred, there cannot be said to be at the present moment any clear prospect of a compromise.

THE CANADIAN PROPOSAL TO PURCHASE THE HUDSON'S BAY COMPANY'S TERRITORY.

One of the very first questions the new Parliament will be called upon to decide is the propriety of a guarantee promised by Mr Cardwell to the Canadian Legislature. It is evident from the recent debates in that body that the colonists are anxious to buy out the Hudson's Bay Company, and so possess themselves of the whole of the British Far West, but it is also evident that they are very much afraid of the financial burden. Their treasury is not in a good position, and they have a dread of direct taxation, which seems to Englishmen morbid. They calculate that the cost will not be under two millions, the Company striving hard for terms, and being on the whole supported by Her Majesty's Government. We should have thought the sale of wild lands, and the enforcement of a royalty upon mines, would have amply secured the interest upon that sum—even should so much be ultimately demanded; but the colonists probably foresee expenses in the way of roads, bridges, telegraphs, and police for the territory, which will swallow up all attainable revenue. Under these circumstances they are disposed to press for the Imperial guarantee, if not even for more effective assistance in the shape of a direct loan at three or three and a half per cent. The point therefore arises whether it is wise for the British Government to assist in their acquisition of this gigantic estate, and if so to what extent.

It will, we think, on the whole, be wise for Government to assist. It is true that in so doing we give to Canada a benefit for which, while she neglects to extend her military establishments, we receive no adequate equivalent; but that is not precisely the whole question. In the first place, though the pretension of Canada to claim the territory as part of the "Canada" ceded by the French is preposterous, the Imperial Government having always exercised the right of fixing colonial boundaries, the Canadians have at all events a preferential right to lands which their population, their roads, and their expenditure generally must so greatly benefit. Under the ordinary circumstances of such colonies they would have obtained these lands for nothing, as the people of New South Wales obtain their interior prairies, and the rights which now impede them were created by ourselves. In the second place, the British Government stands, in one sense, in a position of obligation towards the Hudson's Bay Company. Whatever the value of the original title of that Association—and it is not a very good one, the Crown having stretched its power, and the Company strained its charters—that title has been acknowledged by too many administrations, and implicitly recognised in too many legislative Acts to be now impugned. It has been, so to speak, legally admitted by the nation, and if destroyed for the benefit of the nation, must be paid for out of national resources. Supposing, for instance, to put the extreme case, this country, at the end of an exhausting war, were to cede British America to the Union, it is doubtful whether Parliament would not feel compelled to grant adequate compensation to the Hudson's Bay Company; for though it could of course, acting on the Indian precedent, extinguish the Company's "sovereign" rights, it could not, on its well-understood principles of action, take away its property, and the two are unhappily inextricably intermingled. Relief from that liability, although only a contingency, is real relief, and must be taken into consideration in making the bargain. And in the third place, the ownership of the territory will assist Canada in maintaining that policy which Great Britain desires her to maintain. The real desire of this country is that British America should grow into a separate and independent nation, the stronger the better; and the possession of vast and fertile regions, the sense of power and of the possibility of a great future, tend strongly to develop national feeling. Canada does not feel the wisdom of this policy so deeply as the mother country, and a new inducement to feel it is worth some moderate expense; the cost of guarding ourselves against the United States, and against a Republic of North America, being two very different quantities.

It may be well therefore to listen patiently to the Canadian demand for assistance, even if a little hardly pressed; and the main question is thus reduced to the form in which that assistance can best be rendered. As a rule, this journal is opposed to all colonial guarantees, and indeed to State guarantees of all kinds, for they almost always involve liability without any compensating control. They are like the signatures to accommodation bills which imprudent men so readily grant, because they seem to involve no outlay, but which really amount to debts incurred at the discretion of persons whom the endorsers cannot control. In the case of most colonies, such as the West Indies, or Ceylon, or the Mauritius, or even Australia, it would be easier for the Imperial Treasury to lend the money directly, and then if it is lost, it is lost, and the end of the affair is visible. But the case of Canada is exceptional. We cannot compel her to pay the interest as we could compel the Crown Colonies or even Australia — which latter group of colonies is within reach of naval action—and she will be much less inclined to pay it regularly to Government than to individuals. Everybody is less fair to the State than to a private debtor, and in this instance the State would have inferior means of compulsion. We look upon it as a fact beyond all question that State stock in every country gravitates sooner or later towards the hands of those who live in, or minutely know that country, that the mass of Indian Consols is held by natives and Anglo-Indians, and of colonial bonds by persons interested in the colonies, and the Canadian stock must ultimately fall to Canadians. Now Canadian holders can bring a direct pressure to bear upon a Canadian Legislature which the Imperial Government cannot; could for example insist upon certain forms of taxation, which, if proposed from the outside, would be summarily rejected. The chances, therefore, of the interest being paid to bondholders would, as compared with the chances of regular payment to the Treasury, be very great indeed. The guarantee is, therefore, the cheapest form in which assistance could be given. As to amount, we think the Hudson's Bay Company a little too pretentious. They are inclined to deal a little too much as Crown to Crown, and as if they had a right to refuse in the last resort to sell altogether. Parliament, on the other hand, has always laid down the principle that it has a right to absorb a subordinate sovereignty like that of the East India Company or Hudson's Bay Company at discretion, and to compel a sale of property required by the nation without the owner's consent. In the last resort, therefore, the Ministry have the power to compel the Company to sell to the colony at a price to be settled by arbitration, and if the terms demanded are excessive that power should be employed.

THE PROPRIETY OF REGULATING THE LABOUR OF CHILDREN.

It is not likely that the recommendations contained in the fourth report of the Children's Employment Commission will excite much discussion in Parliament. The Commissioners ask only for the extension of an Act, the Factory Act, which has been already tried, and the facts they relate are alike too simple and too terrible to allow of opposition, even if the employers wished to offer it, which does not appear to be the case. The Commissioners prove that in the cutlery trade children are employed from the earliest age at which they can turn a wheel, give instances where babies of six have been so employed under compulsion of their parents, show that mere boys are worked frequently fifteen hours a day, and occasionally all night and day for some days running, and quote evidence of the consequent ignorance, quite horrible in its grotesqueness. A boy of fourteen, for example, tells them :—"Get 8s 6d a week, and have 6d of it for myself. "For nearly a year have put 4d out of this into the bank. "Generally do shiver like this when I've been hot. Do not "go to school on Sunday or at night; have no good clothes "to go in. Father makes 18s a week, one of my brothers "10s, and I have three sisters at work. Three of us are at "home too little to work. Go to a church. (Qy. what "church?) Some say it's Protestant, some Catholic. Parson "preaches out of a pulpit and reads out of a Bible, but I can't "get nigh enough to understand the words. Have heard "say that God made the world, and that all the people were "drownded but one; heard say that one was a little bird. Sup- "pose that Christ was a man. He was a father and teached "em to read out of a Bible. Think he was put to a cross." In the "heald knitting" trade children of the tenderest years, sometimes from five years old, are kept at work on an average fourteen hours a day, and "hit" when they go to sleep. In the manufacture of umbrella handles lads and young girls are exposed to demands for overtime, which often involve labour for fifteen consecutive hours. In the India rubber trade fifteen hours are a frequent stint, and this extends to boys and girls of fourteen. The very worst case, however, is that of the artificial flower workers. In this trade there are two "seasons" of four months each, and the manufacturers are exceedingly harassed by short time, orders being given which must be executed within twenty-four or forty-eight hours, or the customers will not take the goods. The work is severe from the straining of the eyes and the use of carmine and blue dust; yet during these periods, amounting to two-thirds of the year, the hours of work are described as tremendous. "For a considerable portion of that time "girls of 16 and upwards constantly work 14 and 15 hours "a day, and occasionally as much as 18. One girl, aged 19, "had worked twice all night through, and on till 5 p.m. "the on first, and 10 p.m. on the second occasion. Even "children of 12 and 10 have often worked 13 and some- "times 16 hours." In the glass manufacture, children enter at nine, and Mr White reports that work being arranged by relays, the lads never get sufficient unbroken rest :—"During the working part of the week six "hours is the utmost unbroken period ever attained at "any one time for rest, and out of this has to come the "time spent in coming and going to and from work, washing, "dressing, and meals, leaving a very short period indeed for "rest, and none for fresh air and play, unless at the expense "of the sleep necessary for young boys, especially at such hot "and fatiguing work. If the usual week were extended to "the five days, contemplated as possible, this would take "away some of the time which the boys now have for rest "and play at the end of the week, while it increased their "labour. Even the short sleep is obviously liable to be "broken by a boy having to wake himself if it is night, or "by the noise if it is day." Instances, moreover, are given of boys working 36 and even 48 hours on a stretch, and over-time is very frequent, although much of the work has to be done under excessive heat. Of course, in all these trades no time is left for education, and employers admit that the consequent ignorance of their hands places themselves at a serious disadvantage. Intelligence, in fact, saves time and money; and in the worst trade of all—that in artificial flowers—some taste is also required. French workwomen, says one witness, can think; English can only obey orders; consequently, purchasers prefer the French article.

We have purposely refrained in this brief summary from quoting any of the numerous sensation paragraphs in the reports, or any of the dismally pathetic morsels of evidence with which they are literally choked. The daily journals have given them faithfully, and to our minds there is more impressiveness in the four broad facts which the Commissioners have placed beyond cavil. First, that in the trades named, and some others, scores of children are employed under twelve years old. Secondly, that such children are frequently, and children between twelve and eighteen are almost always, made to work from twelve to fifteen hours a day, and exposed to the risk of being called on to labour occasionally for twice that period. Thirdly, that the men themselves neither can nor will prevent this employment of their children. And fourthly, that the larger employers and most of the men wish for legislative restriction. These points granted, and they cannot be denied, opposition as it seems to us can scarcely be expected. Putting aside all considerations of humanity there cannot be a doubt that the early over-work of human beings is gross economic waste, as much waste as it would be to drive railway trains twice as fast as they were wanted to go, and then consume the saved time in stoppages. Work so performed is sure to be bad work, sure to be insufficient work,—extension of time implying decrease of speed,—and sure to be costly work, health being a distinct element in wages. This waste is only partially redeemed to the individual employer, he losing as much by the ignorance of old hands as he gains by the toil of young ones, and to the whole country it cannot be redeemed at all. It loses by the process the benefit of at least ten years labour by a mature man, the child so treated becoming feeble at least that time before the natural failure of his powers.

We say, "setting apart all considerations of humanity," but we deny that they ought to be set apart. The use of all our economical laws and commerce and manufacturing enterprise is to make men happier or better, and the moment those results are visibly interfered with the utility ceases. They are so interfered with when children who have to become men and women are used up in childhood, and we cannot but believe that the Commissioners might have made their recommendations much more general. Is there, for example, any sound reason why the labour of children out of the parents' house, under the age of 12 years, should not be prohibited altogether? It can never be really profitable to the nation any more than the labour of two-year-old horses, and the cases must be very few indeed in which it is in the long run profitable to individuals. At the same time, it is the most serious obstacle in the way of that complete education of the people which we are trying to secure, and which, if the working class is to obtain power, we must secure for our own sakes as well as theirs. At present the effect of our piecemeal legislation is often not so much to regulate child labour as to interfere with its application. The father who to obtain drink puts a baby son of six to the wheel, will not, when prevented, send him to school, but will only seek for some occupation which the law has not yet reached, or some employer who, working at home, is not likely to be inspected. The practice should be prohibited altogether, and every child in the country left to get its natural rest, and full use of its limbs, and some tincture of knowledge before it is put to work at all, and then from twelve to sixteen be protected by the Factory Act. We doubt very much whether if that broad plan were adopted any individual would lose a shilling, while we are certain that the next generation would be competent to earn a great many more shillings than the present. This journal has always held out stoutly against undue interference with the labour of adult operatives, believing that freedom,—except in cases like those affected by sanitary laws where combination is essential, and therefore compulsion,—secures in the end the best result. But children are not free, ought not to be free, and are not intended to be free, and the legislation which secures them from over-work and compulsory ignorance is legislation not against freedom, but against the abuse of a necessary right of coercion. We do not allow a father to starve or flog a child to death, and have just as little right to allow him to over-work it till it dies, or passes through life deprived of half its natural energies. Open-air labour is of course subject to somewhat different conditions. It is not often or necessarily unhealthy, and is sometimes even beneficial. But even open-air labour in childhood is always

Digitized by Google

fatal to education, and is very often excessive, as the next report of the Commissioners will, we have no doubt, show. They have been directed to inquire into the system of "bondaging," or agriculture by gangs, and they will, we believe find that, owing principally to the want of regulations for child labour, a system in itself only an application of combination to field-work, and therefore beneficial, has been so conducted as to be absolutely inconsistent with civilisation.

IRELAND IN TRANSITION.

LAND TENURE.

In concluding his vigorous sketch of Irish History, Professor Goldwin Smith remarks that "the lateness of the union "between England and Ireland, though caused by and con- "nected with all that is most deplorable, is not in itself "altogether to be deplored.....Wholesome checks are thus "imposed upon tendencies which otherwise would become too "exclusively dominant, and give a one-sided character to "civilisation; and questions are kept in some measure open "which would otherwise be prematurely closed." And, in illustration of his remarks, he refers among other topics to that of the proper relation between landlord and tenant. The observation appears to us to be as just as it is original, and the particular instance of its application which we have adduced particularly important. Land tenure is just one of those questions which are now in danger in England of being prematurely closed; and if this result does not happen, it will only be through the necessity imposed upon us by the practical exigencies of Ireland for a more thorough analysis and larger theory of the facts of that problem than we have yet applied to them.

The approved doctrine in this country on the subject of the landlord and tenant relation is, we believe, pretty much to this effect: it is regarded as a relation in principle precisely the same as all others arising out of contract, involving no other issues, and consequently amenable to precisely the same rules in legislation. As the true policy in commerce is freedom to contract, and strict enforcement of the terms once agreed upon, so, in the questions which arise between the owner and tiller of the soil, this is regarded as affording the only sound and effectual solution. Let landlords and tenants make their bargains like other vendors and purchasers, and let the State see that what is agreed upon is performed—such is the simple panacea provided by the existing political pharmacopœia of Great Britain for all disorders arising out of the tenure of land.

Yet, however, it may be the fashion in this country to identify in doctrine dealings in land with the ordinary transactions of commerce, when the transition is made to the business of life, the conduct and language of Englishmen are far from being in harmony with this simple view. According to the theory, there would in principle be no distinction between the act of a capitalist who should withdraw his money from a particular investment in order to reinvest it at higher interest, and that of a landlord who, on the expiration of a tenant's lease, should eject him from his farm in order to replace him by a tenant offering a higher rent; in fact, the broadest distinction is observed between these cases. While, under all circumstances, the former would be considered a perfectly legitimate operation under certain circumstances frequently occurring, the latter exercise of authority would be regarded by the public conscience as grossly unjust. And the same distinction runs through all our modes of thinking and acting in relation to these subjects. No one would think of treating it as of public moment whether capitalists should invest their money at long or short terms, in foreign or domestic stocks, at high interest with middling security, or at low interest with good; but long or short leases, absenteeism, and rack-rents are everywhere regarded as involving considerations which justify them as being treated as public questions. The latter topics have in all countries furnished demagogues with their most effective themes.

The general sentiment on this subject therefore plainly recognises a distinction for which the received theory makes no provision. Nor is it sentiment only that is here at variance with what is held to be economical theory. The law of the country is equally repugnant to it. Not to speak of the general distinction between real and personal property, which might justly be referred to the accidents of a social system that has passed, or is passing, away—the Common Law and Statute Book of England are full of provisions which have their root in exigencies common to all conditions of society,—which, indeed, in many instances are of quite modern origin—provisions, however, which are wholly irreconcileable with the received theory respecting land. Thus, to give a few instances, the law of emblements, the custom prevailing in many English counties and enforced in the English Courts, imposing conditions on landlords over and above any comprised in their contracts with their tenants, the "Montgomery Act" of Scotland, and several Irish enactments on the subject of landlord and tenant—all proceed upon the assumption that the obligations arising out of this relation stand upon a different footing from those created by ordinary contracts, and one which demands from the State a larger supervision and control.

Still more striking will the discrepancy between fact and theory on this subject become if we extend our view to other countries. Indeed here the discrepancy is no longer between theory and fact, but between English theory and the theory and practice of the rest of the world. English writers are in the habit of speaking of the "peculiar notion" of the Irish respecting property in land—"half Maori and half Hindoo," as a Contemporary recently described it; but, whether true or false, the Irish notion is certainly not "peculiar;" nor was it necessary to travel to the antipodes in order to find for it a parallel. That vague sentiment that the actual cultivator, if not the owner of the land he tills, should at least share in the rights of ownership in such a sense as that he shall not be absolutely dependent on a landlord's caprice, is one which in fact has moulded land tenure over nearly the whole of continental Europe, where, speaking generally, all that portion of the land which is not in the hands of peasant proprietors, is held under customary rents. The two most notable territorial revolutions in modern times—those of France and Prussia—have been accomplished in entire conformity with this view. Stein's celebrated edict by which serfdom was abolished in Prussia embodied even the very terms of the Irish ideal—fixity of tenure and of rent. "We are in "reality," as Mr Laing justly observes, referring to English practice and ideas on this subject, "now, in the nineteenth "century, more the *toto divisi orbe Brittanni* than we were "in the fourth or fourteenth." It is thus not the Irish, but the English, or rather the British, notion that is "peculiar." The doctrine of open competition and contract as the remedy for all social disorders arising from land tenure may be as sound as its admirers believe, but it has certainly failed hitherto to recommend itself to the convictions of any large proportion of mankind.

Now, in this state of things, one may, we suppose, without presumption consider whether the view so generally accepted in this country may not have been too hastily adopted, whether for so almost universal a phenomenon as the "peculiar Irish notion" there may not after all be a solid foundation in fact—a foundation of which the accepted theory takes no account. It seems to the present writer that there is such a foundation; and, without pretending here to exhaust the subject, he will state in a few words what appear to him its main elements. 1, land is absolutely indispensable to the most urgent human needs, and at the same time absolutely limited in quantity; 2, it is, unlike the great mass of commodities, not the *creation* of any man's industry; 3, it differs from all other agents of production in this circumstance, that it may, in the productive process, be greatly improved or deteriorated according to the treatment it receives.

Candid consideration of these circumstances will, we think, show a real distinction between land and other forms of wealth—a distinction which will account for, and to a certain extent, as it seems to us, justify popular usage and sentiment in respect to it. It is evident, for example, that one of the strongest grounds for the recognition of individual property—the support which this institution affords to industry and production through the prospect thereby assured to the labourer of enjoying the fruits of his toil—has no application to a commodity which has not been produced, and cannot be produced, by human industry. And though it is true that other reasons may be found to justify the extension of the principle of individual property to land, still the fact that land, so urgently needed for the general purposes of mankind, is yet strictly limited in supply, cannot but be allowed as a weighty reason for jealously guarding and limiting our concessions in this direction. Further, it is also evident that the liability of land to improvement or deterioration in the process

Digitized by Google

of agricultural production—and, we may add, to augmentation of value from causes independent of the acts whether of landlord or tenant—introduces fresh and important elements of complication—elements which have no place in those transactions of commerce with which the received theory would identify dealings in land. When a merchant borrows capital, he borrows a certain value, which precise value he undertakes to return on the termination of his loan. The borrower of land undertakes to return, not the value which he has borrowed, but the thing itself, of which the value may in the meantime be indefinitely diminished or enhanced. Now, these facts suffice, as it seems to us, not merely to explain the popular sentiment with reference to land tenure, but in a great degree to justify it. They show that dealings of which land is the subject are, from the nature of the case, invested with peculiar conditions; these conditions being of a kind which take the land out of the category of ordinary commodities. Under these circumstances may it not be possible that principles of legislation which are competent to the regulation of dealings in ordinary commodities, may not be competent to the regulation of dealings in land?

We owe the reader an apology for this rather lengthy dissertation upon a somewhat abstract subject, but, as it is the aim of these papers to furnish, as far as may be done within such compass, materials for a sound judgment on the present industrial state of Ireland, and as we are convinced that a fair appreciation of the facts of Ireland's condition is not possible so long as Englishmen persist in looking at Irish facts through the medium of the prepossessions respecting land tenure current in this country, we have found it impossible to accomplish the object we had undertaken without an attempt to deal with those prepossessions. If we had any doubt as to the necessity of this course, a recent example of their effect in foreclosing discussion would have removed it. In the examination which took place before the Irish Land Tenure Committee of last Session, it was very clearly brought out that the laws affecting landlord and tenant in Ireland were little different from those in force in this country, and not at all less favourable to the tenant, from which position it was thought by the majority of the Committee a just inference that for the backward state of Irish agriculture the law could not be responsible. If agriculture has flourished under these laws in England and Scotland—Member after Member argued—its shortcomings in Ireland plainly are not chargeable upon the laws. And we observe that several of our Contemporaries have adopted and repeated the Committee's argument. The reasoning is doubtless irresistible if we assume that a law which works well in England is of necessity framed in conformity with the universal requirements of mankind. But why are we to assume this? We believe it would be nearer the truth to say that Great Britain, if not the only country, is one of the very few countries in the world in which the English law of landlord and tenant would be workable. That it is workable in England is mainly due to two circumstances—the custom according to which the landlord undertakes all outlay of an important character needed for cultivation; and, secondly, the good feeling subsisting between owners and cultivators—conditions which, sustained by a sound and strong public opinion, have supplemented the deficiencies in the law. In Ireland, we need scarcely tell the reader, all these conditions are reversed; it is the tenant, not the landlord, who, as a rule, makes the improvements; and the state of feeling between landlord and tenant, although there is reason to hope on the whole improving, is still mainly such as centuries of mutual recrimination and wrong have made it. Nor does there exist in Ireland that impartial arbiter between landlord and tenant which an independent public opinion might afford. Under these circumstances the law, which on the whole works fairly in this country, has in Ireland produced a state of society of which Ribbon associations and Fenian conspiracies are the normal outcome. And when this is pointed out to English legislators, the consideration of a remedy is estopped by some cut-and-dried maxim, dubbed for the occasion an "economic law." The fault, forsooth, lies with the Irish people themselves. No doubt it does, just as the necessity for all law lies in the infirmities and faults of human beings. But why is it to be assumed that the particular infirmities and faults which produce the present evils are beyond the reach of legal remedy? We know of no reason except this, that the law which suits an Englishman must be supposed to suit the rest of mankind—that a practical rule, which, under the very peculiar and almost unique circumstances of social life in modern England, produces tolerable results, is, *ex vi termini*, a law of nature, any deviation from which means social disorder and ruin. While these prepossessions keep their ground, it is impossible to come to close quarters with English thinkers on that which forms *the* question *par excellence* of Ireland's social state. We have thus found it necessary before attempting to set that question before the reader to challenge the prepossessions which exclude it from a hearing. J. E. C.

CHANGES IN PRICES.

TO THE EDITOR OF THE ECONOMIST.

SIR,—The subject of prices is said to belong to a class of autumnal topics which have not always the fortune to be treated by the most competent writers, but I venture to hope you do not on that account consider it unworthy of attention, although, through absence from England, I have not the advantage of knowing whether it has been lately discussed in the ECONOMIST. As a proof of the practical importance attached to it on the Continent, I may refer to the speech with which Herr Von Gessler, Minister of the Interior, closed the session of the Diet of Wurtemburg last month, and his special notice of a recent augmentation of all public salaries and pensions in that State, "in consequence of the change in "the value of money." Baden, I believe, was first to take a step in this direction; the example has been followed by several other German States besides Wurtemburg; and it is expected that an augmentation of official incomes on account of higher prices will soon be universal throughout Germany. In Belgium, again, all Government salaries have already been raised, and the Belgian Communes have considerably added to the stipends of schoolmasters. No such measures, so far as I have learned, have been adopted in France, but the great increase in the cost of living in most parts of that country is notorious; and I need hardly add that the advance of prices in the United States, and still more in India, is a fact of which not a few Englishmen have had an unpleasant personal experience.

Various causes have been assigned for a monetary phenomenon presenting itself in so many different parts of the world. It has been attributed by some to the new gold; by some to a general increase in wealth, consumption, and luxury; and by others, on the contrary, to war, murrain, and the failure of crops. Out of all these considerations, taken together and properly applied, a nearly adequate explanation of the changes in prices and expenses in many places during the last fifteen years might, I think, be made out; but Mr Mill's Logic has not extirpated the fallacy of overlooking the possibility of a plurality of causes, and gold, exportation, luxury, dearth, has each singly been pronounced the one universal cause of the dearness of living. The insufficiency of each singly to account for all the facts of the case might easily be shown, but I must confine myself to a few particulars. A depreciation of money through the abundance of gold falls short of explaining the monetary changes which have taken place, for in some of the places in which the prices of land and its produce have risen most, a rise had taken place before the new gold had come into circulation, and in others a rise would demonstrably have taken place if the new mines had not been discovered at all. It was proved before a Parliamentary Committee in 1847, that in the neighbourhood of the Liverpool and Manchester Railway the price of land had doubled, and farmers could pay double their former rents, since the opening of the line; and in 1847, Mr Smith, of Deanston, stated that he knew of land the money value of which had been septupled by the railway from Edinburgh to Glasgow. Again, about thirty years ago the price of beef in Wicklow was 2½d a pound, and eggs 2½d a dozen, but these prices had been doubled by improved communication with England and the increased demand of the manufacturing districts, before Californian and Australian gold were heard of. In the Isle of Man I have ascertained that the prices of meat, butter, wine, &c., have been gradually rising for above thirty years, although the rise has been greatest in the latter half of that period. Fish, however, it appears, keeps much as it was thirty years ago in the Maux market, chiefly I presume because the fishermen had then the same access to the Liverpool market as now; while the mar-

Digitized by Google

ket for the produce of the soil has been all along limited to the island itself, but the number of residents and visitors has steadily increased.

Upon the continent of Europe, and elsewhere, both East and West, a rapid elevation of prices has in many places followed the construction of a railway. For example, in the district called the Jardin de la France, the price of land rose from 4,000 to 10,000 francs a hectare on the opening of the line from Orleans to Nantes, and in all the country towns of France which have now railway communication with the metropolis, the inhabitants complain of an approximation to metropolitan prices for provisions and labour. In Egypt, the railway from Alexandria to Suez tripled the price of land in its vicinity; and cases might be mentioned in which land in the United States, which was previously unsaleable at the minimum Government price of a dollar and a quarter, has risen on the opening of a railway to 300 dollars an acre.

It must be admitted that in those places, formerly cheap and remote, which have obtained great improvements in communication and traffic within the last fifteen years, we cannot separate the effects upon prices produced thereby from those of the new gold; but what is clear is that causes independent of the increased production of money from the mines have been at work, and that the production and distribution of the new gold supervened upon an elevation of prices in many places arising from a different cause, namely, an improvement in their position with respect to the markets for their produce. Shall we say then, with some persons, that the new gold has had no effect whatever upon prices, and that the increase of trade and consumption accounts for all the facts that can be adduced? To this the answer seems to be, that but for an abnormal increase of money the equalisation of prices by steam and free trade in cheap and dear markets must have occasioned a fall in the latter proportionate to the rise in the former, and that no such fall has taken place. Down to the discovery of the new mines, the price of provisions in London was kept down by railways, in spite of the increase of population, and the necessary tendency of access to the cheaper markets was to lower prices where they had formerly been relatively high; but the new gold seems to have prevented the fall that would otherwise have taken place in the dear markets, and to have increased the rise in the cheap ones. Indeed, in spite of the improvements in the means of supply, the metropolitan prices of several descriptions of food has risen in the last fifteen years; though, taking quality into consideration, the rise has not, probably, been so great as has been alleged. In 1835, butter in Paris was 2f 25c per kilogramme, while in 1856 it was 2f 11c for a better quality, and if the butter commonly sold in London is now dearer than it formerly was, I believe it is also, generally, much better. On the whole, however, taking town and country prices together, the price of animal food has, beyond question, immensely increased, and the increased cost of living generally complained of must, I think, in part be attributed to a monetary disturbance caused by the mines. Some writers have contended that it arises entirely from a general increase of wealth and of luxury; but if this means that an increase of wealth in the sense of commodities, and not money, tends to make commodities generally dearer, one can only regard it as an example of the extraordinary blunders the human mind is capable of making in political economy. If, on the other hand, it means that there has been a great increase in the amount of money circulated and expended, it seems impossible to deny that a good part of the increase must have come from the gold mines. In the United States, indeed, to which one of the luxury theorists has specially referred, paper instead of gold has been the exalter of prices, and one need not go beyond a reference to the state of the currency to account for a great increase in the nominal cost of living.

Although, however, it is evidently absurd to say that an increase in general wealth—that is to say, in the bulk of commodities—tends to raise prices in general, it is true that it may lead to a rise in the price of particular articles of which there is not a proportionate increase in quantity. If corn, tea, sugar, and several other articles grow cheaper by reason of plenty, more money can be spent upon butter and meat, and these will grow dearer if the supply does not keep pace with the increase in demand; and this seems in fact to be clearly one of the causes of their actual dearness. Those who attribute it to a positively diminished supply in the last fifteen years contradict all the obtainable evidence respecting the domestic production and importation of animal food, though for want of agricultural statistics there can be no proof in figures of these errors. So far from the increase of prices indicating a diminution in the stock of commodities and of the real wealth of mankind, it indicates, I think, in most places, and as regards most articles which have risen, an advance in general abundance and prosperity, though it indicates also the fertility of the source of money. Thus the price of meat has risen in England mainly because the poorer classes have been able to consume more of it; and prices in general have risen in India because its commercial situation and the demand for its produce has been immensely improved. In the part of Germany where these lines are written, animal food is much dearer than it was fifteen years ago, but the working classes are able to buy it as often in the week as they formerly did in the year, and they are much better housed, and wear much better clothing than they formerly did, when prices were lower, because less money was current through the absence of traffic and resort, and labour was little in demand and ill paid.—I am, Sir, your faithful servant,

September, 1865. T. E. C. Leslie.

SAVINGS' BANKS RETURN.

The following return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Oct. 7, 1865:—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
	£ s d	£ s d
Savings' Banks:—		
In money and interest credited	40,754 9 3	165,200 10 8
To transfer certificates from Post Office Savings' Banks to Savings' Banks	213 1 6	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	39,170 7 11
Total	40,967 10 9	204,370 18 7
Post Office Savings' Banks:—

Agriculture.

COMMERCIAL PRINCIPLES APPLIED TO FARMING.

A VISION OF THE FUTURE.

Our readers will be familiar with the proposition, that the main defects of our agricultural system are due to the imperfect manner and limited extent in which the commercial principle is allowed to operate in the business of farming. Farming is a trade, a manufacturing trade, yet the energies of the farmers are cramped and deadened by an obsolete feudalism. There is not one farmer in a hundred who would not farm better than he does, who would not adopt more commercial and business-like practices than he at present follows, were he not prevented from so doing by the anti-commercial and semi-feudal restraints imposed upon him by his landlord. This is far more the case in England than in Scotland, where under a system of long leases—though scarcely up to the requirements of the day—the commercial principle as applied to farming has been greatly more developed.

The Scotch farmers have taken a decided lead in the emancipation of their avocation from the medieval trammels to which it is subjected, and their English brethren will do well to watch the various manifestations made across the Tweed in favour of free farming.

The Wigton Farmers' Club has for its President a landowner, Sir Robert Briscoe, whose enlightened views in regard to the business of husbandry are creditable to his class, and under his auspices the Club is contributing greatly to the progress of sound opinion on the subject. At a recent meeting of the Club Mr Lamport, a successful merchant, read a paper "On Commercial Principles Applied to Farming," which is highly suggestive of the future open to agriculture. Now, though we believe that it is from farmers that all practical improvement must come, yet there are so many analogies between commercial trades—usually so called—and the farming trade, that no one is more likely to make out a general plan for the development of agriculture than an intelligent

Digitized by Google

merchant. So thinking, we deem a brief statement of the points of Mr Lamport's paper will be eminently useful.

After explaining that he was not a practical farmer, and that he should "endeavour to produce authority for his facts, and to show reasons for his conclusions," Mr Lamport said he should define farming, and describe the essentials of a practical farmer; and having secured those grounds would "compare agricultural operations with those of the manufacturing and other staple branches of our national industry." He proposed to show "that the principles involved in all are essentially identical," and that all "should be guided by the same rules and referred to the same standard." Farmers had neglected these principles, and the results had been waste and deficient profit. As a definition of farming he adopted the description which on a former occasion had been made by their President, *i.e.*, "land is a machine through which the farmer passes his capital; you are but as tradesmen and manufacturers; you sell and you buy; you manufacture your goods equally with them [the manufacturers], though you select land as your manufactory, because best suited to your rearing and knowledge."

Though it is said changes of season and the fickle influences of atmosphere and climate involve the farmer's business in the necessity of "long averages" in estimating his profits, yet "the merchant and shipowner, who carry on their operations under natural changes as sharp in their uncertainty, involving greater risks and yielding more precarious results than any farming." The farmer then has no peculiar function. He can raise no plea for immunity from the risks and transitions of trade, his business being "essentially a manufacture," though one "carried on under more than the average of healthful and pleasurable influences."

The definition of a practical farmer is simple enough—*i.e.*, "a person who farms for his living." Farming, then, being a manufacture, and the farmer a person who engages in this process to gain a livelihood, his operations should be guided by "the broad recognised principles of production, which make other branches of trade yield a fair amount of profit." These are—1, division of labour; 2, the employment of mechanical and other appliances for economising labour and lessening the cost of production; 3, a maximum production for a given outlay. These requirements demand an extensive business, ample capital, and a regular system of management. As the various smaller manufacturing establishments of Lancashire and Yorkshire have been merged into large mills, so must the farming ultimately be carried on upon a large scale. Mr Lamport suggested that to this end farming partnerships will be necessary. Thus one partner would manage the tillage, another the purchase, management, and sale of live stock, while a third—perhaps supplying the capital—should keep the books and look after the financial concerns of the partnership. Mr Lamport's example of a large farm suitable for a farming partnership, is one of 500 or 600 acres, with a capital of from 4,000*l* to 5,000*l*, but we confess we see no reason why farms of twice that size and employing more than double that amount of capital should not be well managed by one farmer of enterprise and intelligence without the impediment—for such it must generally be—of a partnership. Such farmer could easily engage a man with the special talent of managing and dealing in live stock, while a moderately-paid clerk would keep any accounts which the farmer might find useful. There is no doubt, however, that the master must have a general and substantial knowledge on all these points in order to obtain and control his proper subordinates. Nor would there be any difficulty in meeting with men willing and able, both as regards capital and skill, to undertake the largest farms, provided they could obtain long and rational leases, and follow their avocations upon conditions consistent with independence and self-respect. It is far more from the absence of commercial principle in the contracts for letting farms, and in the relations of landlord and tenant, that British—or at all events English—husbandry is depressed and retarded, than from any want of what we may call the business machinery of agriculture—such as partnerships and other arrangements for combining capital and dividing labour. Nevertheless, there can be no doubt, that if the commercial principle could ever be fully applied through all the series of agricultural engagements and operations, new and hitherto untried plans for increasing agricultural products and enhancing the profits of farming would come into use. Besides insisting on good book-keeping, and that not merely a cash account, and a record of everything the farmer buys and sells, but "a good system of books as a registry of the results. By it every variety of crop and every variation of quantity is brought out ready for comparison on an unvarying common denominator—money. Prize cattle, show turnips, giant wheat, and all the results of fancy cultivation, are reduced to the inexorable standard of this common denominator." Of the benefit of such a complete system of book-keeping none can doubt, though the practical difficulties in its way in the farming business are considerable.

Then Mr Lamport deems a weekly attendance at market to be a serious waste of time. So he regards the retaining the crops in stackyard and barn by the small farmer, who propably wants capital, "worse than idle." It may however be said that the occasional attendance at market—now seldom involving much loss of time or expense—keeps the farmer alive to the business topics of the day, while the gradual thrashing out of his grain crops enable him to use his straw more advantageously for his live stock than he could if he thrashed out and sold the whole in bulk immediately after harvest.

All these things are details which may safely be left to individual farmers, when once the commercial principle has been fairly brought to bear on their business. This will enable farmers to make larger profits and to secure greater confidence of the moneyed classes than they at present possess. Mr Lamport says truly, "It is only businesses which do not pay, and that are *carried on in a way that does not command the confidence of the moneyed class*, that are starved and cry out. Once show therefore that agriculture is fairly profitable, and establish a fair claim to confidence from its organisation and management, and from a thousand minute and unsuspected sources, and in a thousand ways inscrutable or scarcely traceable, capital will find its way—like water into your deep drains—to fill the empty coffers of the farmers, and fructify their half-cultivated fields."

Sir R. Briscoe, the chairman, endorsed Mr Lamport's views as to farming partnerships, and remarked that "the question now to consider was how circumstances were to be dealt with so as to lead to the desired improvement." And Mr Lawson, M.P., "thought some of the suggestions of Mr Lamport as to partnership very valuable; and in his own case the fact had happened that a younger brother had become a partner in the concern and was a very good farmer." We shall on a future occasion refer to some of the immediate obstacles to the realisation of these bright agricultural visions.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 12th inst. The return for the previous week is added:—

The Bank of France on Monday raised its discount to 5 per cent. and its interest on advances to 5½. Notwithstanding this increase, the return of to-day shows a decline of 33,162,000f in the stock of coin and bullion. Last week, from a decline less than that sum by 11,400,000f, an augmentation of the discount was thought necessary; but none has been declared to-day, neither is any expected this week, unless, indeed, there should be a new advance at London. The situation of the Bank is satisfactory even in the eyes of the most timid. It has 437,755,000f of the precious metals to 893,590,000f of notes in circulation, and 192,560,000f of deposits. The decline in the bullion and coin above mentioned is accompanied by an augmentation of 30,190,000f in the bills discounted compared with last week, and by one of 10,322,000f of the notes in circulation. The deposits are 24,783,000f less.

Although the elevation of the Bank rate of discount was taken as a precaution against a demand for coin and bullion from abroad, and was consequently protective of French commerce, the Bank has been assailed for having made it. But nothing can be more unjust and unreasonable than an attack on such a score. The raising of the rate has besides afforded an opportunity for producing anew the platitudes in which certain economists and journalists in these parts delight, about the injury dear money does to commerce, about the duty of the Bank of France to keep the rate

Digitized by Google

of discount constantly low, and about the means it has of so doing; and of the opportunity praters and writers have availed themselves largely. As, however, their platitudes have been repeatedly reported, it would be a waste of time to examine them again.

The principal characteristic of the Bourse during the last few days has been indecision, but to-day more confidence was manifested in consequence of the discount remaining unaltered both at Paris and London. The following are the quotations: those of the Societe Generale, the Parisian Gas, the Mexican 1864 loan, Orleans and Western railways, being ex coupon.—

The last accounts from Mexico state that measures had been taken for encouraging immigration, by grants of land, exemption from taxation for a year, &c. They state, also, that it was proposed to establish general warehouses for storing goods on the European plan; also a Credit Foncier to lend money on mortgage. For the latter there is said to be a wide field, as money is generally lent at 1 per cent. per month, and even at 20 and 25 per cent. per annum. The government had determined on forming small colonies along the Vera Cruz to Mexico Railway, in order to protect the wire of the telegraph.

The conversion of the 1864 Mexican Loan is progressing very favourably under the auspices of the Comptoir d'Escompte.

The annual meeting of the shareholders of the Isthmus of Suez Canal has just been held. The report stated that the disbursements in 1864 were 31,221,003f, and the receipts, arising principally from investments of funds, 2,468,857f. But the chief interest of the document was the manner in which it justified the assertion made some time ago by the directors, that they had no need to raise a loan, as had been reported, because they had more than 170,000,000f at their disposition. It appears that they have 41,325,857f in hand in France and in Egypt, and that the rest of the sum consists of the "obligations" which the Viceroy of Egypt has given for the lands he took from the company, and the payment of which is "spread over a certain number of years,"—of the sum (77,500,000f) which he has to pay in addition thereto; and of 44,543,000f to be got from the shareholders from overdue and new calls. The report stated that the total disbursements of the Company, from its commencement down to the 30th of June last, were 119,285,874f. It gave a detailed account of the progress made in the canal works, but was not so affirmative as to the time in which they will be completed as might have been expected; the date of 1868 was however indicated. After the meeting the shares of the Company fell at the Bourse; but they afterwards rose, and to-day they stood at 435f. They are nominally of 500f, and 400f have been paid upon them.

Shareholders in Companies are decidedly becoming less docile. Within the last few weeks mention has been made of more than one Company in which they have been refractory; and now it has to be mentioned that those of the Lyons to La Croix Rousse Railway, in a meeting recently held, expressed loud disapprobation of the report presented to them, and that a considerable number of them, after a stormy scene, refused to take part in an election of a number of new directors.

The Company of the Salt Works of the East (Salines Domaniales de l'Est) will from the 16th pay 25f per share on account of the dividend of the present year.

The Coal Pit and Iron Works Company of Commentry, Fourchambault, &c., is to pay from the 15th 17f 50c per share, balance of the dividend of 1863-4.

One of the Government newspapers declares on authority that there is no intention of raising a loan of 125,000,000f or any other sum for Spain in Paris. This confims what I have already stated to you. The same journal asserts that the Spanish Government itself has no desire to get a loan. But on this point it is in contradiction with the known necessities of that Government, and with applications it has addressed to Paris.

According to the *Annales du Commerce Exterieur* "there are scarcely 1,000,000 bales of cotton in the Southern States of America, instead of 2,000,000 which were counted on." As the *Annales* are published under the direction of the Government, it is to be assumed that this statement is made on authority of special information that has reached it. The *Annales* adds that the next crop of cotton will be only 400,000 bales in place of 4,000,000 formerly obtained, and thus further states that "the crop of tobacco has almost entirely failed."

The *Finance* announces that an English company has contracted with the municipality of Brussels to execute a series of works for rendering healthy and embellishing that city. The sum of 800,000*l* (20,000,000f) is to be paid for it. The works are to be executed in three years, and if they are not finished within a year after that period, the company is to pay 50*l* a week until they are terminated. The company has deposited caution money of 50,000*l*.

The *Gironde* of Bordeaux, as I did last week, expresses a wish to see the Board of Customs, in its monthly returns, present a table of the value of the total imports from and exports to the different countries with which France trades. "The customs returns published in England," says your contemporary, "contain a return very worthy of attention, and which we regret not to find in the French documents—a detail for each country. We are told that the exports, for example, amount to so many hundred millions of francs; but what is the share of each nation therein? We know not. The English know it every month from their tables, so far as England is concerned, and it is extremely useful to see what is the degree of activity in the relations with this or that country. The preparation of such a return for the French monthly tables would not cause a great increase of occupation, since the bureaux possess all the elements necessary, and it would assuredly be very instructive, and highly acceptable to the people who wish to study business matters seriously."

The market report is as follows:

Flour.—At *Paris* quotations are less firm; yesterday they varied from 48f to 51f 50c the sack of 157 kilogs. Six marks were 50f for current month; 50f 25c for November and December. Type Paris 31f the 101 kilogs current month.

Wheat.—At *Paris* choice new wheat, white, was 28f the sack of 120 kilogs; choice red, new, 27f 25c to 27f 50c; first marks, 26f 50c to 26f 75c; good, 25f 50c to 26f; inferior, 22f to 24f.

Cotton.—The market at *Havre*, in the week ending Friday, was much agitated. The sales were 15,945 bales, the greater part Asiatic, the arrivals 2,338, most of which were from England. The stock was estimated at 31,750 bales. Prices rose extraordinarily: United States as much as from 35f to 42f; Egypt and Peru, 38f to 40f; Brazil, 27f to 32f; French West Indies and Terra Firma, 25f to 35f; Surat, 25f to 40f; Kurrachee and Tinnevelly, 30f: Madras and Coconada, 20f to 25f; Bengal, 30f to 35f; China, 15f to 20f. Low New Orleans was consequently 290f the 50 kilogs. and good ordinary qualities in Broach 210f; in Tinnevelly and Madras same price; China, 205f; Egypt, 280f. This week the market has been calm, and yesterday Oomrawuttee was 212f 50c and 205f; Broach, 185f; Scinde, 155f; Cocanada, 175f and 160f.

Coffee.—The demand was more active at *Havre*, in the week ending Friday, and prices improved. 579 sacks Haiti Port-au-Prince, ordinary, 78f 75c to 79f the 50 kilogs, in bond; 5,421 at 80f 50c to 82f; 650 for delivery, 81f; 2,100 Jacmel and Jeremie, disposable, 79f to 80f 50c; 460 Jacmel for delivery, 79f 50c; 1,430 Cape, 83f to 84f; 2,600 Gonaives, 85f to 86f 50c; 700 for delivery, 85f; 1,200 La Guayra, 90f to 91f; 2,750 Rio not washed, disposable, 66f to 66f; 4,700 for delivery, 72f 50c to 83f; 100 Rio washed, for delivery, 90f; 25 Capitania, 74f; 500 Santos, disposable, at prices kept secret. By auction, some damaged Capitania. The arrivals were about 1,300 sacks and 160 casks. This week, Hayti Cape, 84f; Rio, 76f, 78f, and 86f; ditto washed, 105f; Gonaives, 86f 50c and 87f; and for delivery, 85f; Port-au-Prince, 83f; Santos, 74f. At *Bordeaux*, last week, 700 sacks La Guayra, disposable, 90f; 300, 92f; 595 at prices kept secret. This week, Mysore, 117f. At *Nantes*, last week, there were no sales, and there have been none this week. At *Marseilles*, last week, the only sale was 880 sacks Rio, at 65f. Nothing done this week.

Sugar.—At *Havre*, in the week ending Friday, 250 casks French West India, disposable, and 60 for delivery, 49f the 50 kilogs, bonne quatrieme, duty paid; 125 usine, 52f to 59f; 1,550 casks Havanna, by French and English ship, 31f 50c to 32f, No. 12 in bond; 358 higher numbers on the basis of 32f 50c for No. 12. There were no arrivals. This week, Havana, No. 12, 31f 50c, in bond. At *Bordeaux*, last week, 78 casks French West India, 49f the 50 kilogs, bonne quatrieme; 55 usine, 54f to 56f. This week, Reunion, to take at Nantes, 51f 50c, bonne quatrieme. At *Nantes*, last week, refiners having ceased to purchase, calm prevailed. 1,400 sacks Reunion gros grain, 52f, bonne quatrieme; a small lot of French West India, 48f, ditto; some usine, 56f 75c, and 58f 25c, and at prices kept secret; 323 baskets Java, secondary quality, on the basis of 31f for No. 12. This week, Reunion for delivery, 51f 50c down to 51f, bonne quatrieme; Martinique, 49f 75c, ditto; Guadaloupe, 47f 50c. At *Marseilles*, last week, 400 casks Martinique, 30f, bonne quatrieme of Havre; 1,500 Havana, by Spanish ship, 31f No. 12; and 4,500 ditto, 31f 50c; 654 casks Santiago, by English ship, 28f, bonne quatrieme of Havre; 4,500 Brazil, by Italian ship, 27f 50c, No. 10. No sales this week.

Indigo.—The sales at *Havre*, in the week ending Friday, were only 17 chests Bengal, and 2 serons Guatemala, at established prices. There were no arrivals. This week, Bengal at prices not stated. At *Bordeaux*, last week, 83 chests Bengal at previous rates, and 7 Madras at prices not given. This week, Bengal and Madras, quotations not mentioned.

Hides.—Business was animated at *Havre*, in the week ending Friday. 2,630 La Plata dry, 78f to 90f 50c the 50 kilogs; 10,000 saladeros ox

Digitized by Google

light, 52f to 53f; the rest, 58f; 2,000 Monte Video salted cow, 48f; 1,900 Rio Grande salted ox, 51f, indifferent quality; 725 ditto, slightly damaged, at prices kept secret; 1,140 cow, 39f; 300 damaged, 33f 50c; 249 Valparaiso salted ox, 47f. By auction, 29,251 Calcutta calf, out of 32,705 offered, fetched from 30f to 115f. The arrivals were unimportant. This week, Monte Video salted, ox, 53f 50c, and for delivery, 59f, and at prices kept secret; cow, light, 46f 50c; Lima dry, 80f; Bahia dry-salted, 60f; Buenos Ayres dry cow, 85f; salted ox, 53f 50c, and at prices kept secret; Monte Video dry, 82f 50c; Pernambuco salted, 45f 50c; Bahia drysalted, 60f; Arica dry, indifferent quality, 66f; Rio Janeiro salted ox light, 37f; Rio Grande salted cow, for delivery, 47f; Minas dry, 80f; La Plata salted ox, light, 51f 50c to 54f 50c.

WOOL.—At *Havre*, in the week ending Friday, the only sales were 104 bales La Plata, unwashed, 1f 80c to 2f 5c the kilog. The arrivals exceeded 1,300 bales. No sales this week.

TALLOW.—The sales at *Havre* in the week ending Friday were 64 pipes La Plata, disposable, 56f 50c to 57f 50c; 700 ditto, for delivery, 57f 50c to 58f 50c; 14 casks, New York, à la marque, 58f 50c; 2 tons ditto, 60f. No arrivals. This week, La Plata, for delivery, 59f and 58f 50c. New York, à la marque, 60f. At *Paris*, yesterday, the 100 kilogs, octroi duty included, were 126f 20c. But this price, fixed officially by the brokers, was objected to by the melters, who thought it ought to be only, with octroi duty, 125f 20c.

SPIRITS.—At *Paris*, yesterday, 3-6, first quality, disposable, 49f the hectolitre.

Correspondence.

REPRESENTATION OF THE PEOPLE.

TO THE EDITOR OF THE ECONOMIST.

SIR,—As you have done me the honour to notice my paper, read at the British Association, entitled "Statistical data in relation to the representation of the people," I would be obliged if you would allow me to elucidate some points which have called forth a considerable amount of criticism.

The first subject of inquiry instituted in my paper was what would be the number of persons physically, morally, and intellectually fitted to exercise the responsible duty of voting in the election of national representatives, and in round numbers I have shown that it would be about 3,000,000, the number of registered voters in England and Wales in 1863-64 being 1,027,000. Personal attendance being required for voting, I have only stated a fact when I have deducted from the total number of men of age, all those who are incapacitated from bodily disease, or disordered state of mind, or other personal defect. The official incapacity of officers of the Revenue and Post-office, Army and Navy is now prescribed by law, and I offered no opinion on, though I did not sympathise with the expediency of retaining the exclusion. Only permit me to notice that in giving the numbers of the army at 100,000, I have only included the troops at home and those of age. As regards criminals, it is quite true that a large number of those apprehended are not convicted, and that many are recommitted once or twice over, but in numbering this class we should remember that over and above those apprehended the police have a record of upwards of 50,000 male criminals at large of 16 years and above. Taking these facts into account, it will be found that my figures are on the whole not beyond the mark, though in an inquiry of this nature it would be idle to lay claim to scientific accuracy. It is possible also that, in first counting the number of persons in the receipt of public relief and the criminals, and then adding those not able to read or write, a certain number may be counted twice over. Yet I do not think that this would materially disturb the total result. Much has been said as regards the large number excluded through inability of reading and writing. It is asserted that it is incorrect to take the state of education from the number of persons who sign the marriage register with marks, since it indicates in many cases rather unwillingness than inability to write. In answer, I may state, first, that it is the only test we now possess. In the return illustrative of the condition of the people in 1831 and 1865, laid before Parliament last session, the number of children at school is shown as an evidence of the advanced state of education, but that only exhibits what is now being done for the new generation, the fruit of which will be seen ten or fifteen years hence. Secondly, the Registrar-General has again and again pointed out that the number of signatures is as good a test as we can have of the state of education among the adult population. It is not true that the parties, especially in parish churches, with few exceptions, are led hurriedly through this part of the ceremony. In some cases the bridegroom only signs his name and the bride puts her mark, or *vice versa*. In other cases both sign, and it is worth noticing that longer time is spent and more trouble taken when one or both parties cannot sign their names that when they can. It is of course a matter of opinion as to whether ability to read and write should be a test for the franchise. I have a strong opinion that it should, if for nothing else, for the purpose of stimulating education. Since 1861 there has been but small improvement in the proportion who signed the marriage register with marks. In 1861 the number who thus signed was in the proportion of 24.6 males for every 100 marriages. In 1863 the proportion was 23.8. When we consider, moreover, that many may be able to sign their names who could not write another word, it will be admitted that, on the whole, we have in this fact not an unfair index of the education of the people.

The second part of my paper comprises a series of facts illustrating the difficulty of arriving at anything like a right and equitable adjustment of the representation in relation to the number of the people, property, and taxation. The formula given for measuring the number of votes by the proportion of taxation paid by different classes of society has created much interest. In that calculation, however, a distinction was made between the amount paid per head and the amount paid by the total number of persons belonging to each class. Taking the figures as given in the Journal of the Statistical Society for March 1860, the result may be more clearly exhibited in a tabular form as follows, in which the opposite result of taking numbers and taxation is very striking.*

Classes.	Number of persons different classes.	Per centage of votes according to numbers.	Amount of tax paid per head.	Per centage votes in proportion to tax paid by each.	Total amount paid by the class.	Per centage votes in proportion to total tax paid by the class.
			£ s		£	
Upper ...	1,000,000	4	22 0	83	22,000,000	30
Middle ...	9,000,000	32	3 9	13	31,000,000	42
Lower ...	18,000,000	64	1 2	4	20,000,000	28

In this table the paupers were excluded, but the data differed but little from that taken by the "Edinburgh Review," in the September number of 1860, the reviewer having taken a lower average rate of wages and a lower estimate of the total income than is generally assumed; whilst here a further division is made between the upper and middle classes.

Having shown the difficulty of apportioning the votes in relation to taxation, and dwelt on the imperfect knowledge we have of the amount of property held, the conclusion seemed evident that any plan framed with a view to put the distribution of the votes in relation to such data must necessarily be exceedingly defective. It has been said, "Wherefore, then, these terrible numerals?" I answer, simply to indicate that it would be futile to any scheme pretending to apportion the representation of the people on anything like precise or scientific method.

The house rent test is certainly not less fallacious, since large numbers of lodging-house keepers have thereby votes as householders, whilst the lodgers—in many cases men of property—have no votes whatever. One fact, however, is evident from the rental of houses, as given in the census report, viz., that the largest number of persons live in houses at very low rental. It has been said that with the progress of education and civilisation more intelligence and probity are found in low-rented houses than it used to be; but this is scarcely the fact, when we consider the increased value of houses. In truth, low-rented houses represent now a still lower range of condition than in former years.

Seeing, then, the low state of education among the masses, and the low range of rental, the only conclusion deducible from my paper, as regards the extension of the franchise, is that it should proceed rather upon the moral and educational than upon the test of mere house rent; and that, with a view to that effect, a franchise should be established in favour of every one *who, being able to write his own name*, can offer any evidence of property, be it a deposit in any savings bank, or the possession of any other bank or Government stock, or the payment of 2*l* a year to the income or assessed taxes. This would admit of the introduction of all those franchises which were included in Lord John Russell and Mr Disraeli's Bills, viz., lodgers, certificated schoolmasters, clergymen, and members of other professions. A legislation so conceived would, I am convinced, not only bring a great accession to the present number of voters, but lay down a safe and sound basis for the constant extension of the suffrage.

I have to apologise for the length of this communication, and I am, Sir, yours faithfully, LEONE LEVI.

Temple, September 26, 1865.

COMMERCIAL AND MISCELLANEOUS NEWS.

Messrs Stechr, Prieger, and Co., writing from Bombay on the 8th ult., thus allude to the state of monetary affairs:—The position of the Bank of Bombay is becoming stronger and stronger; both the deposits and the cash balance are steadily increasing, so that the directors at their meeting on the 26th ult. having again reduced the rates of discount 1 per cent. all round, making 7 to 9 per cent. A considerable advance has also been established in most bank and land shares. Exchange—A fair amount of business has been done but rates are a shade weaker. Credits and documents are both very scarce, the former have been placed at 2s $0\frac{29}{32}$d to 2s $0\frac{7}{16}$d, the latter at 2s $0\frac{7}{32}$d to 2s $0\frac{5}{8}$d, while the rate for Bank bills has been 2s $0\frac{1}{4}$d to 2s $0\frac{5}{16}$d throughout the fortnight.

The export of sherry from Cadiz for the nine months ended the 30th of September amounted to a total of 34,616 butts, against 55,585 for the some period of 1864. The principal exporters were Gonzalez and Byass, 3,146 butts; F. W. Cosens and Co., 2,694; P. Garvey, 2,123; P. Domecq, 1,901; M. Misa, 1,772; Widow Harmony, 1,530; Tosar,

* In your observations on this subject, I regret to find that you have taken what I have given as the proportion paid per head for the total amount paid by the entire number of persons belonging to each class.

Digitized by Google

1,431; Mackenzie, 1,398; Duff-Gordon, 1,282; Pemartin, 1,164; Mora, 1,046; all others figuring for less than 1,000 butts each.

During the week ending Oct. 11, the imports of the precious metals were:—Gold, 580,284*l*; silver, 24,182*l*. The exports were:—Gold, 236,398*l*; silver, 90,719*l*.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 11th day of October, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,606,340	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	11,956,340
		Silver Bullion	...
	26,606,340		26,606,340

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,811 242
Rest	3,134,060	Other Securities	24 026,476
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	7,228 737	Notes	4,294,145
		Gold and Silver Coin	780 006
Other Deposits	13,506 498		
Seven Day and other Bills	549,574		
	38,971,869		38,971 869

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22 861 769	Securities	33.994.718
Public Deposits	7,228,737	Coin and Bullion	12.736 346
Private Deposits	13,506,498		
	43,597,004		46,731.064

Dated the 12th October 1865. W. MILLER, Chief Cashier

The balance of Assets above Liabilities being 3,134,060*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

A DECREASE of Circulation of	£460,017
An INCREASE of Public Deposits of	336,827
A DECREASE of Other Deposits of	292,090
A DECREASE of Government Securities of	572,967
A DECREASE of Other Securities of	88.804
A DECREASE of Bullion of	447,491
A DECREASE of Rest of	688,982
A DECREASE of Reserve of	31,526

The above return is again comparatively unfavourable. Notwithstanding the rise in the rate of discount, the reserve is slightly lower, and would have experienced a considerable decline but for the large loans on Government stock obtained by the Bank. The absorption of coin for internal purposes continues unabated, a decrease being shown in the bullion of 447,491*l*. The reduction in the other deposits at the same time proves that the existing want of money really arises from the requirements of trade.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855:—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 21,622,232	£ 22,395,352	£ 22,860,695	£ 21.774,334	£ 22,861 769
Public deposits	4 359,851	6,253,982	4,616,052	7.023,234	7.228 737
Other deposits	11,9 5,925	15,712,485	16,352,818	13,206,318	13,506,498
Government securities	10,556,040	12,163,992	10,945.363	10,172,343	9,811,242
Other securities	19,280,446	18,931,696	21.340,145	21,922 884	24,026,476
Reserve of notes & coin	5.104,056	9,220,300	7,084,061	6,438,973	5,074,151
Coin and bullion	11,752,421	16,230,760	14,570,611	13,006,293	12,736,346
Bank rate of discount	5½ p. c.	2 p. c.	4 p. c.	9 p. c.	7 p. c.
Price of Consols	87⅛	93⅛	93	88¼	89
Average price of wheat	76s 7d	49s 6d	41s 0d	38s 9d	41s 1d
Exchange on Paris (short)	25 35 40	25 15 22½	25 22½ 30	25 30 40	25 25 35
— Amsterdam ditto	11 19 18½	11 15 15½	11 17½ 17⅝	11 18 18¼	11 18¼ 19½
— Hamburg (3months)	13 10⅝ 11	13 7½ 7⅝	13 8½ 8⅝	13 10 10½	13 10½ 10¾

In 1865, the Bank of Berlin had raised its rate of discount to 4½ per cent. A report was current at Paris that the Emperor Alexandria had made offers to negotiate terms of peace.

In 1861, want of money in France was still experienced, and the drain on the Bank had reduced the metallic reserve by nearly 1,000,000*l* in one week. The Spanish Government had given notice of their intention to issue 2,000,000*l* in Treasury bonds, Money in London was plentiful.

In 1862, the Prussian Chambers had been prorogued by the King immediately after their adverse decision on the vote of the Upper House upon the Budget. The Italian Budget of 1863 had been presented with a prospective deficit of 13,000,000*l*. The French Minister of Foreign Affairs, M. Thouvenel, had resigned. News had reached London of the suspension of the Habeas Corpus Act in America in respect of persons opposing the war policy of the Government.

In 1863, the state of the money market in London was attracting much attention on account of the steady export of gold from England and France. A Swedish State Railway loan of 35,000,000 rix-dollars had been announced.

In 1864, the rates of discount had been moving upwards. The Bank of France return showed a decrease of 680,000*l* in the bullion. The minimum rate of discount in London was 9 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 7,374,521*l*; in 1862, a deficiency of 3,219,211*l*; in 1863, a deficiency of 4,987,327*l*; and in 1864, a deficiency of 8,716,571*l*. In 1865, the deficiency is 10,579,978*l*.

DISCOUNT AND MONEY MARKET.—A further rise took place in the Bank rate of discount to 7 per cent. last Saturday.

The movement was not entirely unexpected from the adverse state of the last return, but it was generally thought that the change would have been deferred for a few days. In the open market the terms have fully kept pace with those at the Bank, the general disposition being rather to charge a fraction higher. To-day there has been rather less pressure than in the earlier part of the week, but no business has been done below 7 per cent. First-class long-dated bills, however, have been more readily taken. Annexed are the ordinary rates changed for paper with various periods to run:—

30 to 60 days	7 per cent.
3 months	7 per cent.
4 months	7 per cent
6 months—Bank bills	7 per cent.
6 months—Trade ditto	7½ 8 per cent.

On the Stock Exchange, money was at one period in demand, owing to the withdrawals by the Bank on stock, but latterly the supply increased from the release of the dividend. In the morning the rate for short loans was 6 to 6½ per cent., but this afternoon large sums were offered at only 3 to 4 per cent.

The discount houses and joint stock banks have raised their allowance on deposits as follows:—

Joint Stock Banks	*5 per cent.
Discount houses at call	5 per cent.
Do. with seven days' notice	5½ per cent.
Do. fourteen days	6 per cent.

* At the London and Westminster 4 per cent. only on sums below 500*l*.

About 103,000*l* in Australian gold was taken to the Bank yesterday, and 66,000*l* to-day.

The amount of Government bills on India, for which tenders will be received at the Bank of England on the 18th inst., will be 2,30,000 rupees (230,000*l*).

The Stock Exchange Committee have ordered the following securities to be officially quoted:—Four per Cent. Debenture Stock of the London and St Katharine Dock Company; Tavistock Annuities of the South Devon Railway; Scrip of the Bay of Havana and Matanzas Railway Seven per Cent. Loan of 400,000*l*; Bonds of the British Columbian Government Six per Cent. Loan of 1865; Bonds of the Ceylon Government Six per Cent. Loan of 1865.

The Committee of the Stock Exchange have suspended the buying in of the shares of the Peruvian Railway Company, to which they had granted a settlement, and have set forth their reasons in a document too long for publication. On the other hand, they have granted a buying-in day to the Estates Investment Company, a concession they had previously refused. The contradiction has excited much notice, and has still further tended to weaken public confidence in the decisions of that body which had already been grievously shaken. It is, in fact, becoming a more and more doubtful question whether the strict compliance with a contract, especially in the shares of new companies, is not to be henceforth considered an exception rather than a rule.

The return of the Bank of France for the week presents the following changes:—

INCREASE.	£
Bills discounted	1,208,000
Circulation	413,000
Treasury balance	426,000
DECREASE.	
Bullion	1,327,000
Current accounts	923,000
Advances	8,000

Digitized by Google

The following are the rates discount in the chief cities of the Continent, showing a general advance :—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	5	5
Vienna	5	5
Berlin	7	7
Frankfort	5½	5½
Amsterdam	4	4
Turin	5	4½ 5
Brussels	5	5
Madrid	9	...
Hamburg	...	6
St Petersburg	6	6¼ 7

ENGLISH FUNDS.—Consols have recovered about ½ per cent. on the more quiet state of the money market, although to-day there was a little dulness, the Bank return having occasioned some disappointment. Consols for the 8th November, which closed last Friday at 88⅞, opened this morning at 89⅛ to ¼, and left off at 89¼ to 89⅜. For money, the last price was 88⅞ to 89. Reduced and New Three per Cents. were quoted 87 to 87⅛ ; and India Five per Cents, 105.

The June Exchequer bills have fallen to 18s to 12s discount. The March left off at 9s to 4s discount.

FOREIGN STOCKS.—The foreign market has shown increased firmness, a rise especially taking place in Greek, Mexican, Turkish, and Spanish Passive and Certificates. There has also been a better demand for Egyptian, New Granada, and Russian descriptions. Turkish Consolides closed ⅜ per cent. higher than last Friday at 48⅛ to 48⅜. Brazilian Scrip has improved to 3¼ to ½ premium, but the old Four-and-a-Half per Cents. are again lower. Venezuelan descriptions also show a reduction. United States Five-twenties left off at 68¼ to 68½.

The final price of French Three per Cent. rentes on the Paris Bourse this evening was 67f 95c, showing a fractional advance compared with yesterday and last week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :—

CONSOLS.

RAILWAYS AND OTHER SHARES.—The railway market has shown increased buoyancy this week. The advance in the value of money caused some speculative operations for the fall, and the approach of the settlement has been accompanied by repurchases to close these accounts. Hence prices have latterly been rising, especially of the heavier stocks—such as London and North-Western, Midland, and Lancashire and Yorkshire. Metropolitan, in which the fluctuations are usually wide, has advanced about 3 per cent, Caledonian has been exceptionally heavy, owing, in is understood. to sales on Scotch account. South-Eastern has been in good demand.

There has been little doing in the colonial department, and prices have shown some dulness, especially of Indian guaranteed descriptions. In the foreign market the principal change has been a rise in Ottoman. Belgian, French, and South-Austrian and Lombardo-Venetian shares have also been firmer.

The Commissioners for the Reduction of the National Debt have given notice that the following amounts will be applied to the purchase of stock during the current quarter :—

	£	s.	d.
To be applied towards the Reduction of the National Debt	624,212	7	7
Add Interest receivable on account of Donations and Bequests to be applied to the purchase of Stock	6,531	4	3
	£630,743	11	10

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day :—

FOREIGN EXCHANGES.—The immediate result of the late rise in the rate of discount was to cause on Tuesday a corresponding upward movement in the foreign exchanges. To-day, however, there has been rather less firmness.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper :—

Gold.—The only demand for gold to send away has been in the shape of sovereigns, 200,000*l* having been withdrawn from the Bank for the Brazils. On the other hand, bar gold to the value of about 288,000*l* has been purchased by that establishment, having been refined from the late arrivals, and further amounts will be sent in daily, the sums expected being large, the exports having now for a time ceased. The Asia has brought 1,000*l* from Boston ; the City of Boston has brought 47,890*l* from New York ; the Germania has brought 38,200*l* from New York ; the Calabar has brought 10,000*l* from Africa ; the Jason has brought 71,000*l* from Sydney. The Rhone has taken 200,000*l* (sovereigns) to Brazil, and the Nyanza 3,200*l* to Bombay and 15,900*l* to Alexandria.

Silver.—The late rapid rise in the Bank rate of discount has somewhat checked the purchases of silver ; prices have consequently declined slightly, and business for the outgoing mails of the 12th inst. from Southampton, and the 20th inst. from Marseilles, has been done at 61½d per oz standard ; this price, however, could not be maintained if sales were pressed, as nearly all existing orders have been executed. The Rhone has taken 8,000*l* to the Brazils, and the Nyanza 84,600*l* to Bombay.

Mexican Dollars.—Our market for this coin is very inactive and prices are merely nominal.

Exchange on India for bank drafts at 60 days' sight is, on Calcutta, 1s 11⅜d to 1s 11⅞d, and on Bombay 2s per rupee.

India Government loan notes are again somewhat lower than our last week's quotations. The prices are, for the 5½ per Cents. 107 to 109, for the 5 per Cents. 100 to 102, and for the 4 per Cents. 97 to 99.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price ; ditto, refinable, 77s 10½d per oz std, last price ; Spanish doubloons, 74s 6d to 75s per oz ; South American doubloons, 73s 6d to 74s per oz ; United States gold coin, 76s 2¾d per oz. Silver—Bar silver, 5s 1⅛d per oz std ; ditto, containing 5 grs gold, 5s 1⅜d per oz std ; Mexican dollars, 4s 11⅜d per oz. Quicksilver, 8*l* per bottle ; discount, 3 per cent.

The Atrato has arrived from the West Indies with 172,000*l* in specie, and the Lincolnshire from Melbourne with 282,000*l*.

FAILURES AND MERCANTILE EMBARRASSMENTS.—It is understood that the asignees of the estate of Messrs Charles Joyce and Co., merchants, trading chiefly with Egypt, who failed in April last for 312,029*l*, have about 30,000*l* in hand, which would allow of a first dividend of nearly 2s, but that, pending the

Digitized by Google

receipt of certain foreign accounts yet to be obtained, they are not in a position to proceed to a distribution. It is feared that under any circumstances the ultimate yield of the estate will not be more than 3s 6d or 4s 6d in the pound.

PUBLIC COMPANIES.—At a meeting of the shareholders of the London and Brazilian Bank, a supplemental agreement, providing for the liquidation of the liabilities of the three establishments by the amalgamated bank, at the risk of each of the establishments, namely, Messrs Maua and Co., Messrs Maua, McGregor, and Co., and the London and Brazilian Bank was approved.

It is notified that the transfer books of the Anglo-Egyptian Navigation Company will be closed until the 16th instant, preparatory to payment of an interim dividend at the rate of 10 per cent. per annum for the half-year ended the 30th ult.

Proposals have been put forth by the Atlantic Telegraph Company, as the result of a general meeting of shareholders held yesterday, for the issue of new shares of 5*l* each to the amount of 600,000*l*, for the construction of a new cable, to be laid down next year, and also for an attempt to recover and complete the lost one, so as to establish a double line. These new shares are to be entitled to a preference dividend of 12 per cent.

The half-yearly report of the Bank of Queensland, which has just been issued, states that the result of the operations of the Company for the six months ended 30th June last, shows a balance of undivided profit of 12,381*l* 17s 7d, or about 12 per cent. per annum on the paid-up capital.

The directors of the Oriental Bank have notified their intention of declaring an interim dividend at their meeting on the 19th inst. at the rate of 5 per cent. for the six months ending 30th June last.

A meeting of the shareholders of the Continental Union Gas Company (Limited), Mr Lewis Cubitt in the chair, was held on Monday, when a dividend at the rate of 8 per cent. per annum was declared.

The British Honduras Company (Limited) are inviting applications for an issue of debentures for three, four, and five years, bearing interest at 6, 6½, and 7 per cent., and secured on the uncalled capital of the company as well as on its land and plant. The remaining unallotted shares, about 2,500 in number, are also offered to the public. This company was formed upwards of six years ago, and the dividends have averaged above 7 per cent. per annum, the rate declared at the last meeting on Tuesday being 8 per cent.

The Panama Railway has paid with regularity a dividend of 20 per cent. per annum, with occasional distributions in addition, but these returns have now been thrown into the shade, for it appears by the New York papers, that the company has just declared a dividend in shares of 40 per cent., and a quarterly cash dividend of 6 per cent., so that the total distribution for the last year seems to be at the rate of 64 per cent.

MISCELLANEOUS.—With reference to the pamphlet on the Venezuela Loan of 1862, which has recently been published by Senor L. Guzman, the following letter has been addressed to that gentleman by Messrs Baring Brothers and Co., whose conduct in the matter of that loan had been impugned by him:—

London, October 9, 1865.

SIR,—We have the honour to acknowledge the receipt of your letter of the 29th September, in reference to the claims of the Venezuelan bondholders, to which we shall reply in detail as early as practicable, and as your letter has been printed and publicly circulated we shall adopt the same course in our reply.—We have the honour to be, sir, your most obedient servants, (Signed) BARING BROTHERS and Co.

Senor Don Leocadio Guzman, &c., Queen's Hotel, Cork-street.

A meeting took place on Tuesday of the holders of "bonds, stocks, and shares of the United States of America, whereon the coupons, interest, or dividends are now in arrear, arising from the late war and other causes," when a committee was unanimously appointed. It was also resolved that the committee shall be paid a commission of one overdue coupon or dividend, being half a year's interest, out of each settlement, to repay the expenses they may incur. It was remarked that the total amount of the arrears due could not be less than 4,000,000*l*, nor the aggregate of the debt less than 27,000,000*l*. This amount did not include the Mississippi bonds, which amounted to 4,000,000*l*, nor the indebtedness which was created by the late war. Of the debt due, South Carolina owed 700,000*l*; Missouri, 500,000*l*; Tennessee, 800,000*l*; North Carolina, 1,800,000*l*, Arkansas, 600,000*l*; Virginia, 11,200,000*l*; Louisiana, 1,100,000*l*; Georgia, 600,000*l*; guaranteed debt, 3,300,000*l*; besides 2,000,000*l*, representing the debt of cities and corporate bodies.

A company is in process of formation for the purchase of the large zinc and iron works long carried on by Messrs F. Braby and Co., of London. The proposed capital is 200,000*l* in shares of 10*l* each.

We understand that the section of the Delhi Railway, extending from Chareeabad (the point of junction with the East Indian Railway) to Meerut, will be ready for traffic as early as November next year, and it is calculated by the contractors that a further portion from Meerut to Moorzuffernugger will be completed by the 1st May, 1867, in time for the summer traffic to the hills.

The Dunraven United Collieries Company, capital 200,000*l*, is announced. The mines proposed to be purchased have long been worked successfully.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.30 per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 2-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.6 per 1*l* sterling. Standard gold at the English Mint price is, therefore, about 2-10ths per cent. dearer in Hamburg than in London.

The course of exchange at New York on London for bills at 60 days' sight is 109¾ to 110 per cent. At this rate there is a small profit on the importation of gold from the United States.

COMMERCIAL EPITOME,

FRIDAY NIGHT.

The supply of English wheat on sale at Mark lane to-day was very moderate, and the trade ruled steady at full prices. In foreign wheat, rather a limited business was transacted, at late rates. For barley, the trade was quiet, on former terms. The oat trade was firm, and in some instances prices advanced 6d per quarter. Beans and peas were in but moderate request at late rates. The flour trade was steady on former terms. This week's imports amount to 16,920 quarters of wheat, 6,700 barley, 21,230 oats, 220 sacks and 1,860 barrels of flour.

At Liverpool, this morning, wheat and flour was in slow request, but at full prices. Maize declined in value 3d per quarter. At Wakefield, wheat moved off slowly, yet prices ruled firm.

The Liverpool cotton market opened with a large inquiry on Saturday last, but the advance of the Bank rate to 7 per cent. on that day tended to check the upward movement, and the market closed quietly. On Monday and Tuesday the business done was only to a limited extent, a further advance in the Bank rate being generally apprehended; such not having taken place, the market on Wednesday assumed again a more active tone, which has been maintained to the close of this week. The total sales of the week have amounted to 112,000 bales, of which spinners have taken 46,000 bales, speculators 54,000, and exporters 12,000 bales. To-day's stock is 201,000; quotations are, for Surats, nearly 2d, Bengals 1d, and Tinnevellys 1¼d dearer than on Friday last.

Telegraphic advices from New Orleans are to Sept 26. At that date, middling cotton was quoted at 45c per lb. During the week ending Aug. 18, the cotton trade ruled quiet, at the annexed quotations:—Ordinary, 33c to 35c; good ordinary, 38c to 40c; low middling, 41c to 43c; and middling, 45c per lb. The receipts since Sept. 1 had been 47,987 bales, and the exports 35,920 bales. The stock on hand and on shipboard, not cleared, was 95,306 bales.

From Mobile, we have intelligence to Sept. 15. The demand for cotton was by no means active; nevertheless prices ruled firm, as follows:—Ordinary, 32c to 33c; good ordinary, 36c; low middling, 39c; middling, 40c; and strict middling, 41c to 42c per lb. The receipts since Sept. 1 had amounted to 50,867 bales, and the exports to 11,640 bales. The stock at latest date was 39,227 bales.

We have information from Charleston to Sept. 22. The cotton trade was firm, on higher terms. Middling was quoted at 36c; strict middling, 37c; and good middling, 38c per lb. The total receipts since the 1st of Sept. had been 6,391 bales; and the exports, 4,263 bales, leaving a stock of 2,100 bales.

The cotton trade at Savannah, during the week ending Sep. 23, was very active, and prices advanced 2 cents per lb. Ordinary realised 30c to 32c; middling, 37c to 39c; strict middling, 39c to 40c; good middling, 41c to 42c per lb. The best Sea Island cotton was worth 80 cents. per lb. The recepts of all kinds of cotton, since Sep. 16, amounted to 4,812 bales, whilst the exports reached 16,429 bales. The total stock at latest date was 4,723 bales.

From Memphis, we learn that the cotton trade was dull, on easier terms. The following were the prices current, Sept. 22:—Ordinary, 31c to 32c; good ordinary, 33c to 35c; low middling, 35c to 37c; middling, 38c to 39c; strict middling, 39c to 41c; good middling, 41c to 43c: and middling fair, 44c to 45c per lb.

Postal advices from Bombay are to Sept. 8. "The cotton market," write Messrs Nicol and Co., "during the past fortnight, until within the last day or two, has shown very little activity, but now that the supplies from the districts are commencing to arrive, there is a firmer feeling in the market, and we look to see a fair trade doing shortly. The Dhollerah cotton which has come by coast, will not probably arrive in any great quantity for a week or two yet, although there are a few boats in already, and this description from what we have seen will, we believe, prove superior to the late shipments. From the Broach, Surat, and Kandeish districts we are daily receiving supplies. Some of the Broach is very fair cotton too, but a little stained, and at the quotations is dear compared with the Dhollerah we have met with. Oomrawuttee and Oomrawuttee Akote continue to show a most inferior selection, and we have little doubt that, with the comparatively heavy shipments of these descriptions during the past three months, all the best of the crop has gone forward. Of sawginned Dharwar there is none here at present, but supplies are daily looked for. The business has been considerable, but the

Digitized by Google

buying has been mostly confined to contracts for delivery in from one to three months from the present time. The few transactions reported in ready cotton are in Broach just arrived at 295 rs, Dhollerah 305 rs to 310 rs, and for delivery in from fifteen days to two months there have been several sales of Dhollerah at 295 rs to 305 rs, Broach at 295 rs. Sawginned Dharwar has also been sold for delivery in one month and a half at 327¼ rs. Subjoined are the tables of prices and exports :—

CURRENT PRICES of COTTON at BOMBAY, Sept. 8.

1858	223,702	13,993	19,542	...	76,060	333,297

Via the Persian Gulf, intelligence has been received from Bombay to Sept. 28. At that date, the cotton trade was in an excited state, at enhanced rates. Dhollerah was quoted at 12 7.10d; Broach, 12 3.10d; Compta, 12d; and Oomrawuttee, 11 9.10d per lb, including freight. The week's shipments had been 15,000 bales. Freight to Liverpool, 20s per ton.

An increased amount of business was transacted in cotton goods at Bombay during the first week of September, as compared with the closing week of the previous month. According to telegraphic news, via the Persian Gulf, the market, during the week ending Sept. 28, was very active, and a considerable improvement took place in prices. The following quotations of grey shirtings, on the 8th ult., are from Messrs. Rennie, Scovell, and Co.'s Circular :—

No.	Inches.		lbs	oz	Per Piece. s	d
13	39	14 by 11	6	0	9	10½
18½	39	14 14	7	0	12	0

32	39	19 19	9	9	18	0
41	45	14 10½	7	0	11	7½
45	44	14 12½	8	0	14	0
49	44 to 45	16 16	9	8	16	7½
57	50	16 17	10	6	19	9

The cotton trade at Calcutta, during the week ending Sept. 1, was very firm, but the transactions were mostly for shipment to China. Fair quality was quoted at 20 to 21 rupees per maund. At Kurrachee, during the fortnight ending Sept. 5, the transactions in cotton had been large. Dhera-Mooltan was selling at 19½ to 20½, Scinde, Ferozepore, and Umritsir, 16½ to 17½, and Kandahar 20 rupees per maund.

The cotton trade at Alexandria, on the 2nd inst., was very active, at 24½d for fair open-ginned produce, cost and freight. Frieght to Liverpool, 1d to 1¼d per lb.

Notwithstanding the advance in the rates of discount, the markets for colonial and foreign grocery produce have continued firm. The amount of business done during the present week shows, indeed, a falling off from last week, but this is chiefly the result of a decline in speculative transactions. Prices, however, are very firm, and all descriptions of produce fully support the recent advance in the quotations. Tea, sugar, and coffee, especially, have been in good consumptive request.

The subjoined statement shows the extent of the imports of coffee, sugar, cotton, hides, and rice, at Hamburg, from Jan. 1 to Sept. 30, as well as the stocks of certain of those articles on the 30th ult. :—

	1861.	1862.	1863.	1864.	1865.

In English wool, only a moderate business has been transacted. As regards prices, however, the market has ruled firm, with a tendency to advance. Colonial wool, in the private contract market, has been in limited request. Hemp is very firm, and considerable business has been done in Manilla descriptions: clean Russian is worth 32*l* to 32*l* 10s per ton on the spot.

The public sales of indigo have been in progress this week. They have been well attended by buyers, and the biddings have ruled active, at an advance in the quotations of from 2d to 6d per lb. Of the total quantity which has now passed the hammer (5,490 chests) 1,114 have been withdrawn, and 511 bought in, leaving 3,165 chests sold.

On the whole, the metal trade has ruled firm. Scotch pig iron has sold at 57s 9d cash, mixed numbers; but tin, copper, and lead have commanded rather more money. The quarterly meetings of the ironmasters have been held this week. No change has been made in any description of finished iron, and the transactions have been of moderate extent. Pig iron has been in limited request.

Oils have met a somewhat inactive market. Linseed oil has sold at 37s to 37s 3d; and foreign refined rape, 49s per cwt. Turpentine is steady at 45s for French spirits. American spirits of petroleum, 3s 1d to 3s 2d per gallon.

The tallow trade is firm. New P.Y.C. has sold at 48s per cwt on the spot, and 50s for March delivery. Advices from St Petersburg quote the price 54 silver roubles for August delivery.

The market for cotton goods at New York during the week ending Sept. 30 showed increased activity, and previous quotations were fully supported. For woollen goods the trade was firm at full currencies. Most descriptions of grocery produce changed hands at quite former prices. Provisions were very firm and realised higher rates. The money market was easy at the annexed quotations:—Prime endorsed bills, 60 days, 6¾ to 7; 3 to 4 months' ditto, 7 to 9 per cent. Gold fluctuated in value between 143¾ and 144¼ per cent. The stock of bullion in the banks on the 23rd ult. was 2,844,420*l*, against 4,013,040*l* last year, and 6,001,720*l* in 1863. The balance in the Sub-Treasury was 15,014,090*l*. The shipments of specie from Jan. 1 to Sept. 23 amounted to 4,345,560*l*, against 6,935,240*l* in the same period last year, and 6,221,080*l* in 1863.

THE COTTON TRADE.

LIVERPOOL—Oct. 13.

On Saturday morning a large business was done, with higher prices, but after the advance of the Bank rate to 7 per cent. the business became quiet; and on Monday and Tuesday the sales were limited, with a tendency in favour of buyers. On Wednesday the demand revived, with a corresponding rally in prices; and yesterday the sales were very extensive, the market closing firmly, not only with a complete recovery from the decline submitted to in the early part of the week, but with more or less advance on last Friday's quotations. The demand for Sea Island continues good at the full prices recently established. In American, a large business has been done, and though importers have supplied the demand freely, prices of the middling and better qualities are about ½d per lb dearer. In Brazil, a large business has been done, especially in Maceio; prices, after slightly giving way, have recovered, and closed 1d to 1½d per lb above last week's currency. Egyptian continues in very general request, and after some fluctuations, closed about 1d to 1½d higher in the better descriptions. Smyrna is quoted ½d to 1d per lb above last week. East India has shown considerable irregularity: in the early part of the week some reduction was submitted to, though holders generally refrained from pressing sales. During the last two or three days prices have recovered, and with a restricted supply an advance of 1d per lb has been established in most descriptions. Bengal and Scinde closed about ½d per lb dearer than last Friday. China and Japan have been selling to a fair extent at ½d to ½d per lb over last week's rates, and continue scarce. The transactions to arrive continue large, especially during the last two days, and the latest quotations for Maranham, fair, ship named, 24½d per lb; December delivery, 24d; Maceio, fair average, Sept, sailing, 22¾d; Egyptian, open, fair, ship named, 24d; shipping or shipped, 24½d; Broach, merchants', without guaranteee, ship named, 16d; Dhollerah, fair new merchants', from the quay and June sailing, 18½d; Oomrawuttee, fair new merchants, overland, 17¾d; August sailing, 17½d and 19d; middling fair, ship named, 16½d; fair merchants', June sailing, 18¼d; August, 18d; ship named, 17d; Comptah, fair merchants', sample guaranteed, July sailing, 17½d; fair new merchants', not sailed, 17d; Scinde, fair, August sailing, 12¾d; Western Madras, fair new merchants', from the quay, 17¼d and 18d: ship named, 16¾d and 17d; August sailing, 17½d; Tinnivelly Madras, fair, September shipment, 16d; Bengal, fair new merchants,, from the quay and July sailing, 12½d per lb.

The sales of the week amount to 112,220 bales, including 54,120 on speculation, and 12,250 declared for export, leaving 45,780 bales to the trade. The sales to-day amount to about 20,000 bales, with a strong market.

LONDON—Oct. 13.

Subjoined is a portion of the circular issued this week by the London Cotton Brokers' Association:—The market opened very briskly on Saturday, but the advance in the Bank rate to 7 per cent. checked business, and it closed quietly. At the commencement of the present week the market remained quiet and inactive, with drooping prices, but on Wednesday the demand improved, and a good business was done, especially afloat. Yesterday again there was a fair quantity of cotton sold on the spot, and large transactions afloat, the closing prices being fully 1d per lb above last week's rates.

NEW YORK—Sept. 30.

The cotton trade has been rather quiet during the week, and prices have been somewhat irregular. However, about 17,000 bales have changed hands. Middling Upland is quoted at 44½ cents per lb. The arrivals are large, viz., 23,084 bales, of which 8,972 are from New Orleans, 3,960 Savannah, 2,496 Florida, 2,517 North Carolina, 896 Mobile, and 3,841 bales by railroad. The remaining quantities are from sundry ports, 70 bales being from Liverpool. The total import since Sept. 1 amounts to 96,099 bales. The following are the prices current:—

NEW YORK CLASSIFICATION.	Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c

MARKETS IN THE MANUFACTURING DISTRICTS.

There has been less activity in the demand for cotton goods; nevertheless, the late advance in the quotations has been supported. The iron trade has become quiet, at barely last week's prices. Coals have sold briskly, both for home use and export, at high rates.

MANCHESTER, Oct. 12.—The action of the Bank in raising the rate to 7 per cent. on Saturday last stopped for the greater part of this week the current of excitement which was then again setting in. Sales have not been to any important extent, and have chiefly been supplied from the small stocks offered by speculators under producers' terms. Prices in the beginning of the week were a little lower, but have since quite recovered to the highest quotations lately established. Business, however, has not followed the re-animation of the Liverpool market to-day, further than inducing a few needful purchases. The American demand has greatly lessened, and buyers for India cannot afford existing rates.

BRADFORD.—There is certainly very little business done in wool. The disposition of buyers is to hold off, or else to limit the extent of the purchases they make. Lustre yarns have met with more inquiry, and in twofolds also the demand has improved. There seems no change in pieces. Figured orleans, mohair glaces, and lenos are still much inquired for. Prices are maintained with much firmness.

LEEDS.—The export houses are mostly doing a good business, and the little quietness noticeable in the home trade is attributable to the protracted summer having delayed the actual wearing of autumn fabrics. The reports from the surrounding district show healthy activity among the woollen manufacturers generally. Prices of wool, yarns, and goods are equally firm.

ROCHDALE.—The market was quieter than usual, and very little business was done either in plain or fancy goods. Very few parcels of Yorkshire goods changed hands, but supplies are increasing in anticipation of colder weather. Transactions in wool are of the most piecemeal kind, but staplers are firm in maintaining prices.

LEICESTER.—There is continued buoyancy in the hosiery trade. Both the departments (plain and fancy) are doing a good amount of business, and manufacturers are working to order. Worsted yarns are firm, and spinners are well engaged. In cotton yarns there is no material change. Wools meet a fair consumptive inquiry, at high rates.

DUNDEE.—Our flax market has continued very firm, notwithstanding the important rise in the rate of interest, and a considerable amount of business has been done at full prices. Jute is held very firmly, in consequence of renewed reports of high prices at Calcutta. For linens the demand continues very brisk.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Sept. 30.—The demand for flour for home consumption rules active, but there is very little business passing for export. In prices an improvement has taken place. In the wheat trade, considerable firmness has prevailed, and the quotations have advanced about 5 cents per bushel. In corn, a fair business has been transacted, but at rather lower prices. The receipts have been 86,328 barrels of flour, 99,218 bushels of wheat, and 976,616 bushels of corn. The following are the prices current:—Flour, State, superfine brands, $7.60 to $7.80; State, extra brands, $7.90 to $8.10; State, choice brands, $8.15 to $8.35; Ohio, common brands, $8.75 to $8.90; Ohio, fancy brands, $8.95 to $9; Ohio, good and choice extra brands, $9.10 to $11.25; Michigan, Indiana, Wisconsin, &c., $7.60 to $8.60; Genesee, extra brands, $8.40 to $11.25; Missouri, $11.75 to $15; Canada, common, $8.10 to $8.40; Canada, good to choice extra, $8.10 to $11.25 per bushel. Wheat—New amber State, $2.12 to $2.15; Milwaukee Club, $1.60 to $1.68; amber Milwaukee, $1,68 to $1.70½; white Canada, $2.15; white Michigan, $2.32. Corn—Western mixed, 90c to 91c; unsound ditto, 85c to 95c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING

Coastwise and by land carriage, the arrivals of English wheat, this week, have been on a very moderate scale. Most of the samples, however, have come to hand in improved condition. Really fine parcels have changed hands steadily, at full quotations; but inferior kinds have met a dull inquiry, at barely late rates. The imports of foreign wheat have been moderately good, most of those from Dantzic having gone direct to the millers; the transactions have been on a very moderate scale, at about stationary prices. The few samples of fine barley on the stands have been taken off freely, at full quotations. Grinding and distilling sorts, however, have sold heavily, on easier terms. Malt has been in fair average supply, and steady request, at extreme rates. The arrival of oats having been in excess of the demand, all inferior kinds have sold at 6d per quarter less money. Both beans and peas have moved off slowly. In prices, however, no change has taken place. Flour has commanded very little attention, at last week's prices.

The following table shows the exports of grain from London during the quarter ending Sept. 29, compared with the corresponding period in 1864 and 1863:—

EXPORTS of GRAIN, &c.

	1863. Third Quarter.	1864. Third Quarter.	1865. Third Quarter.
Wheat ..... qrs	7,561	1,037	780
Barley	25	111	12

Maize	725	2,175	163
Sundry	129	50	...
Flour ..... cwts	44,193	20,801	724

In the country markets, the fluctuations in the value of produce generally have been trifling. The supplies in offer have been very moderate even for the time of year.

Throughout the Continent, wheat has changed hands slowly on English account; nevertheless, prices hade been fairly supported. All kinds of spring corn have moved off freely. The shipments of wheat, flour, and maize from America still continues limited.

In Scotland, wheat has sold at full prices; but the trade has been in a sluggish state. Fine barley and oats have realised fully previous rates. The Irish markets have been heavy for wheat, on former terms. The transactions in other kinds of produce have been only moderate, at about stationary prices.

Only a moderate supply of English wheat was on sale at Mark lane, to-day. The demand ruled steady, at fully Monday's currency. Foreign wheat changed hands to a very moderate extent, on former terms. Barley moved off slowly, at late rates. The oat trade was firm, and Russian produce improved in value 6d per quarter. For beans and peas, the trade ruled quiet, on former terms. Flour was in but moderate request, at late rates.

Mr George Dornbusch reports the state of the floating grain trade as follows:—Arrivals at ports of call since last Friday, 88 cargoes, viz., 44 wheat, 20 maize, 3 barley, 3 rye, 1 oats, 3 beans, 1 millet-seed, 3 linseed, 1 rapeseed, 6 cotton-seed, 2 oilcake, and 1 locust-beans. The trade has been fairly active, notwithstanding the rise in the discount rate, and the continuous arrival of vessels off the coast. Sales:—Wheat—22 arrived, cargoes sold. Ghirka Taganrog, at 40s to 46s 6d; Odessa, at 39s 9d to 42s; Nicolaieff, at 40s 3d; Berdianski, at 42s; Marianopole, at 40s 6d to 42s 6d; Galatz, at 36s 6d, all per 492 lbs. Ghirka Taganrog, on passage, at 41s, and shipped, or to be shipped, at 42s 6d; and to to be shipped, at 42s; hard Taganrog, shipping, or shipped, at 41s; and hard Odessa, at 42s per 492 lbs. Maize—13 arrived, cargoes sold. Odessa, at 29s 9d to 30s 6d; Galatz, at 30s 7½d per 492 lbs; Kustendje, Bulgarian, Wallachian, and Ibrail, at 27s 6d to 29s; Foxanian, at 28s per 480 lbs; and Mazagan at 31s per 492 lbs; Krail, or Sulina, from Kustendje, to be shipped, at 29s per 480 lbs. Barley—1 arrived, cargo sold. Wallachian, at 17s 3d, imperfect, per 400 lbs. Rye—1 arrived, imperfect cargo. Rodorto, at 25s per 480 lbs. Oats—1 cargo from Nicolaieff, at 19s 1½d per 304 lbs. Millet-seed—a cargo, Wallachian, from Kustendji, at 18s 6d, imperfect, per 480 lbs. Linseed—an arrived cargo from Taganrog, at 59s 6d per 424 lbs; and East Indian, from Calcutta, shipped, or to be shipped, at 60s per 410 lbs, L.A.T. Cotton-seed—Egyptian, from Alexandria, to be shipped, at 7*l* 7s 6d, and 7*l* 12s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT"

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market opened rather quietly, owing to the enhanced value of money, but the demand has since improved, and there is now a steady business doing at the late high rates. 1,250 casks West India had sold in three days, including Barbadoes, at 35s to 40s; crystalised Demerara, 41s to 41s 6d per cwt. There is very little speculative business passing. There were only 371 tons landed last week, and the deliveries continued large, reaching 5,600 tons, which reduces the stock to 96,600 tons, against 122,870 tons in 1864 at the same date.

Mauritius.—3,476 bags offered by auction chiefly withdrawn; 300 tons have sold in France, of which the particulars do not transpire. Business of fair extent is reported on the spot.

Bengal.—Of 1,713 bags in public sale, 660 bags low date sort withdrawn at 30s to 32s 6d. The remainder sold: fine dry white Cossipore, 42s to 42s 6d per cwt.

Penang.—1,900 bags chiefly sold at 33s to 37s per cwt for brown to middling yellow.

Foreign.—893 boxes Havana partly sold: dry brown and grey, 36s to 37s 6d. Dry grey taken in at 40s to 41s. 600 casks 152 barrels Porto Rico, sold at 34s to 42s, for brown to fine grocery. 7,500 bags unclayed Manilla have sold at 30s to 31s. 35,500 clayed chiefly at 33s 9d to 34s. 9,400 brown Pernambuco and Paraiba at 32s 9d to 33s. 900 casks Cuba at 36s 6d to 37s. A floating cargo of Bahia at 23s for the United Kingdom. One of Cuba, 25s 6d per cwt.

Refined.—The market is steady with a fair demand for dry goods. Common qualities obtain 44s per cwt.

RUM.—The market is quiet, and prices unchanged. Some Penang has sold at 1s 5½d per proof gallon.

COCOA.—At auction 204 bags Grenada went rather dearer for the common kinds, from 56s 6d to 58s. A few lots fine sold as high as 73s. 123 bags Trinidad sold at 65s to 75s per cwt.

TEA.—There have been large arrivals this week, and the business is chiefly restricted to new season's Kaisow congou, which has sold freely at 2s to up to 3s per lb. These are fair prices. Other kinds are steady, and an increased supply of green tea has arrived.

COFFEE.—The public sales have gone off steadily, and prices exhibit little alteration to notice. 313 casks 278 barrels and bags plantation

Digitized by Google

Ceylon chiefly found buyers at 77s to 84s. 59 casks 370 bags native growth at 66s 6d to 69s 6d for good ordinary to fine. A few lots Jamaica at 66s to 90s. Of 528 cases 4,330 bags East India, a full portion met with purchases at 77s to 94s 6d for pale qualities to fine Mysore; ordinary Mysore kind, 70s to 72s 6d; low to good Singapore, 54s 6d to 66s. Some business has been done in native Ceylon privately. A floating cargo of Rio is reported at 55s 6d for a near port. 800 bags St Domingo have sold, to arrive, at 63s 6d per cwt.

RICE.—A large business has been done in soft grain descriptions, chiefly at 10s 3d to 11s per cwt. The market generally is inactive. Nothing has transpired in Bengal. A floating cargo of Bassein has sold at 11s 9d per cwt for this port.

IMPORTS and DELIVERIES of RICE to Oct. 7, with STOCKS on hand.

Deliveries	52250	58350	62681	49550
Stock	24200	34100	39690	60000

SPICES.—A good demand prevails for black pepper. Penang commands 3¼d; Singapore last sold at 3¼d cash. 751 bags, by auction, were partly disposed of, Tellicherry at 4d. 300 pockets heavy Malabar, 4⅜d to 4½d. White is quiet. 17 cases brown nutmegs sold at 1s 1d to 2s 3d. 244 bags pimento part sold at 2⅝d per lb. 1,236 cases Cochin ginger sold steadily at 64s to 77s; wormy and low, 60s to 62s. 110 barrels Jamaica, at 60s to 71s. Several sales are reported in cassia lignea up to 100s per cwt.

SALTPETRE.—Bengal is firmer, and a steady business has been done. 4,800 bags are reported sold, chiefly at 23s 9d to 24s 3d, according to prompts, refraction 6¾ to 3; 100 tons for arrival at 24s 6d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to Oct. 7, with STOCKS on hand.

COCHINEAL.—There has been a firm market, and the stock shows a very great deficiency in contrast with former years. Of 682 bags by auction, 400 sold; Honduras, pasty, 2s to 3s; dry grain up to 3s 6d per lb.

IMPORTS and DELIVERIES of COCHINEAL to Oct. 7, with STOCKS on hand.

	1865	1864	1863	1862
Imports ....serons, &c.	11460	11515	16312	11925

OTHER DRYSALTERY GOODS.—Bengal turmeric has met an improved demand on the spot, at 24s 6d to 25s. Gambier firm, and quoted 21s to 22s. Cubes sold at 26s 6d to 28s per cwt.

METALS.—Since the rates of discount were raised to 7 per cent., the market has been less active, and in several cases prices have slightly declined. Foreign tin now sells more freely. Straits, 91*l* to 92*l*. Spelter is dull at 20*l* 12s 6d to 20*l* 15s per ton. Other metals are steady. British iron maintains its previous value. Scotch pig has fallen in price, but since improved to 57s 6d per ton cash for mixed numbers. Lead and copper are dearer.

HEMP.—Further advanced rates have been established for Manilla. Good roping, 41*l* to 42*l*, and in proportion at Liverpool. Clean Petersburg, 32*l* 10s to 33*l* per ton.

JUTE.—Of 7,763 bales offered on Wednesday not more than half sold, and prices were barely so high as at the previous series, ranging from 11*l* 10s to 23*l* 5s per ton. Since the sales, a better demand prevails.

OIL.—Olive is firm; Gallipoli, 56*l* 10s to 57*l*. Fish oils steady: Sperm, 115*l*; pale seal, 45*l* 10s to 46*l* per tun. Brown rape oil has been in speculative demand: English, 47s 6d; foreign, 48s; refined, 48s 6d to 49s; English brown, 45s to 45s 6d. Linseed oil steady at 37s. Cocoa-nut unchanged; Cochin, 49s 6d, for arrival. Palm commands extreme rates, from 40s to 42s per cwt.

TALLOW.—Quotations of foreign declined since last Friday, the advance in money restricting speculation, but the market afterwards rallied. First sort Petersburg Y.C., 47s 6d to 47s 9d; January to March, 49s 9d; March only, 50s to 50s 6d per cwt.

PARTICULARS OF TALLOW.—Monday, October 9, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is firmer with a good and steady demand. 1,639 casks West India sold, making 2,893 casks for the week. 2,000 bags Mauritius sold privately at 32s to 40s. 300 casks Cuba at 36s 6d. 6,000 bags unclayed Manilla at 30s to 30s 6d.

COFFEE.—989 casks 1,290 bags East India partly sold upon barely former terms in some instances. 89 casks 616 bags Ceylon were chiefly bought in.

COCOA.—217 bags Trinidad part sold at 62s to 75s per cwt.

RICE.—Further business was done in soft grain, also part of a floating cargo at 10s 8½d per cwt.

SALTPETRE.—150 tons Bengal in course of landing have sold at 24s 6d to 24s 9d per cwt, being dearer.

OIL.—320 casks cocoa-nut by auction sold: Cochin, 49s 6d to 49s 9d; Ceylon, 47s to 47s 3d; Sydney, 44s 6d to 46s. 50 casks palm, 42s 6d per cwt.

TALLOW.—Australian advanced 9d to 1s 6d. 1,000 casks by auction went at 46s 6d to 50s per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar continues firmly supported. In Dutch crushed nothing doing.

DRY FRUIT.—During the week a good trade has been done in the respective articles of this market, the tone of which is firm.

ENGLISH WOOL.—Not any alteration worth notice: perhaps a little less doing, but prices the same.

COLONIAL WOOL.—Market firm, without change.

FLAX.—Market very firm.

HEMP.—Market very firm, and a considerable amount of business transacted during the week.

TOBACCO.—The market has presented a firmer appearance for most descriptions, and importers have been disinclined to progress with sales, unless at outside quotations, and for some classes advanced rates. Buyers have operated more freely during the last few days, and transactions have been of some magnitude.

LEATHER AND HIDES.—At Leadenhall, on Tuesday, there was a moderate supply of fresh leather, with a fair average demand at late prices. Good crop hides 40 lbs and upwards, heavy foreign and English butts, calf skins, and good East India kips were most in request.

METALS.—As the excitement about the price of money which closed last week has been abating, the disposition to a revival of business has again sprung up. Copper is firmer in price, and a few speculators for a rise have been operating to a small extent. Iron is quoted firm on all hands, and at the quarterly meetings, held this week, a large business has been done. Tin keeps steady, and any cheap lot finds a ready buyer. Lead is in good demand, with tendency to stiffer prices. Spelter is rather neglected. Tin plates continue to be in very full demand.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	50	0
Fat by ditto	2	5
Yellow Russia	46	6
Melted stuff	26	0
Rough ditto	22	0
Greaves	27	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Oct. 9.—The total imports of foreign stock into London, last week, amounted to 26,542 head. In the corresponding week in 1864 we received 15,308; in 1863, 11,092; in 1862, 11,295; in 1861, 12,188; in 1860, 5,409; in 1859, 7,590; and in 1858, 7,949 head.

We were again heavily supplied with foreign stock; but the general quality of both beasts and sheep was very middling. All breeds met a dull inquiry, at last week's decline in the quotations. The arrivals of beasts fresh up from our own grazing districts were very moderate for the time of year, and their weight and quality were by no means first-rate. The beef trade was in a sluggish state; nevertheless, prices were unaltered from Monday last. The best Scots and crosses realised 5s to 5s 2d per 8 lbs. There was a fair show of beasts from Ireland; but the supply from Scotland was unusually small. The supply of sheep was tolerably good as to number; but the condition of most breeds was only middling, if we except the Downs and half-breds. The mutton trade was quiet, at late currencies. Prime downs and half-breds sold at 6s to 6s 4d; in some instances at 6s 6d per 8 lbs. We had a fair supply of calves on offer. The demand for them was somewhat heavy, and late rates were not freely supported. Prices ranged from 4s 4d to 5s 4d per 8 lbs. Unusually high quotations were demanded for pigs. Neat small porkers were held at 5s 6d to 5s 10d and large hogs 4s 4d to 5s 4d per 8 lbs. The pork trade, however, was inactive.

SUPPLIES.

	Oct. 10, 1864.	Oct. 9, 1865.
Beasts	6950	3830
Sheep	29060	31650
Calves	162	294
Pigs	390	396

THURSDAY, Oct. 12.—About an average supply of beasts was on sale here to-day, in but middling condition. Most breeds moved off steadily at full quotations. The top figure was 5s 2d per 8 lbs. Sheep, the show of which was moderate, met a dull inquiry at late rates. The best Downs and half-breds realised 6s 4d, in some instances 6s 6d, per 8 lbs. We were fairly supplied with calves, for which the demand ruled steady at 2d per lb more money. The highest quotation was 5s per 8 lbs. Pigs were held at very high rates, but the sale for them was inactive. Milch cows were firm in price.

Per 8 lbs to sink the offal.

	s	d	s	d		s	d	s	d
Coarse and inferior beasts	3	2	to 3	8	Prime Southdown sheep	6	0	to 6	4

Prime small ditto	4	4	4	8	Large pork	4	6	5	4
Veal	4	4	5	4	Small pork	5	6	5	2

HAY MARKETS.

THURSDAY, Oct. 12.—The supplies of hay and straw on sale are good, and the trade rules quiet, at the late decline in prices.

Per load of 56 trusses.

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Hay	80 to 105	85 to 110	80 to 105
Clover	90 to 126	95 to 140	90 to 126
Straw	26 to 33	28 to 34	26 to 33

HOP MARKET.

BOROUGH, Friday, Oct. 13.—The trade has continued steady, choice descriptions being in somewhat brisker demand at improved rates; all other sorts remain firm at late prices. New Mid and East Kents, 105s to 189s; New Weald of Kents, 95s to 130s; New Sussex, 90s to 115s; Yearlings, 95s to 135s per cwt.

Digitized by Google

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Oct. 13.—These markets are well supplied with potatoes. The trade is slow, at late prices. Kent and Essex Regents, 50s to 90s; Yorkshire ditto, 60s to 80s; Flukes, 70 to 100s; Rocks, 50s to 60s; Scotch Regents, 45s to 70s.

COAL MARKET.

FRIDAY, Oct, 13.—Wallsend: Hetton, 23s; Harton, 21s 6d; Wallsend Hetton Lyons, 21s 6d. Ships at market, 4; sold, 0; gas contracts, 4—4; ships at sea, 40.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 12.—The market has been rather quiet this week, as with the high rate of discount buyers purchase with increased caution; holders on the other hand continue pretty firm in their demands.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 13.—The market fairly attended; wheat in slow demand, but holders do not give way in price. Flour quiet at former rates. Indian corn 3d lower: mixed, 28s 6d to 28s 9d. Beans, oats, and oatmeal steady.

The Gazette.

TUESDAY, Oct. 10.

BANKRUPTS.

J. Blades, Vassall villas, Holland road, Brixton, clerk—D. R. Butler, Putney, hairdresser—W. H. Clark, Albion road, Woolwich, assistant to a grocer—W. P. Clarke, Thetford, merchant—J. W. EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 30th of September, or 12,252 miles, to 754,508*l*, and for the corresponding week of last year, on 11,915 miles, to 707,240*l*, showing an increase of 337 miles, and of 47,268*l*. The gross receipts on the 14 principal railways amounted in the aggregate, on 8,771 miles, to 623,591*l*, and for the corresponding week of 1864, on 8,474 miles, to 590,611*l*, showing an increase of 297 miles and an increase of 32,880*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Oct. 9.—In the share market to-day the amount of business was little more than nominal, and the Indian railways and American securities were still disposed towards flatness; but English railways closed with a tendency to recovery. Of these, Lancashire and Yorkshire recovered ¼, and North-Western ½, Great Northern (A stock) improved ½, Great Western ¼, and Metropolitan (extension) ⅛; and Brighton declined 1½, Caledonian a further ½, and Scottish North-Eastern (Aberdeen) and Metropolitan District 1 each, the closing price of the latter being 102 to 103. In colonial, Grand Trunk of Canada (1st preference) declined 1, and Bombay and Central India, East Indian, Great Indian Peninsula, and Madras (5 per cent.) a further ½ each. In foreign no changes occurred. In American, Illinois Central (sterling bonds) improved 1; and Virginia (6 per cent.) declined 2, Erie shares (paid up) further 1¼, and United States (5-20) further ⅜. In British mines, Margaret advanced 1, and Great Wheal Busy ⅜; and Chiverton and East Lovell receded ½ each, and East Wheal Russell ¼. In foreign mines, Frontino Gold recovered ¼, and St. John del Rey declined ½. Of the banks, South Australia declined 1 and Metropolitan and Provincial ½.

TUESDAY, Oct. 10.—In the share market to-day dulness was the prevailing feature, but English railways and banks showed a tendency to advance in the closing prices, the other descriptions not being materially altered. Of the English lines, Brighton recovered 1, Metropolitan improved 2, ditto (extension) a further ⅛, Midland ¼, Great Northern (A stock) and South-Eastern ½ each, North-Western a further ¼, and Lancashire and Yorkshire a further ½; Scottish Central declined 2, North British (Edinburgh, Perth, &c.) 1, and Caledonian a further ½; Metropolitan District (paid-up) are steady at 102 to 103. In colonial, Great Western of Canada shares improved ¼, and ditto (new) ⅛. In foreign, Antwerp and Rotterdam improved ⅛, and Belgian Eastern Junction and Lombardo-Venetian receded ⅛ each. In American, Virginia (6 per cent.) recovered 1, and Illinois Central shares improved ¼. In mines Great Wheal Ver declined ½, and Chiverton a further ¼.

WEDNESDAY, Oct. 11.—In the share market to-day the only descriptions showing any material alteration of tone were English railways and American securities, both of which closed with a firm tendency, and the banks, which were rather weaker. Of the English lines, North British and North-Eastern (Berwick) advanced ½ each, Great Western ¼, Great Northern (A stock) a further ½, Metropolitan further 1½, and ditto (Extension) a further ½, and Blackwall declined 1, and Metropolitan District ½, the last price being 101 to 103. In colonial, Madras (5 per cent.) advanced ½, Great Western of Canada shares (paid up) further ⅜, and ditto (new) a further ¼; and Grand Trunk of Canada (2nd and 4th preference) declined 1 each. In American, Erie shares (paid up) improved ⅜, Virginia (6 per cent.) a further 1, and Illinois Central (shares) a further 1¼, and ditto (sterling bonds) declined 1. In British mines, Great Laxey and Great Wheal Busy advanced ½ and ¼ respectively; and Wheal Buller declined 1, Hingston Downs ¼, and Chiverton a further 1. In foreign mines, Frontino Gold improved ¼.

THURSDAY, Oct. 12.—The share market to-day closed with a tendency inclining to firmness in all the several descriptions, except banks, but the transactions were very few. In English railways, Great Eastern, Manchester, Sheffield, &c., and South-Eastern improved ½ each, and Lancashire and Yorkshire, North-Western, and Midland ¼ each; Scottish North-Eastern (Aberdeen) declined 1. In colonial, Bombay and Central India, East Indian (of both descriptions), East Indian Peninsula, Great Southern of India, and Scinde severally advanced ½, Madras (4¾ per cent.) declined 1. In British mines, West Seton advanced 5, Margaret 1, and Clifford Amalgamated receded 1. In foreign mines, Frontino Gold relapsed ¼.

FRIDAY, Oct. 13.—The railway market was inactive. The principal stocks exhibited no alteration, with the exception of a decline of ⅛ per cent. in Midland. Lombardo-Venetian, Sambre and Meuse, and Great Western of Canada railway shares were inquired for, and exhibited an upward tendency. On the other hand, Great Luxembourg and Namur and Liege showed dulness.

MY LIBRARY.

Edited by PAMPHILIUS.

Just published, price 6d,

THE ECONOMY OF LIFE:
SELF-HELP TO WISDOM, WEALTH, AND WORTH.

"To stimulate industry, energy, perseverance, and self-denial, is the object of Pamphilius in issuing this volume for the guidance of youth. With these virtues, there is no eminence to which a man may not aspire and from the examples that are brought before the reader, he will perceive that a truly enviable reputation is only to be acquired by independency of character, by honesty, consistency, and by spotless integrity, both in public and in private life."—THE ECONOMY OF LIFE

II.

Just published, price 6d,

PATIENT BOYS,
AND HOW BY PATIENCE THEY BECAME GREAT MEN.
PATIENCE IS GENIUS

"The mind and will of man may be said to be almost infinite. It is true he cannot break away from the laws under which he is laid; but, subject to this restriction, there is nothing which, with PATIENCE and PERSEVERANCE, he MAY NOT KNOW, and nothing which he MAY NOT DO.

"'By INDUSTRY and PATIENT thought,' says Sir Isaac Newton, 'the first dawning opens gradually—by little and little—into a full clear light. If I have done anything, it is due to nothing but INDUSTRY and PATIENT thought.'

"Buffon is not far wrong in his assertion 'that the genius of great men consists mainly in their patience.'"—PATIENT BOYS.

III.

In the Press.

THE GENIUS AND WRITINGS OF
A POPULAR AUTHOR.

"Pope asserts that 'the proper study of mankind is man.' If mankind is the proper study of man, life-drawn histories of men in their social relations cannot be considered prejudicial to youth or age. The crude notions of youth have ripened into wisdom, while the forward heart has been tuned to gentleness and affection by the natural painting of a Shakspeare or a Scott; a Goldsmith or a Burns."—STREAMLET THOUGHTS.

Ward, Lock, and Tyler, 158 Fleet street; and all booksellers.

Just published, 1s., Illustrated, Second Edition,

THE HEAD AND HEART LEGACY.

"Po assessed of a Head, and a Heart, and a business education, I should not be grieved did circumstances compel me to take thee by the shoulder, pat thee on the back, bless thee, put £50 in thy pocket, and say to thee, Go, my son, thou art a rich man, wherever thou goest prosperity will be in thy track.'"—HEAD AND HEART LEGACY.

OPINIONS OF THE PRESS.

The book is clear and simple, highly moral in tone, and most encouraging to the young aspirant. It is interesting as a biographical sketch of a life struggle, and contains many observations on men and manners which it would be profitable for every one to know who has the least ambition or desire of having a soul above his buttons, and a good account at the bank."

"The author of this legacy has put together some very touching stories of his chequered life intending to stimulate the rising generation to good conduct and honourable dealing, by showing how an untaught boy rose step by step to a high position. He enjoins patience and vigilance, honesty and sobriety, in every path of life, and teaches what is so little practised—that a man should do what his hands find for him to do. The lessons are alike honourable to the head and heart of the writer."

"Besides the autobiographical sketch, Pamphilius supplies a variety of spirited literary specimens, the principal of which, however, is an ingenious manual of French Grammar, as used by the author when teacher of the French language, designed for the use of self-instruction."

Any one acquainted with the current literature of the metropolis, or its littérateurs, will have no difficulty in identifying the author of this interesting volume. The pages abound with sensible observations, attention to which will be found absolutely necessary to gain even a moderate share of success in this busy world of ours."

Ward, Lock, and Tyler, 158 Fleet street; and all booksellers.

THE LONDON JOINT STOCK BANK

give notice, that the rate of interest allowed on deposits at seven days' call is this day raised to FIVE per cent. per annum.

JOHN W. NUTTER, General Manager.

No. 5 Princes street, Oct. 7, 1865.

JOHN BENNET LAWES, F.R.S.,

1 Adelaide place, London Bridge, Chemist and Merchant. Artificial Manures specially prepared for Sugar Cane, Coffee, and other crops. Sulphate of Ammonia, Superphosphate of Lime, supplied and shipped with despatch.

WESTERN GRAMMAR SCHOOL,

Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

NUNN'S MARSALA OR BRONTE WINE,

25s per dozen, £7 4s per six dozen, £12 15s per quarter-cask. Rail paid to any station in England. This wine will be found of superior quality, is soft and old, and, though full flavoured, entirely free from heat or the slightest approach to acidity.—THOMAS NUNN and SONS, Wine, Spirit, and Liqueur Merchants, 21 Lamb's Conduit street, W.C. Price lists on application Established 1801

KINAHAN'S LL WHISKY

v. COGNAC BRANDY.—This celebrated old Irish Whisky rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s 8d, at the retail houses in London; by the agents in the principal towns in England; or wholesale at 8 Great Windmill street, W. Observe the real seal pink lable, and cork branded "Kinahan's LL Whiskey

NOTHING IMPOSSIBLE.—

The greatest and most useful invention of the day, AGUA AMARELLA.—Messrs JOHN GOSNELL and CO., Three King court, Lombard street, perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price one guinea per bottle; half bottles, 10s 6d. Testimonials from ar istes of the highest order and from individuals of undoubted respectability may be inspected. Messrs John Gosnell and Co. have been appointed perfumers to H.R.H. the Princess of Wales.

PRIZE MEDAL AWARDED.

J. W. ALLEN, Manufacturer and Patentee, 37 West Strand, London, W.C.

TEETH AND PAINLESS DENTISTRY.

—Messrs LEWIN and SIMEON MOSELY and SONS, 30 Berners street, Oxford street, and 448 Strand, opposite Charing Cross Railway Station.

Their painless artificial teeth are unequalled for economy, durability, comfort, and all purposes of articulation and mastication. Operations of every kind being unnecessary, the most nervous patient can be supplied without fear of pain or inconvenience.

Consultation free. Teeth from 5s. Sets from 5 to 25 Guineas, warranted.

For the efficacy, utility, and success of their system, vide LANCET.

Daily attendance 30 Berners street, Oxford street; 448 Strand, London; 15 Whitefriargate, Hull; 10 Norfolk street, Sheffield; 4 East parade, Leeds; and 14 St Nicholas street, Scarbro'.

Observe—Established 1830. No connection with any of the same name

TO MERCHANTS AND SHIPPERS.

The increased demand for

DINNEFORD'S FLUID MAGNESIA

(for thirty years highly approved by the Faculty, and extensively used in hot or tropical climates) recommends it to the attention of Shippers. A very liberal discount is allowed on export orders by the manufacturers, DINNEFORD and CO., Chemists, &c., 172 New Bond street, London.

PRACTICAL OBSERVATIONS

on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.

AND

Just published, second edition, price 1s 6d,

CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.

"Mr Hare is, we think, a sound and successful practitioner."—MEDICAL CIRCULAR.

"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.

"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.

Fifteen Years..	95 0 0	6 6 4	6 16 6

These debentures are available in amounts of £20, £50, £100, and £500 each, with coupons for interest attached, payable on the 15th June and 15th December each year. By special arrangement, debentures may be had in other amounts or for other terms of years to be agreed on, or payable to order instead of bearer.
The business of the Company is confined to the advance (of loans) on duly registered first mortgages of real property, to an extent in no case exceeding half the appraised value of the property mortgaged; such loans being repayable gradually by annual instalments.
For further information, application may be made to the Secretary, No. 17 Change alley, Cornhill.

Second Report of the Directors submitted to the Ordinary General Meeting of proprietors, at the London Tavern, on Tuesday, the 10th October inst.

GEORGE P. KITSON, Esq., in the chair.

The Directors in their first report to the shareholders submitted the accounts of the association to the 31st December, 1864, proposing that the financial year should terminate on the 30th June in each year, and they, therefore, now furnish the proprietors with the balance sheet as at the 30th June, 1865, together with the profit and loss account for the six months to that date, both duly audited.

Since the general meeting, held on the 28th February last, the Directors have added to the Board gentlemen of high commercial standing and influence; and, pursuant to intentions expressed, they appointed a general manager in London, but the result not being in accordance with the Directors expectations, the appointment has been terminated, and the matter of securing the services of another manager engages attention.

Although the six months ending 30th June last cannot for various reasons—amongst them the reduction in the price of cotton, consequent on the cessation of hostilities in America, and the loss of crops through the inundations in Turkey—be considered to have been favourable for the operations of the Company, yet it will be seen from the profit and loss account that the gross profits for the half-year were £23,292 19s 8d, which, with £6,822 16s, balance of last account, enables the Directors, after payment of all current expenses, to propose that £959 8s be written off preliminary expenses, £2,000 put to the reserve fund, and £18,079 14s (less a small amount for rebate), carried over to meet any losses which may result from the suspension of payment by their agents at Smyrna, Stephen Maltass and Anthony Pittaco, which the Directors regret to announce occurred in May last.

The Directors duly despatched a representative to Smyrna to take charge of the branch, and to arrange all outstanding matters; and from information received they have every reason for believing that the losses will be more than covered by the sum now carried over; but until they are in a position to state definitely the exact amount of loss, they consider it prudent to recommend to the proprietors the carrying forward of the whole sum rather than declare a dividend on the present occasion.

The Directors have to state in conclusion that certain arrangements are in view, which, if completed, and the operations of the Company be not entirely confined to the Turkish Empire, must materially advance the interests of the shareholders; and they have still full confidence in the future prosperity of the association.

Two Directors, Frederic Harrison, Esq., and F. B. Henshaw, Esq., retire at this meeting, and being eligible, offer themselves for re-election.

THE OTTOMAN FINANCIAL ASSOCIATION (Limited).

In Newfoundland—The Union Bank of Newfoundland.

Priority in the allotment to the extent of one-half of these shares will be given to present shareholders applying for the same on or before Thursday, the 20th inst.

PROSPECTUS.

In issuing proposals for a further amount of capital, the directors are strengthened, by the circumstances attending the late expedition, in their conviction that the enterprise, though postponed for this year, is yet on the eve of success.

The Great Eastern has proved herself admirably adapted to the work of laying deep-sea cables, and it has been shown that, in the event of insulation being injured during submersion, the electricians are enabled to calculate minutely the exact distance of the injured spot from the ship, though it be sunk in the deepest water.

It has further been proved that many miles of a cable like that selected by the Atlantic Telegraph Company can if so injured, be hauled in and repaired during the heaviest weather, from a depth of 2,000 fathoms; and still more, that even when a cable is absolutely fractured and the broken end lies 2,000 fathoms deep at the bottom of the ocean, it is perfectly possible to find and to raise it, and all those engaged in the recent expedition, are unanimous in the opinion that it is equally possible thus to raise the end of the Atlantic cable which is in that situation, and to splice it to the cable on board the Great Eastern, so as to complete the communication with Newfoundland, so soon as apparatus of suitable strength and convenience can be manufactured.

After careful consideration, therefore, the Directors have determined to persevere with increased vigilance and energy in the great work entrusted to their charge, and guided by the light of experience, they trust to bring it to a successful issue.

They have been encouraged in this view by the fair manner in which they have been met by the contractors, with whom they have entered into a contract for renewed operations.

Under this contract the Telegraph Construction and Maintenance Company, in consideration of the sum of £500,000, which has been agreed on as the cost price of the cable if paid for in cash, have already commenced the manufacture of a new cable, to be laid down during 1866 between Ireland and Newfoundland.

The contractors, if the said cable be successful, but not otherwise, are to have in shares and cash a profit at the rate of 20 per cent. upon the cost.

The contractors also undertake during 1866, without any further charge whatever, to go to sea with sufficient cable, including that now left on board the Great Eastern, and all proper appliances and apparatus such as experience as shown to be necessary, and to use their best endeavours—in the success of which they express entire belief—to recover, repair, and complete in working order between Ireland and Newfoundland, the present broken cable, which has been ascertained by recent careful electrical tests to be in perfect order throughout its entire length.

It will be seen that circumstances have thus enabled the board to effect a very considerable economy in the Company's present operations, for in the event of success the Company will be in possession of two efficient cables for a considerably less amount than would have been expended if the cable of this year had been successfully laid, and another had been purchased separately.

Under these circumstances subscriptions are now invited for the sum of £600,000, in 120,000 shares of £5 each.

Applications from existing shareholders will have priority in the allotment to the extent of 60,000 shares, or one-half the above capital, provided their applications are received on or before Thursday, the 26th inst.

The remaining 60,000 shares are offered to the general public.

This new capital will not only create fresh property but probably resuscitate the old, and the experience of the present year shows that by these means the existing 8 per cent. preference stock will, in all probability, be again placed at par in the market before the sailing of the ship next year.

The Directors have therefore resolved at once to offer a substantial inducement to the general public, as well as to the shareholders, to join them in this fresh effort.

These new shares will accordingly be entitled to take precedence as to dividend over all the other existing stock of the Company, and to participate pro rata in all subsequent dividends, bonuses, or benefits, after eight per cent. shall have been paid upon the second preference stock and four per cent. upon the ordinary stock.

The profits to be expected on the completion of this work can be ascertained by any one who will take the trouble to make a small calculation, by which it will be seen that if each of the two proposed cables can be worked at the very low rate of only five words per minute upon each cable for sixteen hours a day at five shillings per word, the traffic, after paying the dividend charges of twelve, eight, and four per cent. respectively, amounting together to £144,000 upon the capital comprised in those different stocks, and after also paying the very large sum of £50,000 a year for working expenses, would leave a very large balance for paying further dividends or bonuses on the Company's total capital, both ordinary and preferential, or for reserve fund if preferred.

One pound per share, payable to either of the bankers of the Company, must be paid on application, and a further sum of thirty shillings per share on allotment.

Twenty one days' notice of any further call will be given, and no further call will be payable in less than three months from the date of the allotment.

Prospectuses and forms of application may be had of the Secretary, at the office of the Atlantic Telegraph Company, 12 St Helen's place, Bishopsgate street, London; of the Company's bankers, viz., the Bank of England and Messrs Glyn, Mills, and Co., in London; the Bank of England, in Liverpool; the Consolidated Bank, Manchester; and the British Linen Company Bank, Glasgow; or of any respectable broker. Applications for shares, on the form attached to the prospectus, may be addressed to the Secretary, or to the Company's bankers.

GEORGE SAWARD,
Secretary and General Superintendent.

SECRETARY—Mr Henry Hobden.

Offices—356 Euston road, N.W.

PROSPECTUS.

This Company is formed for the purpose of acquiring, carrying on, and extending the business of zinc, galvanised iron, and roofing manufacturers, merchants, contractors, &c., which has been carried on by the above firm, and by their predecessors, in the Euston road for upwards of 25 years.

The daily increasing application of zinc and other metal work for many purposes warrants the expectation of great addition to the success already achieved by the present firm.

An agreement has been made for the transfer to the Company of the extensive premises and range of buildings known as the Fitzroy Works, also of the whole of their stock in trade, machinery, and plant, the valuable patent rights of Mr Digley, and of the firm, the contracts in hand, and also the book debts, the liquidation of which the vendors guarantee.

All leases of the premises are made over to the Company on the same terms as those on which they were originally taken by the vendors, although greatly increased in value.

The agency of the Vieille Montagne Zinc Mining Company of Belgium, held by the firm and their predecessors for many years, is of very considerable value, and the Vieille Montagne roofing zinc is rolled but for one other firm in the United Kingdom. The agency will be continued to this Company, and as a proof of its increasing value it may be stated that in the year 1864 the vendors sold to the Vieille Montagne Company the sum of £10,800, while in the two years 1863 and 1864 the amount paid was nearly £60,000. As a further evidence of the additional demand and sale of the Vieille Montagne Company's zinc, it may be stated that their shares are now more than four times their original value.

Braby's brand of corrugated galvanised iron sheets enjoys a high reputation in the colonies and elsewhere, and is in constantly increasing demand. The galvanising of iron work for the trade also forms an important feature in the business.

Braby's Italian shaped roofing zinc, with patented improvements, is rapidly increasing in demand as applied to railway stations, public and other buildings; and many of the new metropolitan stations are now being covered in with this material.

Contracts are taken for roofs and buildings, with framework complete, also for gas, railway, and other buildings and works. The bulk of the manufactures and goods sold and sent out by this firm, consisting of sheet and perforated zinc, nails, tubing, washbars, pierced metals, galvanized iron goods of all descriptions, cast-iron work, wire netting, roofing felt, &c., find a ready market in every part of the world.

It is contemplated to enter upon the manufacture of stamped zinc for architectural purposes. This is an article almost unknown in this country, while its production in Paris alone employs 1,000 workmen, consuming annually about 4,000 tons of zinc; and the Company's business may be extended to other objects connected with building construction and the working of metal.

Some of the machinery and implements in use, and to be handed over to the Company, are of so costly and peculiar a nature that they have required years for their completion by the firm, and could not easily be reproduced, except by them.

The exclusive agency of the Iron Minium Paint for Great Britain has been secured for five years.

An investment in this Company is divested of everything of a speculative character, it will at once enter upon an old-established and lucrative business in full operation, with some important contracts in hand, and others under negotiation, while at the same time the connections established in almost every town of importance in the United Kingdom, in the colonies, and in foreign countries, combined with the leading position which the manufactures of the firm hold in the trade, can scarcely fail to secure to the Company a prosperous future.

The whole of the present working staff will, it is believed, continue in the service of the Company. A primary object in its formation being to secure the co-operation of those connected with it, such as officers and workmen, it is intended to give to them opportunities for participating, to a certain extent, in the profits, and thus, it may be said, to combine the joint-stock and co-operative principles, and to secure the practical interest of all in its success.

The amount of purchase money for the goodwill, leases, and patent rights is £25,000. The plant and stock will be taken at a fair valuation. The book debts owing to the firm, with valuation of plant and stock, will probably amount to £50,000.

The vendors are to receive £20,000 only in cash. The balance is to be taken part in shares, and part to remain on loan to the Company, at five per cent. interest, repayable at periods extending over seven years.

The vendors agree, as an assurance of their confidence in the success of the Company, to guarantee a minimum dividend of 10 per cent. per annum during the first three years of its operation; and, as part of the purchase money, to hold shares considered as paid up, to the amount of £4 per share, representing £32,500, until profits equal to 40 per cent. of the capital paid up have accrued, thus rendering themselves liable for the balance of £6 per share on 3,250 shares.

The accounts of the firm have been examined and verified by Messrs Harding, Pullein, and Co., the eminent accountants. The business will be taken over on 1st of January, 1866, and interest at 5 per cent. per annum on amounts paid will be allowed from the last day upon which the allotment money is payable until December 31st.

Prospectuses and forms of application for shares can be obtained of the brokers of the Company, the solicitors, or of the secretary, at whose offices the articles of association may be seen. Each application for shares must be accompanied by a deposit of £1 per share, which will be returned in full in case no allotment be made, and in case of a partial allotment the balance will be retained to meet the further payment thereon.

London, October 9, 1865.

FORM OF APPLICATION FOR SHARES.

(To be sent to the London and Westminster Bank, No.— Lothbury).

To the Directors of Frederick Braby and Co. (Limited).

Gentlemen.—Having paid to your bankers the sum of £ , being the deposit of £1 per share on shares in the above Company, I hereby request that you will allot to me that number, and I hereby agree to accept the same and become a member of the Company in respect of such shares, or in respect of any less number you may allot to me; I also agree to pay the deposit on allotment and further calls when made, and to sign the articles of association when required; and I hereby authorise you to place my name in the register of members for the number of shares allotted to me.

TEMPORARY OFFICES—17 Duke street, Westminster, S.W.

This undertaking is introduced under the auspices of the Metropolitan Railway Company to supply the want of warehouse and business accommodation in the metropolis, in connection with the railway system, and to take advantage of the opportunity offered by the unoccupied ground near Farringdon road, and the railway works in progress there, for the introduction into the heart of the metropolis of a block of buildings on a scale of unusual magnitude, which will combine railway communication below, warehousing accommodation above, and a magnificent range of exhibition galleries on the uppermost story.

The warehouses will afford the same facilities for the reception, deposit, and storage of goods conveyed by rail as are provided by the warehouses at the docks for goods carried by water, and will be designed and conducted on a scale and upon principles adapted to embrace upon equal and advantageous terms the general trade of London and the traffic of all the railways connected therewith.

By the Metropolitan line there will be continuous railway communication, adapted for both gauges, between the warehouses and all the railways on the Northern side of the Thames, and, by the Metropolitan extensions of the London, Chatham, and Dover Railway, with all the railways on the Southern side of the river.

The erection of the warehouses with the requisite working capital will be well covered by £600,000, one-third of which at least may be raised by mortgage at favourable rates of interest.

The Metropolitan Railway Company having consented to furnish the requisite site above their proposed goods station on the payment to them of a moderate rent-charge, subject to augmentation proportioned to the profits of the undertaking, no capital will be required for the purchase of land.

The deposits will be returned in full in case 10,000 shares be not taken, and £2 paid upon each by the 31st of March, 1866.

Application for shares must be in the prescribed form, and accompanied with the requisite deposit, which will be returned in full if no allotment be made.

Forms of application may be obtained from the Secretary and brokers.

More than one-fourth of the first issue of shares has already been subscribed for by shareholders in the Metropolitan Railway Company; the remaining shares will be allotted without reserve to applicants in the order in which their applications are received. Immediately the full number has been applied for no further applications will be entertained. No notice of the time when the list will be closed can be given, but the fact will be published as soon afterwards as possible.

For the prospectus in full refer to the "Times" of this date.—By order,

JOHN HENCHMAN, Secretary.

Offices, 17 Duke street, Westminster.

TO GENTLEMEN SEEKING

preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton crescent, Tufnell park West, N.W.

IMPORTANT ANNOUNCEMENT.—

JOSEPH GILLOTT, METALLIC PEN MAKER to the QUEEN, begs to inform the commercial world, scholastic institutions, and the public generally, that by a novel application of his unrivalled machinery for making steel pens, he has introduced a new series of his useful productions, which, for the excellence of ten per quality of material, and, above all, cheapness in price, must ensure universal approbation and defy competition.

Each pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with lable outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition, J. G. has introduced his warranted school and public pens, which are especially adapted to their use, being of different degrees of flexibility, and with fine, medium, and broad points, suitable for the various kinds of writing taught in schools.

Sold retail by all stationers and booksellers. Merchants and wholesale dealers can be supplied at the works, Graham street, Birmingham; at 91 John street, New York; and at 37 Gracechurch street, London.

GALE'S PROTECTED GUNPOWDER COMPANY, LIMITED.

Incorporated under the "Companies Act, 1862," with Limited Liability.

Capital £200,000, in 8,000 Shares of £25 each.

Deposit £1 per Share and £2 on Allotment.

Calls not to exceed £3 per share, and at intervals of not less than three months.

1,000 shares fully paid up will be reserved for the Inventor.

It is contemplated that not more than £10 per share will be required for a considerable period of time.

DIRECTORS.

Sir John C. Dalrymple Hay, Bart., 108 St George's square, Chairman.
Thomas Brassey, jun., Esq., 4 Great George street, Westminster.
Sir Arthur W. Buller, M.P., 20 Queen's Gate terrace.
Colonel De Bathe, Fusilier Guards, 3 Morpeth terrace.
The Hon Henry W. Petre, Springfield, Chelmsford.
John Gilbert Talbot, Esq., 10 Great George street, Westminster.

CONSULTING MANAGER—Mr James Gale.

BANKERS.

Messrs Barclay, Bevan, Tritton, Twells, and Co.
Messrs Ransome, Bouverie, and Co.
Messrs Heywood, Brothers and Co., Manchester.
North Western Bank, Liverpool.
Town and District Bank, Birmingham,
English Joint Stock Bank, Bristol,
Devon and Cornwall Banking Company, Plymouth.
Will also receive Subscriptions and Deposits.

SOLICITORS—Messrs Marchant and Pead, 30 Great George street, Westminster.

BROKERS—Messrs Huggins and Rowsell, 1 Threadneedle street.

AUDITORS.

Messrs Johnstone, Cooper, Wintle, and Evans.
Mr T. Walliker.

SECRETARY (PRO TEM.)—Mr David Ker.

TEMPORARY OFFICES—132 Gresham House, Old Broad street.

This Company is formed for the purchase and use in the United Kingdom of Mr Gale's valuable invention for rendering gunpowder non-explosive and explosive at pleasure, and for protecting gunpowder from damp—an invention admitted to be of national importance.

The objects of the Company will be as follows:—

1. To manufacture and sell the protecting material ready for use.

2. To grant royalties and licences to gunpowder manufacturers and others for the use of the invention.

3. To purchase or manufacture gunpowder and supply it to the public in a protected state.

4. To enter into contracts for the storage and transit of gunpowder to any part of the United Kingdom or elsewhere; and the application of the invention to all the other purposes of which it is capable.

The articles of association are open for inspection at the offices of the Company, and also at the Solicitor's office, 30 Great George street, Westminster.

In the event of no allotment being made, the deposits will be returned in full.

Applications for shares, accompanied by a remittance for the deposit, may be made to the Bankers and Brokers.

Prospectuses and forms of application for shares can be obtained at the offices of the Company, of the Bankers, and Brokers.

GALE'S PROTECTED GUNPOWDER COMPANY, LIMITED.

NOTICE IS HEREBY GIVEN, that the APPLICATION LIST for SHARES in this Company, will be CLOSED on THURSDAY NEXT, October the 19th.

Temporary Offices, 132 Gresham House, Old Broad street, October 10th, 1865.

DAVID KER, Secretary (pro tem.)

WHERE SHALL WE DINE?

Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and file Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.

N.B.—Lists of Heirs at Law, Next of Kin.

ADOPTED LARGELY BY HER MAJESTY'S GOVERNMENT.

CHEAP, LIGHT, AND DURABLE ROOFING.

CROGGON'S PATENT ASPHALTE ROOFING FELT has been extensively used and pronounced efficient and particularly applicable for warm climates

1st. It is a non-conductor.

2nd. It is portable, being packed in rolls, and not liable to damage in carriage.

3rd. It effects a saving of half the timber usually required.

4th. It can easily be applied by any unpractised person

5th. From its lightness, weighing only about 42 lbs to the square of 100 feet, the cost of carriage is small.

INODOROUS FELT, for damp walls and for damp floors, under carpets and floor cloths; also for lining iron houses, to equalise the temperature.

Price ONE PENNY PER SQUARE FOOT.

CROGGON and CO'S PATENT FELTED SHEATHING for Covering Ships' Bottoms, &c., and

DRY HAIR FELT, for Covering Steam Boilers, Pipes, &c., preventing the radiation of Heat, and saving 25 per cent. of Fuel.

Samples, testimonials, and full instructions on application to CROGGON and CO, 2 Dowgate hill, London and at 2 Dorset Piazzas Liverpool.

NEW OPERA AND FIELD GLASS

and the Reconnoitrer Glass, price 10s 10d (sent free). This "TOURIST'S FAVOURITE," through extraordinary division of labour, distinctly shows small windows ten miles off, landscape at 30 miles, Jupiter moons, &c. The Marquis of Carmarthen—"The reconnoitrer is very good." Earl of Bresdalbane—"I find it all you say, and wonderfully powerful for so very small a glass." Earl of Caithness—"It is a beautiful glass." "Rev. Lord Scarsdale approves of it." Lord Gifford—"Most useful." Lord Garvagh—"Remarkably good." Sir Digby Cayley—"It gives me complete satisfaction, and is wonderfully good." Captain Sendey, Royal Small Arms Factory, Enfield, "found it effective on the 1,000 yards range." F. H. Fawkes, of Farnley hall, Esq.—"I never before met, although I have tried many, a glass combining so much power, for its size, with so much clearness." THE FIELD—"We have carefully tried it at an 800 yard rifle range against all the glasses possessed by the members of the corps, and found it fully equal to any of those present, although they had cost more than four times its price." NOTES AND QUERIES—"What intending tourist will now start without such an indispensable companion to a pleasure trip?" The celebrated Hythe Glass shows bullet marks at 1,200 yards, and men at 3½ miles, 31s 6d. All the above glasses, respectively bearing the registered Trade-Marks, "Salom," "Reconnoitrer," and "Hythe," are only to be had direct from Salom and Co., 98 Princes street, Edinburgh. No agents of any kind anywhere.

H. J. AND D. NICOLL, TAILORS

to the Queen, Royal Family, and Courts of Europe.—For GENTLEMEN, the FASHIONS for the SEASON, for the promenade or demi dress—Superfine frock coats, with rich silk breast facings, or morning coats of superfine Melton cloths, the charge for the former being 3½ to 4½ guineas; for the latter, 2½ to 3½ guineas. For negligé purposes, morning coats with pocket flaps at the waist, also the negligé jackets; these are of Melton, fancy coatings, Angola and Cheviots, the prices from 25s to 4 guineas. The Angolas and Cheviots are also made in suits, at prices from 2 to 4 guineas; evening dress, black cloth of the finest quality. For overcoats—Melton, Beaver, and Witney cloths, from 2 to 8 guineas. For young gentlemen from eight years of age—The morning coat and negligé jacket; also suits of Angola and Cheviot, the prices according to size, commencing at 31s 6d the suit. For boys from four years of age—The knickerbocker and Highland costume of black velvet, or fine cloth for dress, and of Angolas and Cheviots for morning, the price of the first size knickerbocker, 1 guinea the suit. For overcoats—Melton, Beaver, and Witney cloths, from 1 to 2 guineas each. Foreigners and visitors to London, Manchester, and Liverpool, will find at Messrs Nicolls', garments ready for immediate use, or made to order at a few hours' notice.—H. J. and D. Nicoll, 114, 116, 118, 120 Regent street; 22 Cornhill, London; 10 Mosley street, Manchester; and 50 Bold street, Liverpool.

ALLSOPP'S PALE OR BITTER ALE.

—Messrs SAMUEL ALLSOPP and SONS beg to inform the Trade, that they are now registering orders for the March Brewings of their Pale Ale in Casks of 18 Gallons and upwards, at the Brewery Burton-on-Trent; and at the undermentioned Branch Establishments.—

LONDON	At 61 King William st, E.C.
BRIGHTON	At 6 Marine Parade.
LIVERPOOL	At Cook street.
MANCHESTER	At Ducie place.
LEEDS	At Commercial buildings.
BIRMINGHAM	At Upper Temple street.
DERBY	At the London road.
LEICESTER	At 52 Granby street.
WOLVERHAMPTON	At Exchange street.
SHEFFIELD	At Exchange buildings.
NOTTINGHAM	At Maypole yard.
CHESTERFIELD	At the Low Pavement.
STOKE-UPON-TRENT	At Wharf street.
DUDLEY	At Burnt Tree.
WORCESTER	At the Cross.
BATH	At 5 Edgar buildings.
SOUTH WALES	At King street, Bristol
DUBLIN	At Crampton quay.
CORK	At Cook street.
EDINBURGH	At 47 North bridge. At 11 Union street lane.
GLASGOW	At St Vincent street.
PARIS	At 279 Rue St Honoré

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Casks and Bottles, and on Draught, genuine, from all the most respectable wine and beer merchants and licensed victuallers, on "ALLSOPP'S PALE ALE" being especially asked for.

SPECIAL NOTICE.

E. MOSES AND SON'S

ESTABLISHMENTS WILL BE CLOSED on Thursday and Friday, the 12th and 13th inst., and Re-opened as usual on Saturday evening the 14th inst., at ½-past 5.

E. MOSES and SONS,

Ready-made and Bespoke Tailors, Habit Makers, Woollen Drapers, Hatters, Hosiers, Boot and Shoe Makers, and General Outfitters.

LONDON HOUSES:

154, 155, 156, 157, Minories; 83, 84, 85, 86, 87, 88, 89, Aldgate.

506, 507, 508, New Oxford street; 1, 2, 3, Hart street.

137, 138, Tottenham court road; 283, Euston road.

THOMAS TURTON AND SONS,

Manufacturers of CAST STEEL for cutters, punches, taps and dies, turning tools, chisels, &c. CAST STEEL piston rods, crank pins, connecting rods, straight and crank axles, shafts, and forgings of every description. FILES marked T. Turton. Superior to any other make. (See results of trial in the TIMES, July 26, 1851.) TOOLS of all kinds, for engineers, railways, contractors, &c., &c. EDGE TOOLS marked Wm. Greaves and Sons. Electro-Boracic steel, warranted to wear out three tools made of cast steel. DOUBLE SHEAR STEEL, BLISTER STEEL, SPRING STEEL, GERMAN STEEL. Springs, buffers, and cast steel tyres for locomotive engines, railway carriages, and waggons. SHEAF WORKS and SPRING WORKS, SHEFFIELD.

London Warehouse, 35 Queen street, City

Paris Warehouse, 10 Rue du Grand, Chantier.

New York Store, 102 John street.

Where the largest stock of steel, files, tools, &c., &c., may be selected from.

NEW THEATRE ROYAL ADELPHI,

Sole Proprietor and Manager, Mr B. Webster.

Great Hit of Mr Jefferson in a new Drama written expressly for him by Dion Boucicault, Esq., called RIP VAN WINKLE; or, THE SLEEP OF TWENTY YEARS.

On Monday, and during the week, GOOD FOR NOTHING. Mrs Mellon, and Mr Felix Rogers. At 8, RIP VAN WINKLE; or, The Sleep of Twenty Years Rip, Mr Jefferson, supported by Messrs P. Bedford, R. Phillips, Billington, Felix Rogers, Ashley, Eburne, C. J. Smith, and Mrs Billington. And the WIDOW'S VICTIMS. Mr Felix Rogers, and Miss Jenny Willmore. Commence at 7.

ROYAL POLYTECHNIC.—

Professor Pepper on the Gorgeous Phenomena of Polarised Light.—New Serio-Comic Ghost Story (J. H. Pepper and Henry Dircks joint inventors) entitled "The Poor Author Tested."—New Scene, with the wonderful illusion called "Proetus;" or, "We are here, but not here."—Musical Entertainment by Mr F. Chatterton, the celebrated harpist, assisted by Mrs Haldane, entitled "The Adventures of an Artist in search of Fame."—Course of Lectures, by Dr Donovan, on Phrenology.—Lecture by J. L. King, Esq., on "Thermal Battery Power"—Admission to the whole 1s.

The Political Economist.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

A SUPPLEMENT, *containing the Reports of the Joint Stock Banks of the United Kingdom, similar to that published on the 27th of May, 1865, will be published by the* ECONOMIST *on the 11th November.*

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE STATE OF THE MONEY MARKET.

THE opinion of the best-informed judges is that money will not be cheaper for a little while, and we have little doubt that this opinion is well founded, It is certain that some money will be sent to Egypt, and some will probably be sent to India also. How much it is not possible to say, but still some fair amount worthy of consideration. The holders of silver ask long prices for it, and so show that *they* believe, as we do, that the demand will be of importance.

It is true that the means of supplying this demand are augmenting, Money is about to come in from Ireland, and also from the country. After a brief period, the periodical tide of cash from the interior will set to the Bank as strongly and as quickly as it has set from the Bank. The high rate of interest will attract money from the Continent, and already long-dated bills are greatly in demand, which is a usual symptom of an influx of continental money.

It is impossible to predict with certainty whether or not these immediate resources will enable us to meet the anticipated drain, at least without another rise in the rate of discount; but, on the whole, we are inclined to believe that, for the present at least, they will do so. During the next week we do not anticipate the value of money to become higher, and we are pretty confident that it will not fall lower.

LORD PALMERSTON.

LORD PALMERSTON only died on Wednesday, and already the world is full of sketches and biographies of him. It is very natural that it should be so, for he counted for much in English politics: his personality was a power, and it is natural that every one should at his death seek to analyse what we used to have, and what we have now lost. We will do so, but remembering how often the tale has been told, we will be as brief as possible.

Lord Derby happily said that *he* was born in the "pre-"scientific" period, and Lord Palmerston was so even more. He was, it is true, a boarder at Dugald Stewart's, and we believe transcribed at least a part of the lectures on political economy of that philosopher, lately published. But the combined influence of interior nature and the surrounding situation was too strong. His real culture was that of living languages and the actual world. He was the best French scholar among his contemporaries,—so much so that when he went to Paris in 1859, the whole society which fancied he was an imperious and ignorant Englishman, was charmed by the grace of his expression. His English in all his speeches was sound and pure, and in his greater efforts almost fastidiously correct. The *feeling* for language, which is one characteristic of a great man of the world, was very nice in Lord Palmerston and very characteristic.

It was from the actual knowledge of men—from close specific contact—that Lord Palmerston derived his data. We have heard grave men say with surprise, "He always has an "anecdote to cap his argument." He begins, "I knew a "man once," and the anecdotes had no trace of the garrulity of age: they were real illustrations of the matter in hand. They were the chosen instances of a man who thought in instances. Some men think, as the philosophers say, by "definition"; others by "type"; Lord Palmerston, like an animated man, used to the animated world, thought in examples, and hardly realised abstract words.

It was because of this that in international matters—the only ones for which in youth he cared—he was a great practical lawyer. He knew, what hardly any one knows, the subject-matter. He knew the *cases* with which during a long life he had to deal. To most men international law is a matter of precedent and words; to him it was a matter of personal adventure and reality. Some people, not unqualified to judge, have said that his opinion on such matters was as good as any law officer's. He might not have studied Vattel or Wheaton so closely as some; but he had, which is far better, followed with a keen interest the actual and necessary practice of present nations.

It was this sort of worldly sympathy and worldly education which gave Lord Palmerston his intelligibility. He was not a common man, but a common man might have been cut out of him. He had in him all that a common man has and something more. And he did not at all despise, as some philosophers teach people to do, the common part of his mind. He was profoundly aware that the common mass of plain sense is the great administrative agency of the world, and that if you keep yourself in sympathy with this you win. and if not you fail. Sir George Lewis used to say that just as Demosthenes declared action to be the first, second, and third thing

Digitized by Google

in a statesman, so intelligibility is the first, second, and third thing in a constitutional statesman. It is to us certainly the first, second, and third thing in Lord Palmerston. This is not absolutely eulogistic. No one resembled less than Lord Palmerston the fancied portrait of an ideal statesman laying down in his closet plans to be worked out twenty years hence, and to be appreciated twenty years hence. He was a statesman for the moment. Whatever was not wanted now, whatever was not practicable now, whatever would not *take* now, he drove quite out of his mind. The prerequisites of a constitutional statesman have been defined as the "powers of a first-rate "man, and the creed of a second-rate man." The saying is harsh, but it is expressive. Lord Palmerston's creed was never the creed of the farseeing philosopher; it was the creed of a sensible and sagacious, but still common-place man. His objects were common objects: what was uncommon was the will with which he pursued them.

No man was better in action, but no man was more free from the pedantry of business. People, he has been heard to say, have different minds. "When I was a young man, "the Duke of Wellington made an appointment with me at "half-past seven in the morning, and some one asked me, "'Why, Palmerston, how will you keep that engagement?' "'Oh,' I said, 'of course, the easiest thing in the world. I "shall keep it the last thing before I go to bed.'" He knew that the real essence of work is concentrated energy, and that people who really have that in a superior degree by nature, are independent of the forms and habits and artifices by which less able and active people are kept up to their labour.

Lord Palmerston prided himself on his foreign policy, on which we cannot now pronounce a judgment. But it is not upon this that his fame will rest. He had a great difficulty as a foreign minister. He had no real conception of any mode of life except that with which he was familiar. His idea, his fixed idea, was that the Turks were a highly-improving and civilised race, and it was impossible to beat into him their essentially barbaric and unindustrial character. He would hear anything patiently, but no corresponding ideas were raised in his mind. A man of the world is not an imaginative animal, and Lord Palmerston was by incurable nature a man of the world. Keenly detective in what he could realise by experience—utterly blind, dark, and impervious to what he could not so realise. Even the best part of his foreign policy was alloyed with this defect. The mantle of Canning had descended on him, and the creed and interests of Canning. He was most eager to use the strong influence of England to support free institutions—to aid "the Liberal party" was the phrase in those days—everywhere on the Continent. And no aim could be juster and better; it was the best way in which English strength could be used. But he failed in the instructed imagination and delicate perception necessary to its best attainment. He supported the Liberal party when it was bad and the country unfit for it, as much as when it was good and the nation eager for it. He did not define the degree of his sympathy, or apportion its amount to the comparative merits of the different claims made on it. According to the notions of the present age, too, foreign policy should be regulated by abstract, or at least comprehensive principles, but Lord Palmerston had no such principles. He prided himself on his exploits in Europe, but it is by his instincts in England that he will be remembered.

It was made a matter of wonder that Lord Palmerston should begin to rule the House of Commons at seventy, and there is no doubt he was very awkward at first in so ruling it. Sir James Graham, and other judges of business management, predicted that "the thing would fail," and that a new Government would have to be formed. But the truth is, that though he had been fifty years in the House of Commons, Lord Palmerston had never regularly attended it, and even still less attended *to* it. His person had not been there very much, and his mind had been there very little. He answered a question on his own policy, or made a speech, and then went away. Debate was not to him, as to Mr Pitt, or Mr Gladstone, a matter of life and pleasure. Mr Canning used to complain, "I can't get that three-decker Palmerston "to bear down." And when he was made leader of the House, it came out that he hardly knew, if he did know, the forms of the House. But it was a defect of past interest, not a defect of present capacity. He soon mastered the necessary knowledge, and as soon as he had done so, the sure sagacity of his masculine instincts secured him an unconquerable strength.

Something we wished to say more on these great gifts, and something, too, might be said as to the defects by which they were alloyed. But it is needless. Brevity is as necessary in a memorial article as in an epitaph. So much is certain:—We shall never look upon his like again. We may look on others of newer race, but his race is departed. The merits of the new race were not his merits; their defects are not his. England will never want statesmen, but she will never see in our time *such* a statesman as Viscount Palmerston.

POLITICAL PROSPECTS.

We do not attempt the impossible task of telling the world what has not yet happened. News, like other things, requires to be *created*. Nor is it worth while to go over the obvious probabilities and possibilities in the varying events of an impending crisis. Of one thing we may be perfectly sure,—that the Government, whoever is at the head of it and whoever forms it, will be substantially Mr Gladstone's Government. He is young,—comparatively young,—vigorous, and in the House of Commons; and no one else has all three advantages. Besides this, Mr Gladstone has a following in the world far beyond any living man. People who come home from India, and who judge by literature merely, cannot comprehend that he should not be at once Prime Minister. He has attracted not only the English people, but the English race, far beyond any living man.

The "best judges" say that he cannot lead the House of Commons, and that leadership requires such a peculiar assemblage of qualities that it is rarely safe to predict their possession by an untried man. The "best judges" said that Lord Palmerston "could not lead the House;" and, as we have elsewhere said, no one could be more awkward at it than he was at first. We doubt if any one ever made such a blunder as calling Mr Bright "the honourable and reverend gentleman" after a speech which touched the House, and was an admirable model of pathetic eloquence. Mr. Gladstone will not be the same sort of leader as Lord Palmerston, but there are many "mansions" in the kingdom of Parliament. Lord Althorp, Lord Russell, Sir Robert Peel, Lord Palmerston, all succeeded, and more various men could hardly be found. Mr Gladstone has an advantage which, except Sir R. Peel, no one of these enjoyed. He is indispensable to his party. There is no other Liberal leader at this moment actual or possible.

Shrewd observers say that the difficulty of the Liberals is their majority. It is too large to be safe. No Minister has the sure and undivided allegiance of the Liberal party. The party is uncertain. It will accept any good, even any fair leader, but it is not sure which leader will be best. If their majority were as small as in the last Parliament, they would be obliged to choose under self-restraint and with discretion. There is a danger now that they may think they are too strong for the Tories in any case, and therefore may vacillate too often and not make choice of a leader till too late. The only counter-weight is one which a very eminent Chancery barrister once used. "He said, I have great confidence in the other "side. Probably they will make some mistake." Just so probably Mr Disraeli will make some mistake.

Lord Russell is now trying to construct an Administration, but under considerable difficulties. His course of late years, since indeed he left the Aberdeen Cabinet in 1855, has made him many enemies. He has no influence in the House of Lords, where Lord Granville is popular. He is old, and he is hated by the Irish. He has little, if any, personal following in the present House of Commons. Still, he has a traditional reputation, and immense experience in great affairs.

THE OPERATION OF THE ACT OF 1844 AT THE PRESENT CRISIS.

The great evil of the currency is that no one will ever upon it attend to any opinions save their own. They are for example either for the Act of 1844 or against the Act, and on which ever side they are they never think there is anything to be said on the other side. If that grave and important Act of Parliament were discussed carefully and calmly like most other Acts, the truth would be evident; it would be universally seen that the Act confers one great and conspicuous advantage, but that it contains one intrinsic and inherent defect, and that the mode of working it is still but imperfectly understood.

Digitized by Google

We have always recognised and often shown that during an unfavourable foreign exchange, the Act of 1844 has a beneficial effect. It rouses the attention of the Bank directors. It compels them to raise the rate of discount. The whole stress of the foreign demand falls on the banking department, and the rapid diminution of its reserve leaves the Bank directors no option. They *must* take the one protective measure, which both experience and theory show to be effectual. If they were wise, they would do so without the Act; but the Act (now that its effect is foreseen and known) takes from them all option.

But there is an important difference between a domestic drain and a foreign drain, and the action of the Act of 1844 is very different upon the two. A little analysis will show this. There are two kinds of domestic demand, and we have both in action though in very different degrees at the present moment.

1st. There is a drain on the Bank of England, arising from the complete or partial destruction of other firms of credit. To this we drew attention last year almost at this time, because when those many great causes were in operation, the occurrence of a panic was possible, and a panic *means* a vast annihilation of subsidiary credit. We have now a very minute but very instructive instance of such a drain. Half a million of gold has been sent to Ireland, and all this has been so much deducted from the banking reserve. Irish banks who want sovereigns do not go about England picking up stray notes in active circulation. They sell or borrow on their securities, get credit at the Bank, draw cheques on that credit, and so reduce the Bank reserve. On all sudden demands the bank department is the *exposed* department; it is the first place where persons who want an unusual stock of bank notes or coin go to get it. So little gold has been wanted for Ireland that the effect is trifling. But suppose the petty Fenian disturbance to have grown to a considerable outbreak, suppose 5,000,000*l* of bank notes or bullion to have been required on a sudden, the effect of the Act of 1844 is to take those notes or that coin from the banking reserve. That reserve would be correspondingly reduced, the rate of interest would have to be raised perhaps to 12 per cent., and very likely, after all, the Act would have to be broken.

It is true that the Irish Act of 1845 also throws upon the English Act of 1844 a burden of peculiar and unnecessary magnitude. The Irish circulation is wholly *unsecured*. In case of an embryo insurrection, and such cases are an ever-recurring part of the history of Ireland, it is probable that some suspicion will always be thrown on every kind of credit. But the most frail part of credit is circulating credit. That is the credit which will first break and which will last mend. The Irish Act up to a fixed limit permits the Irish banks to issue without security, and after that limit, though it requires gold to be sent to Ireland, does not earmark that gold for the circulation. If the issuing bank stops, the holder of the note has no claim upon the gold whatever. A worse system for a country liable to political disturbance can hardly be imagined, and it is wonderful how little objection is taken to it.

The amount of discredit, however, of Irish origin is so trifling, that it is only important to consider it, because it gives a practical example of the weakest point of the Act of 1844. That Act undoubtedly prevents the substitution of the Bank of England credit for other credit when the latter is deranged, and the former still intact. What has happened now on a small scale may happen hereafter on a great scale, and with correspondingly disastrous results.

But it is the second species of domestic drain which it is most important to consider now. This is what we last week called the periodical drain. The note circulation and the coin circulation both increase at particular epochs: the augmentation may be expected as surely as the augmentation of cold in winter may be expected. Now it is not right that a calculable increase of demand should cause an incalculable and sudden increase of value. The seller ought to raise the price gradually. Just so the Bank of England; they ought to manage so that this periodical drain should never be a cause of sudden alteration in value. They should keep such a reserve as will enable them to spare such a sum without much change of rate, if any change. This rule has never indeed been formally laid down for the management of the Bank, but it is one of the first importance. The neglect of it on the present occasion has done considerable evil. First, because it has led people to say the whole rise was owing to the Act of 1844, and with much appearance of reason, since the reserve was reduced so low that the abstraction of every 100,000*l* became of primary magnitude. Secondly, because a sudden rise in the rate of discount exercises a bad effect on trade, whereas a gradual rise when called for exercises a beneficial effect. A sudden rise checks good transactions; careful and considerate people say, "We do not know what to be about; we do not enter "into more engagements than are necessary, because we do "not know what the course of trade is likely to be." A rise in the rate of discount which guides people to the true value of capital is beneficial, but a convulsive rise which puzzles people as to that true value, for analogous reasons is prejudicial and lamentable.

It is true, therefore, that as respects the Irish demand, the Act of 1844 has aggravated the rise in the rate of interest; it is true that the unfortunate reduction in the Bank reserve has given to the periodical drain of cash an undue and mistaken importance, and has brought about a more sudden change in the value of money than was necessary, or than would otherwise have occurred; but it is also true that these are minor and subsidiary agencies, and that the main causes of the present high value of money are the natural demand for capital in trade which has already arisen, and the natural demand for bullion to Egypt and the East, which hangs suspended over the market, and which in all likelihood will very soon be in actual operation.

THE UNITED STATES AND MEXICO.

A COMMUNICATION to the *Times* of last Saturday from its correspondent in New York excited a good deal of unnecessary fear (or, perhaps, in one view of the matter, hope), that a rupture was likely to occur between France and the United States on the subject of Mexico. Mr Seward was rumoured to have written a despatch *forbidding* the sending of any further reinforcements by the Emperor of the French to the French army in Mexico, and stating that any further intervention on the part of the Emperor in Mexico would be resented by the United States, which, of course, could have meant only War. Later in the week came from the same source the statement that General Grant—the only man in public life in America who never talks big and seldom talks at all—had been stating everywhere in public that the French must be driven out of Mexico. Both statements have since been absolutely contradicted, and both no doubt are absolutely erroneous. But they received a certain degree of credit, and raised a certain amount of uneasiness in this country, which reports of equal authenticity and moment concerning the action of any European State would have scarcely succeeded in producing. The reason is that all recent American events have surprised us so much, and have corresponded so little with what was expected, that America is regarded as the parent of great surprises, and almost any political fiction which is narrated in good faith concerning the designs of the United States is in danger of being believed. If the *Times* correspondent telegraphed that Mr Seward had just written a despatch "recognising" Ireland as an independent Republic, we doubt whether it would not find a certain number of believers, perhaps enough to warrant the City article writers in saying that the fall of one-eighth in certain Irish railways was believed to be due to the remarkable statement received from America. We believe this state of mind concerning American affairs, although not entirely without excuse, is absolutely without reason. It is not without excuse, because Mr Seward, though *perhaps*, as Lord Russell says, a man of "remarkable powers," applies those remarkable powers not only to explaining his real intentions, but to satisfying a real or imaginary demand in the people of the United States for sensation writing,—in short, to the production of bounce, and the popular judgment in England has confused a good deal between what Mr Seward has intimated he would do and not done, and what he has done without making any fuss about it. There is also some kind of excuse for this popular delusion in the really incalculable political results of American character. There were a few persons indeed who predicted that if the South collapsed at all, when it collapsed, it would collapse quite suddenly, throw aside all useless resentments, and set to work almost cheerfully to make the best of its beating. But those who did predict this had nothing to show for their prediction except a sort of instinctive sense of the bearings of American character. The velocity of the process of reconciliation is not the less really astounding and

Digitized by Google

extraordinary, and with regard to a nation that thus surprises the world, it is not wonderful that the popular mind should be a blank, a *tabula rasa* ready for the reception of any new image, however marvellous, which incautious circulators of fiction choose to trace upon it.

Yet we believe it will be found that the American people have surprised or disappointed (whichever phrase be most applicable) rational expectation only in two ways. They have been more tenacious of their national purposes when they seemed to them feasible than we gave them credit for, and they have renounced those purposes when they became absolutely hopeless with more promptitude than we gave them credit for; but in neither respect have they, we think, shown themselves untrue to their Anglo-Saxon lineage, though there is probably somewhat more *adaptability* to new circumstances in the American than in the Englishman. Englishmen might have sulked longer after such a defeat as the Southerners have had, but Englishmen would certainly not have shown less tenacity on the territorial and national questions than the North. Hence we do not think that the disposition to accept any rumours, however wild, as to the designs of the Union, is in any degree justified. Whatever unexpected strength of national pride has revealed itself in the American character, we have no pretence for saying that, granting that, and granting a little bounce as to language, the Americans on both sides have not shown a very clear and steady regard to their own interests. The firmness with which the North avoided a complication with both England and France, when, to their own thinking, they had grave grounds of complaint against both countries, in order to prosecute the one which they had on hand, and the promptitude and firmness with which they began to curtail their expenditure the moment the war had ceased, are not in any way reconcileable with the character of a people likely to be actuated by fanciful and capricious notions.

Now, what could have been more insane than for the North, at this crisis of the Mexican question, when there is assuredly much less reason to apprehend that France will convert Mexico into a French colony, or even keep an army of occupation permanently there, than there was two or three years ago, to *challenge* war by sending a threat to the Emperor which he could not help resenting. The war, if once entered upon with such a power as France could put into the field, at such a distance from the source of Government as Mexico, and in a condition of the Treasury so exhausted as the present, would in all probability entail defeat, and if not defeat, certain bankruptcy,—while it is not even very likely that the men for such an undertaking would be forthcoming without some great insult to rouse the national pride. Had what the *Times* correspondent said been true, the Government of Washington would have been guilty of an idiotic policy,—and whatever have been their sins, no one at least can accuse them of that. They would have stirred up a strong, probably an overwhelming anti-war party in the country, which is by no means willing to contemplate the possibility of a repudiated debt and a new drain upon the capital and labour of the people; they would have given a new chance to the restless politicians of the South, and robbed them of their strongest motive for acquiescence in defeat, namely, the hope of speedy prosperity; and they would have gratified their enemies by laying themselves open to a very probable disastrous defeat by the French arms. These are not dangers which politicians so shrewd as Mr Seward are likely to incur for a trifle. That the Northern Government have steadily disapproved the intervention in Mexico, have steadily warned the French Government that circumstances might arise under which they would think it their duty to interfere, and have laboured, in short, in every way to raise up before the Emperor's eyes the possibility of a war with the United States as arising out of his enterprize, unless he withdraws from it within a moderate time, there is no doubt. But this is a very different thing indeed from pledging themselves to immediate action of any kind in an emergency when every nerve is strained to cement again the broken fragments of the Union, and maintain the national credit under the terrible strain which it has recently suffered.

Mexico is safe enough from American invasion for the next two or three years at the very least, unless the French policy should sting the national honour in any way likely to rouse the whole nation. For that the Emperor is as much too shrewd as is the Northern Government for the blunder recently attributed to them. It is only the cloudy mind with which we contemplate all the political possibilities of the great American continent that could for a moment prevent people from discerning the intrinsic marks of unauthenticity in the rumour contributed last week to the stock of political speculations by the correspondent of the *Times*.

IRELAND IN TRANSITION.

THE FUTURE OF IRISH INDUSTRY.

Two leading results have, it is to be hoped, been made plain as accruing from the revolution in Irish industry of which we have been tracing the course. 1, Ireland in her agriculture is—speaking broadly—exchanging an economy of tillage for one of grass farming; and 2, coincidently with this, she is in her industrial organisation passing from a *regime* of cottiers to one composed mainly of capitalist farmers and labourers. This state of things being recognised, the question naturally arises, what is to be the ultimate goal of this still transitionary state?—what the definitive form which industrial society in Ireland is destined to assume? This question, if it has not been formally treated in this country, has not been unconsidered: the prevailing view upon the subject is, we imagine, to this effect.

It appears to be generally believed that the movement now in progress, and which has reached the stage we have indicated, is destined to proceed much further in the same direction, and to issue finally in a general assimilation of the agricultural system of Ireland to that of this country, or rather to that which prevails in the large farm districts of Scotland. The definitive result looked forward to, therefore, is an extensive consolidation of the present holdings of 20, 30, or 40 acres into farms on the Scotch scale, ranging from 200 to 300 and 400 acres in extent; this transformation being of course accompanied with the removal from the country of the present race of occupiers unless so far as they can be absorbed by the very limited labour market which would arise under this condition of things. Such, we believe, is the notion which most Englishmen who think seriously on Irish affairs form to themselves of the industrial future of Ireland. But from this view the present writer entirely and strongly dissents.

The exchange of grass and stock farming for cereal cultivation, and, as incidental to this, the extensive reduction which has taken place and still continues in the population, has been, as he believes and has endeavoured to show, the necessary and truly beneficial consequence of our free trade policy, combined with the other influences of modern civilisation which have been acting upon Ireland; but that this change necessarily implies that other change which is looked for and apparently desired—that the restoration of the industry of the country to its natural *rôle* necessarily involves a further extensive consolidation of farms with, as its accompaniment, the expatriation or degradation of a large proportion of the existing population—this he ventures to doubt, and indeed strenuously disputes. Not that he would question that this result may not in fact be accomplished; but what he contends is that, if this should happen, it will be a purely gratuitous consummation, the product not of any necessity in the existing economic conditions of Ireland, but of imperfect or mistaken legislation—that it will be a result as deplorable as it will be needless, as discreditable, in his opinion, to English statesmanship as it will be certainly disastrous to Ireland.

In attempting to deal with this question, there is no need that we launch into the vexed waters of the controversy of the *grande et petite culture*. Without presuming to decide whether the Scotch or the Belgium mode of husbandry yields on a given outlay the largest net return, it is sufficient for our present purpose that the Belgium mode is a possible and successful one—capable of maintaining itself in free competition with the world, and of so maintaining itself as to challenge the admiration of the most competent judges. "Will any Scotch farmer," says Mr Laing, "'of capital and "'skill,' from the Lothians, venture to say that he has his "farm of 200 or 300 acres in such good heart, in such clean "garden-like condition, so free from weeds, and carrying all "over it such luxuriant crops, and producing so much food per "acre for man and beast, as an equal number of the acres now "before me in this tract of country.....The stock of cattle "and of people will be greater under this garden-cultivation "of a country.....The luxuriance of the crop here, in "Flanders, shows that the stock of cattle producing manure

Digitized by Google

"must be greater, or the manure must be better preserved, "than in our large-farm husbandry; for no such crops can be "seen with us unless on some small pet field."

Mr Laing is high authority on such a question; but a still higher is M. Lavergne, who, after a comprehensive survey of the three kingdoms, pursued in the light of a knowledge of Continental agriculture possessed by few living men, thus expresses his opinion—the opinion, be it observed, of an admirer—though a discriminating admirer—of the *grand culture*—on the question in hand:—"The English," he writes, "hope "to profit by the new situation to introduce into Ireland their "favourite system of large farming. They will succeed in it "without doubt in a certain measure; but it does not appear "that it is destined to become the general condition of the "country. Large farming supposes the existence of that "which is wanting in Ireland—capital. Efforts have been "made to attract thither English and Scotch farmers; but "not hitherto with much success.....All seems to announce "that the land of Ireland will continue to be cultivated prin- "cipally by Irishmen; *agricultural regeneration will march "less quickly; but it will be upon a wider and more natural "foundation.*" In presence of these facts and opinions it will not be maintained that a wholesale consolidation of holdings and a dispersion of the bulk of the present Irish population are economic necessities. And we beg especially to call attention to the concluding words of the passage just quoted. The width and naturalness of the foundation of an industrial system—in less metaphorical language, the extent of the population which it embraces and its suitability to their traditions and tastes—are surely elements of the problem which no far-seeing statesman will lightly regard. Of two methods of industry equally well adapted to the physical and external conditions of a country, that one which is capable of sustaining the largest number of human beings in the greatest comfort is surely the one to be preferred. This we think would be solid ground to take even if we were dealing with a purely abstract problem. In the actual circumstances of Ireland and the British Empire—Ireland in which a population still large, though much reduced, now exists—the British Empire sustaining a drain of emigration unprecedented in the history of the world—the consideration seems to us to be paramount, if not vital. For assuredly one of the most momentous facts of the present time is the dispersion of population now going forward over the globe. With the facilities of international intercourse every year increasing, and the familiarity of the masses with the attractions of new countries increasing *pari passu*, is there no danger of such a depletion of the populations of some of the principal countries of Europe, as seriously to jeopardise their position in the rank of nations? Is there no danger of this kind especially for England, with her limited area and her vast colonial possessions soliciting her inhabitants away? That is a question which can hardly fail soon to force itself upon our statesmen in a practical form. We make no pretension now to solve it; but this we may venture to say, that its determination in a sense favourable to old countries will depend mainly upon their mode of dealing with such questions as we have now raised. The population which a country can comfortably maintain (and magnitude of population, however its importance may in former times have been ignorantly exaggerated, *is* undoubtedly an element—the principal element—in the greatness of nations) depends, not upon rents or profits, not even upon the rate of wages, but upon the aggregate wages fund. A system of industry therefore which sacrifices the latter to the former, cannot but be unfavourable to the stability of empires. It seems to follow from these considerations that the question we are now considering—the future industrial organisation of Ireland—is a question not of Irish merely, but, in the largest sense of the term, of imperial importance.

But at this point we shall encounter an objection—how is a State to control the industrial organisation of its citizens? Is not this a question for the citizens themselves? And will not any attempt to attain this end be merely reverting in another form to that principle of protection of the evils of which Ireland has already furnished such disastrous illustration? What, in short, consistently with free-trade principles, can the State do in this matter than simply allow things to take their course? We reply, it may modify its definition of property in conformity with the requirements of a new industrial epoch; it may give protection to property in conformity with this new definition; and it may facilitate the acquisition by the people at large of property in that form in which it is most widely desired,—measures perfectly consonant with free trade principles, and which would supply to the present race of tenant-farmers in Ireland those motives and means to an improved agriculture, failing which they must assuredly abandon the country; in short, it may enact a good tenant-compensation law, and simplify and cheapen land transfer.

It is not our intention now to attempt an examination of any of the several plans for tenant-compensation which were propounded by able witnesses before the Committee of last Session, but we wish to justify the principles of such a scheme, to show its practicableness, and lastly its suitability to the actual exigencies of Ireland.

As we pointed out in a former paper, land, as a subject of property, stands on a different footing from almost all other things. The right to property in land—to land as distinguished from the value added to land by outlay and exertion—is not traceable to that act which forms in the last resort the natural title deed to almost all other wealth—human labour. Now, one consequence of this is, that this right, if pushed beyond a certain point, conflicts with the more fundamental principles on which property in other forms rests, in such a way that the claims of the owner of land can only be maintained by setting aside those of the producer. There may thus arise in the development of the conception of property a conflict of principles; and in fact this conflict of principles has actually occurred in Ireland. Interpreted in the landlord sense, which is also at present mainly the sense of English law, the right to property in land means the right to the land *and all that it contains*, albeit the contents owe their existence to the labour of another man. Regarded from the point of view of the cultivator, the right should be confined to the land taken strictly—the land *minus* the value which may have been added to it by others than its owner. Whether a tenant-compensation scheme involve a violation or not of the principle of property will entirely depend upon whether we adopt one or the other of those views—upon whether we regard the claim of the landowner to whatever has become attached to the soil, or that of the labourer to whatever his labour has produced as the more sacred title. For our part we have no hesitation in saying that we regard the latter as the paramount claim,—paramount as being more directly implicated with the elementary ideas of justice, and as lying nearer the root of those grand and universal motives which constitute the main propelling force of human progress.

So much for the question of principle. We must reserve the consideration of the other topics we have indicated for our next and concluding paper. J. E. C.

THE DELICACY OF THE CAPITAL MARKET.

(COMMUNICATED.)

THE ECONOMIST has frequently contained remarks calculated to show the great advantage derived from deposit banking, in encouraging individuals to save, and in storing up and utilising their savings.

There is another effect of deposit banking and money dealing carried to the extent now existing in this country, which has excited little attention, but which nevertheless is very important.

The matter thus alluded to is the greater and more rapid changes in the rate of interest which we now see when compared with what occurred in former times.

The reason is plain: there are no longer any hoards, any accumulations of unemployed money which, laying ordinarily dormant, can be drawn forth when the rate of interest rises beyond a certain point, and thus prevent its rising still higher. At present, everybody deposits whatever he can spare with a banker, most probably at interest, and the banker naturally lends all the money in his hands which he can prudently part with, retaining the smallest reserve in cash which he deems sufficient to meet the casual demands of his customers. This being the case, it follows that at all times nearly the whole capital of the country is engaged, sometimes at a high, sometimes at a low, rate of interest. There is rarely, if ever, a surplus really seeking occupation.

A writer in the *Times*, some time ago, gave reason to imagine that the loose cash floating in the London money market at any given time hardly exceeds four millions. It is plain that, with so trifling a reserve, a very small, sudden, and

Digitized by Google

extra demand may produce a most powerful effect upon the rate of interest. We have seen a striking example of this truth in the last few weeks. A sudden rise in the price of cotton has, according to the opinion expressed in the ECONOMIST, caused a rise in the rate of interest, as indicated by the Bank rate of discount, of from 4 to 7 per cent., with reasonable chance of a still higher elevation.

It may be further remarked that the system so fully developed in England, has made much progress on the continent. The hoards which in former times existed in the till of every great merchant or banker in France, Holland, Germany, &c., &c., have disappeared. The capital of these countries is more fully employed than formerly, and we no longer receive from abroad those ample supplies of capital which used to flow into England whenever the London exchanges were favourable and the rate of interest in England high.

Foreigners have followed our example and employ their capital far more closely than formerly.

It must not, however, be imagined because at any given time, the national capital is fully employed, that we are therefore unable to furnish means for any new enterprise, such as loans to our own or other Governments, the construction of factories, ships, railroads at home and abroad, &c., &c.

The annual augmentation of wealth in England is enormous. According to the calculations of Mr Newmarch, our savings are not less than 130 millions per annum. Up to that amount then, we are prepared during each year, without withdrawing capital from existing undertakings, to take up new enterprises, among which our capitalists naturally select the most promising.

Should our Government then want to raise a loan of 50 millions, and offer such terms as capitalists would deem more attractive than the enterprises into which they would otherwise enter, such a sum could readily be furnished, and that without any great disturbance of the money market, provided the instalments were spread over a reasonably long period.

THE QUARTERLY TIDE OF CASH TRANSACTIONS.

TO THE EDITOR OF THE ECONOMIST.

SIR,—In your article of last Saturday, headed "Why Seven "per Cent.?" you explain the disturbing influence of the quarterly *tide* in the cash transactions of the country, remarking that it is often hard to say why at one time or another the quarterly craving for cash is greater or less. You add that the only rule you can lay down is, that it is greater in times of increasing manufacturing employment, and less in times of diminishing manufacturing employment.

Admitting the full force of your remarks, I wish to draw attention to another *tide* occurring with equal regularity and with marked potency of effect; and which is very generally, almost universally overlooked. Why was the pressure in *October*, 1847, in *October*, 1857, in *October* last year, in *October* this year, and more or less in October every year? It is because there is an *annual tide* in the cash transactions of this country, and I believe of all countries. The currency generally, including bank notes of all our banks, gold coin and silver coin, expands from July to the end of October or beginning of November; it contracts from the middle of November to the end of March; and is on the whole stationary (the tendency being towards expansion) in April, May, and June. Such is the annual tide, masked to some extent by the action of the quarterly tides, and as regards gold by the foreign exchanges, but still equally sure and regular in its recurrence. Thus it is that the extreme ebb of the annual tide, occurring simultaneously with that of one of the quarterly tides, makes October the pressure month of the year.

What is the cause of this annual tide? You have pointed out a *manufacturing* cause at present in operation, which is fitful and cannot be surely forecast. The true cause of the annual tide I believe to be mainly *agricultural*, and can be forecast as surely as the return of the seasons. We always hear of sovereigns flowing out of the Bank from July to October for harvest purposes. Then about October there are always large remittances of gold to Ireland to support the expanding issues of the banks, the notes being required to pay for the produce of the season, and the stock changing hands at the fairs. The same takes place in Scotland in May and November, the dates of the Scotch terms, when rents and interest on mortgages are paid and produce realised.

About the middle of November the tide turns; the Bank of England notes in circulation, which have been performing the same office in England as those of Scotland and Ireland in these countries, return to the Bank with such rapidity that the circulation often reaches almost its minimum point before Christmas. So it is with all country notes, and with sovereigns, which return gradually and steadily through the winter. In spring, a tendency to expansion is to be traced coincident with seed-time and the resumption of active farming operations,

The same causes would produce similar effects in other countries, and we find, for example, the Bank of France affected in the same way as the Bank of England in the fall of the year, bullion generally flowing out of both. I believe that observations in the direction I have indicated would be found to confirm the law of annual tides, arising from agricultural as distinguished from manufacturing causes; and to prove that they are a periodical source of disturbance in the money markets of the world, of greater force and importance than has hitherto been acknowledged.—I am, Sir, your obedient servant,

G. F.

19th October, 1865.

Foreign Correspondence

(FROM OUR OWN CORRESPONDENT.)

PARIS, Friday.

The *Moniteur* has published the following return of the Bank of France, made up to the 19th inst. The return for the previous week is added:—

DEBTOR

	Oct. 19, 1865. f	c		Oct. 12, 1865. f	c
Capital of the bank	182,500,000	0	.....	182,500,000	0
Profits, in addition to capital	7,044,776	2	.....	7,044,776	2

	1,454,907,987	63	.....	1,486,050,354	98

The return of the Bank of France, published to-day, compared with that of last week, shows a decline of 6,648,000f in the coin and bullion, of 13,618,000f in the discounts, of 17,834,000f in the circulation of notes, and of 12,600,000f in the deposits. In presence of such figures as these, there is manifestly no necessity for a modification in the rate of discount, and none has been made. Nor is any augmentation to be anticipated, unless the Bank of England should be again under the necessity of raising its rate.

What, during the past week, has principally interested the Bourse are the fluctuations in Consols at London. They were taken as a guide to the monetary situation, indicating whether there was likely to be an advance or fall in the discount. To-day the death of Lord Palmerston has created much painful interest, and given rise to speculations as to the influence it is likely to have on the foreign policy of England, but it has produced no effect on prices. Subjoined are the quotations:—

The *Journal des Debats* publishes, on the recent elevation of the rate of discount by the Bank of England, an article which has excited considerable sensation, because though unsigned, it evidently emanates from one of the greatest authorities in economic science in all Europe. After mentioning the augmentation in the rate adopted by the Bank of England, and followed "rightly or wrongly" by the Bank of France, the article declares to be "bad" the law of 1844 relative to the former establishment, which was drawn up by Sir Robert Peel at the moment, it says, he was in favour of restrictive ideas, and frightened by the excesses of the American banks. Under this law, it continues, the Bank must have gold and silver for every note it issues above the amount of 14,500,000*l*. "Even if the commerce of London were reduced to the sorest straits for the want of an instrument of exchange, and were to throw itself in despair at its feet, the Bank could not, without violating the law, make it an advance of a supplement of its notes, even on deposit of the best securities, of Exchequer bills themselves." This arrangement, the writer of the article affirms to be "vicious and false," "contrary to the soundest ideas of credit," and preventive "of that precious auxiliary in getting through difficulties." He maintains that no law ever succeeded less than the Bank Act has done, since twice in twenty years it has had to be suspended under pain of producing frightful calamities, and that when not supended, "it has strangely embarrassed business," and has, instead of rendering crises rare and less intense, as was promised, made them more frequent and more rigorous." "The principal vice of the law," he continues, "is to disregard absolutely the nature of credit. The latter is a spring of great elasticity which, in moments of difficulty, is worth nothing except by that very elasticity; but the law of 1844 has made it rigid and incapable of extension. In crises, commerce has need of unaccustomed succour, and employed with discernment credit affords the means of giving it, and without serious peril; but the law of 1844 is so contrived that the Bank of England can only afford it slight assistance at first, and none at all in the supreme moment. At that moment a few more notes are required; but the law of 1844 presents an absolute obstacle to the issue of them, the quantity of notes which the Bank can send out being mathematically fixed." The author of the article goes on to say that the founders of Economic Science reduced gold and silver to their proper place, by dispelling the notion that they were the principal if not the only wealth; but the Bank Act worships them anew, "by rendering imperative, even in times of crisis, an enormous proportion of the precious metals in the vaults of the Bank of England," and by "forcing it to consider as a grave event, of which the entire commerce of the nation must bear the burden, the exportation of 400,000*l* or 800,000*l* in gold, in a country where the general exportation amounts to 200,000,000*l*." The author of the article fully admits that most undoubtedly the Bank of England needs a certain quantity of the precious metals, and a larger one now than formerly on account of the extension of trade. But he remarks that the law of 1844 contains no stipulations for providing one, and he suggests (and in so doing he repeats an "idea" of M. Michel Chevalier and M. Isaac Pereire relative to the Bank of France) that the Bank shall employ its capital, or at least half of it, in that purpose. In order that it may do so, he advises that the Government shall repay what it owes it. "The power of disposing of the capital," he declares, "is henceforth one of the essential conditions of the good working of great banks of issue,—those that is which circulate masses of bank notes." And he affirms that if the Bank of England does not get that power, combined with greater liberty in the issue of notes, it will "continue to be in Great Britain an instrument of commercial instability and at times of ruin, and will exercise a disturbing influence in the great European community." Another means, however, might be employed, he says, for freeing great banks of issue from the grave embarrassments to which they are so much exposed now-a-days, and that is the "establishment of regular relations between the principal banks of the different States," and particularly between France and England, the two greatest commercial countries in the world. In support of this idea, which will be a novelty to many readers, but which does not appear to be impracticable, the author of the article says:—"Already by accident the Bank of England and the Bank of France have rendered each other support, and have derived great advantage from so doing. Why should they not contract the habit of doing so? In 1847 an incident occurred which shows what services a great bank can receive abroad, when an impetuous current takes from it unusual quantities of the precious metals. In that year a large export of 5f pieces took place to Russia to pay for wheat. The Emperor of Russia bought from the Bank *rentes* to the amount of about 80,000,000f; and that relieved the Bank of France from the difficulty in which it was placed. What the Emperor Nicholas did then, a powerful foreign bank could do as well now. It would not even need to buy *rente* or other securities; it need only consent to make an advance for a determined period. In matters of credit and of banks, the mutual dependence of the civilised peoples one on the other makes itself felt by grave inconveniences. The security and prosperity of French commerce and manufactures are placed in question by the acts of the Bank of England. Ought not efforts to be employed for making that dependence advantageous, instead of, as it now is, injurious? Is it not in the nature of things that there should be drawn from it infinitely more good than evil?" Such are the principal points of the remarkable article of the *Journal des Debats*. Doubtless it will obtain as much attention in England as it is attracting here.

The Commission charged with the inquiry into banks, currency, the laws regulating the rate of interest, &c., has, after a long suspension, resumed its sittings this day, under the direction of M. Rouher, Minister of State. In fact, the suspension was so long that the general belief was that the inquiry was to be carried no further. As stated when the Commission assembled, it is much to be desired that its proceedings should be reported day by day in the newspapers. To keep them secret, in French fashion, until they are completed, and then to publish the record of them in a huge volume, is to deprive them of all practical utility. Everybody would read reports in newspapers, and the journals would discuss them, and would thereby enlighten the public, but few persons will have the courage to study a vast blue book.

The bills falling due in Paris on the 15th were not so well paid as usual. This was owing partly, of course, to the difficulties of the monetary situation, but partly, also, to the 15th having been the day for the payment of a quarter's rent.

The Credit Foncier, in the exercise of its ordinary operations has undertaken to lend communes about 300,000,000f; and it will do so by an issue of bonds in the usual way. It is probable that one-half of the bonds will be offered very shortly, in fact, as soon as a favourable moment shall arise. The issue of the second half will depend on circumstances. The bonds will be of 450f, will bear 20f interest, and will have the chances of gaining certain prizes in a lottery. Shareholders of the Credit Foncier will have the privilege of subscribing in preference to the public.

The Company des Forges et Chantiers de la Mediterranee announces the payment, from the 1st November next, of 30f per share as a provisional dividend for 1865.

The Company et Ateliers de l'Ocean is to pay, from the 2nd November, 25f per share on account of dividend for 1865.

The directors of the South of Austria, Lombardy, and Central Italy Railways have fixed at 20f the first coupon of the present year. It is to be paid from 1st November next. In some of the libellous attacks recently made on this company, it was represented that the payment of a coupon of more than 15f would not be possible.

The Company of the Docks et Entrepots de Marseilles advertises the payment, from November 2, of 12f 50c per share on account of dividend for 1865.

M. Lecomte, banker, of Dinan, has suspended payment. His failure has been occasioned by that of M. Payoux, which took place recently in the same town.

A joint stock bank is about to be established at Lille, on the plan of the Credit Lyonnais of Lyons and the Bank des Depots of Paris. The Credit Industriel Bank of Paris patronises the new undertaking.

An official return just issued shows that of 529,677,000f direct taxes due for 1865, 398,607,000f were paid in the course of the nine months ending in September last. The sum paid exceeded by 45,489,000f that which could legally be exacted, the taxes being payable in monthly instalments, and a month's credit being allowed. The expenses of legal proceedings for enforcing payment were at the rate of 98c the 1,000f. At the end of September last year, the amount paid in advance was 44,492,000f, and the expenses of proceedings were the same. The indirect taxes in the nine months of this year yielded 871,984,000f, which sum was 4,656,000f less than in the corresponding period of 1865, and 40,511,000f less than in that of 1864. The falling off is owing to the alterations in the fixing and collecting of the sugar duties: the other branches of indirect revenue, on the whole, present an increase.

A singular incident in railway history has occurred. Messrs Gouin and Co., the engine builders of Paris, lately obtained a judgment from the Tribunal of Commerce, condemning the North of Spain Railway to pay them without delay the sum of 100,000f. On application at the offices of the Company in the Place Vendome, a positive refusal to pay was given. Thereupon they proceeded to a seizure, but it had to be set aside in consequence of

Digitized by Google

the Credit Mobilier, in whose house the offices are, declaring that there was nothing therein belonging to the North of Spain Company. Messrs Gouin accordingly, a few days later, caused one of the trains of the company to be seized, as it entered French territory. The train, consisting of a locomotive, a tender, and six carriages was placed in a siding under the care of a bailiff. Shortly after the company paid the 100,000f, and the train was released.

The Franco-Serbe Company, which was formed some time ago by means of pompous announcements for the purpose of undertaking mining and other enterprises in Servia, has completely failed to obtain success, has swallowed up all its funds, and incurred large liabilities. In consequence, the shareholders, in a meeting just held, resolved to transfer its privileges and concessions to an English company, on the condition of the latter taking on itself the debentures issued, and the payment of interest thereon, and of paying 10 per cent. out of the profits to the first shareholders, after payment of 10 per cent. to the new company. The name of the last is to be the Anglo-Serbe Company.

The shareholders of the Societe Houillere et Metallurgique des Asturies, in a recent meeting charged a committee to examine into the affairs of the company, which it appears are far from satisfactory.

The following is a detail of the value of the principal imports into France, taken out of bond for consumption, in the first eight months of the present and the two preceding years:—

	First eight months of 1865. francs.	First eight months of 1864. francs.	First eight months of 1863. francs.
Wool	168645000	143585000	148471000
Silk	189299000	178469000	186450000
Sugar	100551000	89498000	93079000
Cotton	260029000	248161000	158793000
Coal	80471000	72662000	62906000
Oxen	50149000	46795000	46451000
Hides and skins	72533000	70650000	79036000
Oleaginous seeds	36723000	29455000	28506000
Coffee	56792000	54037000	52343000
Timber	65439000	66373000	65611000
Staves	15669000	10597000	13614000
Seeds for sowing	25213000	11452000	10837000
Olive oil	25193000	20607000	16870000
Jute	6560000	4975000	2847000
Hemp	10399000	5081000	2625000
Flax	50608000	34583000	31875000
Indigo	19606000	16299000	16300000
Flax, hemp, and jute yarn	9075000	3261000	4945000
Cotton yarn	6670000	3288000	4766000
Woollen yarn	940?000	7182000	7303000
Goats' hair yarn	3542000	3045000	2386000
Flax and hemp tissues	10393000	10519000	8306000
Silk tissues	5300000	4315000	2662000
Hair tissues	3203000	3954000	4337000
Woollen tissues	21562000	19693000	21917000
Cotton tissues	6504000	7015000	4677000
Machinery	11051000	6746000	6718000
Cast iron	4526000	1903000	12043000
Iron	1562000	593000	3158000
Copper	25492000	29556000	24913000
Lead	19251000	6324000	6311000

The principal exports of French productions were as follow:—

	First eight months of 1865. francs.	First eight months of 1864. francs.	First eight months of 1863. francs.
Silk tissues	251486000	300000000	251257000
Woollen tissues	221376000	232668000	177771000
Cotton tissues	69971000	62159000	54896000
Flax and hemp tissues	17157000	15008000	12197000
Woollen yarn	14471000	12327000	9584000
Cotton yarn	1699000	1350000	1166000
Flax and hemp yarn	7403000	16627000	10044000
Prepared skins	40661000	41670000	31889000
Articles in skin or leather	52355000	58436000	50802000
Machinery	5313000	5834000	5069000
Cutlery	1327000	1497000	1596000
Arms	4712000	4389000	7956000
Tools & articles in metal	23858000	28831000	26257000
Turnery, mercery, and buttons	105278000	109547000	84655000
Ready-made clothes and linen	72173000	68041000	49509000
Wines	178285000	163136000	152513000
Brandies	37172000	56144000	44562000
Refined sugar	64937000	46086000	57069000
Native beetroot sugar	2021000	2864000	6328000
Millinery and artificial flowers	13893000	11988000	6386000
Furniture and articles in wood	12715000	12636000	7825000
Jewelery and silversmiths' work	11016000	11069000	9740000
Paper and pasteboard	11037000	12462000	11450000
Timber	22927000	18188000	20581000
Native rosin	23651000	24809000	21439000
Butter	32436000	25007000	20131000
Wool	21804000	40394000	23480000
Silk	75925000	68234000	56701000
Oxen	17544000	12191000	11023000
Eggs	24888000	19850000	16878000

It is not possible from want of space to record the *quantities* of the different sorts of goods imported and exported; but as regards cotton it may be mentioned that in the first eight months of this year the quantity taken out of bond for consumption was 51,769 tons, of which, however, 9,824 tons were sent to different countries, 3,808 going to Spain, 3,151 to Switzerland, 522 to England. In the corresponding period of last year the imports were 49,336 tons, of which 9,118 were exported, and in that of 1863 the imports were 34,097 tons to 7,032 of exports.

The import duties levied by the customs amounted to 70,838,000f in the first eight months of 1865; but to this has to be added a portion of the sugar duties, for which credit is allowed. In the first eight months of 1864 the customs yielded 95,144,000f, and in the same period of 1863 106,384,000f. In the 70,838,000f received this year, 13,007,000f were from foreign sugar, 16 477.000f from French colonial ditto, 14,180,000f for coffee, 4,986,000f for coal, and 2,644,000f for woollen tissues. The produce of all other articles was inferior to this latter sum.

Letters from St Denis, in the Isle of Reunion, of the 19th Sept., announce that, contrary to all expectation, the Government of Madagascar had not only recognised the right of the French Company of Madagascar to an indemnity of 900,000f (36,000*l*), but have actually paid the money, for being dispossessed of the concessions of lands, mines, forests, and various privileges of great importance which it had obtained from the preceding Government. It is owing, it is said, to the intimidation of the English Consul and missionaries that the indemnity was paid. The company in question, it may be remarked, was formed under the auspices and on the inspiration of the Emperor of the French; and senators, railway directors, and other influential personages were at the head of it. His Majesty's idea was that the company might do on a small scale in Madagascar, and on the African continent, what the English East India Company did in Hindostan.

The following is an account of the markets:—

FLOUR.—Firmness prevails at *Paris*. Yesterday, the quotation was 48f to 51f 50c the sack of 157 kilogs. Six marks, current month, were 51f 25c; November and December, same price; four months of January, 52f 50c to 52f 75c. Type Paris, the 101 kilogs, disposable, 31f 50c.

WHEAT.—At *Paris*, yesterday, holders had to make a concession on certain lots. The prices were: choice white, new, 27f 50c to 28f the sack of 120 kilogs; choice red, 27f to 27f 25c; first qualities, 26f 25c to 26f 50c; good, 25f 50c to 25f 75c; and inferior, 22f to 24f.

COTTON.—The market at *Havre*, in the week ending Friday, was again agitated, though not to the same extent as in the week preceding. The sales were 13,749 bales, and the arrivals 11,969. The stock was estimated at 30,165 bales. The closing quotations were 10f higher for United States, Egypt, Bengal and China, 15f higher for Peru, Hayti, Coconada and Madras, 20f for Brazil, Terra Frma, Porto Rico, Martinique and Guadaloupe, 10f to 15f Surat, 5f Kurrachee, 10f to 15f Tinnevelly. Low New Orleans was consequently 300f the 50 kilogs; good ordinary qualities in Broach and Tinnevelly 220f, in Madras 225f, China 215f, Jumel 290f. This week great activity has prevailed and prices have risen. For qualities, inferior to good ordinary, the quotation was, Madras 220f and 225f, and Tinnevelly 205f. For Oomrawuttee of different qualities it varied from 205f to 235f. Ingelghaut was 250f, Coconada 192f 50c and 200f, Rangoon 190f, Bengal 172f 50c, and for delivery 160f.

COFFEE.—The demand was rather active at *Havre*, in the week ending Friday, and prices rose. 571 sacks Port-au-Prince, 81f 50c to 83f for the 50 kilogs in bond; 250 Jacmel, 81f 25c; 2,100 Cape, 83f to 84f; 950 Gonaives, 85f to 87f; 700 ditto, for delivery, 85f 50c to 86f; 1,950 Rio not washed, disposable, 70f to 82f; 1,965 for delivery, 78f to 86; 178 Rio washed, for delivery, 105f; 550 Santos, 65f to 74f. The arrivals were about 25,000 sacks. This week, Gonaives, 87f and 85f 50c; Hayti Cape, 84f; Rio for delivery, 63f to 80f; Santome, 78f; Santos, 70f to 95f; Mocha and Malabar, for delivery, at prices kept secret; Saint Marc, for delivery, 89f; Port-au-Prince, 82f. At *Nantes*, last week, some Gaudaloupe habitant, 140f, and some bonifieur at prices not stated. Nothing done this week. At *Bordeaux*, last week, 340 sacks La Guayra, grage and non-grage, at established prices: 100 Rio, not washed, at preceding quotations; 350 sacks Rio washed, 98f; 1,100 sacks Mysore, 118f; 109 at 117f; 454 Guatemala at prices not stated. This week, La Guayra at prices not stated; Mysore, 118f; Winard, 124f. At *Marseilles*, last week, 600 sacks Maracabio for delivery, 82f; 1,500 Coro, 85f; 550 La Guayra, 95f for grages, and 90f non-grages; 600 Brazil, 75f. This week, Rio, 77f.

SUGAR.—Calm prevailed at *Havre* in the week ending Friday. 1,770 casks Havana, 31f 50c, No. 12, in bond. The arrivals were insignificant. This week, Havana, 31f 50c and 32f, No. 11, in bond; French West India, 46f to 49f, bonne quatrieme. At *Nantes*, last week, upwards of 13,000 sacks Reunion, at 51f 50c, bonne quatrieme; 1,278 at 51f 25c to 51f 50c, ditto; 192 at 51f 25c, ditto; some French West India, 47f 50c; ditto and usine, 56f. This week, Guadaloupe, 47f 50c, bonne quatrieme. At *Bordeaux*, last week, about 290 casks French West India, in small lots, 49f 50c, bonne quatrieme; 1,400 bales Reunion, 52f, ditto, and 1,600, 51f 50c, ditto, both lots to be taken at Nantes. This week, French West India at different prices, to be taken at Nantes. At *Marseilles*, last week, 870 casks French West India, 29f 50c, bonne quatrieme of Havre; 600 casks Bahia, in the port, 28f 75c, No. 10. No sales this week.

TALLOW.—At *Havre*, in the week ending Friday, the sales were 205 pipes La Plata, disposable, 57f 75c to 59f the 50 kilogs; 716 for delivery, 58f to 59f; 25 casks New York a la marque, 60f. The arrivals were 2,196 casks. This week, La Plata, 58f 50c, and for delivery 59f; New York a la marque, 60f. At *Paris*, yesterday, the 100 kilogs. octroi duty included, were 127f 20c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, disposable, was 49f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 56f the hectolitre; 3-6 beetroot, first quality, 90 deg., the same price.

COMMERCIAL AND MISCELLANEOUS NEWS.

The subjoined report of the Calcutta money market is dated the 7th ult. :—The imports of specie during August were over 15½ lakhs of gold and 57½ of silver, while exports of both were barely over 16½ lakhs: more than one-half of the supply of silver has come from China, and nearly 7 lakhs of gold have come from Australia. Bank rates continue without alteration. From the indigo districts there is the inquiry for money usual at this season, needed to bring the new crop to market, and advances on indigo assignments are made at 9 to 10 per cent., but loans on Government securities do not fetch over 4 per cent.; money generally is in more demand than for some time past. Government securities have been remarkably steady throughout the fortnight, and prices have stood at rs 10.8 to rs 10.12 for 5½ per cents., without any fluctuation. Share Market—Bank of Bengal shares have changed hands at prices ranging from rs 6,600 to rs 6,950, and are in demand at the latter figure; in Agra and Masterman's Bank stock a good business has been done. Exchange—On 1st instant, the rate was 2.0 3/16 for 1st class 6 months' sight paper on London; but it has risen since, and though bank bills have been selling at 2.0 3/16 and 2-0 1/4, there are very few buyers to-day at these rates. The rate on Hong Kong has fallen from 220 to 218¼ per $100, with no inquiry for bills. The following are the statements of the Bank of Bengal for the weeks ending Aug. 22 and Aug. 29 :—

Liabilities.	Aug. 22.		Aug. 29.
Proprietors' capital, paid up	£2,200,000	...	£2,200,000
Reserve fund	175,655	...	173,655
General treasury balance at head office	706,633	...	908,872
Do. at branches	708,220	...	805,737
Other deposits at head office and branches	2.933 808	...	2,973,155
Bank post bills, &c.	29,816	...	24,974
Bank notes outstanding	23,986	...	23,777
Sundries	64,984	...	59,307
	6,840,602	...	7,169,477
Assets.	**Aug. 22.**		**Aug. 29.**
Government securities, investment No. 1	£447,329	...	£501,825
Loans on Government securities at head office and branches	991,045	...	1,001,025
Accounts of credit on ditto	78,702	...	84,589
Mercantile bills discounted at ditto	481,761	...	479,215
Dead stock ditto	40,114	...	40,175
Stamps ditto	1,098	...	1,179
Balances with other banks	30,315	...	26,794
Sundries	13,053	...	14,947
Treasury reserve in coin at head office & branches.	6,632	...	208,872
Cash and currency notes at head office	3,182,222	...	3,173,444

	6,263,547	.....	6,565,009

Messrs Dymes and Co., writing from Madras on the 13th ult., thus allude to the state of monetary affairs:—The demand for loans on Government securities has been so great, that the Banks' rates have been raised two per cent. all round. They now stand at seven per cent. for loans, and nine per cent. for discount on private bills having three month to run. Madras Banks shares have fluctuated during the fortnight, and sales have taken place as low as 72 premium. The market closes steady at 74 premium with but little demand. Government paper has been pretty firm both in Bombay and Calcutta, and we are able to quote 5½ per cents. at 10 to 10¼ premium, 5 per cents. at 4 premium, and 4 per cents. 9 to 9¼ discount. In the middle of the fortnight some purchases of 5 per cents. were made, on Calcutta account, at 4 3/16 premium, but this rate has not been maintained and prices close at our quotation. The course of exchange has been decidedly upwards in its tendency, first class agency bills having been sold at 2s 0¾d for 6 months' sight, against previous sales at 2s 0½d to 2s 0 5/16d. Documents we quote at 2s 0⅜d to 2s 1d at 6 months' sight. There has been a large amount of the latter offering during the fortnight, as shipments, chiefly of cotton, have been very brisk. Sovereigns, English rs 10-7-0 each, Australian rs 10-1-6 each, much wanted.

Subjoined is a portion of the circular, relating to the bullion movements at Hong Kong, for the fortnight ending Aug. 28, published by Messrs Sharp and Co. :—Gold—The receipts amount to $350,000 worth, and the exports, including the shipments per Emeu on the 12th inst., and excluding those to leave to-morrow, to $640,000 value. Cheap freights and low rates for rupees, still cause bullion to be the favourite remittance. Silver—We have received $340,000 worth, the bulk in bars from San Francisco and Europe, the remainder mostly indemnity Sycee from Canton. The shipments outward are $110,000. Dollar Currency—The large quantities of dollars still leaving this place for coinage into rupees is worthy of remark. The imports are $510,000, against an export of $1,460,000. The demand for clean coin for remittance to the North is very slack. Discount and Mortgages—A good demand ha existed for short periods, and for longer time lenders are now very firm at our quotations. Exchange has been very steady. Shares—Transactions lately have been less speculative, purchasers being mostly limited to real investment. Closing Quotations :—On London, 6 months' sight, 4s 5⅜d; on Calcutta, 3 days' sight, 217 rs; on Bombay, 3 days' sight, 217½ rs; on Shanghai, 3 days' sight, bank, 72¾ tls; ditto, 30 days' sight, private, 73¾ tls; on Amoy, 15 days' sight, private, 1½ per cent. dis.; on California, 60 days' sight, 18 per cent. dis.; bar silver, 17 dwts. *B.*, 9¾ per cent. prom.; Sycee, Canton indemnity, 8⅛ per cent. prem.; Mexicans, 1 per cent. prem.; gold leaf, $22.80 per tael; gold bar, Pekin, $22.40 per tael; sovereigns, English, $4.60 each; ditto Sydney, $4.50 each; discount, 8 per cent.; Hong Kong and Shanghai Banking Companys shares, 7 per cent. prem.; Hong Kong and Whampoa Dock, 40 per cent prem.; Union Dock shares, 5 per cent. prem.; Gas Company, 30 per cent. prem.

During the week ending Oct. 18, the imports of the precious metals were :—Gold, 617,240*l*; silver, 573,493*l*. The exports were :—Gold, 127,994*l*; silver, 107,931*l*.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 18th day of October, 1865.

ISSUE DEPARTMENT.

	£		£
Notes issued	26,654,840	Government Debt	11,015,100
		Other Securities	3,634,900
		Gold Coin and Bullion	12 004,840
		Silver Bullion	...
	26,654,840		26 654.840

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities (including Dead Weight Annuity)	9,326,477
Rest	3 173,598	Other Securities	21 447 283
Public Deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and Dividend Accounts	3,589,353	Notes	4,3 6,600
Other Deposits	14,013 614	Gold and Silver Coin	785,118
Seven Day and other Bills	565,913		
	35,895.478		35,895 478

THE OLD FORM

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	22 884.153	Securities	30 870,760
Public Deposits	3,589,353	Coin and Bullion	12,7?9 958
Private Deposits	14,013 614		
	40,487,120		43,660,718

Dated the 19th October 1865. W. MILLER, Chief Cashier.

The balance of Assets above Liabilities being 3,173,598*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

AN INCREASE of Circulation of	£22,384
A DECREASE of Public Deposits of	3,639,384
AN INCREASE of Other Deposits of	507,116
A DECREASE of Government Securities of	484,765
A DECREASE of Other Securities of	2,629 193
AN INCREASE of Bullion of	53,612
AN INCREASE of Rest of	39,5?8
AN INCREASE of Reserve of	47,667

The Bank returns continue to show important changes. Notwithstanding the very large repayments under the head of the other securities, the reserve has only been maintained by further loans of nearly half-a-million on Government stock. The comparatively small augmentation in the bullion compared with the amount of foreign gold, 555,000*l* known to have been sent in during the week, indicates that coin is still being absorbed by the public, on this occasion chiefly through the payment of the dividends.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1855 :—

At corresponding dates with the present week	1855.	1862.	1863.	1864.	1865.
Circulation, including bank post bills	£ 21,351,884	£ 22,271,497	£ 22,824,466	£ 21,828,920	£ 22,884.153
Public deposits	3 825,021	5,944,238	4,437,835	3,273,589	3,589,353
Other deposits	11,764,080	15,197,661	15,371,262	14,098,454	14,013,614
Government securities	10,635,359	11,863,992	10,945.363	9,570,212	9 326,477
Other securities	18,789 512	18,605 938	19,986,456	19,780,748	21,447,285

Price of Consols	88¼	93⅝	93	88⅞	89¼
Average price of wheat	76s 10d	48s 11d	40s 4d	38s 1d	41s 11d
Exchange on Paris (short	25 30 37½	25 15 22½	25 22½ 27½	25 25 40	25 25 35
— Amsterdam ditto	11 17⅝ 18¼	11 14¼ 15	11 17½ 17⅝	11 18 18½	11 19½ 12 0½
— Hamburg (3 months)	13 10½ 10¼	13 7 7½	13 8¼ 9	13 10½ 10½	13 10¼ 10½

In the corresponding week of 1855, the returns of the Louisiana sugar crop had shown a falling off on that of the previous year. The Russians had been defeated by the Turks

Digitized by Google

in an attack on Kars, with a loss of about 4,000 men. Advices from India were of a more favourable character. Trade was quiet in Australia. The Banks of England and France had raised their rate of discount to 6 per cent.

In 1862, the constitutional struggle in Prussia continued, and the Chambers had just been closed, the Lower House having refused to sanction the budget proposed by the Government. In Constantinople there were reports of the approaching secularisation of the mosque property. Some disturbances had broken out in Greece.

In 1863, the deaths had taken place of Lord Lyndhurst and M. Billault. The Turkish budget had appeared, showing a nominal surplus. A bill for a new loan of 96,000,000 florins had been introduced by the Austrian Minister of Finance in the Reichsrath. In the London money market there was a good demand for discount at 4 per cent.

In 1864, a commercial crisis had taken place in Brazil. The banking firm of M. Sonto had failed for a large amount, and other failures were expected. The Government had decreed the suspension of cash payments for notes by the Bank of Brazil. An interview had taken place between the Emperor of Russia and the King of Prussia at Darmstadt. The death of the Duke of Newcastle had taken place at Clumber Park. In America, an attack made by Grant on the Confederate lines at Petersburg had been repulsed, with a loss of 2,000 prisoners. The Federal loss, North and South of the James River, had been estimated at 4,000 men. The Federals had also been repulsed in an attack on Saltville, Western Virginia. The National Bank of Italy had raised its rate of discount to 9 per cent.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1855, a deficiency of 7,025,432*l*; in 1862, a deficiency of 3,408,277*l*; in 1863, a deficiency of 4,715,194*l*; and in 1864, a deficiency of 5,682,294*l*. In 1865, the deficiency is 7,433,669*l*.

Discount and Money Market.—The demand for money this week has perceptibly declined, and there is an entire absence of the pressure that accompanied the recent upward movement in the Bank rate. Only within the last day or two, however, has any business taken place below 7 per cent. On the other hand, the existing activity in trade is considered in many quarters to preclude a return to lower rates for some weeks to come. High class six months' bills are readily discounted, but are scarce in the market. Annexed are the terms for paper, with various dates to run:—

30 to 60 days	6⅞ per cent.
3 months	7 per cent.
4 months—Bank bills	7 per cent
4 months—Trade ditto	7½ per cent.
6 months—Bank bills	6¾ per cent.
6 months—Trade ditto	8 per cent.

On the Stock Exchange, the rate for loans in the morning was 5½ per cent., but declined in the afternoon to 4½.

Annexed are the rates of interest allowed on deposits:—

Joint Stock Banks	*5 per cent.
Discount houses at call	5 per cent.
Do. with seven days' notice	5½ per cent.
Do. fourteen days	6 per cent.

* At the London and Westminster 4 per cent. only on sums below 500*l*.

About 106,000*l* in gold was taken to the Bank yesterday, and 117,000*l* to-day.

The biddings for 23.00,000 rupees (230,000*l*) in bills on India took place on Wednesday at the Bank of England. The proportions allotted were—To Calcutta, 9,82,000 rupees; to Madras, 4,18,000 rupees; and to Bombay, 9,00,000 rupees. The minimum price was as before, viz., 1s 11½d on Calcutta and Madras, and 1s 11¾d on Bombay; tenders on Calcutta and Madras at 1s 11⅞d will receive about 47 per cent., and on Bombay at 2s about 19 per cent., above these prices in full.

At the adjourned meeting of the Confederate bondholders, a report from the committee was presented, which states that the contractors have no money in hand for the payment of interest. The amount of bonds issued was 3,000,000*l*, of which 376,600*l* have been exchanged for cotton certificates, and 204,600*l* redeemed by the drawings, making a total of 581,200*l*, so that the amount of bonds still in circulation is 2,418,800*l*. The opinion of Mr Fleming, Q.C., has been taken, and the committee express themselves as entertaining no doubt that, "sooner or later, either the United States or the States which lately formed the Confederacy will recognise and pay the loan."

The Stock Exchange Committee, on Monday, appointed the following settling days:—Merchant Banking Company o London, 5,000 new shares (to be marked), Thursday, 19th October; Imperial Brazilian Five per Cent. loan (to be marked as scrip and paid-up scrip), and Erie Railway Company's scrip of 800,000*l* sterling 6 per cent. bonds (to be marked), Friday, 20th October.

The Bank of France return for the week shows the following changes:—

	£
Increase.	
Treasury balance	10,000
Decrease.	
Bullion	266,000
Bills discounted	550,000
Circulation	710,000
Current accounts	496,000
Advances	16,000

The following are the rates of discount in the chief cities of the Continent, showing in several cases a decline, especially at Hamburg:—

	Bank Rate. Per cent.	Open Market Per cent.
Paris	5	4¾
Vienna	5	5
Berlin	7	6¾
Frankfort	5½	5½
Amsterdam	4	4
Turin	5	4½ 5
Brussels	5	5
Hamburg	...	5
Madrid	9	...
St Petersburg	6	6½ 7

English Funds.—Consols have been inanimate, but generally steady. The unexpected calamity of the death of Lord Palmerston at one time influenced prices unfavourably, but a recovery subsequently occurred. At the official close to-day, the quotation for the account was 89¼ to 89⅜, or the same as last Friday, but after regular hours an improvement occurred to 89⅜ to 89½. For money, the final price was 89⅜. Reduced and New Three per Cents. left off at 87⅜ to 87⅝; and India Five per Cents. at 104¾ to 105.

The decrease in the pressure for money has caused a rally in the June Exchequer bills to 8s to 4s discount. The March issue are also higher at 6s to 3s discount.

Foreign Stocks.—The transactions in foreign stocks have been on a limited scale, and prices have occasionally manifested less firmness. Buenos Ayres bonds, Greek, Russian Five per Cents. of 1822, and Spanish Three per Cents. have especially been heavy. Spanish Passive and Certificates have, on the other hand, improved. Turkish Consolides have receded to 48¼ to 48½, but the 1862 loan closes higher. The new Conversion loan, after falling to 42½ to 43, recovered to-day to 43 to 43½. Mexican was also firmer this afternoon, and left off at a fraction above the price of last Friday. Equador and Egyptian securities have been in rather better demand. United States Five-twenties have fallen to 64½ to 64¾ ex div., on the less favourable financial intelligence from New York. The Confederate loan is nominally quoted 6 to 7. The new Brazilian scrip left off at 3¼ to 3⅜ prem.

The closing price of French Three per Cent. rentes on the Paris Bourse this evening was 67f 85c, showing an improvement of an eighth compared with yesterday, but a fractional decline since last week.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day:—

CONSOLS.

RAILWAYS AND OTHER SHARES.—The railway market has been quiet, but prices have in several cases improved. Among the heavier stocks the chief rise has been in London and North-Western, Midland, and Lancashire and Yorkshire. Great Western, on the other hand, has declined. Great Eastern, North-Eastern descriptions, and North British are likewise flat, Metropolitan at one period experienced a fall, but subsequently rallied, especially this afternoon. To-day, in particular, the tendency generally has been good.

In the colonial department, Indian guaranteed and Canadian descriptions are quoted better. In the foreign market, a slight decline has taken place in Great Luxembourg, Ottoman, and South Austrian and Lombardo-Venetian, and an improvement in Bahia.

The principal feature in miscellaneous shares has been an active demand for Overend Gurney and Co. (Limited), in which a very large business has been done. At one period to-day the price was quoted as high as 9¼ to 9½ prem.; a relapse then occurred to 8¼ to 8⅜, but a recovery subsequently occurred to 8½ to 8¾.

The letters of allotment in Gale's Protected Gupowder Company (Limited) were sent out this evening, The closing price was 1¼ to 1¾ prem.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day:—

FOREIGN EXCHANGES.—The rates this week have been rather firmer, especially on France and Italy.

BULLION.—The following is the weekly circular of Messrs Pixley, Abell, and Langley on the transactions in bullion during the week, and in Indian rupee paper:—

Gold.—As was anticipated in our circular of the 12th instant, some large amounts of gold have been sent into the Bank, making a total of 558,000*l* since that date. There is not the slightest demand at present for gold for the Continent, and the arrivals mentioned below are likely to go to the Bank as soon as they are refined; the return of sovereigns from Ireland may also be expected. The Atrato has brought 110,000*l* from the West Indies; the Lincolnshire has brought 282,000*l* from Melbourne; the Australasian has brought 25,400*l* from New York; the Etna has brought 30,000*l* from New York; the John Duthie has brought 111,560*l* from Sydney. The following vessels are now on the way from Australalia:—The William Duthie sailed 18th July, with 130,500*l*; the Holmesdale sailed 12th August, with, 421,000*l*; the Maid of Judah sailed 17th August, with 192,500*l*. In addition to the above, the screw steamer London was about leaving and would probably bring a large amount of gold, and the Overland Mail from Calcutta was bringing 160,000*l* in sovereigns, which sum may be shortly expected. The Messageries steamer takes 30,000*l* to Alexandria to-day from Marseilles.

Silver.—In consequence of the rise in the rates of exchange from Bombay, some large transactions have taken place for the outgoing mails from the 20th inst. and 5th prox., and the 27th inst. from Southampton. Prices have, however, remained tolerably steady, owing to the firmness in the exchanges from the Continent, and we equote the rate as from 61 1-16d to 61 3-10d per oz standard. The Atrato has brought 62,000*l* from the West Indies, the greater part of which consisted of "Dore," and was sold at 61⅜d per oz standard.

Mexican Dollars.—Our market is nearly bare of this description of coin, and prices are therefore tolerably firm at our quotation below, but without any business of importance to report. The Syria takes 10,000*l* to China.

Exchange on India for drafts by the banks at 60 days' sight may be quoted 1s 11⅞d to 2s 0⅛d for Bombay and 1s 11⅜d for Calcutta and Madras. The Council drafts sold yesterday brought rather higher rates, viz., on Calcutta and Madras at 1s 11⅜d, 47 per cent.; Bombay at 2s, 19 per cent.

India Government loan notes remain at about last week's quotations, viz., 107⅝ to 108⅓ for 5½ per Cents., 100½ to 101½ for 5 per Cents., and 87½ to 88½ for 4 per Cents.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std, last price; ditto, refinable, 77s 10½d per oz std, last price; Spanish doubloons, 74s to 74s 6d per oz; South American doubloons, 73s to 73s 6d per oz; United States gold coin, 76s 2¾d per oz. Silver—Bar silver, 5s 1 1-16d to 5s 1 3-16d per oz std; ditto, containing 5 grs gold, 5s 1⅜d per oz std; Mexican dollars, 4s 11⅛d per oz. Quicksilver, 8*l* per bottle; discount, 3 per cent.

PUBLIC COMPANIES.—At a meeting of the Oriental Bank Corporation, an *ad interim* dividend of 1*l* 5s per share for the half-year ending the 30th of June last, being at the rate of 10 per cent. per annum, was declared. The chairman, Mr H. G. Gordon, mentioned that the reduction in the dividend was attributable to the great fall which occurred last year in all articles of Indian produce, to the commercial crisis that ensued, and to the heavy failures.

The following are the principal passages of the report of the Standard Bank of British South Africa, to be submitted at the fourth ordinary meeting on the 24th inst.:—Since the proprietors were prepared by circular of 25th August for the general character of the present half-yearly accounts, intelligence of further mercantile failures has been received, and the full amount then estimated by the directors has therefore been found necessary to cover losses to the 30th June. A further sum may be required in next account to meet losses on bills that had not matured within the half-year, a portion of which is contingent on the duration of the war in the Orange Free State. The directors have transfered 30,000*l* from reserve fund to help in providing for the half-year's losses, and in enabling the payment of a reduced dividend of 5 per cent. per annum. The directors take the opportunity of stating that the events from which the bank now suffers do not repress their hopes of future success; they rather rely on the rapid progress of the South African colonies in productive wealth as the surest foundation for a profitable banking business. Certain alterations, suggested by experience, are now being made with a view to concentrate the management, as well as to strengthen the more important stations with capital derived from the closing of others of less promising character.

A meeting of the shareholders of the Bank of Queensland took place on Wednesday, when a dividend of 15s per share—equal to 6 per cent. per annum—was declared.

At a meeting of the shareholders of the Chartered Bank of India, Australia, and China, an interim dividend for the half-year, at the rate of 5 per cent. per annum, free of income tax, was declared.

At a meeting of the proprietors of the Bank of British Columbia, the directors were authorised to issue, *pro rata*, amongst the present shareholders, 12,500 new shares of 20*l* each, at 2*l* prem.

The report of the Egyptian Commercial and Trading Company shows a net profit for the twelve months of 14,701*l*, after ample provision for all bad and doubtful debts, rebate of interest, and current expenses in London and Egypt. The above sum, added to the undivided balance brought forward from last year, makes a total of 18,664*l* now disposable. The directors will, therefore, after adding the sum of 1,470*l* to the reserve fund, as required by the articles of association, recommend a dividend of 2s 6d per share, free of income tax, leaving a balance of 2,968*l* to be carried forward to next account.

The directors of the Royal Mail Steam Packet Company have decided to recommend to the proprietors, at the meeting to be held on the 25th instant, a payment for the half-year ended the 30th June last of 4*l* per share out of the ordinary profits, and of 2*l* per share from the insurance fund, both free of income tax.

A committee of shareholders appointed to investigate the affairs of Smith, Knight, and Co. (Limited), published, on Monday, a most discouraging report. They allege that, while

Digitized by Google

the sum paid for the purchase of the business was 230,000*l*, —130,000*l* in cash and bills, and 100,000*l* in shares,—the concern was practically worse than valueless, involving the assumption of a large number of contracts not merely unremunerative, but also burdensome. It is also stated that no investigation was instituted as to the real value of the goodwill bought; that other improper payments, to the amount of 22,757*l*, have been made to Messrs Smith and Knight; and that 72,000*l* has been expended as "secret service" money. The committee further aver that the financial arrangements of the company are most disastrous, and likely to involve a loss to the shareholders of the whole of the subscribed as well as paid-up capital. There are several other points adverted to, but the above are the most salient. The directors have issued a reply, in which they meet most of the statements of the committee with a flat contradiction. They state that on one contract alone, handed over by Messrs Smith and Knight, the estimated profits would far exceed the whole of the consideration paid to them; that the value of the plant was in excess of that at which it was estimated on its transfer to the company; and that, of all the contracts taken from Messrs Smith and Knight, there is not one which, if carried out by the company, will not result in a profit, the only contract which has been actually completed showing a clear net profit of 15 per cent. The directors then proceed to explain the various payments said to have been improperly made to Messrs Smith and Knight, and they deny that any sums have been paid for "secret service money," though they admit that a sum of 72,000*l* has been applied in the shape of 2½ per cent. "commissions" on certain contracts; and, as proof that the money was well applied, they affirm that the objects in respect of which that sum was expended have resulted in a secured profit to the company of 177,000*l*, in addition to the reimbursement to the company of the amount which had been paid as commissions. Further explanations are also given, to which it is unnecessary to refer at length. The committee of investigation still maintain the truth of their statements, and the whole question will, doubtless, be fully discussed at the approaching general meeting.

Another report from a committee of investigation was presented at a meeting of the London Mercantile Discount Company on Wednesday. In the main, it resembles that of the undertaking mentioned above. The principal points alleged are excessive preliminary expenses, the purchase of the goodwill and business of a scheme called the British Reversionary and Investment Company, and that of Messrs Womersley and Burt, a private firm, for considerable sums without any proper examination of the real value of the properties bought, and other minor matters. Some curious details are also afforded of the negotiations incidental to the formation of a new company. It was resolved to wind up voluntarily.

At a meeting of the London and Mediterranean Bank, resolutions were passed in favour of an amalgation with the London and Bombay Bank.

At the thirty-fourth half-yearly meeting of the shareholders of the Commercial Banking Company of Sydney, held at the head office at Sydney, on the 25th of June last, the directors declared a dividend and bonus equal to 17 per cent. per annum, the rate of distribution being the same as the two previous half years. The reserve fund was maintained at 104,000*l*, and a balance of undivided profits, amounting to 4,079*l*, was carried forward.

The half-yearly meeting of the Bank of Victoria (Australia) was held at Melbourne on the 1st of August last. The report shows an available total at the credit of profit and loss of 46,538*l* 7s, which was applied to payment of dividend at the of rate 12½ per cent. per annum, 31,250*l*, and to reduction of bank premises account, 5,000*l*, leaving a balance to be carried forward of 10,288*l* 7s.

The Metropolitan Parcels Company, capital 20,000*l*,, in 4,000 shares of 5*l* each, is to conduct a business which has for nearly three years been under the management of Messrs Bolton and Ambler as a private undertaking, The firm delivers 8,000 parcels a week, and a contract has just been concluded with the Midland Railway for carrying all the parcels of their passenger trains. The Company will likewise enter into an agreement with other large London firms as well as railways for the carriage of parcels.

MISCELLANEOUS.—The following, relating to the Venezuela loan of 1864, is from the General Credit Company:—

The General Credit and Finance Company of London (Limited) are in receipt of advice from their agents, Messrs H. Z. Boulton and Co., dated La Guayra, Sept. 25, 1865, of duties collected (and remitted) on account of the above loan, as follows:—Porto Cabello, 7,387.72 dols. Messrs Boulton add that the season's crops are now at an end, and no stocks are held for shipment. Some of the new coffee crop may be expected in market about the month of November, but no large quantity will be brought forward much earlier then January. This growing crop promises to be a heavier one than that of last season, and the next cotton crop will also show an improvement.

The mail from Guayaquil has brought a remittance of 1,800*l* on account of the dividends on the debt of Eucador.

COMPARATIVE EXCHANGES.

The quotation of gold at Paris is about 3 per mille premium, and the short exchange on London is 25.30 per 1*l* sterling. On comparing these rates with the English Mint price of 3*l* 17s 10½d per ounce for standard gold, it appears that gold is about 2-10ths per cent. dearer in London than in Paris.

By advices from Hamburg the price of gold is 428 per mark, and the short exchange on London is 13.6⅞ per 1*l* sterling. Standard gold at the English Mint price is, therefore, nearly 1-10th per cent. dearer in London than in Hamburg.

The course of exchange at New York on London for bills at 60 days' sight is 109⅝ to 109¾ per cent. At this rate there is a small profit on the importation of gold from the United States.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British corn (imperial measure) as received from the inspectors and officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended Oct. 14, 1865:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	80,312 0	41 11
Barley	40,246 3	30 9
Oats	6,537 0	20 11

COMPARATIVE AVERAGES.

The following is a comparative statement, for the corresponding week in each of the years from 1861 to 1864, of the quantities of British corn sold in the towns from which returns are received under the Act of the 27th and 28th Victoria, cap. 87, and of the average prices as ascertained under the Act 5th and 6th Victoria, cap. 14:—

COMMERCIAL EPITOME,

FRIDAY NIGHT.

The supply of English wheat on sale at Mark lane to-day was small. The trade, both for red and white qualities, was firm, and the extreme rates of Monday were obtained. Foreign wheat, of which there was a good supply on offer, moved off steadily, and prices ruled firm. Good and fine barley changed hands at fully Monday's currency, but for inferior barley the trade was dull. Oats were in good supply, and most qualities were in active request, at an advance in price of 6d per quarter. Beans were in demand, and prices ruled firm. For peas there was a fair sale, at fully late rates; whilst most descriptions of flour sold steadily, at full quotations. The week's imports amount to 8,090 quarters of wheat, 14,110 barley, 30,380 oats, 220 sacks and 110 barrels of flour.

At Liverpool, this morning, wheat advanced 2d per cental. French flour realised 6d per sack more money, whilst maize changed hands at full currencies. At Wakefield, an improvement of 1s per quarter took place in the value of fine wheats.

There has been a fair extent of business transacted in the Liverpool cotton market during the present week, the total sales amounting to 86,000 bales, of which spinners have taken 34,000 bales, speculators 32,000 bales, and exporters 20,000 bales. Quotations for the week remain generally unchanged, the little advance which was obtainable at the commencement of the week having been again nearly lost, through the quieter markets of the past two days.

Via the Persian Gulf, we have intelligence from Bombay to Oct. 5. The cotton trade at that date was still in an excited state, at advancing prices. Dhollerah was quoted at 13¾d; Comptah, 13½d; sawginned Dharwar, 14¼d; and Oomrawuttee, 13d per lb, free on board. Freight to Liverpool had advanced to 25s per ton.

Advices from Calcutta report a falling off in the demand for cotton for the Chinese markets, yet the demand for shipment to Europe showed no activity. Prices, however, were very firm.

At Madras, during the fortnight ending Sept. 11, the cotton trade was much more active, and an advance took place in prices. Western produce sold at 10½d per lb, cost freight and insurance. The following statement of shipments is from E. J. Dymes, Cartwright, and Co.'s circular:—For quarter ending June 30, 78,886 bales; for previous quarter, 151,996 bales—total, 230,882 bales, against 230,059 bales for the corresponding six months in 1864; and 216,218 bales in 1863.

The cotton trade at Alexandria continues very active. According to the Egyptian Commercial and Trading Company's circular, fair open-ginned cotton, on the 5th inst., was worth 25d; for November delivery, 24½d; for December, 24d; and good fair open, for November shipment, 25½d per lb., free on board, light canvass. Freight to Liverpool, 1¼d per lb.

At Pernambuco, on the 28th of Sept., the cotton trade—owing to increased arrivals—was somewhat heavy; but the market exhibited more activity previously to the departure of the mail. Pernams, on shore, 14 52.100d; Maceios, on board, 14 24.100d per lb., f.o.b.

In the colonial and foreign grocery produce markets this week, attention has been chiefly directed to tea, in which a large business has been done, principally by private contract, at full quotations. As regards sugar, coffee, cocoa, and rice, considerable firmness, as far as prices are concerned, has prevailed; but the demand for the articles has been mostly confined to the actual wants of buyers. Very few transactions appear to have been effected in grocery produce on speculation.

Advices from China report considerable activity in the demand for tea at the leading ports. In some instances, rather higher prices were obtained; but the bulk of the transactions was at fully late rates. The export to Great Britain from June 1 to August 27, amounted to 45,376,300 lbs, against 44,220,800 lbs—to the United States, 3,385,100 lbs, against 2,212,700 lbs in the previous season. Later advices by telegraph state the export to Great Britain at 51,000,000 lbs.

We learn from Colombo, to Sept. 6, that the new coffee season had not been opened at that date. The trade, consequently, was almost at a standstill. "Crops," however, were held at exorbitant rates. The prices current for old produce were:—Plantation, 13s per bushel; native, picked and dried, 49s per cwt. As regards the prospects of the *new* crops, the accounts at hand were favourable. The following table of shipments is from Messrs Fryer, Schultze, and Co.'s circular:—

EXPORTS of COFFEE from CEYLON from Oct. 1 to Sept. 14.

The demand for English wool has been rather quiet. Prices, however, both of Down and Lincoln descriptions rule firm. The public sales of East India wool have been commenced at Liverpool, this week, and there has been a good attendance of buyers; but the biddings have ruled inactive, and, in some instances,

Digitized by Google

prices have slightly declined. The supply to be offered consists of 22,000 bales.

At Port Elizabeth, during the month ending August 8, large supplies of wool were received from the interior, and the shipments were of proportionate extent. The prices current were as follows:—Fine fleece, washed, 1s to 1s 1½d; medium, ditto, 11d to 1s; handwashed, superior, 1s 3d to 1s 4d; medium to good, 1s to 1s 2d; fine, unwashed, 7d to 7½d; medium, 6½d to 7d; coarse, unwashed, 4½d to 5d per lb.

The hemp market continues very firm, and clean Russian qualities now command 34*l* per ton, on the spot. Flax fully supports last week's currency, and fine jute is rather dearer.

The silk trade at Shanghai, during the fortnight ending August 20, was very active, the total transactions during that period having amounted to about 4,000 bales. As regard good and fine samples of produce, prices were the turn higher, but the dealings in middling and inferior qualities were at a decline in value of about 5 taels per picul. The total settlements, since July 1, had been 19,000 bales, against 8,900 bales last year, 7,647 bales in 1863, and 23,100 bales in 1862. The total export during the same period was 17,941 bales, against 7,071 bales in 1864. The following were the prices current per lb, overland, all charges paid to England, at the exchange of 6s 3d per tael;—Tsatlees, chop No. 1, 30s 10d; ditto, No. 2, 29s 9d; ditto, No. 3, 28s 8d; market, No. 3, 26s 11d to 27s 10d; ditto, No. 4, 25s 10d to 26s 5d; ditto, No. 5 and common, 24s 3d to 25s 4d; Taysaam, chop No. 1, 25s 7d to 26s 2d; ditto, No. 2, 24s to 24s 7d; ditto, No. 3, 23s to 23s 9d; ditto, No. 4, 5 and common, 20s 4d to 22s 8d; Yuenfa, No. 1, 25s 10d to 26s 5d; No. 2, 24s 10d to 25s 4d; No. 3, 23s 9d to 24s 3d; No. 4 and common, 21s 5d to 22s 8d; Hainings, 21s 5d to 25s 7d; Hangchow Tsatlees, 24s 10d to 25s 10d; Sewhings, 20s 10d to 23s 6d; Laeyongs, 19s 10d to 20s 10d.

At Yokohama, at the date of our last advices, the silk trade was very active, and prices advanced $20 to $30 per picul. The export since the opening of the season had been 1,467 bales, against 167 bales last year.

The quarterly public sales of indigo, which were commenced on the 10th inst., were brought to a close on Tuesday last. The quantity declared for sale was 9,681 chests in the A catalogue and 870 in the B; total, 10,551 chests, of which 596 were not printed or withdrawn, leaving the quantity to be brought forward 9,955 chests, consisting of 4,476 chests Bengal, Tirhoot, &c., 1,998 Oude and plant Oude, 912 Kurpah, 1,468 Madras, 95 Bengal figs, 73 Mooltan figs, 122 Manilla, and 811 sundries, including B catalogue. The opening of the sale was animated; there was a good attendance of buyers, both home and foreign, and the rates finally established were: for ordinary Bengals, par to 3d advance; middling and good middling, 3d to 6d advance; good and fine, about par. Oudes, notwithstanding the large quantity in the catalogue, met with a good demand, at fully 2d to 3d advance for desirable kinds, and par for hard, sandy, and mixed lots. The supply of Kurpah, as has been the case in all the late sales, was very indifferent. A few small marks of European manufacture sold with great spirit, at 4d to 6d advance. Dry leaf Madras has been in active demand. Some good and fine native brought fully 6d advance, whilst ordinary and middling sold readily at 3d to 4d advance, the lower kinds bringing occasionally rather more. Figs, both Bengal and Mooltan, were principally withdrawn. A few were sold at our quotations. Of the total quantity brought forward, 10,551 chests, 4,553 were withdrawn and 1,495 bought in, leaving 4,500 chests sold in the room, to which must be added 500 of the withdrawn and bought in, making a total of 5,000 chests sold.

In metals, the principal change to notice is an advance of 5*l* per ton in the value of copper. Scotch pig iron is quoted at 57s 6d cash, mixed numbers. Lead is very firm, and other metals may be considered steady.

The oil trade has been rather quiet, and in some instances prices have slightly declined. Linseed oil is quoted at 36s 3d to 36s 6d, but foreign-refined rape commands 50s to 50s 6d per cwt. Turpentine is in fair demand, at 45s to 45s 6d for French spirits. American-refined petroleum is selling at 3s 1d to 3s 2d per gallon.

During the week ending Oct. 7, there had been considerable excitement at New York in the markets for dry goods and general merchandise, arising chiefly from the upward movement in the premium in gold. At the close of the week, however, the various markets had become much quieter, and with the exception of cotton, for which there had been an active home export and speculative demand, at enhanced rates, prices had somewhat declined from the high rates previously current. The fluctuations in gold had been from 144¼ to 149 per cent., closing at 46½ per cent. prem. For money there had been an improved demand, and the quotations were firmer, prime short-dated paper being quoted at 7 per cent. The stock of bullion in the banks, on the 30th ult., amounted to 2,728,640*l*, and the balance in the Sub-Treasury to 14,194,440*l*. The shipments of specie, from Jan. 1 to Sept. 30, were 4,535,160*l*, against 7,055,760*l* last year; 6,503,410*l* in 1863; 8,568,630*l* in 1862; 655,960*l* in 1861; and 7,970,680*l* in 1860. The imports of dry goods, for the week ending Sept. 30, were valued at 625,960*l* against 183,580*l* last year; and 385,760*l* in 1863; the total of dry goods and general merchandise, for the nine months ending Sept. 30, being 28,935,030*l* in the present year; 35,436,700*l* in 1864; and 27,295,280*l* in 1863.

Subjoined is the statement of the Secretary of the American Treasury, showing the extent of the United States debt on the 30th ult.: the calculations are made at 4s the dollar:—

	Amount. £		Interest. £
Debt bearing interest in coin	223,331,630	...	13,000,315
Do. in lawful money	252,001,830	...	14,505,540
Debt on which interest has ceased	277,864	...	...
Debt bearing no interest	73,378,220	...	...
Total	548,989,544	...	27,505,855

The legal tender notes in circulation were 135,625,460*l*.

Tallow has continued very firm, and a further advance has taken place in the quotations. New P.Y.C. is now quoted at 50s 6d to 50s 9d per cwt, on the spot; 51s 6d to 51s 9d for December, and 52s 3d for January to March delivery. At St Petersburg, the price is 53¼ silver roubles.

The cotton market opened with an active demand, and in the early part of the week a large business was done at advancing rates, but since Tuesday the inquiry has fallen off, and the sales have been comparatively limited, with a downward tendency in prices, buyers seeming disposed to wait for the increased choice the large import will afford. In Sea Island, an extensive business has again been effected at full prices. American continues in demand, particularly for export and on speculation, but is freely offered, and has declined ¾d to 1d per lb, and some considerable sales have been made from the quay at a greater reduction. Brazil advanced ¾d to 1d per lb, but has since been very heavy of sale, and closed only ¼d to ½d above last week's quotations. Egyptian was in good demand in the beginning of the week, and a large business was done, stimulated by reports of injury to the crop, with an advance of fully 1d per lb; but the inquiry has fallen off, and prices have nearly receded to former rates. Smyrna is in fair request, at full prices. In Surat a large business was done, at advancing prices, until Wednesday afternoon, when the demand became limited, and prices have subsequently fallen back to about the currency of last week. China and Japan have been in fair request, at rather higher rates.

In the early part of the week, the transactions to arrive were unusually extensive, but have been limited during the last few days, and on terms influenced by the general tone of the market; the latest quotations were, on Wednesday, for Egyptian, open, fair, at sea, 25d per lb; shipment December and January, and November,

Digitized by Google

December and January, 25¼d; Dhollera, fair, August sailing, 19⅜d; Salem, fair, October or November sailing, 16d; Western Madras, fair, from quay, 18¾d and 19d; September sailing and not sailed, 18d; and yesterday, Western Madras, fair, ship named, 18d; Tinnevelly, good fair, September or October shipment, 17d; Bengal, fair, July sailing, 13½d per lb.

The sales of the week amount to 86,460 bales, including 32,260 on speculation, and 19,610 declared for export, leaving 34,590 bales to the trade. The sales to-day amount to about 10,000 bales, with a firm market.

PRICES CURRENT.—OCTOBER 23, 1863.

LONDON—Oct. 20.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :—

The market opened on Friday last at again higher rates, and the excitement continued until Tuesday morning, prices advancing with almost each transaction; a lull in the demand then ensued, a good portion of the advance of ½d to 1d has been lost, and the market close quietly, holders being unable to make such concession as would lead to a larger business.

Sales, to arrive, this week :—6,080 bales Tinnevelly, at 16½d to 19d, closing at 18½d for August, 17½d for September and October sailing; 4,800 bales Western, at 17½d to 19d, closing at 18½d for July, and 17½d for October sailing; 550 bales Coconada, at 15½d to 16d, for May and October sailing; 250 bales Salem, at 16½d, for September sailing; 3,630 bales Bengal, at 12d to 13¾d, for October shipment to July sailing—total, 15,310 bales.

NEW YORK—Oct. 7.

The cotton trade has been very active this week, and prices have advanced 6 cents per lb. The transactions have been large for export as well as for consumption and on speculation. The sales are estimated at 35,000 bales. The arrivals have amounted to 23,818 bales, of which 8,089 bales are from New Orleans, 4,176 Savannah, 1.745 Mobile, 3,100 by railroad, the remaining quantity being from North and South Carolina, Virginia, Maryland, and Mexico. The following are the prices current :—

	New York Classification. Upland. c	Florida. c	Mobile. c	New Orleans and Texas. c

Freight to Liverpool, ⅜d to 7-16d per lb.

MARKETS IN THE MANUFACTURING DISTRICTS.

There has been only a moderate business doing in cotton goods this week. Nevertheless, prices have been well supported. The stocks continue only moderate. The iron trade has been tolerably active at extreme quotations, and most of the works are in full operation. Coals have been in great demand, both for home use and export.

MANCHESTER, Oct. 19.—Quotations have been but nominal this week, the animation which formerly prevailed having wholly subsided. Indeed, some of the more sensitive articles have marked a decline; in home-trade yarns, 32's twist has fallen 2d per lb. The large imports of cotton, the high prices to which all fabrics have attained, the large supplies now in the hands of buyers, laid in at comparatively low rates, have all conspired to this dulness. Spinners have become much less confident of their position, large orders having gone out to America for cotton at limits which are pretty sure to admit of execution, the American demand for cloth, on the other hand, being chiefly for goods which involve much labour, but little material. Though Indian telegrams were to hand advising a great advance in response to the late excitement here they have given no stimulus to our market. Printing cloths for the States, which a few weeks ago could scarcely be had, are now pressingly offered for sale, owing to the enlarged production of them.

BRADFORD.—Wool—The tendency to quietness which has been increasing the last few market days has now culminated in something approaching to stagnation. Quotations are in great measure nominal, but where sales have been made a fractional concession

Digitized by Google

has been submitted to. Yarns—The same state of things prevails here. Buyers are only taking small lots which they urgently need. Pieces—In goods, also, the tendency of the market is in the direction of quiet. Manufacturers, though still busy, are rather easier to deal with. Prices remain the same.

LEEDS.—Meltons and tweeds were in fair request, and there was a sprinkling of heavy goods sold. There is a steady business doing by the export houses, and there is a good prospect for the spring goods trade for both Australia and America. Prices are firm, and manufacturers in general are well employed.

HUDDERSFIELD.—Goods of all kinds have been sparingly selected from, and to complete orders in hand in most cases. The shipping houses have been represented only to a limited extent as compared with previous weeks. There is, however, a large business doing to order of the large London and other wholesale houses, and the bulk of goods manufactured in this district are now sent away direct from the mills or warehouses, and cannot be said to come into the market at all. There is a falling off just now in the quantity of goods required for the country trade.

ROCHDALE.—Trade continues quiet. Buyers chiefly seek after fancy and printed goods for the fashionable winter shirtings. There is rather an improved demand for some of the better kinds of Yorkshire woollens, but for most kinds there is little or no sale. There is no change in the wool market.

LEICESTER.—There has been a fair amount of business transacted in hosiery goods. Articles (both plain and fancy) meet with a good sale, and manufacturers continue well engaged with orders on hand. In the rural districts business remains tolerably active, and the workpeople fairly employed. Worsted yarns are high in price, and extreme rates are quoted for cotton. Wools are in fair request at high rates.

NOTTINGHAM.—The cotton market continues more active, there being several American orders in the market, and more orders are expected. The home trade is a shade more active, but there is no improvement in the continental demand. Some classes of silk goods have been ordered for the American market, but, on the whole, the silk trade is quiet. Black silk laces and narrow edgings are selling slowly. The hosiery trade continues brisk. All departments are well engaged, and the operatives are in full work at good wages. Yarns are rather dearer.

BIRMINGHAM.—The trade of this town is very satisfactory. Orders have come in very freely of late on account both of the home and the foreign trade; a considerable amount is being done for America, and the most recent advices speak of the prospects of a good trade with that quarter.

SHEFFIELD.—Trade here continues to improve. For the common descriptions of cutlery there has been for some weeks an excessive demand for America, and this has drawn so many workmon from the home department that the orders for the country trade, which is also brisk, cannot be executed with promptness.

WOLVERHAMPTON.—The demand for iron keeps very steady, orders coming in day by day, and they are pressed for completion. The improvement in the trade with the United States is more decided, and ironmasters having agencies there are sanguine of a heavy spring trade with that country.

GLASGOW.—A moderate business in iron at 57s 6d prompt; G.M.B., No. 1, 57s 6d to 56s 9d; Gartsherrie, No. 1, 66s to 57s 6d; Eglington, No. 1, 55s 6d to 54s; No. 1, Coltness, 66s; Glengarnock, 59s; Langdown, 59s; Caldera, 58s 6d; Kinnoul, 58s; Forth, 57s 6d; Canon, 57s 6d.

DUNDEE.—Our flax market has continued buoyant. There has been an increased inquiry for the article, and spinners having shown more disposition than before to increase their stocks, a considerable amount of business has been done, at gradually improving prices. Jute is very firm, and good qualities being comparatively scarce, command full rates. A large business has been doing in flax and tow yarns at full prices. Linens continue to move off freely.

CARDIFF.—A very considerable business continues to be done in the steam-coal trade, and there are a number of vessels in the docks taking in cargoes. In the Aberdare valley the colliery proprietors are hardly able to turn out the requisite quantity of coal, owing mainly to the scarcity of competent hands and to the difficulty of getting the colliers to work regularly. Both rails and bars may be quoted 2s 6d to 5s per ton higher than a fortnight ago, and there are less complaints of under-selling. Puddled bars remain without change, and quotations for pig iron are firmly maintained. Activity characterises the tin-plate trade, and the iron foundries are in full work.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Oct. 7.—The market for flour and wheat has ruled firm, with an upward tendency in prices. The home demand has ruled active, and rather extensive coastwise shipments have been made. For export, however, the inquiry has been restricted. The following are the prices current:—Flour, State, superfine brands, $7.80 to $8.05; State, extra brands, $8.10 to $8.30; State, choice brands, $8.35 to $8.50; Ohio, common brands, $8.85 to $9.10; Ohio, fancy brands, $8.15 to $9.20; Ohio, good and choice extra brands, $9.25 to $9.30; Michigan, Indiana, Wisconsin, &c., $9.35 to $12.15; Genesee, extra brands, $8.60 to $11.50; Missouri, $13.50 to $15.50; Canada, common, $8.20 to $8.80; Canada, good to choice extra, $8.90 to $12 per bushel. Wheat—Chicago spring, $1.65 to $1.72; Milwaukee Club, $1.68 to $1.72; amber Milwaukee, $1.72 to $1.73; new amber State and amber Michigan, $2.26 to $2.30. Corn—Prime mixed Western, 94c to 95c; unsound ditto, 83c to 93c; white Western, 98c per bushel.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The arrivals of English wheat up to our market, this week, coastwise and by land carriage, have been again very moderate, but in fair average condition. All kinds have changed hands steadily, and, in some instances, the quotations have had an upward tendency. The imports of foreign wheat have not increased. Selected parcels have sold at full prices; but all other kinds have commanded very little attention. There has been a good sale for malting barley, at quite last week's currency. Grinding and distilling sorts have moved off heavily, at late rates. Malt has been in good supply, and fair request, on former terms. The supply of foreign oats has been good; nevertheless, the oat trade has ruled firm, at 6d per quarter more money. The few beans and peas on the stands have mostly found buyers at extreme rates. The flour trade may be considered steady.

The various local markets have been firm for wheat, at very full prices. In the value of spring corn and flour, very little change has taken place.

A fair quantity of wheat has been disposed of in the continental markets on English account, at full prices. Barley and all other articles have commanded extreme rates. The export demand for breadstuffs in the United States is still very limited.

In Scotland, there has been an improved feeling in the grain trade generally. Fine wheat, barley, and oats have produced rather more money, and other articles have been firm in price.

The Irish markets have been scantily supplied with grain. The trade, however, has been somewhat inactive, at about previous quotations.

The supply of English wheat on sale at Mark lane, to-day, was very moderate, and the trade for all qualities ruled firm at extreme rates. Foreign wheat—of which there was a good supply on offer—moved off steadily at full prices. Barley, of good and fine quality, was firm in price; but the trade for inferior produce was dull. Oats were in good demand, and the quotations advanced 6d per quarter. Beans were in request at full currencies. For peas, the trade was firm at quite late rates. The flour trade was steady, and prices ruled firm.

Mr George Dornbusch reports the state of the floating grain trade as follows:—Arrivals at ports of call since last Friday have been small, embracing only 18 cargoes, viz., 8 wheat, 7 maize, 1 barley, 1 rye, and 1 beans. The trade has been firm in tone, with an improving tendency. Sales:—Wheat—27 arrived cargoes sold, 1s to 2s lower on the week. Ghirka Taganrog, at 40s 6d to 42s; Odessa, at 40s to 41s 9d; Nicolaieff, at 41s and 41s 9d; hard Odessa, at 41s; Berdianski, at 42s 6d; Marianopoli, at 40s 6d and 42s 6d, all per 492 lbs; Sandomirca and Odessa, at 43s 3d; Salonica, at 38s 6d; and Enos, at 38s, all per 480 lbs; Ghirka Nicolaieff, shipping, or shipped, at 42s; Odessa, shipping, at 42s 6d; Nicolaieff, shipped, or to be shipped, at 42s; and Ghirka Taganrog, spring shipment, at 42s and 42s 6d, all at per 492 lbs. Maize—12 arrived, cargoes sold. Odessa, at 29s 6d to 30s; Galatz, 30s 3d per 492 lbs; Ibrail, at 28s (partially imperfect) at 29s 3d; Bulgarian and Kustendje, at sup. 27s 3d to 27s 6d (imperfect); and Saffi, at 29s 3d, all per 480 lbs. Barley—2 arrived cargoes sold. Bulgarian, at 21s 9d; Baltchick, at 18s 7½d (imperfect), per 400 lbs. Beans—1 arrived cargo sold. Barbary and Casabianca, at 37s, net, per 480 lbs. Linseed, 6d to 1s dearer—East Indian and Calcutta, on passage, sold at 61s 6d to 62s 6d per 410 lbs, L.A.T., and East Indian and Bombay, shipped, or to be shipped, at 63s per 416 lbs, L.A.T., sound bags; and East Indian and Calcutta, at 61s 6d per 410 lbs. L.A.T. Cotton-seed Egyptian and Alexandria, to be shipped, at 7l 12s 6d per ton.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT"

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been a firmer market this week, although prices are irregular. In many instances fully 6d advance was paid upon Tues-

Digitized by Google

day's rates, but yesterday the general demand rather slackened. 1,666 casks West India sold in three days. Desirable qualities of Barbadoes went very dear, fine selling up to 42s; soft brown and low quality, 35s to 37s per cwt. Last week, 5,330 tons were delivered, making a total increase of 46,500 tons over the previous season's, and the stock is less by 30,620 tons.

Mauritius.—Several parcels have sold by private contract: grainy and crystallised, 35s 6d to 43s 6d; soft brown and yellow, 30s 6d to 35s 6d per cwt. 2,272 bags by auction partly sold at full quotations.

Bengal.—1,255 bags offered by auction on Tuesday found buyers: white Benares, 39s 6d to 41s; soft brown date sort, 30s to 31s 6d per cwt.

Penang.—3,148 bags offered by auction were taken in above the value.

Madras.—About 500 tons Jaggery have been reported: low on the spot and now landing at 28s 6d to 29s; dark grainy at 30s 6d per cwt.

Natal.—370 bags sold at 32s to 38s per cwt.

Manilla.—About 12,000 bags clayed have sold: current quality to very good, 34s 6d to 35s. 1,500 bags unclayed, at 30s 3d to 31s per cwt.

Other Foreign.—By private contract the transactions have been of moderate extent. 1,500 boxes Havana, No. 11½, at 38s 6d, 200 boxes Cuba, at 40s. 350 casks Porto Rico, at 38s. 330 casks Cuba, 36s 6d to 38s. By auction, 96 casks Martinique part sold: fine yellow, 40s to 41s 6d; white bought in at 42s 6d to 44s 6d. 85 casks Honduras sold at 33s 6d to 35s per cwt for muscovado kinds.

Refined.—The market is very steady, with an improved demand for dry goods.

MOLASSES.—No sales are reported.

MELADO.—242 casks Cuba offered by auction were taken in at 29s per cwt.

RUM is quiet. Good to fine qualities Jamaica are in steady demand at previous rates.

COCOA.—The market has been inactive, with small supplies offering. 63 bags Trinidad went at 61s to 85s for low mixed quality to good clayed. A few small lots of Grenada sold at 55s to 62s 6d. 102 bags Bahia were sold at 35s for wormy. 109 bags Surinam sold at 57s to 77s per cwt.

COFFEE.—At the Dutch Trading Company's sale on Wednesday, satisfactory prices were obtained: good ordinary Java selling at 44½ cents. The market here is steady, although not much influenced by the above result. 150 cases 5,730 bags East India partly sold at 77s to 85s; Malabar, 71s to 74s; Cochin, 70s 6d to 75s. Singapore taken in at 56s. 139 casks 34 barrels and bags plantation Ceylon went off at steady rates. The arrivals have been large. No change can be quoted in native. 3,001 bags Rio were taken in at 54s to 64s. 76 bags washed Rio sold at 79s per cwt. The export deliveries exceed those of last year by nearly 6,000 tons, which reduces the stock to 12,990 tons, being about the same as in 1864.

TEA.—The market is still active. Fine congous of the new crop have continued to meet a ready sale. Green teas recently landed are in good demand, at higher prices. On Tuesday the public sales were small, comprising 7,360 packages, when 5,933 packages "without reserve" found buyers at about previous rates, including a few breaks of common red leaf congou at 11¾d to 1s 0¾d. A chop of common black leaf at 1s 0¼d. Scented capers from the late imports ranged at 9¾d to 1s 8d per lb, showing a slight reduction.

RICE.—The week's business includes 24,000 bags soft grain, chiefly Rangoon, at 11s 3d to 12s 3d. 600 bags white Bengal at 15s 6d. A cargo of Bassein has sold at 11s 9d per cwt, landed.

IMPORTS and DELIVERIES of RICE to Oct. 14, with STOCKS on hand.

	1865.	1864.	1863	1862.
Imports ....tons	34900 ...	47700 ...	41600 ...	81400
Deliveries	50760 ...	59400 ...	64000 ...	50930
Stock	25600 ...	34200 ...	41700 ...	60350

SPICES.—Higher prices have been paid for cassia lignea, viz., 107s 6d for pile 1 and 2. 176 barrels Jamaica ginger sold at 63s to 100s per cwt. Black pepper continues firm and there is not much offering for sale. 823 bags Singapore by auction sold at 3¼d, with a few lots 3⅜d. White remains quiet. 1,120 bags Zanzibar cloves sold at easier rates, chiefly at 3d to 3⅛d, with a few lots 3¼d. 15 cases mace were mostly bought in, 3 cases good selling at 2s 2d to 2s 3d per lb. The stock is getting very small.

SALTPETRE.—120 tons of Bengal has sold to arrive at 25s to 25s 3d. 50 tons now landing at 25s 1½d per cwt, usual conditions.

IMPORTS and DELIVERIES of SALTPETRE to Oct. 14, with STOCKS on hand.

	1865	1864	1863	1862

Stock....	6150 ...	8610 ...	5870 ...	3650

Delivered last week 157 tons.

DRYSALTERY GOODS are without alteration, and the market remains steady.

METALS.—The more settled state of the money market has caused rather a better feeling to prevail. Copper has been raised 5*l* per ton, and there is a better demand, partly for export. Lead commands rather higher quotations. Several contracts have been made in foreign tin, chiefly Straits, at 91*l* 10s to 93*l* on the spot, according to conditions. The spelter market is more steady, some business having been done at 20*l* 12s 6d to 20*l* 17s 6d per ton. Scotch pig iron has advanced to 58s per ton cash, mixed numbers.

HEMP.—Russian has obtained a further advance, clean Petersburg selling at 33*l* 10s to 34*l*. Manilla hemp is again higher, but less active at present quotations. Good roping last sold at 42*l*; superior, 44*l* 10s per ton.

JUTE.—There is a better inquiry on the spot and for arrival. 7,400 bales by auction, on Wednesday, went at 10s to 20s dearer: low to fine, 12*l* to 23*l* 10s per ton.

OILS.—Linseed has declined to 37s 3d on the spot: for future delivery, 36s. Rape has advanced: brown, 48s; foreign, 48s 6d; refined, 49s 6d to 50s. Brown has sold freely for delivery to the end of the year. Olive has become quiet. Gallipoli 56*l* on the spot. Pale seal has advanced, viz., 47*l* 10s to 48*l* on the spot. Sperm held at 120*l* per tun. Palm has advanced: fine, 43s. Cocoa-nut is slightly dearer: Ceylon, 47s 6d; Cochin, 50s to 50s 6d per cwt.

TALLOW.—The market has been excited, closing much dearer, and with a further tendency to improvement. 1st sort Petersburg Y.C. new, 50s 9d to 51s; January to March, 52s 6d to 53s; March, 53s 6d to 54s per cwt.

PARTICULARS OF TALLOW.—Monday, October 16, 1865.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is quiet, but firm. Various parcels of W.I. partly sold. To-day's sales are 911 casks, and for the week 2,577 casks. 758 bags Mauritius, by auction, realised 36s to 38s 6d for grainy and crystallised. 6,500 bags clayed Manila have sold at 34s 9d per cwt.

COFFEE.—Rather more inquiry prevails for plantation and native Ceylon privately.

COCOA.—350 bags Guayaquil offered by auction were taken in at 72s to 74s 6d per cwt.

RICE.—10,000 bags Rangoon have sold at 11s 3d per cwt.

OIL.—217 casks palm, by auction, part sold at 43s 3d to 43s 9d.

TALLOW.—Town advanced to 52s 9d. 823 casks Ausfralian, by auction, went 2s dearer; mutton, 52s 3d to 52s 6d; beef, 49s to 49s 6d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market for refined sugar has been well supported this week, and in some instances better prices have been obtained. Dutch crushed continues firm. No material alteration as respects prices.

DRY FRUIT.—A good general trade has been done in fruit during the week, both at public sale and in private contract. The market is firm for all articles.

COLONIAL WOOL.—The market is quiet and without change.

FLAX.—Market firm.

HEMP.—Market very firm, and higher prices paid again this week, with little offering for sale.

SILK.—Market very firm, large business doing in China silk. Other sorts neglected.

TOBACCO.—The market has continued active, and a full extent of sales effected in most descriptions. The greatly diminished stock of growths other than American, has influenced buyers to operate more freely, and an advance on previous rates has been established.

LEATHER AND HIDES.—About a fair average demand still prevails for most descriptions of leather, but without change in value. Sole leather is generally firm, but the demand is principally for the strongest qualities. The supply at Leadenhall on Tuesday was moderate, and a good demand existed for good crop hides, 40 to 50 lbs average, heavy English butts, calfskins, especially those under 40 lbs per dozen.

METALS.—We have a steady continuance of business all the week. Copper having become in more active inquiry, the smelters advanced prices 5*l* per ton all round on Wednesday, and subsequent business has justified the movement. Iron finds a steady inquiry. Tin has been selling at full rates, which continue to be maintained. Lead is very firm at late advances. Spelter is quiet. Tin plates in demand still.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	52	9
Fat by ditto	2	7
Yellow Russia	52	6
Melted stuff	40	3
Rough ditto	23	0
Greaves	2	0
Good dregs.....	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Oct. 16.—The total imports of foreign stock into London last week, amounted to 21,090 head. In the corresponding week in 1864 we received 17,089; in 1863, 14,181; in 1862, 8,909; in 1861, 9,501; in 1860, 12,558; and in 1859, 8,395 head.

We were again heavily supplied with foreign beasts. Amongst them were about 300 from France, in good condition. The stock from Tonning was inferior. The arrivals of sheep from Germany were again very large. From our own grazing districts the receipts of beasts fresh up to-day were very moderate, the time of year considered, both as to number and quality. The arrivals from Ireland and Scotland were on a limited scale. Good and prime breeds commanded a steady inquiry, and, in some instances, prices were slightly on the advance; otherwise the beef trade was inactive, at last Monday's currency. The top figure for beef was 5s 4d per 8 lbs. The arrivals of beasts from Lincolnshire, Leicestershire, and Northamptonshire, amounted to 1,250 Shorthorns, &c.; from other parts of England 500 various breeds; from Scotland 10 Scots and crosses, and from Ireland 80 oxen, cows, and heifers. The supply of English sheep was very limited, but most breeds came to hand in improved condition. The mutton trade was firm, and the quotations had an upward tendency. Prime Downs and half-breds produced 6s 6d to 6s 8d per 8 lbs; good foreign sheep were rather dearer. We were scantily supplied with calves, which moved off freely, at full currencies, viz., from 4s 6d to 5s 6d per 8 lbs. The sale for both English and foreign pigs was far from active, nevertheless last week's prices were supported. The best pigs were worth 5s 10d per 8 lbs.

SUPPLIES.

	Oct. 17, 1864.	Oct. 16, 1865.
Beasts	8150	6340
Sheep	29740	31860
Calves	377	236
Pigs	620	470

THURSDAY, Oct. 19.—Our market to-day was but moderately supplied with beasts, chiefly in middling condition. Prime breeds moved off steadily, at full quotations. Otherwise, the trade was heavy, at late rates. The top figure was 5s 4d per 8 lbs. Sheep, the show of which was rather limited, changed hands freely, at extreme rates. Downs and half-breds realised 6s 4d to 6s 8d per 8 lbs. The quality of most breeds was good. We were fairly supplied with calves, which sold steadily, at very full prices —viz., from 4s to 5s 6d per 8 lbs. Very few English calves were on offer High prices were again demanded for pigs, but the sale for them was inactive. In milch cows very little was doing.

Per 8 lbs to sink the offal.

HOP MARKET.

BOROUGH, FRIDAY, Oct. 20.—A full average business is passing in our market, and all good and fine hops command extreme rates. The trade, however, for inferior hops is rather quiet. New Mid and East Kents, 110s to 190s; new Weald of Kents, 95s to 130s; new Sussex, 70s to 115s; yearlings, 90s to 135s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, FRIDAY, Oct. 20.—These markets are well supplied with potatoes. Most qualities are in fair demand, and prices rule tolerably firm. Kent and Essex Regents, 60s to 90s; Yorkshire do., 60 to 80s; Flukes, 70s to 100s; Rocks, 40s to 60s per ton.

HAY MARKETS.

THURSDAY, Oct. 19.—Only moderate supplies of hay and straw have been on sale. The trade has ruled quiet, at our quotations.

Per load of 36 trusses.

	Smithfield.	Cumberland.	Whitechapel.
	s s	s s	s s
Hay	80 to 105	85 to 110	90 to 105

COAL MARKET.

FRIDAY, Oct. 20.—Wallsend Haswell, 23s 6d—Cowpen Hartley, 21s 3d —West Hartley, 21s 3d—Holy Main, 20s. Ships at market, 14; sold, 1; gas contracts, 13—14; ships at sea, 105.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Oct. 20.—The East India sales opened on Wednesday with a very full attendance from the home trade as well as of continental buyers. The quantity of this series will be larger than anticipated, owing to numerous late arrivals from Bombay, and will probably reach 22,000 bales. Prices are rather lower than in July last.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, OCT. 20.—The market fairly attended. Wheat steady at 2d per cental dearer; flour, French, is 6d dearer, and in good demand. Indian corn steady; mixed, 28s 6d to 29s 9d; beans firm; oats and oatmeal, moderate sale.

EPITOME OF RAILWAY NEWS.

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom amounted for the week ending the 7th of October, on 12,284 miles, to 754,264*l*, and for the corresponding week of last year, on 11,985 miles, to 696,282*l*, showing an increase of 359 miles, and of 57,982*l*. The gross receipts on the 14 principal railways amounted in the aggregate, on 8,803 miles, to 624,353*l*, and for the corresponding week of 1864, on 8,484 miles, to 579,818*l*, showing an increase of 319 miles and an increase of 44,637*l*.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Oct. 16.—In the share market to-day, this being the preparation for the settlement in the middle of the month, the transactions were about equally divided between those for money and those for the account, and the movements in the closing prices showed only a slight tendency to weakness of tone. In English railways, Lancashire and Yorkshire and Midland improved ¼ each, Metropolitan and Scottish North-Eastern (Aberdeen) declined 1 each, Great Eastern ½, and Great Western a further ¼; and Metorpolitan District (paid up) remain at 102 to 104. In colonial, Bombay and Central India advanced ½; Grand Trunk of Canada (1st and 2nd preference) receded 1 each, and ditto (Equipment bonds) are now quoted ex dividend. In foreign, Dutch-Rhenish improved ⅛, and Great Luxembourg, Namur and Leige, and Lombardo-Venetian declined ⅛ each. In mines, Washoe Gold (of both descriptions) improved ½ each, and Cape Copper declined ¼.

TUESDAY, Oct. 17.—In the share market to-day the business was very limited in amount, but the tendency of the movements in the closing prices was generally towards improvement, American securities and British mines being the exceptions. In English railways, Metropolitan recovered 1, Great Northern (A stock) advanced ½, and North-Western ¼, and Metropolitan District (paid up) are unaltered at 102 to 104. In colonial, Grand Trunk of Canada advanced ½, and Great Western of Canada (shares of both descriptions) improved ¼ each, although now quoted ex dividend. In foreign, Lombardo-Venetian recovered ⅛, Central Argentine advanced ¼, and Dutch-Rhenish (paid up) ¼; Great Luxembourg further declined ⅛, and Bahia are now quoted ex dividend. In American, Erie shares (paid up) declined ¾, and Illinois Central shares a further ¼, and United States (5-20) are now quoted ex coupons. In British mines, Chiverton and Marke Valley declined ⅛ each, and East Caradon and Wheal Seton are quoted ex dividend. In foreign mines, Cobre Copper advanced 1, and Frontino Gold ¼, and Yudanamutana receded ⅛.

WEDNESDAY, Oct. 18.—In the share market to-day only an occasional business was done, and except in the banks, which showed average firmness, the movements in the closing prices in all the descriptions were generally downward. In English railways, North-Western relapsed ¼, and Great Northern (A stock) and Metropolitan ⅜ each; ditto (Extension) declined ⅛, Great Western ¼, Midland, North British, and North Staffordshire ⅜ each, and South-Eastern 1; and Metropolitan District (paid up) are unaltered at 102 to 104. In foreign, Namur and Liege improved ⅛, Lombardo-Venetian relapsed ⅛, and Great Luxembourg further declined ¼. In American, United States (5-20) declined ¼, Virginia (6 per cent.) 1, and Illinois Central shares a further ¼. In British mines, East Carn Brea and Tin Croft receded ¼ and ½ respectively. In foreign mines, Cobre Copper further advanced 1; Yudanamutana recovered ⅛, and Frontino Gold relapsed ¼.

THURSDAY, Oct. 19.—In the share market to-day the transactions were not numerous, but there was a general tendency to a recovery of tone, the only exception being British mines, in which there was again a shade of weakness. In English railways, Scottish North-Eastern (Aberdeen) improved 1, and Lancashire and Yorkshire ¼; North-Western recovered ⅜, and Midland and Great Western ½ each; ditto (South Wales) declined ⅛, and North British a further ½; and Metropolitan District were steady at 102 to 104. In colonial, Grand Trunk of Canada (4th preference) recovered ½; ditto Equipment bonds improved 1, Great Western of Canada (shares of both descriptions) ⅛ each, and Madras (5 per cent.) ½. In American, United States (5-20) recovered ¼, and Illinois Central shares ½, and Erie shares (paid up) advanced ¾. In British mines, Great South Tolgus and East Caradon receded ¼ and 1 respectively. In foreign mines, St John del Rey advanced 3½.

FRIDAY, Oct. 20.—There was a fair amount of business in the railway market to-day, and the general tendency of prices was favourable. Caledonian stock was in stroag demand, and improved about 2 per cent. Metropolitan also advanced ¾. London and North-Western, ⅜; South-Eastern, ¼; and Great Western, ⅛.

JURY AWARDS, DUBLIN EXHIBITION.—Honourable Mention for IMPROVED STEAMING and BATH APPARATUS, and appliances, awarded to Fred-rick Thomas, 72 Bishopsgate with n. Bath-rooms fitted up in the best manner.

BROWN AND GREEN'S KITCHEN RANGES. The PRIZE MEDALS, London, 1862, and Dublin, 1865. The New Patent, "A Close Range with an Open Chimney," cures smoky chimneys, avoids all close heat or smell. Prospectus post free.
Frede-ick Thomas, 72 Bishopsgate within.

A CLOSE RANGE WITH AN OPEN CHIMNEY. Prize Medal awarded to BROWN and GREEN at the Dublin International Exhibition. No Smoky Chimneys. No close heat or smell.
Frederick Thomas, 72 Bishopsgate within.

TO GENTLEMEN SEEKING preparation for Woolwich, the Civil Service, and the Line.—A Graduate of Oxford, who has had long experience in preparing for the competitive and University examinations, and has three students at present, wishes to receive two more. Delightful situation, great educational and domestic advantages, and moderate terms.—Address, L. L. D., 9 Leighton rescent, Tufnell park West, N.W.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—Herr THOMAS prepares Young Gentlemen for the Army, Navy, Civil service, and Mercantile pursuits. German and French only are spoken in the establishment, where the Pupils enjoy all the comforts of an English home. The highest references given.—For particulars, apply to the Director, THEODORE THOMAS. Baumschule Allée, Bonn.

WESTERN GRAMMAR SCHOOL, Brompton, S.W., in union with King's College, London.—The system pursued at this school is eminently practical, and calculated to prepare pupils for the competitive examinations and the various pursuits of life. Three pupils successfully passed the Oxford Local Examinations this year. The Head Master takes a few boarders.—For terms and prospectus apply at the school.

WHERE SHALL WE DINE? Go to DEACON'S COFFEE HOUSE, WALBROOK, where the "Economist" and all other newspapers in the world are taken in and file Directories for every county in England, also for Canada and Australia. Advertisements inserted in any papers English or foreign.—Wm. Howell, proprietor.
N.B.—Lists of Heirs at Law, Next of Kin.

NOTHING IMPOSSIBLE.—The greatest and most useful invention of the day. AGUA AMARELLA.—Messrs JOHN GOSNELL and CO., Three King court, Lombard street, perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it, on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price one guinea per bottle; half bottles, 10s 6d. Testimonials from ar istes of the highest order and from individuals of undoubted respectability may be inspected. Messrs John Gosnell and Co. have been appointed perfumers to H.R.H. the Princess of Wales.

TEETH AND PAINLESS DENTISTRY.—Messrs LEWIN and SIMEON MOSELY and SONS, 30 Berners street, Oxford street, and 448 Strand, opposite Charing Cross Railway Station.
Their painless artificial teeth are unequalled for economy, durability, comfort, and all purposes of articulation and mastication. Operations of every kind being unnecessary, the most nervous patient can be supplied without fear of pain or inconvenience.
Consultation free. Teeth from 5s. Sets from 5 to 25 Guineas, warranted.
For the efficacy, utility, and success of their system, vide LANCET.
Daily attendance 30 Berners street, Oxford street; 448 Strand, London; 15 Whitefriargate, Hull; 10 Norfolk street, Sheffield; 4 East parade, Leeds; and 14 St Nicholas street, Scarbro'.
Observe—Established 1830. No connection with any of the same name

PRACTICAL OBSERVATIONS on the CAUSES and TREATMENT of CURVATURES of the SPINE. Third edition, price 6s.
AND
Just published, second edition, price 1s 6d,
CASES and OBSERVATIONS illustrative of the beneficial results which may be obtained by close attention and perseverance, in some of the most unpromising instances of Spinal Deformity; with numerous Engravings. By SAMUEL HARE, F.R.C.S., &c.
"We unhesitatingly commend this work as a truthful and trustworthy statement of the power of scientific surgery and medicine over some of the most grievous hindrances to human activity and industry."—MEDICAL GAZETTE.
"Mr Hare is, we think, a sound and successful practioner.'—MEDICAL CIRCULAR.
"The author has had much success in his plan of treatment, and we are of opinion that the principles on which he acts, in the treatment of these affections, are correct."—LANCET.
"Mr Hare may take credit to himself for having effected much good in the treatment of the cases described."—BRITISH MEDICAL JOURNAL.
London: John Churchill; and may be had of all booksellers.

THE METROPOLITAN PARCELS DELIVERY COMPANY (Limited).

Incorporated with limited liability, under the Companies Act, 1862,

By which the liability of each shareholder is strictly limited to the amount of his shares.

Capital £20,000, in 4,000 shares of £5 each.

First issue £10,000, in 2,000 shares of £5 each. A deposit of £1 per share to be paid on application, and £1 per share to be paid on allotment.

No call to exceed £1 per share, nor be made with a less interval than three months.

It is not expected that more than £3 10s per share will be required.

Of the first issue of shares, 400 will be allotted, fully paid up, in part payment of the plant and goodwill of the business purchased. More than one-fourth of the remaining shares of the said issue have been actually and bona fide applied for.

DIRECTORS.

William Smith, Esq. (Messrs Fevez Freres and Charvet) 2 Sermon lane, St Paul's Churchyard, London, E.C.

John Barrand Faulkner, Esq. (Manchester Warehouseman), 7 Foster lane, Cheapside, London, E.

Michael Francis Tindale, Esq. (Auctioneer), Commercial road, Stepney, London, E.C.

Benjamin Mitchell, Esq., Shirley House, Auerley, Surrey.

George Ward Challis, Esq (Messrs Challis and Co.), 69 Lombard street, London, E.C.

Thomas John Bolton, Esq., } The proprietors of the business purchased; and who will join the board

Benjamin Ambler, Esq., } if invited to do so, after the allotment of shares.

SOLICITORS.

Messrs Allen, Nicol, and Allen, 88 Queen street, Cheapside, E.C.

BANKERS.

The London and County Bank, Lombard street, London (and all branches).

AUDITORS.

M. L. Challis, Esq., Bank of England, London, E.C.

(The second Auditor to be chosen by the shareholders.)

GENERAL MANAGER AND SECRETARY.

John Wick, Esq. (formerly in the employment of Messrs Chaplin and Horne).

Principal Business Depot.—Gough street, Gray's inn road, London.

PROSPECTUS.

The Metropolitan Parcels Delivery Company has for nearly three years been conducted as a private undertaking by the Messrs Bolton and Ambler. The business of the concern has now reached an average of about 8,000 parcels per week, and is daily increasing; and as the premises and plant will still admit of a large extension of the business, and as a contract has just been concluded with the Midland Railway Company for carrying all the parcels of their passenger trains, and as other similar contracts will, it is expected, be shortly entered into, it has been deemed advisable to form a joint stock company, with limited liability, for the purpose of extending the concern, by introducing larger capital, and by consolidating the interests of influential men.

A provisional agreement has been entered into with Messrs Bolton and Ambler for the transfer of the goodwill of the business, and of the 70 horses, 32 carts, 6 vans, and the general fittings and plant employed in the business, together with a Seven Years' Lease of the premises in Gough street, Gray's inn road, which are so admirably suited for the head depot of the Company. This agreement may be seen at the offices of the solicitors; it is sufficient here to state that its terms are to pay Messrs Bolton and Co. £4,000 in easy instalments, and to give them four hundred fully paid-up shares (representing £2,000).

The plant, &c., to be transferred to the Company has been valued as follows, say:—

	£
70 horses, 32 carts, 6 vans, the traveller's horse and chaise and the collectors horse and chaise, harness, &c., fittings and fixtures, and official boards for receiving houses, and general plant	3,600
Seven years lease of the premises in Gough street, Gray's inn road.	
The rental of the premises is £250 per annum, but the sub-rentals at present existing (and hereafter to be received by the Company) are as follows:—	
Per annum.	
Mr Bingham (blacksmith) rents a portion at..	50
Mr Godschalk (cab proprietor) rent a portion at.....	120
And gives manure valued at	15
Three smaller rentals, at 13s, 9s, and 7s per week respectively, produce together, say...	75
Total.....	260
So that the Company will be rent free, and will receive a surplus of £10 per annum from the sub-rentals.	
This seven years' lease is valued, at the low rent of £70 per annum, say	£490
Add £10 per annum, surplus as shown above, for 7 years, say	70
	560
	4,160

For this plant &c., (valued as above, at £4,160), and for the goodwill of the business, Messrs Bolton and Co. are to receive £4,000 in cash, in easy instalments, and 400 fully paid-up shares.

The stabling at Gough street is sufficiently large to accommodate fifty more horses when the expected increase of the business requires them.

It is the intention of this Company—

1. To continue the present business of the Metropolitan Parcels Delivery Company.

2. To contract with several of the railway companies to carry their parcels.

3. To enter into agreements with the large London firms to carry the whole of their packages and parcels, and by so doing to obviate the necessity of each firm maintaining stables, horses, vans, &c.

It is firmly believed that this Company, commencing as it will with an established business of no inconsiderable extent, and aided by the joint strength of influence and capital, will prove highly remunerative to its shareholders.

It may be mentioned that the "London Parcels Delivery Company" pays large dividends, and that the large London carriers have been proverbial for their wealth, accumulated in their business.

As the business is transacted on the cash or "ready-money" principle, only a small capital is required, and it is not anticipated that more than £3 10s per share will be called up.

Interest at 6 per cent. per annum will be allowed on calls paid in advance.

Applications for shares, accompanied by a deposit of £1 per share, may be made to the London and County Bank, London, and all branches, to the solicitors, to the secretary, and to Messrs Challis and Co., 69 Lombard street, London. If no allotment be made, the deposit will be returned in full and without delay.

Prospectuses, forms of application for shares, and copies of the articles of association, and all information desired, may be obtained by addressing the secretary, either at 69 Lombard street, or at the head depot of the Company, Gough street, Gray's inn road.

THE METROPOLITAN RAILWAY WAREHOUSING COMPANY (Limited),

In immediate connection with the Metropolitan Railway.

Capital £600,000, in 30,000 shares of £20 each (with power of increase).

First issue 20,000 shares of £20 each.

Deposit £1 per share on application and £1 on allotment.

Interest at 6 per cent. will be paid during construction.

Copies of the prospectus and forms of application for shares may be obtained of the Secretary; and of the Brokers, A. Ricardo, Esq., 11 Angel court, E.C., and G. W. Shirreff, 5 Warnford court, E.C; or at the National Bank, Old Broad street.—By order,

JOHN HENCHMAN, Secretary.

Offices, 17 Duke street, Westminster.

THE METROPOLITAN RAILWAY WAREHOUSING COMPANY (Limited).

No applications for Shares will be received after Wednesday next, the 25th instant.—By order,

JOHN HENCHMAN, Secretary.

Offices, 17 Duke street, Westminster,
October 19, 1865.

COMPANY OF THE RAILWAYS OF THE SOUTH OF AUSTRIA, LOMBARDY, AND CENTRAL ITALY.

Shareholders are informed that the Board of Directors has fixed at 20f (16s) per share the first coupon of the year 1865. This coupon will be paid from 1st November next,—at Paris by Messrs de Rothschild, at Marseilles by the Syndicat des Agens de Change, and at Geneva by Messrs Lombard, Odier, and Co.

EAST INDIAN RAILWAY COMPANY.

Chord Line from the Barrakur to Luckieseral, with a Branch to the Kurhurbaliee Coal Fields, about 148 miles.

The East Indian Railway Company will be prepared on the 9th November next to receive Tenders for the construction of the above work.

Plans, sections, drawings, and specification of the work to be executed, together with the general conditions of contract, may be seen at the Company's Offices, between the hours of 10 and 4 o'clock. A copy of the specification, &c., may be had on payment of £5 5s.

Tenders, in sealed envelopes, and marked on the outside "Tender for the Chord Line," &c., must be delivered to the Secretary, in terms of the specification, on the 9th of November next. The Company is not bound to accept the lowest or any tender.—By order of the Board,

D. I. NOAD, Secretary.

East Indian Railway House, Alderman's walk, New Broad street, London, 27th July, 1865.

CALEDONIAN RAILWAY.—

Contract for a Portion of the Works authorised under the Cleland Midcalder Railway and Branches Act, 1865.

The Directors of the Caledonian Railway are prepared to receive Tenders for Works on that portion of the main line of the Authorised Cleland and Midcalder Railway, described in the Act as Railway No. 1, extending from the commencement of the said main line to a point about three furlongs south-westward from the farmsteading of Muir House, Dyke Mains, in the Parish of Westcalder, to the eastern termination of the said main line, being about 13¾ miles in length, and for works on the branch described in the Act as Railway No. 2, being about four furlongs in length. The main line is to be constructed as a double line of railway. These works will be embraced in one contract, to be called the Dykehead Contract.

The rails, chairs, and fastenings will be supplied by the Company.

The drawings and specifications may be seen at the Company's office, 302 Buchanan street, Glasgow, or at the office of Messrs B. and E. Blyth, Engineers, 135 George street, Edinburgh, on and after Wednesday, 1st November.

Forms of tender, with copies of the specifications, and duplicate copies of the schedules, may be obtained from Messrs Blyth, on payment of three guineas.

The assistant engineer will attend at the Motherwell Station of the Caledonian Railway, at ten o'clock on the morning of Thursday the 2nd of November, for the purpose of exhibiting the plans, and on that and the following day accompanying intending offerers over the line of works.

The successful contractor shall pay the cost of the measurements.

Sealed tenders, addressed to the Secretary, and marked "Tenders for the Dykehead Contract," must be lodged with him at the Company's office, 302 Buchanan street, Glasgow, on or before Monday the 13th of November.

The Directors do not bind themselves to accept the lowest or any of the tenders.

C. JOHNSTONE, General Manager.

General Manager's Office, 302 Buchanan street, Glasgow, 14th October, 1865.

ISSUE of DEBENTURES at 6, 6½, and 7 per Cent., and of the REMAINING UNALLOTED SHARES.

THE BRITISH HONDURAS COMPANY (Limited).

Capital, £100,000, in 20,000 shares of £5 each.

Subscribed, £86,840: Paid-up £66,837 15s.

This Company was formed rather more than six years ago; the dividends have averaged above 7 per cent. per annum free of income tax, derived almost exclusively from mahogany and logwood cutting, and a reserve fund has been accumulated of 10 per cent. on the paid-up capital.

A limited number of Debentures, for 3, 4, and 5 years, bearing interest at 6, 6½, and 7 per cent. per annum, according to term, and secured on the uncalled capital as well as the land and plant of the Company are now offered to the public.

The remaining unallotted shares are also offered; 10s per share to be paid on application, and 10s on allotment. Further calls, if made, not to exceed 20s per share, at intervals of not less than three months.

Applications for debentures and shares to be made to the secretary, Mr William Heriot, at the office of the Company, No. 2 Great Saint Helen's, London, E.C., or through Messrs Barnetts, Hoares, Hanburys, and Lloyd, the bankers of the Company, and the National Bank of Scotland, at Edinburgh and Glasgow.

Further information and forms of application may be had of the Secretary.

—By order of the Board.

J. R. ROBERTSON, Chairman.

2 Great Saint Helen's, London, E.C., October, 1865.

THE DUNRAVEN UNITED COLLIERIES COMPANY (Limited).

Incorporated under the Companies Act, 1862, with limited liability. Capital £200,000, in 8,000 shares of £25 each. Deposit £1 per share on application, and £2 on allotment. Calls not exceeding £3 per share at intervals of not less than three months. A minimum dividend of 10 per cent. guaranteed by the vendor for the first five years.

DIRECTORS.

Viscount Malden, Loudwater, Rickmansworth, Chairman.

Bryan Donkin, Esq., C.E., Estnor house, Blackheath (Bryan Donkin and Co., Bermondsey).

David Joseph, Esq., Ely rise, Cardiff (late Manager of the Plymouth Forge Company, Merthyr Tydfil).

MANAGING DIRECTOR.

Thomas Joseph, Esq., Tydraw, Pontypridd.

BROKERS.

Messrs Crosley Brothers, 30 Cornhill, E.C.; Messrs John Wade and Sons, Birmingham.

BANKERS.

Messrs Barnett, Hoares, Hanburys, and Lloyd, Lombard street; Messrs Wilkins and Co., Brecon Old Bank, Cardiff.

AUDITORS.

C. L. Lawson, Esq., F.S.S. and F.I.A., 101 Chespside, London; James Walkinshaw, Esq., Chelsea (late Chief Cashier of the Dowlais Iron Works).

SOLICITORS—Messrs Bell, Brodrick, and Bell, 9 Bow churchyard, London.

SECRETARY—T. C. Simmons, Esq.

Temporary Offices—10 Cullum street, E.C.

ABRIDGED PROSPECTUS.

This Company is formed with a view of purchasing from the proprietor the Dunraven, New Brithdir, and Blaenclydach Collieries, in the county of Glamorgan, for the purpose of developing and further improving the property; and full powers have been taken for efficiently carrying out the same.

These properties are sold entirely in consequence of the vendor's capital being insufficient effectually to work so large a concern.

The proprietor has guaranteed to the satisfaction of the Directors that for the first five years after the formation of the Company 10 per cent. per annum shall be paid upon all the paid-up capital (taking the average of profits over such period). He will also continue to manage the whole business of the Company, at a salary fixed by the Directors.

There is sufficient plant at each of the collieries efficiently to work a much larger quantity of coal than has been named.

The purchase money for the whole of the above-named properties is £130,000, and the same is to be paid by instalments spreading over two years. The proprietor will take shares to the extent of £50,000.

The price to be paid is based upon valuations made by several well-known and experienced colliery engineers, all of which have been thoroughly verified. The originals may be seen at the offices of the Company.

Prospectuses and forms of application for shares may be obtained of the bankers, at any of their branches, brokers, solicitors; of James Wright, Esq., C.E., 12 Copthall court, London; of Messrs Smith and Pickering, solicitors, Merthyr Tydfil; and at the temporary office of the Company, 10 Cullum street, E.C.

DUNRAVEN UNITED COLLIERIES COMPANY (Limited).

Notice is hereby given, that the List of Applications for Shares in this Company will be Closed on Monday, 30th, for London, and Tuesday, 31st October, for the country. T. C. SIMMONS, Secretary.

Temporary offices, 10 Cullum street,
21st October, 1865.

UNIVERSAL COMPANY OF THE MARITIME CANAL OF SUEZ.

REPORT presented to the General Meeting of Shareholders, held in Paris on the 5th October, 1865, by M. FERDINAND DE LESSEPS, in the name of the Board of Directors.

PART I.

Financial Situation.

THE general assembly, in its meeting of the 8th August last year, approved of the accounts for the financial year 1862.

Those for 1863, presented to the same meeting, were referred for examination to an audit committee, charged to make a report on them at the meeting of 1865.

You have just heard the report of that committee. Its examination has been directed to the receipts and expenditure of the financial year 1863, as well as to the accounts of the former general board of works, the liquidation of which, successively adjourned for reasons explained in previous reports, has been effected this year. In conformity with the conclusions of your audit committee, we beg to move a resolution approving of those accounts.

Our report of last year informed the assembly that in the winding up of the accounts of the former Hardon contract, there had arisen between the accounts drawn up by the director-general of the works of the company and those presented by the former contractor, a disacord which had given rise to a contestation before the Tribunal of Commerce of the Seine.

We are happy to be able to announce to you that a friendly compromise has put an end to that misunderstanding.

It is our duty to give to you an account of the motives which determined the board of directors to effect that compromise. A simple statement of facts will justify it, and will convince you that our decision has been at the same time in comformity with equity and with the good management of the interests of the company.

You no doubt remember, gentlemen, that the cancelling of the contract concluded with Mr Hardon was declared in January, 1863, by the company, in virtue of the right it has reserved on that subject, under certain conditions anticipated and stipulated beforehand, par Art. 24 of that treaty.

The article referred to was as follows:—

"The company expressly reserves the right of putting an end, now and at any time, to the effects of the present treaty by a simple declaration of revocation notified to Mr Hardon, but on condition of paying to him in that case an indemnity of twelve hundred thousand francs, besides the savings acquired by him on the works executed, according to an account established."

The payment to Mr Hardon of a sum of twelve hundred thousand francs as an indemnity, besides the savings effected by him, was therefore the condition itself of these annulments declared by the company. On that point there could be no dispute.

Nor was any contestation made by the direction as to the amount of the outlay made under the former contract during the period of its working,—that is to say, between February, 1859, and January, 1863.

The expenditure amounted to a total sum of 34,652,488f 40c.

That amount has been verified by detailed writings admitted by the company, they having been countersigned by its engineers by degrees as they were produced, and finally approved of by the audit committee.

The difference which has arisen between the accounts drawn up by the general board of works for the final settlement of the liquidation and those presented by Mr Hardon, referred exclusively to the mode of application of the expenditure and the consequent notation of accounts, to the credit and debit of the undertaking.

The treaty in fact anticipated, besides the purchase of materials, and some other special accounts, two large categories of expenditure, namely:—

The outlay made on joint account.

The expenditure made on account of the company.

The outlay on joint account was to be applied to all the works anticipated and mentioned in the estimates inserted in the report of the international committee. Mr Hardon had engaged to execute those works at a price inferior to that of the estimates. In that case he was to receive a share of 40 per cent. of the savings effected on that head, in the works executed by him.

The outlay on account of the company was to include the works not foreseen or not sufficiently specified in the report of the international committee, especially those relative to works of first installation; to the accessory works of construction; to modifications or increases of the original plans and project; to the supply of fresh water in the working establishments, and any other operations executed *ex officio* by the company, and not included in its plans and design.

The expenditure of this class was to be regulated on special estimates drawn up by the director-general of works. The constructor was to receive for his trouble and direction a fixed payment of 5 per cent. payable after the completion of each work ordered by the company,

In the accounts presented by Mr Hardon, of which the total amount was, as we have said, admitted by the administration, the expenditure on joint account amounted to 6,380,578f; that on account of the company, 15,594,336f.

According to the accounts drawn up in view of the liquidation of the contract, by the general board of works,

The expenditure on joint account amounted to 10,664,982f.

That on account of the company should not have exceeded 9,900,000f.

Mr Hardon, taking as his authority the accounts produced by him, claimed for the allowance of 5 per cent. to which he was entitled on the expenditure on account of the company, a sum of 779,706f.

He also claimed:

In conformity with the stipulations of the treaty, the share of 40 per cent. to which he had a right on the savings effected in the expenditure on joint account, the amount of which, according to his statement, balanced with a profit, by a comparison with the prices taken as a basis in the estimates of the international committee.

According to the classification of expenditure adopted by the company's general board of works, on the contrary, the allowance of 5 per cent. on the works on account of the company, due to Mr Hardon, was only 495,000f, and nothing was owing to him on the works executed on joint account, on which no reductions had been effected.

Such was the point principally in dispute.

After an attentive and impartial examination of the questions in contestation, your board of directors has decided that in consideration of the unforeseen and quite exceptional difficulties the contractor had met with in the preparatory labours for the first establishment of the working stations in the desert, there was reason to admit to the account of works on behalf of the comdany a sum of 12,000,000f, and to balance, without loss, as well as without profit, the sum of the expenditure on joint account.

According to the terms of the treaty the allowance due under those conditions to Mr Hardon, was fixed at a sum of six hundred thousand francs for payment in full.

That sum was offered as an indemnity and as a friendly solution to Mr Hardon, who accepted it.

Such was the compromise which has been effected, and of which the preamble is worded as follows:—"The company, in consideration of the services rendered by Mr Hardon, and the two parties, with a desire of conciliation, as also to avoid unforeseen eventualities, and the considerable expenses of an action at law, have agreed to put an end to the suit above-mentioned."

This explanation is a summary of the motives which have determined the council to decide in favour of a friendly solution.

The accounts for the financial year 1864 which we have to lay before you this year, at the same time asking you to refer them to your audit committee, are detailed in a statement which will be printed at the end of this report and placed at the disposal of the shareholders.

Those accounts include:—

	f	c
For the expenditure, a total sum of	31,221,003	63
For receipts, not including the money derived from calls on shareholders, a sum of.....	2,468,857	26

Those amounts are composed as follows:—

EXPENDITURE.	f	c
Financial expenses	35,211	17
Increase of moveable property in France and Egypt ...	10,819	95
Interest paid to shareholders	6,359,693	75
Purchase of houses and ground in Clary square, with incidental expenses and cost of installation	734,793	65
Plantations and cultivation of ground in the desert, adjoining the estate of the Ouady.....	12,526	70
Administrative expenses for 1864, in France and Egypt	1,600,960	33

Receipts.	f	c
Produce of investments previous to 1864	15	0
Produce of disposable funds invested, concerning the financial year 1864	2,236,490	73
Bank receipts, collection of money due, exchange, &c...	113,952	27
Net produce of the Ouady estate	118,399	26
Total	2,468,857	26

Those receipts effected in a complete manner, independently of the calls on shares and the operations of the accounts to order of the general board of works, contribute, as we have already remarked in our preceding meetings, to increase the capital of the company.

Their amount this year represents almost two-fifths of the sum paid as interest on the shares.

It is a detailed statement of those accounts that we ask of you, as in preceding years, to refer to a special audit committee for verification. You have in order to constitute that committee to fill up the vacancies which the lamentable deaths of MM. Roy Bry and Bellot leave in the committee appointed last year. MM. de Caladon, military intendant, at Tourneux, formerly chief of the division for railways at the Ministry of Public Works, both members of that assembly, have kindly assisted the honourable M. Lemayre in laying before you the report prepared by M. Bellot.

We propose to you to nominate them to form part of the committee charged with presenting the report to the assembly next year.

A general balance sheet of the situation of the company up up to the 30th June last will terminate this exposition of your financial situation.

That balance sheet will be printed after the report, and will be delivered with it to the shareholders on application.

By grouping under general heads the detailed accounts of that balance sheet, which themselves are only successive additions of the accounts submitted each year to your approbation, the following results will be obtained:—

	f	c
The total receipts contributing to increase the capital of the company, amounted on the 30th June last to the sum of	16,484,120	2
The total expenditure amounted at the same date to	119,285,874	44

That amount of expenditure is made up as follows:—

	f	c
1. Expenses incurred in the formation of the company..	2,893,601	27
2. Territory of the company and the purchase of landed property in France and in Egypt	3,000,326	92
3. Purchase and maintenance of moveable property belonging to the company	128,746	11
4. Interest paid on the shares	27,751,230	0
5. Expenses of administration in France and in Egypt...	7,954,489	84
6. Materials and stores	28,643,583	26
7. Buildings and sheds...	2,335,243	6
8. General outlay in the construction of the canals and ports	42,956,318	14
9. Current accounts	3,223,575	84
Total	119,285,874	44

If from the general balance up to the 30th June last is deducted the sums which refer especially to the realised assets of the company, it will be readily seen that these assets present, as we have recently announced to the public, a total of at least 170,000,000 francs.

In fact, these assets consist of the following sums:—

	f	c
1. Cash in hand, bills and deposits with bankers, in France	16,609,903	64
2. The same at Alexandria	24,715,954	40
3. Amount of the 7th and 8th instalments of a tenth each, on the shares of the Viceroy, now settled	17,660,200	0
4. Balance unpaid on previous calls	4,543,900	0
5. Balance of the indemnity stipulated by the imperial decision	77,500,000	0
Total	141,029,958	4
To which must be added the 9th and 10th instalments not yet called for	40,000,000	0
Total	181,029,958	4
From which must be deducted the balance of interest to be paid on shares, the amount of sums due to different persons, drafts, current accounts, &c., amounting, according to the balance, to	7,725,282	1
Net	173,304,676	3

To be quite exact in the estimate of the assets by a comparison with the anticipated expenditure resulting from engagements made with contractors, under bond, to the above amount, must be added the sum of advances already made for purchases of materials, and which will be successively deducted from the price of execution per cubic metre.

The amount of those advances to the 30th June last reached a sum of 7,662,984f.

The assets, increased by the addition of that sum, would be in reality 180,967,660f.

This satisfactory situation permits us to abstain at present from discounting on disadvantageous conditions the bonds of the Egyptian Government, the payment of which are spread over a certain number of years. Your board of directors will not fail, at a later period, if advisable, to take advantage of favourable circumstances to assure the realisation of that capital.

It is, therefore, strictly just to maintain as assets, integrally, the amount of the indemnity stipulated by the imperial decision.

If at a subsequent period there is a necessity to have recourse to the discount of a portion of those titles, the loss would be largely and more than covered by anticipated resources in assets on certain other accounts of payments realisable, which we have only to mention incidentally.

Those are the investment of disposable funds, until the completion of the works, and the income to be derived from the provisional working of the canal we are in course of organising, for the transit from one sea to the other.

Lastly, the ever-increasing value of the lands composing the company's territory, for the purchase of which serious offers are already made to us.

The data resulting from the totality of the foregoing statement are easily to be appreciated; they will enable you to judge, with a perfect knowledge of the facts, the financial situation of our undertaking.

PART II.

Situation of the Works.

It was, you are aware, gentlemen, at the moment in which we were about to derive from the first phase of our installation all the profits of time and money that we had a right to expect, that the suppression of the contingents occurred to upset all our organisation, and place us under the necessity of studying and solving the difficult problem of a complete change in the system of our works.

The policy which had prompted that measure thought to deal us a blow which we should be unable to ward off.

To replace in the midst of the desert the labour of men by that of machines, was a task which required time, money, and new and profound study; to that work we have applied ourselves, and we are now able to announce to you that the difficulty is entirely overcome.

You will find proof of this in the account, which is about to be communicated to you, of the situation of all the working stations on the isthmus, and of the power of the means of action possessed by the company and its contractors with respect to a proper and rapid execution of the works.

Contract of MM. Dussaud Brothers for the Construction of the Jetties at Port Said, in artificial blocks, made on the 20th October, 1863.

The installation of the works of MM. Dussaud Brothers has been completely terminated since the end of July last.

These consist of:—

1. The yard for the manufacture of mortar, containing ten crushing machines worked by a steam engine of 60 horse-power.

Each crushing machine is capable of producing 35 cubic metres per day, which gives for the ten machines 350 cubic metres, forming 35 blocks of 10 cubic metres each, or for a minimum labour of 20 days monthly, 8,400 blocks a year. The works are erected on an elevated timber platform, beneath which come the waggons to receive the mortar, in order to convey it afterwards to the place where it is manufactured into blocks. The materials are conveyed by two railways on inclined planes, one starting from the lime stores, and the other from the quays to which the sand is brought. The ascension of the trucks containing those substances is effected by a powerful crane worked by a steam engine of 60 horse-power.

2. The platform for the manufacture of the blocks, where these are methodically arranged in parallel lines.

This platform can contain 1,900 blocks. It is completely filled at the present moment. By degrees, as they are removed to be conveyed to the sea, they are replaced by fresh blocks, to remain there for about three months in order to require sufficient hardness. Those blocks, of ten cubic metres each, and weighing 20 tons, are composed of 45 parts of Thiel hydraulic lime and 55 of sand and sea water.

3. Apparatus for washing, removing, and shipping the blocks.

To raise and remove those enormous masses powerful steam machinery was necessary; this latter works in the most satisfactory manner.

4. Lastly, the large decked lighters for conveying the blocks to the points where they are to be submerged.

The contractors, besides, possess two steam-tugs and ten lighters for landing their material and stores in the roadstead.

The sand used in the manufacture of the blocks is derived from the excavations for the port canal, by virtue of a convention passed between MM. Dussaud Brothers and the contractors for the dredging works. This sand is conveyed to the landing-place on lighters, which receive it in large boxes as it issues from the hopper of the dredging-machines; the landing and discharging of those boxes is afterwards effected by means of a steam-crane.

A large shed, capable of receiving 5,000 cubic metres of lime; dwelling houses for the clerks and workmen; offices and store-

Digitized by Google

houses; a workshop for repairs; and other buildings of lesser importance, complete the series of factory dependencies.

The immersion of the first large ten cubic metre block took place on the 9th August last; by the end of the month 148 had been submerged; before next month the canal, in which two drags are at work, will be sufficiently large and deep for the immersion to be carried on simultaneously with the manufacture of the blocks.

Already last winter, the contractors had sunk at the extremity of the piering, towards the small island, 204 blocks of 4 metres 50 each, to form a dyke, which will be of course comprised in the mass of the permanent jetty.

By the above description and the figures we have given, it will be seen that the contractors for the jetties at Port Said possess means of action amply sufficient to enable them to terminate, within the required time, that is to say in 1868, the two jetties, absorbing together 25,000 blocks, or 250,000 cubic metres.

Movement of Shipping in Port Said and Convention for Landing Goods.

The maritime movement in the roadstead of Port Said, from the commencement of the works until the 1st July, 1865, may be summed up as follows:—

Flags.	Number of Ships.	Total Tonnage.
American	2	650
English	70	25,637
Austrian	144	48,892
Belgian	3	795
Brazilian	2	1,073
French	389	81,519
Greek	227	36,286
Dutch	5	1,925
Italian	34	9,132
Syrian	91	10,735
Prussian	6	1,302
Russian	30	7,371
Swedish and Norwegian	6	2,522
Turkish and Egyptian	1,687	127,298
Wallachian	1	311
Total	2,037	359,548

It is to be remarked that of the above total of 359,548 tons, the first half of the year 1865 counted alone for 100,000 tons, or a third of all that has arrived at Port Said during a period of more than five years. This fact proves sufficiently that our works have received the greatest impulsion during the course of the present year.

By a recent contract we have arranged for the landing of goods at Port Said, with MM. Savon Brothers and Co., of Marseilles, who for a long time past have been noted in that city for work of the same kind. The contract will commence on the 15th October, and will last until the completion of the maritime canal. Our old landing apparatus has been disposed of to the contractors, at prices mutually agreed upon, and the new at cost price.

Until the coming into operation of their contract, MM. Savon Brothers have undertaken the landing business at Port Said as agents of the company.

Contract of Messrs Borel, Lavalley, and Co., for the execution of the the first portion of dredging between Port Said and the section of El-Guisr.

The first portion of dredging includes, independently of the canal and basins of Port Said, the first part of the maritime canal, consisting of a distance of 60 kilometres and a half. It comprises the excavation of 21,700,000 cubic metres.

In virtue of contract made on the 13th January, 1864, this first portion of dredging had been conceded to Mr William Aiton, contractor for earthworks, who offered a tender at a lower rate than other competitors, and with respect to whom the most favourable reports had been received from Glasgow. The company had placed at his disposal all the apparatus it already possessed and a very considerable quantity more which it had ordered in view of the execution of his portion. We stated on the 6th August last year that Mr Aiton had not yet completed all his preparations, and that it was impossible for him to employ all the rapidity in the execution of the work which we expected from his experience and activity.

Mr Aiton commenced the works with the resources furnished him by the company. About the middle of October, after having solicited different modifications in his contract which were granted to him, Mr Aiton set up a claim to obtain a complete change in his engagements.

In this interval a commercial crisis had arisen in the principal commercial towns of England, which limited and at length put an end to the credits on which he had counted; he suffered, consequently, some monetary embarrassments, and found that he was not only unable to pay the manufacturers of his machinery, but also the freight of stores he had ordered for the execution of his engagements, and even his own workmen. His works underwent delays to which we could not submit. In those circumstances, Mr Aiton demanded, under the alternative of an immediate suspension of the works, a mode of measuring of the excavations contrary to his agreement and that of the other contractors. The company could not admit such pretensions. Mr Aiton suspended his works, placing us in a position which might have given rise to serious complications.

After having shown that Mr Aiton was subject to one of the clauses of the contract involving the cancelling of the contract for default of execution of the cubic quantity within three months which he had engaged to perform, and armed with the not less important fact of the arbitrary interruption of the works, we legally signified to him the annulment of his contract.

However, Mr Aiton was in possession of our machinery; the company could not take his place until after having recovered possession of it; in that situation the company was obliged to effect a compromise with him in order to avoid the delay of a law-suit, although the issue of a trial could not be doubtful. A demand for indemnity put forward by Mr Aiton was considered exorbitant by your President, who made a final offer of 200,000f. This proposal was at length accepted, and the company recovered possession of its machinery and workshops.

In consequence of the rupture with Mr Aiton, a new contract was made on the 12th December, 1864, with Messrs Borel, Lavalley, and Co. for the execution of the work comprised in the first portion of dredging, with the cession of the machinery previously handed over to Mr Aiton, and the addition of six steam transports at the price of 150,000f each.

MM. Borel, Lavalley, and Co. could not resume immediately the works left by Mr Aiton: these were provisionally continued on our account by the engineers of the company until the month of April of the present year.

The machinery handed over by the company to the contractors consisted of—

Twenty small and twenty large dredging machines,
Twenty steam cranes,
One hundred and twenty iron lighters of 50 tons each,
Six hundred mud boxes,
And ten steam transports to convey the sand excavated to the sea.

The new contractors declared that it was necessary to effect divers repairs and modifications in that machinery and stock to adapt it to their mode of working. While those operations for their adaptation were being executed, they had to employ great efforts in fitting up their requisite establishments along the whole line of the works.

In accepting the new contract for the section of Port Said, Messrs Borel, Lavalley, and Co. were consequently obliged to increase the orders they had at first made solely in view of their contract at Suez.

The totality of their orders for the two portions included, among other machinery and stock,

Thirty new large dredging machines,
Thirty lifting machines,
Fifteen large steam transports for conveying the earth excavated to the sea,
Forty-two steam transports for removing the dredgings in the lakes,
Ninety lighters for carrying the mud-boxes,
Fifteen steamers for conveying coal and stores along the whole line of the works,
Twenty steam trucks,
Four steam wherries.

A large portion of that machinery and rolling stock is already erected, or being terminated at Port Said.

The first small dredging machines brought into use were employed in the basin of Port Said in widening and deepening the channels which cross that basin in different directions, with the view of making use, as early as possible, of the large dredging machines attended by the transports.

One of those small dredging machines is making the canal which gives access to the port by advancing from the interior seaward; it brings up an excellent sort of sand made use of in the artificial blocks of MM. Dussaud. The produce of the other dredging machines is employed in extending the embankments of Port Said, in conformity with one of the articles of agreement, which binds the contractors to execute that work, without any charge, to the extent of 200,000 cubic metres.

One of the large dredging machines has been already placed between the piering and the small island, to deepen the channel, by advancing from seaward in the direction of the interior of the port; it is accompanied by two steam transports. A second dredging machine is about to be applied to the same work so as to obtain very shortly a channel sufficiently large and deep to enable ships of an average tonnage to penetrate into the interior of the port without impeding the circulation of the lighters employed in the immersion of the blocks, or the transports which shall be engaged in carrying to sea the material derived from the dredgings of the basin of Port Said, and of a portion of the maritime canal.

Everything is now perfectly disposed to enable the contractors to push forward their effective works with the activity and rapidity desirable.

Contract of M. Couvreux for the excavation of the canal through the section of El Guisr.

By a first treaty passed with M. Couvreux on the 1st October, 1863, that contractor was charged with the entire opening of th

Digitized by Google

maritime canal through the section of El Guisr—a total length of fifteen kilometres: the undertaking included the excavation of nine million cubic metres, by cutting or dredging.

By mutual accord we have made with M. Couvreux a new agreement to limit his undertaking to the cutting through of the elevated portions of the section, comprising a distance of about nine kilometres, and to withdraw from the original contract the greater portion of the excavations to be made under water, so as to enable him to devote his efforts to the cutting of the dry portion. It was originally stipulated that the works should be first directed to widening and deepening the present navigable channel in order to complete as early as possible between Port Said and Ismailia, a canal which should permit us, notwithstanding the presence of the dredges and other machinery, to increase our transit navigation.

The undertaking of M. Couvreux includes a total of four million cubic metres of dry excavations, and 200,000 metres under water.

Several of the excavating machines of his invention which had succeeded so well for the dry cuttings have been applied successfully on the wet portion.

The working stations of M. Couvreux are well organised. They include a service of thirty kilometres of railway, ten locomotives, ten steam excavators, four hundred trucks, besides some considerable workshops for repairs. Four new locomotives have also been ordered.

There is every reason to believe that the contractor will be in a measure to fulfil his engagements within the period assigned for the execution of MM. Borel and Lavalley's two portions.

Opening of the Canal at the passage of El Ferdane, and the dredging to Lake Timsah.

The portion of works deducted from M. Couvreux's contract has been almost wholly conceded to MM. Borel, Lavalley, and Co., as a continuation of their first lot of dredging. The company has reserved to itself the right, as a matter of urgency, to execute on its own account the works, consisting of excavations to be made for enlarging and deepening the ship canal through the downs of Ferdane, a distance of 6,700 metres.

Those works include, 3,000 cubic metres of dry cutting, of which 130,000 to be executed with barrows, and 170,000 with locomotives, and 200,000 of excavations under water.

The stations for the barrow work have been promptly organised and progress in a satisfactory manner with 600 labourers. The works to be executed with locomotives and trucks are being commenced, and lastly for the under water portion, six excavators have been ordered in France on condition that four of them shall be delivered in Egypt before the end of November.

Those works on account of the company are being directed with zeal and intelligence by M. Gioia, chief engineer of the division of El Guisr.

They will be terminated at the commencement of 1866, so as to join with those being executed above and below Ferdane.

The dredging to be executed by MM. Borel and Lavalley, in cutting through the section, and destined to carry the maritime canal to its definitive depth of eight metres, will be commenced as soon as the level of the waters of Lake Timsah shall have reached that of the Mediterranean; a result which is expected to be realised during the month of April next. The mode of execution will consist in receiving the produce of the dredging machines in lighters which will discharge their contents in certain parts of the lake. The contractors will have all their apparatus ready by the time mentioned.

Contract of Messrs Borel, Lavalley and Co., for the execution of earthworks and dredging between the section of El Guisr and the Red Sea.

The treaty relative to this contract was passed on 26th March, 1864, and includes a total excavation of 24,500,000 metres.

Messrs Borel and Lavalley applied themselves actively to the task of ascertaining definitively the means to be employed in the execution of that portion of the works. We have already described their orders for machinery in the great manufactories of MM. Ernest Gouin and Co., the Societe des Forges et Chantiers de la Mediterranea and the Societe des Chantiers et Ateliers de l'Ocean, as well as the erecting all that machinery at Port Said.

Experienced agents were sent to the spot to consider and decide on the different modes of execution; at the same time the contractors directed their attention to the establishment of their workshops; they erected a series of important buildings at Serapeum, the principal centre for the direction and supply of the works to be executed between Lake Timsah and the bitter lakes, and at Chafoul and Terraba, the centre of that section of the works including all the portions comprised between the bitter lakes and the lagoons of Suez.

The mode of execution agreed on by the contractors for the greater part of the works of the second portion consists in taking advantage of the height of the fresh water canal, placed at several metres above the level of the ship canal, to execute by means of dredging the greater portion of the excavations. With this object, in the line of the ship canal will be dug a channel to be placed in communication with the fresh water canal by means of a connecting creek already made with that intention, and by which the dredging machines will be introduced, with all the accessory machinery and supplies. On the other hand, some deep marshy places along the side of the maritime canal will be utilised by being filled from the fresh water canal, and into them will be shot, by means of boats provided with traps, the produce of the dredgings.

In order to hasten the moment when those plans shall be realised, the contractors already last year had organised stations for the works performed with wheelbarrows; they anticipate being able to commence on the Serapeum section with steam engines in the course of January next. Three months later Lake Timsah will be full, and will be in a condition to receive dredging machines intended to complete the deepening of the cuttings already opened to their entire width by the former contingents for a distance of 6,000 metres, from the southern extremity of Lake Timsah to beyond Toussoum.

On the portion between the bitter likes and Suez the contractors have not yet commenced the excavations, but they are adopting measures to continue vigorously the cutting through of the Chaslouf section, which has been already commenced by contingents of fellahs. Before thinking of using the dredging machines, a chalky bank of 25,000 cubic metres must be first removed. This bank which descends as far as the bed of the future canal may be probably dug out. The stones which will be derived from it will ultimately serve for facings to the banks of the canal.

The original line traced out for the canal in the lagoons opposite Suez gave evidence by soundings, of the existence of masses of rock which we had an interest in avoiding. By a new series of soundings in the same regions our engineers were induced to think that by removing the course of the canal towards the east they would succeed in avoiding these shoals. The result has happily justified those previsions. M. Larousse, the chief engineer of the Suez division, has now, on the spot, decided on a new line, on which the very minute soundings made have nott discovered the least existence of rock. This tracing passes a-1,100 metres to the east of the spot known as the Suez quaran tine. Although it involves, as compared with the first tracing, an increase of about 3,000 cubic metres of excavation, it offers such great facilities and decrease of expense, that there can be no hesitation in giving to it the preference.

Fresh Water Canal.

You, no doubt, remember that the Egyptian Government is charged with the construction of the first portion of the fresh water canal from Cairo to the Ouady, including the derivation of the water from the Nile. According to the terms of the treaty made on the 18th March, 1863, with the Viceroy, Ismail Pacha, that work was to have been terminated by the 1st March of the present year.

The total measurement of the excavations for that part of the canal, the length of which is about 70 kilometres, is about seven million cubic metres. The works were only commenced during the latter months of last year, over a portion 22 kilometres in extent. They were interrupted for six weeks at the period of the fast of Ramadan and the feast of the Bairam; in the month of March they were resumed, and then shortly after completely suspended during and after the cholera. The works so far executed have produced a total of excavations exceeding two millions of cubic metres.

At the moment of the summer level of the Nile, the Egyptian Government commenced the works for the water source at Cairo; the construction of that difficult and important work of art is in competent hands, as it is confided to M. Sciama, formerly chief engineer for the execution of our works, and of whose eminent services we had not longer any need from the moment that the execution was made over to contractors. M. Sciama entered the service of the Egyptian Government with the authorisation of the Minister of Public Works in France, as director-general of bridges and canals in Egypt; this choice has been for us a proof of the dispositions of the Viceroy for the accomplishment of his contract with the company, and for the good relations of his government with the direction of our works.

The locks of Ismailia and Suez on the fresh water canal are terminated, and the opening of the line of navigation in transit without unshipment, between the Mediterranean and the Red Sea, was inaugurated at Ismailia on the 5th August.

A fleet of twelve lighters laden with coal and towing a raft of timber left Port Said, passed through the Suez locks, and entered the Red Sea. A recent despatch states that a portion of that fleet, reserved for a return of goods from the Red Sea, is on its way to Port Said, from whence will be forwarded to Marseilles gum, elephants' teeth, coffee, and skins, purchased on the coast of Arabia by the firm of Bazin and Co.

Three intermediate locks are in course of construction on the Suez branch. They are intended to diminish the loss of water during the fall of the Nile. They were contracted for by MM. Borel and Lavalley, in virtue of a special treaty, and are to be terminated within three months. In the meantime the waters are provisionally turned aside from those points by a circuit of the navigable canal.

We will add that the cost of those locks, as well as that of the

Digitized by Google

other works of the fresh water canal, and the cost of the execution of the canal itself, are included in the total estimated sum of ten million francs which has served as a basis in fixing the indemnity to be paid by the Egyptian Government for the retrocession of the fresh water canal.

Sanitary Service.

We have printed separately, to be distributed to you, the report of the head physician, Dr Aubert-Roche, on the sanitary and medical state of the labourers and the establishments of the isthmus during the financial year 1864–1865.

That document, and the supplementary report on the subject of the invasion of the cholera, have given fresh evidence of the salubrity of the territory in the isthmus.

Undertakings accessory to the works.

The supply of provisions at all the working stations of the isthmus is now exclusively carried on by private enterprise. Free trade and competition have sufficed to satisfy all requirements and to maintain articles of consumption at reasonable prices, an allowance being made for the high cost of living in Egypt.

MM. Borel and Levalley have established, without any subvention, the regular service of a steamer between Alexandria and Port Said. That vessel makes every month four passages each way. MM. Bazin and Co., of Marseilles, are organising a service of steamers between that city and Port Said. The first voyage is being made at the present moment.

The company has now at its charge only the transport service on the canals. At Port Said, Suez, and Zagazig, there are daily arrivals and departures of swift mail and passenger boats, and fast and slow lighters for conveying provisions, materials, and supplies. They touch daily at all intermediate points.

Serious offers have been made to us by MM. Bazin, of Marseilles, to undertake the transports from Port Said to Suez, and from Zagazig to Port Said. This matter has been examined with great attention by your board of directors, who will decide it to the best of your interests.

The attention of the chambers of commerce of Europe and America has been called to the advantages that the first passage from one sea to the other will offer to the trade of all countries. The chambers have sent to the isthmus delegates to the number of 100. We have promised to them the regular working of that first passage about the beginning of 1866.

A large number of them have already given accounts of the impression they received, in reports published on the subject of their important inspection.

We must here mark the expression of our satisfaction and gratitude for the kindly solicitude and devotion with which the honourable delegates have accomplished their mission, and we hope that the meeting will share those feelings.

We have now to mention to you some facts which are not without their importance, as they concern the immediate putting into operation of a transit between the two seas.

We are in treaty with the Messageries Imperiales Company for the transport from Port Said to Suez, of the large boilers destined for their steamers on the India and China line.

The trade in coal required for the steamers of all nations navigating on the Red Sea and coming to Suez to obtain their supplies, will no doubt be forced to have recourse to our transit navigation. We have already received proposals from England to send through annually a minimum of 300,000 tons of coal.

We have the intention to offer to the French, Spanish, English, Dutch, and Portuguese Governments, to transmit by the isthmus the greater part of the stores they now send to their establishments in India, China, Cochin China, and the Indian Archipelago, by the Egyptian Railway, and which we shall be able to convey on more favourable conditions. We neglect nothing in order that commerce in general may profit by the road we open to it, while awaiting the completion, at a not distant date, of the great maritime passage.

Agricultural Service.—Domain of Ouady.

You have no doubt remarked in the portion of the report concerning the financial situation, that the domain of Ouady for the agricultural year 1863-1864, shows a net income of 118,000f 16c.

On the 1st of the present month terminated the first period of three years for the leases made in 1862.

The agreements renewed with the native farmers for another period of three years, effected in March last, has raised the future rent to 522,580f.

A month after the signing of those leases, the necessity in which we found we were placed to deprive our farmers of water in order to maintain the feeding the fresh water canal as far as Ismailia and Suez, induced us first to make a reduction of one-half of the stipulated rent, and subsequently to declare that the lands which, for want of irrigation, could not be sown, shall be exempted from the lease.

It was only an act of justice to reassure the farmers by anticipating their complaints, and to suspend all further leases.

The interests of the agricultural service will necessarily suffer from that situation so long as the Egyptian Government shall not have completed the first portion of the fresh water canal. Fortunately, the years of prosperity which had enriched the farmers of our domain has given them sufficient confidence in the future to support them under a time of trial.

It is of interest to state that the population of the Ouady has not decreased. A large part of the lands will be cultivated, if not with cotton, at least with maize and corn in winter, and the net produce of the next financial period, while not retaining the high sum to which the new leases had raised it, will nevertheless not be inferior to that of preceding years.

Such is the totality of our operations. Your board is convinced that the present progress of your works assures you within three years a success which will reward your confidence and perseverance.

PART III.

General Situation.

After having read to you in our last general meeting the arbitral decision, without appeal, pronounced by His Majesty Napoleon III., we said:—

"You have understood, gentlemen, the importance of that sovereign judgment which consecrates with such impartiality and an equity so exalted, the rights of the company, and shields it henceforth from all the difficulties that hitherto had delayed the progress of our undertaking."

It is in virtue of those considerations that you accepted unanimously and gratefully a definitive solution, notwithstanding the sacrifices it imposed on you.

Subsequently to our meeting, His Majesty's Government published the account of the situation of the Empire, addressed to the Legislative Body and the Senate. That official document contained the following passage:—

"The Government of the Sultan having stated on what conditions it was disposed to sanction the primitive concession made by Said Pacha, negotiations have been opened between the Government of the Viceroy and the Universal Isthmus of Suez Company, with the view of placing the concession in harmony with the demands of the Porte. As an accord could not be arrived at on certain points, the two parties agreed to express to the Emperor the desire that those difficulties should be referred to his arbitrage. His Majesty, desiring to accede to the appeal of the Viceroy, and at the same time willing to give a fresh proof of his interest in the great work it is pursuing, deigned to grant the request; the two parties then signed an act by which they agreed to submit to the decision of the Emperor, and His Majesty delivered an arbitral sentence which was notified to them. The Egyptian Government and the Company have already executed those clauses of that decision which were of immediate application. The judgment of the Emperor was communicated to the Ottoman Government. The Sublime Porte made no difficulty in acknowledging that by that act the different conditions to the accomplishment of which Turkey had subordated her sanction were fulfilled."

That important declaration closed for our exclusively commercial and industrial company the political question of the promised firman for authorising the works.

In order to completely convince you of this, it will suffice to read to you a telegram which His Majesty kindly addressed from the camp of Chalons, on the 15th August, to your President, who had just announced to him from Suez the celebration of his fete on the isthmus by the first cargo of coal being sent in direct transit from the Mediterranean to the Red Sea.

"I congratulate you on the success obtained, and thank you for giving me that good news on the occasion of my fete.

(Signed) "NAPOLEON."

We trust, therefore, in future to no longer have to refer, in the account of our general situation, to political questions, which, although reluctantly, we were obliged to touch on in our previous meetings.

To the Emperor's Government it belongs, in relation to other Governments, to obtain the execution of the sovereign arbitral decision which is without appeal. To the administration of the company it belongs to carefully direct your affairs, and to cause the works to advance in such a manner as to satisfy yourselves, as well as public opinion, which is justly impatient to obtain as promptly as possible, the great results to which we devote all our time and all our efforts.

You have always considered that your board has fulfilled its duties towards you; it will be happy if after having presented to you the balance sheet of our financial situation and the progress of our works, you accord to it a fresh proof of your approbation and your confidence. (Unanimous applause).

After some explanations given by the president in reply to questions from different shareholders, the order of the day called for a vote on the following resolutions:—

First Resolution.

The meeting, after having heard the reading of the report by M. de Lesseps, President-founder of the company, in the name of the board of directors,—

Approves that report and its proceedings.

Ratifies the measures adopted by the President-founder of the board.

The resolution was adopted unanimously.

TO ADVERTISERS.—To secure insertion, advertisements for the ECONOMIST must be forwarded to the office by 5 o'clock p.m. on Fridays.

A SUPPLEMENT, *containing the Reports of the Joint Stock Banks of the United Kingdom, similar to that published on the 27th of May, 1865, will be published by the* ECONOMIST *on the 11th November.*

The INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

THE STATE OF THE MONEY MARKET.

THE money market has during the week been subject to several curious changes of feeling. On Monday it was generally imagined that money would at once become cheaper; on Thursday, before the publication of the Bank return, there was a prevailing impression that it would soon become dearer. Since the Bank return has been published, the common anticipation has again become more favourable. In truth, there is little or no change in the circumstances upon which we last week ventured an opinion. The principal changes in the Bank account are the reduction in the private securities caused by the repayment of advances usual at this season, and the increase of reserve owing to the influx of circulation, also usual at this season. A considerable amount of gold has, however, during the week been carried to the Bank.

As to the future, it is certain that the export of bullion to the East will be of importance, though it is checked and postponed by the high rates of money which now prevail. The foreign exchanges show signs of weakness, and a little change might induce the Bank to raise the rate again. But we hope that the present rate will be sufficient. There is, we believe, a considerable amount of foreign money in London to be invested in long-dated bills, and probably other similar amounts may be expected. So long as the present high rate of money continues, as little money as possible will be sent to the East. We think, therefore, there is every reason to believe that the present value of money will be high enough, but we cannot anticipate that for a short time at least it will be lower.

THE NEW MINISTRY.

THE Queen acted wisely in desiring that Lord Palmerston might be buried in Westminster Abbey. As we trace these lines his remains are being borne thither. It is easy to scoff at these great national ceremonies, for such they are. But such jests are weak and harmless. It will be centuries before Englishmen are indifferent to Westminster Hall or Westminster Abbey—"the place," Lord Macaulay said, "where the "great men of twenty generations have contended, the place "where they sleep together."

The best epitaph on Lord Palmerston is the effect of his death. It is the end of a political period. It has been said that the new Government will be Lord Palmerston's Government *minus* Lord Palmerston; it would be as wise to propose a solar system *minus* the sun. Lord Palmerston was the centre of attraction of his system. He had an influence, not over any single party or set of men, for he was disliked or but half-liked by the real zealots of every party, but over the common, sensible, uncommitted mass of the nation who now-a-days do not strictly or rigidly adhere to any party. Through all the divisions of our present England there is a common element which consists of fair, calm, sensible persons, who have something to lose, who have no intention of losing it, who hate change, who love improvement, who *will* be ruled in a manner they understand. The business of the nation in all departments is transacted by such men as these. These are the men who really rule in all localities, in all undertakings, in all combinations; and it was over these that Lord Palmerston possessed unequalled and marvellous influence.

That influence has died with him, and the problem for his successors—for those who aspire to be his successors—is how they can recreate that influence. No Government which is mainly or predominantly a *party* Government is suitable to the present times. Every one who lives among careful, quiet, practical men, and this—in common times, in such times as these—is the governing class of England, must know that violent party men are in that class a very small minority. He will be able to count the *zealots* on his fingers, but the *non*-zealots he will not be able to count at all. The sectaries are few; the moderate men are the nation. Whoever is to rule England now must rule by calm sense, and not by party passion.

Will Mr Gladstone be able so to rule her? That is the question which comes foremost and which must be answered before any other. Till he has been tried, no one else can be tried. What, then, are his chances? It is certain that no one can be in character, in tone of mind, in habit of thought, more the antithesis of Lord Palmerston; but it may be doubted if this is a disadvantage. The original Palmerston was very good, but a second-hand Palmerston would be very bad. It is a case in which "imitation is suicide." Whoever rules England must rule her by applying his own mind, his own character, his own powers, simply and boldly to the task. One great statesman does not imitate another; any more than one great writer imitates another. It

is, in some respects, an advantage to Mr Gladstone that, by his complete opposition of nature, he escapes the slightest motive to copy—the slightest power of copying—the slightest possibility of being said to copy—his successful predecessor. A Government of Mr Gladstone's will not be the old thing over again: even his enemies do not say it will; it will be something new and original now, just as ten years ago Lord Palmerston's Government was new and original.
